TO END A WILL—After disposing of the property, the will may be ended as follows—And I hereby appoint the said sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this — day of —, 19—

EXECUTION OF A WILL—The testator should sign his name at the foot or end of the will in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall

be paid but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient—

Signed by the testator (or testatrix, as the case may be), in the presence of us, both present at the same time who in his (or her) presence and in the presence of each other have hereunto set our names as witnesses.

William Jones, of Vine Cottage, Silver Street Reading Tailor Henry Morgan, of North Street Reading Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign even by a mark, another person may sign the testator's name to the will for him in his presence and by his direction and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded—Signed by Thomas Brown by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator who appeared fully to understand the same. If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present then the attestation should be—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence, &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL—When any change is required to be made in the disposition of property as stated in the will the change should be embodied in a codicil. A codicil should begin—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage Silver Street, Reading, in the county of Berks, the said will bearing date, &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS—It is usual to appoint two executors although one is sufficient. The name and address of each executor should be given in full, as follows—"I appoint John Jones, of number twenty one, London Street Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary but it is desirable, here as else where, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. See PUBLIC TRUSTEE, post.

TRUSTS OF THE WILL—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees — "I give and devise all my estate and effects, real and personal of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death such last mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking. Where the widow is to have a life interest use the following words "upon trust for my wife during her life [or during her widowhood] and after her death [or second marriage which first happens] upon trust in equal shares for all or any my children or child &c as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY—A minor cannot make a will. A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (1)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

REVOCAION—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will, for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will so that after marriage the old will must be re acknowledged, or a new one made.

LAPSED LEGACIES—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY—When it is the intention to leave all the property to one person as for instance a wife or child, the will may read—"I devise and bequeath all my estate and effects, real and personal which I may die possessed or entitled to, unto my wife Mary Smith, absolutely.

TO CHILDREN UNDER AGE—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance.

A wife may be appointed a trustee or may be sole trustee. It is also usual to appoint the executors or some near relative guardians of children under age. By the Guardianship of Infants Act, 1886, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

DUTIES OF EXECUTORS—After the death of the testator the duties of the executor may be stated briefly as follows.—The first duty of the executor, or of one of them is to see that the funeral takes place in a suitable and becoming way then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left or get it valued. Under the Finance Act 1894, duties are charged on all property in which the testator had a life interest even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode or to a solicitor, and prove the will to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors who hold the same as trustees for the persons beneficially entitled under the will or other wise, and such persons can only acquire a title to the estate through the executors after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act; one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL

To find a will proved before Jan. 1, 1898, the date on which the Court of Probate Act, 1897 (so & s. 11 of the Act of 1897), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district.

in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case the original will proved in the District Registry is there kept, and may be seen or a copy obtained but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations is prepared and printed annually in lexicographical form and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy he can order one to be made for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy which with a shilling stamp impressed thereon can be produced and read in any court of law. The District Probate Registries were enumerated on p. 431 of the 1921 WHITAKER

SAFE CUSTODY OF WILLS

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s for the deposit, of 2s 6d for entering a minute thereof, and 2s for filing the affidavit which is required. A will once deposited will not be given up to anybody but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity and destroys his will in the presence of the Registrar. (See also PUBLIC TRUSTEE, *post*.)

PROBATE OF WILLS

OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR

The entrance to the office for personal applications is in the south east corner of the Quadrangle of Somerset House Strand Room 44. The applicant should bring the registrar's certificate of the death of the deceased or an official certificate of burial and the will if there be one and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present in force will be found in detail under "Estate Duty."

In no case can any correspondence be entered into nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the "District Probate Registries" (q.v.) application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, with out the deduction of debts or funeral expenses does not exceed £500 application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will and the whole personal estate does not exceed £500 and the widow resides at more than three miles from any Probate Registry application may be made to the Registrar of the County Court.

Scotland—"Confirmation is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either nominate or dative. An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the court (s) in the case of intestacy or (a) where the deceased had failed to name an executor in his will. In the former case the deceased's next of kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts together with an affidavit must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

SCOTS LAW OF WILLS

The only formalities required by the Law of Scotland as regards the execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6s 8d sterling). A will may be either (1) *holograph* i.e. written by the testator himself, in which case no witnesses are necessary (2) *testated*, which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

TRUST FUNDS AND INVESTMENTS

The Act of 1893 enacts that Trustees may invest in any Parliamentary Stocks or Government Securities of the United Kingdom on real or heritable Securities in Great Britain or Ireland in Bank of England Stock Bank of Ireland Stock India $3\frac{1}{2}$ per cent and 3 per cent Stocks any Stock hereafter issued by authority of Parliament charged on revenues of India any Securities having interest guaranteed by Parliament Metropolitan Board of Works or London County Council Stocks Debenture Stock created by Metropolitan Police District Receiver Debenture Rent charge, Guaranteed or Preference Stocks of any railway in Great Britain or Ireland that has paid not less than 3 per cent per annum on Ordinary Stock for each of the 10 years preceding date of investment any railway or Canal Stock in Great Britain or Ireland leased for 100 years or more at a fixed rental to any railway specified above Indian Railway Debenture Stocks of companies with interest paid or guaranteed by Indian Council 'B' Annuities, Eastern Bengal East Indian and Scinde, Punjab, and Delhi Railway, C and 'D' Annuities of the East Indian Railway and any like annuities of any other railway hereafter created any Indian railway with fixed or minimum dividend paid or guaranteed by Indian Council any Debenture, Guaranteed or Preference Stocks of any incorporated or chartered Water Company in Great Britain or Ireland that has paid not less than 5 per cent per annum on Ordinary Stock for each of the 10 years preceding date of investment any Corporation Stock of any borough having 50,000 inhabitants any County Council Stock authorised by Act of Parliament or Provisional Order any Water Stocks issued by incorporated Commissioners levying compulsory rates over areas containing 50,000 inhabitants such rates not having exceeded 80 per cent. of authorised amount for 10 years and in any Securities authorised by order of the High Courts of Justice of England or Ireland Provided Stocks redeemable within 15 years are not purchased at a premium over the redemption price or at more than 15 per cent premium over such redemption price if redeemable after 15 years.

The Rule of the Supreme Court 1883, authorises investment in—Debenture Preference, Guaranteed or Rent charge Stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on Ordinary Stock or Shares and in like Stocks if guaranteed by Railway Companies of the same description and in Nominal Debentures or Nominal Debenture Stock under the Local Loans Act 1875 or under the Isle of Man Loans Act 1880 provided such Stocks are not liable to redemption within fifteen years from the date of investment.

The Trusts Amendment Act 1884 (Scotland only), excludes Irish real or heritable Securities or Stocks, and British Railway contingent Preference and Waterworks Stocks admits all Railway Debenture Stocks and Guaranteed Stocks of railways that have paid Ordinary Dividends for the past ten years, and all Municipal Loans, and East India Stocks, and registered Colonial Stocks if approved by Court of Session.

The Colonial Stock Act, 1900, permits Trustees, both English and Scottish, to invest in certain Colonial Stocks registered in the United Kingdom which the Treasury publishes a list of in

the London and Edinburgh Gazettes but subject to the clause as to Redeemable Stocks in the Trustee Act, 1893.

THE PUBLIC TRUSTEE

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will or as Trustee under a Settlement whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained. The value of the trusts accepted up to March 31, 1922 was £186,229,083.

The facts of any trust new or old in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act his appointment is effected in the same simple way as in that of a private trustee or he can be appointed by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, 'I appoint the Public Trustee executor and trustee of this my Will' or the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with, or without the Will annexed.

The Public Trustee being a permanent trustee the expense of fresh appointments is saved. His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office and a wide knowledge in the work of investment.

The Public Trustee is not as such limited in his powers of investment to trustee securities, but like a private trustee he is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts. He makes a point of giving the personal attention of himself or of his senior officials to the personal details of any trust. The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to produce an annual amount sufficient to discharge the salaries and other expenses of the Department and no more. A profit is not intended. An important Committee of Investigation presided over by Sir George Murray GCB, was appointed by the Lord Chancellor in April, 1919 to inquire into the organisation of the Office and any alteration which might be required in the scale of fees.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time by letter or telephone.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingway, W.C. (tel. Holborn 2,400), or at any Post Office.

A branch office has been opened in Northern Assurance Buildings, Albert Square, Manchester.

I.—PERSONAL PROPERTY, INCLUDING LEASEHOLDS.*The person entitled to administer is shown in brackets***In each instance it is supposed there are no nearer relations than those named**

By the Intestates Estates Act 1890, the widow of a man dying intestate and without issue is entitled to the whole estate both real and personal if under £500 in value, if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

His representatives take in the proportions following —

Widow only	Half to widow	Half to the Crown [Widow]
Widow and child or children	One third to widow	Two thirds to children in equal shares. In case of deceased children who have left issue such issue take amongst them their deceased parent's share [Widow]
Widow and father	Half to widow	Half to father [Widow]
Widow and mother no father	Half to widow	Half to mother [Widow]
Widow, brothers or sisters	Half to widow	Half equally amongst brothers and sisters, whether of the whole or half blood, if a deceased brother or sister has left issue such issue take amongst them their deceased parent's share [Widow]
Widow, mother, nephews or nieces	Half to widow	One fourth to mother One fourth to nephews and nieces <i>per stirpes</i> [Widow]
Husband, with or without children	All to husband	[Husband]
Father, brothers, and sisters	All to father	[Father]
Mother, brothers and sisters	All equally	[Mother]
Mother, but no other kin	All to mother	[Mother]
Children, and grandchildren by deceased children	Amongst children in equal shares, the grand children taking amongst them their deceased parent's share [Any number of children not exceeding three]	
Brother or sister and nephews or nieces	Amongst brothers or sisters in equal shares the children of deceased brothers or sisters taking amongst them their deceased parent's share [Brother or sister]	
Brother or sister and grandfather	All to brother or sister	[Brother or sister]
Brother or sister, and uncles or aunts	All to brother or sister	[Brother or sister]
Grandfather no nearer relation	All to grandfather	[Grandfather]
Father's father and mother's mother	Equally to both	[Either or both]
Grandmother uncles and aunts	All to grandmother	[Grandmother]
Great-grandfather uncles and aunts	Equally <i>per capita</i>	[To either or any number not exceeding three]
Uncles and aunts	All equally	[To either or any number not exceeding three]
Uncle, and deceased uncle's child	All to uncle	[Uncle]
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle	[Uncle]
Aunts, nephew, and niece	All equally	[If either not exceeding three]
Cousins	Equally <i>per capita</i>	[Any number not exceeding three]
Nephew by brother, and nephew by half sister	Equally <i>per capita</i>	[Any number not exceeding three]

NOTE A.—Taking *per capita* is taking by head individually. Taking *per stirpes* is taking by descent or representation. Thus, if A die leaving three brothers or sisters and no nearer kin they each take an equal part of his personal estate in his or her own right, *i.e.* *per capita*. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived *i.e.* *per stirpes*.

NOTE B.—By English Law brothers and sisters of the half blood share equally with the whole blood

II.—REAL PROPERTY

(N.B.—Leaseholds are Personal Property.)

Table of Descent of Real Property in England & Wales and Ireland on death of an Intestate. No illegitimate child is capable of inheriting real estate. Custom of *Gavelkind* (descent to all sons alike) still exists in Kent, and custom of *Borough English* (descent to youngest son) in divers ancient boroughs. *The Dower* (viz., widow's thirds) of widows married since 1533 is in the majority of cases barred.

In each instance it is supposed there are no nearer relations than those named

<i>If Intestate die, leaving</i>	<i>Real Property would descend to—</i>
Wife only, no blood relations	One third to wife for life, rest to Crown, copyholds to lord of manor

<i>If Intestate die, leaving</i>	<i>Real Property would descend to—</i>
Wife and child or children and children of a deceased child	One third to wife for life in any case Rest to eldest son or his issue, such son and his issue whether male or female, being preferred to any other son and his issue, and all sons and their issue whether male or female being preferred to all daughters and their issue, whether male or female If no son, rest to daughters equally If daughters and grandchildren (sons and daughters of deceased daughter) rest to daughters and eldest son of deceased daughter
Wife and father	One third to wife for life rest to father if deceased purchased same or had it left him by will
Wife and mother	One third to wife for life, rest to mother, there being no heirs on father's side
Wife brother or sister and children of a deceased brother or sister	One third to wife for life in any case rest to eldest brother or his issue (See above, 'Rest to eldest son or his issue under head 'Wife and child &c') Sister and children of deceased sister rest equally between sister and nephew (eldest)
Wife mother nephews and nieces	Sisters and nieces only, children of deceased sister rest equally between sisters and nieces One third to wife for life, rest to nephew (eldest) or nieces, if brother left no son
Wife, mother, brother sisters and nieces (children of deceased brothers and sisters)	One third to wife for life in any case rest to eldest brother Rest to nieces, equally, if children of eldest brother deceased
No wife or child or issue of a deceased child	Lineal ancestor paternal, males of whole blood first
Children by one or more wives and the issue of deceased children	All to eldest son or his issue (See above 'Rest to eldest son or his issue under head 'Wife and child &c') Daughters equally Husband for life (provided the wife or the husband in her right was at some time during the coverture solely seized in possession of the legal or equitable estate) afterwards to only child or to eldest son or issue of a deceased eldest son If all daughters, to them equally
Husband and child or children	All to mother in default of lineal ancestors on the father's side, or issue of such ancestors
Mother, but no wife, child or issue of a child, father, brother sister, nephew, or niece or more distant descendants of father	All to eldest brother All to sisters All to father
Mother and brothers and sisters	See above 'Rest to eldest son or his issue' under head "Wife and child &c"
Father, and brothers and sisters	All to brother
Child and grandchild by deceased child	All to great nephew if eldest brother's grandson All to brother's daughter if child of eldest brother
Brother and grandfather	Brother all
Brother's grandson, and brother or sister's daughter	One third to wife for life rest to brother
Brother and two aunts	All to grandfather
Brother and wife	All to father's father
Grandfather (no nearer)	All to uncle or aunt
Father's father & mother's mother	Uncle unless deceased uncle was elder brother when his child takes all
Grandmother & uncle, or aunt on father's side (no nearer)	Child of deceased uncle on father's side or (if none) child of deceased aunt on father's side
Uncle and deceased uncle's child	Nephew
Uncle by mother's side, and deceased uncle or aunt's child	Eldest brother's grandson or if granddaughters between them equally
Two aunts nephew and niece, children of deceased brother	Nephew by brother
Uncle or aunt's children and brother's grandchildren through a son	All to eldest nephew, son of deceased brother
Nephew by brother, and nephew by half sister	
Nephew by deceased brother and nephews and nieces by deceased sister	

NOTE A—By the Land Transfer Act 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate, but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir at law if not one of the next of kin, shall be equally entitled to the grant with the next-of kin.

Intestates' Estates, Scotland

I—MOVABLES

[In each instance it is supposed there are no nearer relations than those named]

By the Intestate Husband's Estate (Scotland) Act, 1911 the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value. If over that amount she takes £500 out of the heritable and movable estate rateably before any division is made and after that the share in the remainder to which she was entitled before the passing of the Act

<i>If the Intestate die, leaving</i>	<i>His representatives take in the proportions following —</i>
Widow only	Half to widow, half to next of kin or if none then to the Crown
Widow and child or children	{ One third to widow Remaining two thirds to child or among children equally
Widow and children and issue of predeceasing children	{ One third to widow one third to living children equally, remaining third amongst living children <i>per capita</i> * and issue of deceased children <i>per stirpes</i> *
Widow and father	Half to widow, half to father
Widow and mother no father	Half to widow, one half to mother
Widow, brothers or sisters	{ Half to widow half equally amongst brothers and sisters whether of the whole or half blood consanguinean. If a deceased brother or sister has left issue such issue take amongst them their deceased parent's share
Widow mother nephews or nieces	Half to widow, one half to mother
Husband with or without children	Half to husband, half to wife's next of kin
Father and mother	Whole to father
Father, mother brothers and sisters	{ Half to father half to brothers and sisters equally
Father and mother and their grandchildren	{ Half to father half to grandchildren equally <i>per stirpes</i>
Father, brothers and sisters	{ One half to father one half equally amongst brothers and sisters
Mother brothers and sisters	Mother one half brothers and sisters one half equally
Mother, but no other kin	Whole to mother
Child, children or grandchildren by deceased children	{ Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share
Brothers or sisters and nephews or nieces	{ Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share
Brother or sister and grandfather	All to brother or sister
Brother or sister and uncles or aunts	{ All to brother or sister
Grandfather no nearer relation	All to grandfather
Father's father and mother's mother	{ All to father's father
Grandmother, uncles and aunts	All to uncle and aunts if paternal
Great-grandfather uncles and aunts	{ All to uncles and aunts, if paternal if not, then to paternal great grandfather
Uncles and aunts	All equally
Uncle and deceased uncle's child	All to uncle
Uncle by mother's side and deceased uncle or aunt's child	{ Child of deceased paternal uncle or aunt takes to exclusion of maternal uncle
Aunts, nephew and niece	Nephew and niece
Cousins	Equally <i>per capita</i> *
Nephew by brother, and nephew by half sister	{ All to nephew by brother

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy

NOTE B.—In Scotland a lease on intestacy and in the absence of any destination descends to the heir at law

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritable, if he is also one of the next of kin, is not entitled to any of the movables if he takes the heritable. He may however "collate the heritable, i.e., share it with the other next of kin and thus get an equal share of the mixed estate

* *Per Capita* means by the head *per stirpes* means inheriting through a parent deceased. Movables taken *per capita* divide into as many shares as there are children. Where representatives of a deceased parent take *per stirpes* they take equally amongst them the share that would have fallen to the deceased had he or she survived

II—HERITAGE

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property writs, other than "to heirs and successors"

In each instance it is supposed there are no nearer relations than those named

<i>If Intestate die leaving</i>	<i>Heritage would descend to —</i>
(1) Wife only no blood relations	One third to wife for life rest to Crown as <i>ultimus heres</i>
(2) Wife and child or children, and children of a deceased child	One third to wife for life Fee to eldest son or his heir male If no son then to daughters equally The eldest son of a deceased daughter taking his mother's place
(3) Wife and father	One third to wife for life, rest to father
(4) Wife and mother	One third to wife for life Fee to nearest heir male
(5) Wife brother or sister and children of a deceased brother or sister	One third to wife for life Fee to immediate younger brother and his heir male if none, then to immediate elder brother
(6) Wife mother, nephews and nieces	One third to wife for life, rest to nephew (eldest) or nieces equally if brother left no son See No 2
(7) Wife, mother brother sisters and nieces (children of deceased brothers and sisters)	One third to wife for life rest to younger brother and his heirs If the only heirs are nieces they will take equally If no younger brother then to immediate elder brother and his heirs in the same way If sisters but no brothers the sisters take equally and if the sisters have predeceased leaving only daughters they succeed equally
(8) No wife or child or issue of a deceased child	To brother as in (5) whom failing to lineal ancestor paternal and his heirs
(9) Children by one or more wives and the issue of deceased children	All to eldest son or his issue If no male issue then to female issue as in (2)
(10) Husband and child or children	Liferent of whole to husband Fee to eldest son
(11) Mother, but no wife child or issue of a child father brother sister, nephew or niece or more distant descendants of father	Nearest paternal collateral (uncle or his heirs) If none then to grandfather and his heirs
(12) Mother and brothers and sisters	All to younger brother whom failing to immediate elder brother
(13) Mother and sisters	All to sisters equally
(14) Father and brothers and sisters	Fee as in (5)
(15) Child and grandchild by deceased child	(See No 2) "Rest to eldest son or his issue under head 'Wife and child etc'"
(16) Brother and grandfather	All to brother
(17) Brother's grandson and brother or sister's daughter	All to great nephew if grandson of brother (conforming to Nos 2 and 7) All to brother's daughter if child of eldest brother
(18) Brother and two aunts	Brother all
(19) Brother and wife	One third to wife for life rest to brother
(20) Grandfather (no nearer)	All to grandfather
(21) Father's father and mother's mother	All to father's father
(22) Grandmother and uncle or aunt on father's side (no nearer)	All to uncle or aunt
(23) Uncle and deceased uncle's child	If deceased uncle was younger brother then to child If both brothers older than intestate then to the younger of them or his heir male.
(24) Uncle by mother's side and deceased uncles or aunts' child	Child of deceased uncle on father's side or (if none) child of deceased aunt on father's side
(25) Two aunts, nephew and niece children of deceased brother	Nephew
(26) Uncle or aunts' children and brother's grandchildren through a son	Brother's grandson, or if granddaughters between, then equally (conforming to Nos 2 and 7)
(27) Nephew by brother, and nephew by half sister	Nephew by brother
(28) Nephew by deceased brother and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother

NOTE—In Scotland succession to heritage on intestacy NEVER ascends to the mother and her relations Even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again

SOLICITORS CHARGES

These are now usually regulated in conveyancing and non-contentious business by the Solicitors Remuneration Act 1882 and the Scale thereunder—we say usually because that Act allows an option to a solicitor of declining to adopt it. In practice most solicitors (although some old established firms are found to prefer the old system) are willing to adopt the Scale and especially on mortgages and sales. Looking first at the old system we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official and in 1870 a further Act enabled the taxing officer to have regard to skill labour and responsibility as well as to mere length of documents. The Act of 1882 enabled the high legal authorities, with the consent of certain representative solicitors to frame a Scale and this has been done. It chiefly relates to sales, purchases and mortgages and is based upon the value of the property or amount of the money involved. Besides this it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor whether under Scale or agreement is intended to cover the services of himself and his clerks while it is of course exclusive of actual outlay for stamps &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000 the Scale charge for each party's solicitor is 1½ per cent. this does not apply to sales by auction. Where a negotiation fee is chargeable in addition by the vendor's purchasers or mortgagees (not mortgagors) solicitor the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage he is entitled to an additional fee of substantial amount under the Scale referred to. *All charges (except scale and certain County Court matters) are now subject to an increase of 33½ per cent.*

Scotland—Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in the Parliament House Book and in 'The Scottish Law Directory'. When a solicitor sues for payment of a professional account it is remitted to the Auditor of the Court for taxation of his charges.

MEDICAL FEES

Patients are charged according to their supposed incomes the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners—

GENERAL PRACTITIONERS	RENTALS			
	£10 to £25	£25 to £50	£50 to £100	£100 to £150
Ordinary Visit	5s to 7s 6d	5s to 10s 6d	7s 6d to 12s	
Night Visit	Double an ordinary visit			
Mileage beyond two miles from Home	2s 6d	3s	4s	
Detention per ½ hour	5s to 7s 6d	5s to 10s 6d	7s 6d to 12s	
Letters of Advice	Same charge as for an ordinary visit			
Attendance on servants	5s	5s	5s to 7s 6d	
Midwifery	21 4s	21 to 41 5s	41 to 71 6s	
Administering Chloroform	15s	21 4s	31 5s	
CONSULTANTS				
Advice or Visit alone	2 6s	2 6s	2 6s	
Advice or Visit with another Practitioner	21 6s	21 to 31 6s	21 to 31 6s	
Mileage beyond two miles from Home	15s	15s	15s	

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation he is entitled to charge double his ordinary fee. When he himself is called in in consultation he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits &c. if all goes well, but if the illness be protracted or if any special operation has to be performed there is an extra charge.

If attendance on servants is paid for by employer or if he send for the doctor the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed as in certificates for lunacy insurance offices &c. when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

ACCOUNTANTS CHARGES

Scale of fees approved by the Institute of Chartered Accountants. On Nov. 6, 1918 the Institute resolved that a substantial increase in fees is justifiable. The Incorporated Society (Jan. 15, 1920) expressed opinion that increase should be 50 per cent. on pre-war standard and the Scottish Chartered Accountants recommended a similar increase (June 1920).

Audits—Fees fixed by Shareholders in General Meeting.

Preparing Balance Sheets Investigating Accounts, &c.—Principals time per day of seven hours 5 6s. Managing Clerks (if Chartered Accountants), 2 6s. (not Chartered Accountants), 1½ 6s. other Clerks, 1 6s. If at a distance (a) in the U.K., Principal 5 to 22 6s. Managing Clerks (C.A.) 2 to 3 6s. (not C.A.) 1½ to 2 6s. others 1 6s. (b) outside U.K. Principal, 7 to 30 6s. Managing Clerk (C.A.) 3 to 10 6s. (not C.A.) 2 to 5 6s. others 2 to 3 6s. (The above rates are exclusive of travelling and hotel expenses.)

Arbitrations—£10 10s per day and upwards. **Liquidators and Trustees in Bankruptcy**—usually by percentage on realisation of assets and dividends paid.

Voluntary Liquidators—usually fixed by the Company in General Meeting.

ARCHITECTS

Fees on New Works—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and, in preparation of contract, selecting and instructing of consultants furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment and passing and certifying accounts, a percentage on the total cost of all executed works as follows—

(a) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £2,000 the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

Alterations and Additions—A percentage not exceeding twice the amount due for new works of the same cost.

Fittings, Decorations, &c.—In works in which designs for fittings, appointments, decorations or complex detail or construction are main features special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works—In addition to the percentage on the total cost of executed works the Architect is to be paid in respect of all works included in the tender or order but not executed, two thirds of the charge which would have been due upon them had they been carried out.

Partial Service—If the project or part of it be abandoned or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows—

(a) For making approximate estimate of cost by cubic measurement or otherwise one fourth of the percentage on the estimated cost of such works.

(b) For making approximate estimate of cost by cubic measurement or otherwise and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained two-thirds of the percentage on the estimated cost of such works.

Installments—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two thirds of the charge calculated on the total amount of the contract or order and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

Work Executed with Old Materials, &c.—In all cases where work is executed wholly or in part with old materials or where material labour or carriage is provided by the Client the percentage shall be calculated as if the works had been executed throughout by a Contractor and with new material.

Services Not Included in Percentage—The foregoing percentages do not cover the following services for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved—

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in or addition to the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the work. Altering drawings or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the

works. Making extra drawings for the Client or Contractors use, and making drawings for and negotiations with ground landlords adjoining owners, public authorities or others, and making applications for licences and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with fire flood or tempest during the execution of the works and services in connection with the planning of grounds or gardens.

Housing Schemes and Laying Out Estates—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Scottish Board of Health.

Approval of Lessee's Plans—For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled and certifying for lease when required, the charge is as follows—

For each £100 or part of £100 of the total cost up to £500, 2½ per cent. (minimum fee £3 3s.)

For each £100 or part of £100 from £500 to £5,000 1½ per cent.

For each £100 or part of £100 above £5,000 1 Guinea per cent.

Litigation and Arbitration—For qualifying to give evidence settling proofs conferences with Solicitors and Counsel attendances in Court or before Arbitrators or other tribunals and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

Land Surveying and Levelling—For surveying and making a plan of a town village, street or road estate or grounds or any part thereof for taking levels setting out streets or roads and for other services in connection with land not otherwise specifically provided for the charges are by time in accordance with Clause 21.

Sanitary Surveys—For inspecting, reporting and advising on the sanitary condition of premises the charge is by time in accordance with Clause 21 the minimum fee being £3 3s., in addition to the cost of assistance and appliances.

Expenses—The above mentioned fees are, in all cases exclusive of the cost of copies of documents, lithography, travelling and hotel expenses and all other disbursements, which are to be charged in addition.

QUANTITY SURVEYORS

A fee of 2½ per cent. upon the amount of the lowest tender received for the contemplated building or upon its estimated cost should the work be abandoned before tenders are received, is charged by Quantity Surveyors for preparing Bills of Quantities.

FOR MEASURING AND ADJUSTING VARIATIONS the fees are 2½ per cent. on the amount of additions and 1½ per cent. on the amount of omissions brought into account.

FOR SERVICES IN CONNECTION WITH LITIGATION OR ARBITRATION a charge per day (depend-

dent upon the Surveyor's professional position) is made.

The above charges are exclusive of the cost of printing lithography and fair copies of accounts and in all cases travelling and other out of pocket expenses are payable in addition to the fees.

CONSULTING ENGINEERS

On *Constructional Work* the payment is usually an agreed fee or a commission (which includes the necessary drawings, &c.) of 5 per cent on the cost of the works where the contract exceeds £5,000 and 7½ to 10 per cent where the amount does not exceed £5,000.

For *Quantities and Accounts* (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyor's work) the usual charge is 1½ to 2 per cent where the amount exceeds £5,000 and 2 to 2½ per cent on amounts below £5,000.

AUCTIONEERS, SUPERVISORS AND ESTATE AGENTS

1 Sales by Auction

Freehold Leasehold and Copyhold Properties including the preparation of particulars and advising as to reserves—On the first £300 5 per cent on the next £4,700 2½ per cent on the residue, 1½ per cent.

In addition to the above charges—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks* and other *Movable Effects, Timber* and *Tenant right* under the conditions of sale in addition to the purchase money of the property—5 per cent on £500 and 2½ per cent on residue, to include inventory and valuation.

Sale before Auction

After issue of advertisements the same scale as by auction.

Non Sale

Charge equivalent to one fourth of the commission in which would have been earned on a sale up to £5,000 calculated on the reserve price to include valuation for reserves on larger amounts by arrangement.

Sale after Auction

In the event of the property being sold within three months after the auction the charges for non sale would merge into the ordinary commission then payable.

Furniture, Trade Stocks, and Chattels on the Vendor's Premises—5 per cent on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery—5 per cent on the amount realised, exclusive of preparation of catalogues.

Live and Dead Farming Stock (except Horses and Pedigree Cattle)—2½ per cent on live stock and 5 per cent on dead stock, on the amount realised.

Horses and Pedigree Cattle—5 per cent on the amount realised.

On *Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor*—One half the commission on sale calculated on the amount of reserve or buying in price.

2 Private Treaty Sales

Freehold and Copyhold Estates and Houses and Ground Leases—On the first £300, 5 per cent on the next £4,700, 2½ per cent on the residue, 1½ per cent, and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks* and other

Movable Effects, Timber, and Tenant right of 5 per cent up to £500, and 2½ per cent on the residue, to include inventory and valuation.

3 Purchases.

Freehold Copyhold or Leasehold Property—One half of the scale for sale by private treaty, calculated upon the amount of the purchase money but including inspection advising as to value, and negotiating or bidding. If no purchase is effected the usual scale for valuation should be charged—one guinea per cent on first £1,000 half a guinea on next £9,000 and a quarter of a guinea per cent beyond on the value of the property. Minimum fee, £5 5s.

4 Lettings

Business Premises Unfurnished Houses Flats (i.e. on or Disposing of all Leases (other than Ground Leases) by assignment or otherwise—If the annual value be £200 or less 5 per cent on one year's rent where the term is for one year or less and 7½ per cent on one year's rent where the term is for more than one year. If the annual value be over £200 the above scale shall apply to the first £200 and on the excess rental over that amount where the term is for three years or less 5 per cent on one year's rent where the term is for more than three years, 7½ per cent on one year's rent. In the case of leases requiring the lessee to repair the demised premises the commission is 10 per cent on one year's rent whatever the term. Upon the premium or consideration (in all cases), 5 per cent up to £1,000 and 2½ per cent on the residue and the commission on any sum obtained for fixtures furniture, or effects of any kind of 5 per cent up to £500, and 2½ per cent on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to let or sell is let by him and the tenant afterwards purchases the commission for selling less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats excluding Survey or Valuation—Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent—5 per cent on the first year's rental and 2½ per cent for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation—Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects—A minimum fee of two guineas per day exclusive of expenses.

On Letting Land on Building Lease—One year's ground rent on first £50 three quarters ditto on next £50 half ditto on next £500 quarter ditto on residue.

5 Collections or Receiverships

10 per cent upon gross rental of weekly property 5 per cent upon gross rental of other property or tithes 7½ per cent upon the gross rental for the management and collection of rents on agricultural estates 2½ to 5 per cent on ground rents, according to the amount of the rents and the number of collections.

6 Laying Out or Development of Estates

For Road Construction, 5 per cent upon the outlay, exclusive of expenses.

7 Valuations
1 Valuation of Freehold, Copyhold or Leasehold Properties—A guinea per cent on the first £1,000, half a guinea per cent on the next £9,000, and a quarter of a guinea per cent beyond on the value of the property subject to a minimum fee of five guineas.
2 Of Property taken under Compulsory Powers—The charge is on R.D.C. Scale. The fee is exclusive of five guineas per day for attendances. Plan and disbursements extra.
3 Valuing for Annual Rental—(a) *Agricultural Property*— $\frac{7}{8}$ guinea per cent up to £250, 5 guineas per cent on the next £250, and 2 guineas per cent beyond. (b) *Urban and Residential Property*—5 guineas per cent up to £100, and $2\frac{1}{2}$ guineas per cent beyond. Minimum fee 3 guineas.
4 Valuation of Immovables, Fixtures and Effects—5 per cent up to £500 and 2½ per cent on the residue.
5 Valuation of Plant, Machinery and Trade Stocks—5 per cent on first £100 and 2½ per cent on the residue.
6 Valuation of Live and Dead Farming Stock—5 guineas per cent on first £100 and 2½ guineas per cent on the residue.
7 Valuation of Hotel and Public House Fixture Fittings and Stock—5 guineas per cent up to £1,000 and £3½ per cent on the residue.
8 Valuation for Probate and Estate Duty Purposes—(a) *Freehold, Copyhold and Leasehold Property*—One guinea per cent on the first £1,000, half a guinea per cent on the next

£4,000, and one quarter guinea per cent on the remainder. Minimum fee, £5 5s on each property.

(b) *Of Furniture and Effects*—5 guineas per cent on the first £100 and 2½ guineas per cent on the next £400 and 1½ guineas per cent of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9 Valuations under the Finance (1909-10) Act 1910 For Survey Completion of (or on) Land

County Residential Properties, Agricultural Land and Undeveloped Land—One half guinea per cent up to a total value of £20,000 and one quarter guinea per cent on the balance above that amount.

Urban Properties—One quarter guinea per cent on a total value of £20,000 and one eighth guinea per cent on the balance above that amount. Minimum fee, £3 3s.

10 Valuation of Properties on Redemption or Discharge and setting the amount if required—5 guineas per cent on the amount. Minimum fee, £5 5s.

11 Valuation or Sale of Timber—5 guineas per cent on amount realised. When valuing only 5 guineas per cent on first £100 and 2½ guineas per cent on the residue.

12 Valuation of Tenant's Right—5 guineas per cent on the first £100 and 2½ guineas per cent on the next £900 and 1½ guineas per cent on the residue.

Where one value acts between both parties the minimum charge shall be scale and a half divisible between both parties.

THE UNION JACK CLUB Waterloo Road S.E. 1 101 Hop 3511

Patron in Chief His Majesty the King

Patroness in Chief Her Majesty the Queen

H R H The Prince of Wales K.C. etc.
 President Colonel Sir Edward W. D. Ward, K.C.
 Vice President Colonel Sir Walter E. Lawrence, Bt.
 Hon. Treasurer Sir C. J. Marjoribanks, K.C.
 Comptroller of Club Brig General I. F. O. Gascoigne, C.B., D.S.O.

This is one of our great National Institutions where Sailors, Soldiers and Airmen can go when on leave or passing, through London a place where they may deposit their kit and valuables where they may obtain at moderate charges good meals and comfortable bedrooms to themselves and where they find the usual amenities of a club including Library and Writing Room, Baths, Barbers Shop and also a Club Shop in which articles of everyday use, from clothing to cigarettes, can be purchased under their own roof and feel really at home.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War and other campaigns and was opened on July 1st 1907 by His late Majesty King Edward VII. Membership is limited to those serving on the

H R H The Duke of Connaught K.G. etc.

Active List of the Regular Forces below the rank of Officer but during the War all mobilised men including those from the Overseas Dominions and Allied Countries were made Honorary Members. The Club is managed by a Council and General Committee which includes representatives elected by the members. Already firmly established before 1914 the Union Jack Club was an inestimable boon to Service men in the Great War during which period alone sleeping accommodation was provided for no fewer than 1,131,338 men and 3,054,809 meals were served whilst many millions of whom no record was kept passed through its doors for rest and refreshment many of them straight from the trenches in France. Open day and night the capacity of the Club was taxed to the uttermost. Work was commenced late in 1920 on a considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914-18 and to provide the increased accommodation which is so much needed. By permission of His Royal Highness, the new building will be known as The Prince of Wales Wing.

THE ORDER OF ST JOHN OF JERUSALEM

Libban Black
 The Order had its origin in Jerusalem and Arc was an international confraternity for the relief of crusaders and was later sovereign in Rhodes and in Malta, where its knights kept galleys and galleons, to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean from 1330 till 1798. The work of the British Order is the control of the St John's Ambulance and Brigade and of the British Ophthalmic Hospital Jerusalem. *Sovereign Head and Patron H.M. King George V; Grand Prior H.R.H. Duke of Connaught and Strathearn; Secretary General Maj. Gen. Sir Geoffrey P. T. Pellick; Chaplains, Knights of Grace and Esquires* There are also 'Ladies of Justice' and selected Chaplains. These distinctions are notified in the *London Gazette* but do not confer any rank or title.

Farthing ¼ d	43 75000	—	0 875

Standard Gold contains twenty two twenty months (carats) of fine gold and two twenty fourths of alloy fineness 916 66 or 22 carats. 240 Troy ounces of standard gold are coined into 934 sovereigns and one half sovereign, one Troy ounce is therefore worth £3 17s 10½ d and one ounce of pure gold on the same basis £4 4s 11½ d. During 1922 the mint et price of gold has been above these figures.

Standard Silver formerly consisted of thirty even fortieths of fine silver and three fortieths of alloy fineness 925. Silver for coinage by an Amending Act (10 Geo V ch 3) consists of one half silver one half alloy or in millesimal fineness, 500. 12 Troy ounces of 500 fineness are coined into 66 shillings and 1. Another Standard called the New Sterling, or Britannia of the fineness 1100 to 1000 (958 33) is practically obsolete. It is occasionally used however for high class plate.

On account of the high price of precious metals the melting of British gold and silver coin is prohibited as well as their export. The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows—1912 28½ d 1913 27½ d 1914 25½ d 1915 23½ d 1916 31½ d 1917 40½ d 1918 47½ d 1919 57½ d 1920 61½ d 1921 36½ d. On Oct 5 1922 the price of silver was 35½ d per oz.

In the United States the price of silver is quoted in cents per Troy ounce fine. In order to convert an English quotation into cents per ounce fine first express the pence as a whole number and decimal fraction and then multiply by 1 25 to express a United States price on the English system multiply the cents by 0 4536.

*Bronze is an alloy of copper 95 parts tin 4 parts and zinc 1 part, or of copper 95½ parts tin 3 parts and zinc 1½ parts.

* Issued on special occasions.

* By law a shilling weighs one sixteenth of 1200 Troy. 2000 of pure silver would be used in coining 72 shillings of 925 fineness and 120 of 500 fineness.

The legal weight of a penny is one third of the halfpenny one fifth and of the farthing one tenth of an ounce avoirdupois the halfpenny is one sixth in diameter.

Discontinued

The 'Remedy' is the amount of variation from standard permitted in fineness and in weight of coins which first issued from the Mint.

Tokens—No person is allowed to coin any token to pass for or as representing bronze or other money under a penalty of £20.

Light Gold—Any person to whom it is tendered may break out or deface any gold coin below the least current weight but under the provisions of the Coinage Act 1892 and an Order in Council of 16 March 1892 light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of £5 £10 £20 £50 also for £100 £200 £500, and £1 000.

Treasury Notes of the value of £1 and 10s are issued and are legal tender to any amount.

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days sight. They are issued for the full sum named thereon without allowance for discount. No charge is made for bills drawn. They may be obtained at the Chief Office of the Bank of England in London or at any of the branches.

Legal Tender of Money—The tender of Bank of England Notes is legal in England and Wales in every purpose and by anyone (except by the Bank of England). No one can be compelled to give change (gold if above the least current weight and Treasury notes are legal tender to any amount). Silver is not a legal tender for sums over two pounds nor bronze including farthings for sums over one shilling.

British Coinage Statistics—During 1921 the number of coins struck at the Royal Mint was 298 946 125 of which 287 500 125 were Imperial and 4 445 974 Colonial.

BRITISH DOMINIONS ABROAD

Imperial (King) Coins are the sole legal metallic currency in—

NEW ZEALAND

UNION OF SOUTH AFRICA AND SOUTH AFRICA

TRANSVAAL (Special coinage proposed)

ITALY AND ISLANDS

FIJI

CHIRATAI

SIERRA LEONE

WEST INDIES. See also JAMAICA below.

Special Coins are current in addition to the Imperial series in—

AUSTRALIAN COMMONWEALTH—Special florins shillings sixpences and three pences in silver and pence and half pence in bronze of the same weights and composition as Imperial coins of these denominations but of special designs.

GUINEA GUAYANA—A special groat or four pence.

BERNESE—Eight douanes (= 1 penny), 4, 2, and 1 double.

JAMAICA—Nickel bronze pence halfpence, and farthings.

PERU—Special pence halfpence, and farthings.

MAITA—One third of a farthing (bronze).

BRITISH WEST AFRICA—Silver and also alloy metal 2s, 1s 6d, and 3d, One penny, one halfpenny, and one tenth penny (nickel bronze).

MONEYS OF FOREIGN NATIONS

423

In many cases silver coins are reduced in fineness, in others coins in low value metals are substituted, as a consequence of the War

§ The par value and rate of exchange of Foreign Moneys and Sterling at certain dates in 1922-1923 are shown on p 426

* Rate on Dec 30 1922

† Rate on Oct 6 1923

The Rate on Kobe taken after the Japanese earthquake

Notes—(a) 1923 Paper Ruble—(i) until November 1 all 1922 paper money will be exchanged by the People's Commissariat for Finance and the State Bank for money of the 1923 issue. The par of exchange of the rouble is £1 sterling, = 9 46 gold roubles.

(b) Germany—On October 16 it was announced that the paper mark was to remain legal tender but a secured currency called Rentenmark was to be issued acceptable as payment by all public offices. The Rentenmark is to be secured by first mortgage on gold marks on the entire German landed property and by gold obligations with first priority on industry, trade and the banks.

HALL MARKS ON PLATE*

Assay Office Marks—The official marks stamped on gold and silver plate at Assay Offices are distinguished as under—

Assay Office	Distinguishing Mark
London (Goldsmiths Hall)	Leopards Head (crowned, until 1823)
Birmingham	Anchor (square frame for gold, pointed shield for silver)
Chester	City Arms (3 Garbs and a sword)
Sheffield	Crown
Edinburgh	Castle
Glasgow	Three Fish & Pell
Dublin	Harp crowned

In addition to the above there have been Assay Offices at Bristol, Exeter, Newcastle upon Tyne, Norwich and York, all of which have long been closed.

Makers Mark (instituted in 1363)—This is impressed by the maker and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the type of letter and the shape of the shield being changed in cycles of 20, 25 or 26 years. In 20 year cycles (London invariably, Chester alternately with 25 and Sheffield alternately with 25) the letters J V W X, Y Z are omitted in 25 year cycles (Birmingham, Edinburgh and Dublin and alternately at Chester and Sheffield) the letter J is omitted from the alphabet. At Glasgow all the letters are employed in a 26 year cycle.

The Sovereigns Mark—The lion passant introduced in the reign of Edward I (1300) for silver articles only.

The Sovereigns Head—The portrait of the reigning Sovereign was impressed on all plate charged to duty assayed from 1784—1889-90. The duty on plate was removed in 1890 and the Sovereigns head does not appear on plate assayed before 1784 or after 1890.

The Crown—On gold articles only in lieu of the lion passant on silver.

Britannia—A full length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz 10 dwt of fine metal to each 12 dwt of alloy) during a short period only 1697-1720, since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia with the lion's head erased and the date mark.

Sterling Silver—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 12 oz 2 dwt of fine metal to each 18 dwt of alloy.

Sterling Gold—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The relative values of the various standards is shown below—

	£	s	d
Pure gold 24 carats	4	4	11½
Standard, 22 carats	3	17	10½
2nd ditto, 18 carats	3	3	8½
3rd ditto, 15 carats	2	13	1
4th ditto, 12 carats	2	2	5¼
5th ditto, 9 carats	1	11	10½

* For the greater part of the material for this article readers of the ALMANAC are indebted to the late Mr Wilfrid Cripps (author of *Old English Plate*) by whose courtesy also many of the illustrations were provided.

London (Goldsmiths Hall) Date Marks
From 1438 to 1936

	Lombardic simple	1438-9	to 1457-8
	Lombardic cusps	1458-9	1477-8
	Lombardic double cusps	1478-9	1497-8
	Black letter small	1498-9	1517-8
	Lombardic	1518-9	1537-8
	Roman and other capitals	1538-9	1557-8
	Black letter small	1558-9	1577-8
	Roman letter capitals	1578-9	1597-8
	Lombardic cusps	1598-9	1617-8
	Italic letter small	1618-9	1637-8
	Court hand	1638-9	1657-8
	Black letter capitals	1658-9	1677-8
	Black letter small	1678-9	1696-7
	Court hand	1697 (From March 1697 only)	1715-6
	Roman letter capitals	1716-7	1735-6
	Roman letter, small	1736-7	to 1755-6

	Old English capitals	1756-7 to 1775-6	The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another presuming his knowledge to be sufficient to judge by the style and period of the article itself <i>e g</i>
	Roman letter small	1776-7 1795-6	An article marked with the letter F 1721 a can be distinguished from letter F 1801 a by the difference in the shape of the respective shields as also those containing the crowned leopard's head and the lion passant the absence of the sovereign's head in the former as against its presence in the latter case the different form of the leopard's head (which was crowned until 1823) and lastly the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp
	Roman letter capitals	1796-7 1815-6	These again can be distinguished from F 1881 a as before by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801 a) the absence of crown on leopard's head and the presence of the Queen's <i>viz</i> the King's head
	Roman letter small	1816-7 1835-6	
	Old English capitals	1836-7 1855-6	
	Old English small	1856-7 1875-6	
	Roman letter capital	1876-7 1895-6	
	Roman letter small	1896-7 1925-6	
	Old English small	1916-7 1935-6	

Imported Plate

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 11 1906 under which the mark for each Assay Office is ordained to be—*London*, the sign of the Constellation *Leo Birmingham*, Equilateral Triangle *Cheshire* Acorn and two leaves *Sheffield* the sign of the Constellation *Tibna Edinburgh*, St Andrew's Cross *Glasgow* double block letter *H inverted Dublin* Bonnet. The annual date letter is to be added by the Assay Office as for plate, etc., of home manufacture.

The Periods of English Architecture

	Date	Style
I	Before P.C. 55	Ancient British
II	B.C. 55 to A.D. 420	Roman Period
III	A.D. 449 to Norman Conquest (1066)	Anglo-Saxon
IV	1066-1189 (<i>e.g.</i> to end 12th cent.)	Norman
V	1189-1307 (<i>e.g.</i> 13th cent.)	Early English (Lancet or Geometrical).
VI	1307-1377 (<i>e.g.</i> 14th cent.)	Decorated (or Curvilinear)
VII	1377-1485 (<i>e.g.</i> 15th cent.)	Perpendicular (or Rectilinear)
VIII	1485-1558 (<i>e.g.</i> first half 16th cent.)	Tudor
IX	A.D. 1558-1625	Early Renaissance
X	A.D. 1625-1830	Late Renaissance
Modern Architecture (the Age of Civilisation)		19th cent. to present time

This Comparative Table shows the approximate period of each style. It must however be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in a listing, to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note—The first portion (I-VIII) of this table is based upon that given on p. 319 Parts IX and X on p. 701 and 'Modern' on p. 764 of 'A History of Architecture on the Comparative Method' (6th ed.) by Sir Banister Fletcher, F.R.S.A. (Batsford)

The Weights and Measures Act of 1878 superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound in the custody of the Standards Department of the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard wet or dry is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights both water and air at the temperature of 62° Fahrenheit with the barometer at 30 inches.

Apothecaries' Weight

Measures of Weight

20 grains = 1 scruple (ʒ) (= 1 296 Grains)
3 scruples = 1 drachm (ʒ) (= 3 888 Grains)
8 drachms = 1 ounce (= 31 1035 Grains)

Measures of Capacity

60 minims (m) = 1 fluid drachm (= 3 552 Minims)
8 fluid drachms = 1 fluid ounce (= 2 8423 Centilitres)
20 fluid ounces = 1 pint (= 0 568 Litre)
8 pints = 1 GALLON (= 4 545963 Litres)

The Apothecaries grain is the Avoirdupois grain and the Apothecaries ounce is the Troy ounce of 480 grains. The Apothecaries drachm is not the same as the Avoirdupois dram and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437 5 grains). A fluid drachm (54 6875 grains) is equal in weight to TWO Avoirdupois drams.

Approximate Equivalents —

1 sovereign = 4 drams
1 half crown = 3½ drams
1 florin = 3 drams
1 shilling = 1½ drams
1 3d piece = ½ dram
1 table spoon = ½ fluid oz
1 dessert spoon = ¼ fluid oz
1 tea spoon = ¼ fluid oz

Avoirdupois Weight

7000 grains (gr) = 1 pound (lb)
16 drams (dr) = 1 ounce (oz) (= 28 350 Grains)
16 ounces = 1 POUND (= 0 45359243 Kilogram)
14 pounds = 1 stone* (= 6 350 Kilograms)
28 pounds = 1 quarter (of a cwt) (= 12 70 Kilograms)
100 pounds = 1 cental (= 45 359243 Kilograms)
4 quarters (112 lb) = 1 hundredweight (cwt) (= 50 8035 Kilograms)
20 hundredweight (2 240 lb) = 1 ton (= 1 016 Tonnes or 1016 0 Kilograms)

Troy Weight

24 grains = 1 pennyweight (dwt) (= 1 555 Grains)
20 dwt = 1 ounce (= 31 1035 Grains)

For gold and silver the ounce, divided decimally, and not into grains is the sole unit of weight. The Troy ounce is the same as the Apothecaries ounce, = 480 Avoirdupois grains (31 1035 Grains) in weight. There is no Troy POUND.

Jewellers Weight

The metric carat of 200 milligrammes is the legal standard of weight for precious stones and pearls.

* The Smithfield stone (for dead meat) is 8 lb only.

Measures of Capacity

4 gills = 1 pint (= 0 568 Litre).
2 pints = 1 quart (= 1 136 Litres).
4 quarts = 1 GALLON (= 4 545963 Litres).
2 gallons = 1 peck (= 9 0919 Litres).
8 gallons = 1 bushel (= 3 637 Dekalitres).
8 bushels = 1 quarter (= 2 909 Hectolitres).
A chaldron is 6½ bushels = 4½ quarters.

Measures of Length

12 inches (in) = 1 foot (ft) (= 0 30480 Metre)
3 feet = 1 yard (yd) (= 0 914399 Metre).
6 feet = 1 fathom (= 1 8288 Metres)
5½ yards = 1 pole (= 5 0826 Metres)
22 yards = 1 chain (= 20 1168 Metres)
220 yards = 1 furlong (= 201 168 Metres).
8 furlongs = 1 mile (= 1 6093 Kilometres)
3 miles = 1 league (seldom used).
100 links = 1 chain (22 yards)
10 chains = 1 furlong
8 furlongs = 1 mile

A Pole of 5½ yards is a quarter of a chain.
A Cricket Pitch is 22 yards (one chain) between the stumps.

A Lawn Tennis Court is 78 × 36 feet (double) and 78 × 27 feet (single).

A Croquet Lawn is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

Birmingham Gauge

The Weights and Measures Act of 1878 made standards on and after Nov 1 1914, certain new divisions of an inch. The equivalent of an inch is 25/6 B.G. The numbers proceed by units down to 1/6 B.G. which = 0 3964 inch and from 1 B.G. (3532 inch) by units to 52 B.G. (0 0095 inch).

Square or Surface Measure

144 sq inches = 1 sq foot (= 9 2903 Sq Decimetres)
9 sq feet = 1 sq yard (= 0 836126 Sq Metre)
30¼ sq yards = 1 perch or rod, or pole (= 25 293 Sq Metres)
40 perches = 1 rood (= 10 117 4188 Hectares)
4 roods (4840 sq yards) = 1 acre (= 3 0468 Hectares)
10 square chains = 1 acre
640 acres = 1 square mile (= 2 58995 Sq Kilometres).

Note.—The Anglo Saxon acre's length is the furlong, and the acre's breadth the chain.

Cubic Measure

1 728 cubic inches = 1 cubic foot (= 0 028317 Cubic Metre)
27 cubic feet = 1 cubic yard (= 0 764553 Cubic Metre)

Angular or Circular Measure

60 seconds (") = 1 minute (')
60 minutes = 1 degree (°)
30 degrees = 1 sign
90 degrees = 1 right angle or quadrant
12 signs (4 quadrants) = 1 circumference
Diameter of circle × 3 1416 = circumference.
Diameter squared × 7854 = area of circle.
Diameter squared × 3 1416 = surface of sphere
Diameter cubed × 5236 = solidity of sphere
One degree of circumference × 57 3 = radius
Diameter of cylinder × 3 1416 product by length or height gives the surface
Diameter squared × 7854 product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Electrical Measures

It is customary to express electrical measurements in terms of the centimetre the gramme and the second (C G S units) and the value of the units has been fixed by international agreement. The principal units are as follow —

As a unit of resistance the international *Ohm* which is based upon the ohm equal to 10^9 units of resistance of the C G S system of electro magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice 145.5 grammes in mass of a constant cross sectional area and of a length of 106.3 centimetres.

As a unit of current, the international *Ampère* which is one tenth of the unit of current of the C G S system of electro magnetic units and which is represented sufficiently well for practical use by the unvarying current which when passed through a solution of nitrate of silver in water in accordance with a certain specification, deposits silver at the rate of 0.001118 of a gramme per second.

As a unit of electro motive force, the international *Volt* which is the E M F that, steadily applied to a conductor whose resistance is one international ohm will produce a current of one international ampère and which is represented sufficiently well for practical use by 1.105 of the E M F between the poles or electrodes of the voltaic cell known as (Lark's cell at a temperature of 15° C) and prepared in the manner described in a certain specification.

As a unit of quantity the international *Coulomb* which is the quantity of electricity transferred by a current of one international ampère in one second.

As a unit of capacity the international *Farad* which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one millionth part of this or the microfarad.

As the unit of work the *Joule*, which is 10^7 units of work in the C G S system and which is represented sufficiently well for practical use by the energy expended in one second by an international ampère in an international ohm. In practice the watt hour is usually employed. It represents the work done by such a current in an hour and equals $3,600$ joules.

As the unit of power the *Watt*, which is 10^7 units of power in the C G S system and which is represented sufficiently well for practical use by the work done at the rate of one joule per second 746 watts = 1 horse power and the value of a Board of Trade unit (B O T U) is $1,000$ watt hours, or $3,600,000$ joules, or $1\frac{1}{2}$ horse power hours.

As the unit of induction the *Henry*, which is the induction in the circuit when the F M F induced in this circuit is one international volt while the inducing current varies at the rate of one international ampère per second.

Builders' Measurements

Stock or kiln bricks	$8\frac{1}{2}$ inches	$\times 4\frac{1}{2}$	$\times 2\frac{1}{4}$
Wet fire bricks	9	$\times 4\frac{1}{2}$	$\times 2\frac{1}{4}$
Paving bricks	9	$\times 4\frac{1}{2}$	$\times 1\frac{1}{4}$
Square tiles	$9\frac{1}{2}$	$\times 9\frac{1}{2}$	$\times 1$
"	6	$\times 6$	$\times 1$
Dutch clinker bricks	$9\frac{1}{2}$	$\times 3$	$\times 1\frac{1}{2}$
A Rod of Brickwork $16\frac{1}{2}$ feet $\times 16\frac{1}{2}$ feet $\times 1\frac{1}{2}$ brick thick = 306 cubic feet or $11\frac{1}{2}$ cubic			

yards and contains about $4,500$ bricks with about 75 cubic feet of mortar. The rod being 5 British metres a rod of brickwork is 25 square metres $1\frac{1}{2}$ bricks thick = very nearly 20 cubic metres.

Ordinary bricks weigh about 7 lb each a load of 500 weighs about 1 ton 11 cwt 1 qr.

A Piece of Wall Paper is 12 yd long \times 21 in wide (English), and 9 yd \times 18 in (French).

Timber and Wood

100 superficial feet = 1 square of flooring

50 cubic feet of planks = 1 load

42 do timber = 1 shipping ton

108 do do = 1 stack

128 do do = 1 cord

A standard hundred of deals contains 120 pieces.

The Petrograd standard consists of 265 cubic feet or 120 pieces $1\frac{1}{2}$ in \times 11 in \times 12 ft or 120 pieces 3 in \times 11 in \times 6 ft.

A battens is not more than 7 inches wide a Deal not more than 9 inches Planks are 2 to 4 inches thick and 10 inches and up in width.

Sizes of Staves

	in in	Ladies	in in
Princess Small	16×16		16×10
Princesses	16×14	Small	16×8
Princesses	14×14	Large	14×12
Marchnesses	14×12		14×8
Marchnesses	12×12	Plantation	13×11
Countesses Small	12×11	Doubled	13×10
Countesses	10×10		13×7
Countesses Wide	10×12	Small	12×8
Viscountesses	12×10	Ditto	12×6
" Small	12×9	Ditto	$11 \times 5\frac{1}{2}$

Specific Gravities

Weight of any volume of following substances compared with the weight of the same volume of water.

Alcohol	0.79	Mercury	13.60
Aluminium	2.67	Milk	1.03
Basalt	2.86	Olive Oil	0.92
Beer	1.02	Petroleum	0.88
Blood	1.06	Platinum	21.45
Brandy	0.84	Portland Stone	2.00
Brass	8.00	Sand river	1.90
Chalk	1.08	" pit	1.80
Cider	1.02	Shingle	1.60
Clay	1.90	Silver	10.51
Coal Welch	1.60	Sodium	0.97
Newcastle	1.24	Steel	7.75
Copper	8.04	Thames ballast	1.80
Cork	0.24	Tin	7.29
Earth	1.60	Turpentine	0.87
Glass	2.80	Urine	1.01
Glycerine	1.26	WATER	1.00
Gold	19.32	Wine Bordeaux	0.99
Gravel coarse	1.85	Wood —	
Gunpowder	0.93	Ash	0.84
Honey	1.45	Beech	0.85
Ice	0.92	Cedar	0.61
Iridium	22.38	Cherry	0.72
Iron, cast	7.20	Elony	1.33
wrought	7.79	Mahogany	1.06
Ivory	1.82	Oak	1.17
Lead	11.35	Poplar	0.58
Limestone	2.50	Walnut	0.67
Marble	2.70	Zinc	7.19
Marl	1.90		

To find the weight of a cubic foot multiply 62.321 lb by the specific gravity. To find the number of cubic feet in one ton divide 35 943 by the specific gravity.

Weight of Cubic Foot and Cubic Yard.

A cubic foot of fresh water = 62½ lb salt water 63½ lb Timber—ash 49 lb beech 43 lb birch 49 lb, cork 15 lb elm 36 lb pine 41 lb oak 59 lb A cubic foot of clay weighs 125 lb of loose earth 95 lb

A cubic yard of anthracite coal solid weighs 2 160 lb bituminous 2 025 lb canal 1 400 lb A cubic yard of compressed hay = 225 lb of hay in stack, 126 lb of compressed straw 145 lb of straw in stack, 90 lb of grain 20 bushels

Fish

In Scotland and at certain places in England and Wales at which the *Cran* Measures Act 1908, has been put into operation fresh herrings must be sold by the *Cran* containing, 37½ imperial gallons or *Quarter Cran* of 9½ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Waze* which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above mentioned Act is not in force they are sold by the *Last* which contains 13 200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred 132 10 Hundred = 1 Thousand 1 320 10 Thousand = 1 Last 13 200 Cured herrings are sold in barrels the capacity of which in Scotland must always be 26½ imperial gallons or in half barrels of 13½ gallons. Herring barrels or half barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act 1913 is in force.

A *Quintal* of fish (Newfoundland &c) is 100 lb a barrel of anchovies = 30 lb a box of fish is about 90 lb

Geographical Measures

The *North* and *South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle equally distant from the North and South Poles. For geographical purposes the surface of the earth is divided by circles called the circles of Latitude and Longitude. The circles of Latitude are small circles parallel to the Equator. The circles of Longitude are great circles perpendicular to the Equator and passing through the North and South Poles. These circles are divided into Degrees, Minutes and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude or Meridian which passes through the astronomical observatory of Greenwich (England).

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere every minute of Latitude would be of the same length but as it is a spheroid the length of a minute increases from 6 046 feet at the Equator to 6 108 feet at the Poles. The mean length of the geographical mile is 6 076½ feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice however, it is taken as the *Admiralty Knot* of 6 080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7 925 English miles. The mean equatorial diameter is 7 926 miles. The circumference at the Equator is 24 902 miles.

Thermometer Comparisons

Comparison between Scales of Fahrenheit, Reaumur and Centigrade

Fahrenheit			Reaumur			Centigrade		
Cent	Fahr	Rmr	Cent	Fahr	Rmr	Cent	Fahr	Rmr
100	212	80	25	77	30	0	32	28
99	210	79	24	75	29	0	30	26

Nautical Measures

6 feet = 1 fathom
 100 fathoms = 1 cable length
 10 cables = 1 nautical mile
 60 nautical miles = 1 degree

The assumed length of the cable is 600 feet (= 182.87 metres), but it is strictly 606.97 feet (= 185 metres). The conventional Nautical Mile (the *Knot* in speed measurements) is 10 cables assumed at 6080 feet (strictly 6069.7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude.

Ship Measurement

The *Ton* measurement of cargo was originally the space occupied by 4 hogsheads (= a *fun*) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton of wheat.

The *Ton register* the unit of capacity of a ship, was originally the space occupied by a last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the *Ton register* used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel divided by 100.

Net tonnage is the gross tonnage less certain deductions on account of crew spaces, engine room, water ballast and other spaces not used for passengers or cargo.

Dead weight tonnage or *carrying capacity* is the number of tons (of 2240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q.r.*).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.r.*) i.e. it is the *weight* of vessel and contents in tons.

Load water line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load water line marks the greatest or loaded draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage afloat is said to be *light ship* or *light* or *in ballast*.

Free Board is the distance from the main or upper deck to the load water line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

Bells and Watches on Board Ship

Bells—Time is kept by means of a bell which is struck every half hour except at certain times towards the end of a watch when the bell is struck 10 or 15 minutes before the expiration of the regular half hour partly as a signal to the Commanding Officer that the watch is about to be changed, and partly as a signal to the Officer of the next watch to prepare for duty.

Watches—For purposes of discipline and to divide the work fairly the crew is mustered in two divisions the *Starboard* (right side looking forward) and the *Port* (left). The day commences at noon, and is thus divided—

Afternoon Watch	noon to 4 p.m.
First Dog	4 p.m. to 6 p.m.
Second Dog	6 p.m. to 8 p.m.
First	8 p.m. to midnight
Middle	midnight to 4 a.m.
Morning	4 a.m. to 8 a.m.
Forenoon	8 a.m. to noon

This makes seven Watches enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day and the men who have only four hours rest one night have eight hours the next. This is the reason for having *Day Watches* which are made by dividing the hours between 4 p.m. and 8 p.m. into two Watches.

For TIME AT SEA see p. 78

Speed of Ships.

The *Knot* is a measure of speed of ships. The following table shows the equivalents of 1 to 42 knots in land (statute) miles per hour—

Knots	Miles	Knots	Miles	Knots	Miles
1	1.1515	15	17.2727	29	33.3939
2	2.3030	16	18.4242	30	34.5454
3	3.4545	17	19.5757	31	35.6969
4	4.6060	18	20.7272	32	36.8484
5	5.7575	19	21.8787	33	38.0000
6	6.9090	20	23.0303	34	39.1515
7	8.0606	21	24.1818	35	40.3030
8	9.2121	22	25.3333	36	41.4545
9	10.3636	23	26.4848	37	42.6060
10	11.5151	24	27.6363	38	43.7575
11	12.6666	25	28.7878	39	44.9090
12	13.8181	26	29.9393	40	46.0606
13	14.9696	27	31.0908	41	47.2121
14	16.1212	28	32.2424	42	48.3636

Measures of Energy, &c.

In Physics the unit of force is the *dynes*, the amount that acting for one second on one grammic mass gives it a velocity of one centimetre per second. The British unit is the *poundal* which in one second gives one pound a velocity of one foot per second. One *poundal* = 13.8255 *dynes*. In Meteorology the unit of atmospheric pressure is the *Bar*, equal to the pressure of 1,000,000 *dynes* (1 megadyne) per sq. centimetre. The Meteorological *Bar* is thus 1,000,000 Chemical *Bars*.

Horse power is energy exerted at the rate of 550 foot pounds per second. An alternative unit is the *kilowatt* (1000 kilogram metres per second) = 737.59 foot pounds per second.

Thermal Unit—The British thermal unit (B.T.U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The *Gas Therm* = 100,000 B.T.U. If I = cu. ft. consumed H = declared heat value of the Company's gas (in B.T.U. per cu. ft.) P = cost of them in pence B = total bill in pence then $B = I \times H \times P$ —100,000 whence equivalent cost (in pence) per 1,000 cu. ft. = $B \times 1,000 - I = H \times I - 100$.

Yarn Measures

Cotton and Spun Silk Count—

Thread = 1' yards.

Lea or Skein, *skn* = 120 yards.

Hank *hk* = 7 Skeins or Leas = 840 yards.

Spindle *spdl* = 18 Hanks.

Counts = the number of Hanks in 1 lb.

Bundle Hanks either of 5 lb. or 10 lb.

Reels of cotton vary from 30 to 1,760 yards they must be marked correctly.

Bundles of Cotton are chiefly made up for export.

Worsted Count—Wrap 80 yards Hank = 560 yards = 7 Wraps. Counts or Numbers are the number of hanks in 1 lb.

Woolen Count—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 18 hanks a Bundle is 300 hanks.

Wool of England Count—The Hank is 300 yards and the number of hanks in 1 lb. is the count of the yarn.

Paper and Book Measure	
Writing Paper	Printing Paper
24 sheets = 1 quire	516 sheets = 1 ream
20 quires = 1 ream	21 reams = 1 bundle
	5 bundles = 1 bale
Regular Sizes of Printing Paper	
Foolscap	= 17 × 13½ inches
Double Foolscap	= 27 × 17
Crown	= 20 × 15
Double Crown	= 30 × 20
Post	= 19¼ × 15½
Double Post	= 31¼ × 19½
Double Large Post	= 33 × 21
Sheet and ¼ Post	= 33¼ × 19¼
Demy	= 22½ × 17½
Double Demy	= 35 × 22½
Music Demy	= 30 × 15½
Medium	= 23 × 18
Royal	= 25 × 20
Super Royal	= 27½ × 20½
Elephant	= 28 × 23
Imperial	= 30 × 22

NOTE—Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad). A crown octavo book of 320 pages will therefore require 5 sheets of quad crown and a ream will provide 100 books, the odd 16 sheets being reckoned as waste. News papers (and books circulating in large numbers) are printed on rotary presses for which the paper is supplied on reels (and not in cut reams). Whitaker is printed on a rotary press, 122 pages at a time, the paper being served to the press from a reel and 6 sheets of 32 pages are delivered, printed and folded at the opposite end of the press.

Sizes of Writing and Drawing Papers	
Emperor	= 72 × 48 inches
Antiquarian	= 53 × 31
Double Elephant	= 40 × 28½
Grand Eagle	= 42 × 28½
Atlas	= 34 × 26
Colombier	= 34½ × 23½
Imperial	= 30 × 22
Elephant	= 28 × 23
Cartridge	= 26 × 21
Super Royal	= 27 × 19
Royal	= 24 × 19
Medium	= 22 × 17½
Large Post	= 21 × 16½
Copy or Draft	= 20 × 16
Demy	= 20 × 15½
Post	= 19 × 15¼
Pinched Post	= 18½ × 14¾
Foolscap	= 17 × 13½
Sheet and ¼ Foolscap	= 22 × 13½
Sheet and ½ Foolscap	= 24½ × 13¼
Double Foolscap	= 26½ × 16½
Double Post	= 30½ × 19
Double Large Post	= 33 × 21
Double Demy	= 31 × 20
Brief	= 16½ × 13¼
Pott	= 15 × 12½

Sizes of Bound Books	
Casing	= 46 × 36 inches
Double Imperial	= 45 × 29
Elephant	= 34 × 24
Double Four Pound	= 31 × 21
Imperial Cap	= 29 × 22
Haven Cap	= 26 × 21
Bag Cap	= 24 × 19½
Kent Cap	= 21 × 18

Sizes of Bound Books	
Demy 16mo	= 5½ × 4¾ inches
Demy 18mo	= 5½ × 3½
Foolscap Octavo (8vo)	= 6½ × 4½
Crown 8vo	= 7½ × 5
Large Crown 8vo	= 8 × 5½
Demy 8vo	= 8½ × 6
Medium 8vo	= 9½ × 6
Royal 8vo	= 10 × 6½
Super Royal 8vo	= 10½ × 6¾
Imperial 8vo	= 11 × 7½
Foolscap Quarto (4to)	= 8½ × 6¾
Crown 4to	= 10 × 7½
Demy 4to	= 11½ × 8¼
Royal 4to	= 12½ × 10
Imperial 4to	= 15 × 11
Crown Folio	= 15 × 10
Demy Folio	= 17½ × 11¼
Royal Folio	= 20 × 12½
Music	= 14 × 10¼

Sizes of Type

All Founders cast their type to one uniform height (type high) which is 44 inch though the letters may vary considerably in their breadth.

The type chiefly used in Whitaker is named *Nonpareil* (6 point). The column contains 75 lines and is 12 Pica ems wide on an average; every column contains about 3,000 letters, or 600 words.

The Point System—The basic unit in American (and many British) type foundries is the point of 0.013837 inch (72 points to the inch) and the names of the various types in the point system are added in parentheses.

Brilliant (3½ point). A column the size of this in Whitaker if set in Brilliant would contain 124 lines and about 7,500 letters.

Diamond (4½ point) is the next size the column would contain 107 lines and about 6,000 letters.

Pearl (5 point) 95 lines 4,370 letters—

Printing is the art of producing impressions from clay.

Ruby (5½ point) 87 lines 3,740 letters—

Printing is the art of producing impressions from clay.

Nonpareil (6 point) 75 lines 3,000 letters—

Printing is the art of producing impressions from

Mignon (7 point) 64 lines 2,360 letters—

METRIC WEIGHTS AND MEASURES

See also 'Double Conversion Tables for Weights and Measures'

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH

10 millimetres = 1 centimetre	= 0.39370113 inch
(mm)	(cm)
10 centimetres = 1 decimetre	= 3.9370113 inches
	(dm)
10 decimetres = 1 METRE (m)	= 1.0936143 yards
10 metres = 1 dekametre	= 10.936143 yards
	(dam)
10 dekametres = 1 hectometre	= 109.36143 yards
	(hm)
10 hectometres = 1 kilometre	= 0.62137 mile
	(km)

A kilometre is approximately *five eighths* of a mile, so that 8 kilometres may be regarded by pedestrians as 5 miles.

2.—MEASURES OF WEIGHT

10 milligrams = 1 centigram	= 0.15432 grains
(mg)	(cg)
10 centigrams = 1 decigram	= 1.5432
	(dg)
10 decigrams = 1 gramme	= 15.4323
	(gm)
10 grammes = 1 dekagram	= 5.6438 drams
	(dag)
10 dekagrams = 1 hectogram	= 3.5274 oz
	(hg)
10 hectograms = 1 KILOGRAM	= 3.2046223 lb
	(kg)
10 kilograms = 1 myriagram	= 22.046223 lb
10 myriagrams = 1 quintal (q)	= 1.9684 cwt
10 quintals = 1 tonne (t)	= 0.9842 ton

3.—MEASURES OF CAPACITY

10 millilitres = 1 centilitre	= 0.0704 gill
(ml)	(cl)
10 centilitres = 1 decilitre (dl)	= 0.17598 pint
10 decilitres = 1 LITRE (lit)	= 1.7598 pints
10 litres = 1 dekalitre	= 2.1997 gals
	(dal)
10 dekalitres = 1 hectolitre	= 2.7497 bushels
	(hl)

1 cubic cm (water) = 1 gram 1 000 cubic cm (water) or 1 litre = 1 kilogram 1 cubic metre (1 000 litres, 1 000 kilograms) = 1 metric ton

4.—MEASURES OF LAND

100 sq metres = 1 are (a)	= 0.0988 rood
100 ares = 1 hectare (ha)	= 2.4711 acres
100 hectares = 1 sq kilometre	= 0.38611 sq mile

NOTES

1 hectolitre	= 2.75 bushels
1 hectolitre per hectare	= 1.12 bushels per acre
1 quintal	= 3.67 bushels
1 quintal per hectare	= 3.49 bushels per acre
1 franc a hectolitre	= 3.67 a bushel (par)
1 „ a quintal	= 4.3d a cental (par)
7 francs „ (duty)	= 1s 6d a quarter (par)

THE UNITED STATES

The weights and measures of the U S A are identical with those of Great Britain, with the following exceptions—

Weight—In the short ton of 2 000 lb the Cental of 100 lb takes the place of the Cwt in the long ton. There are two tons therefore the long ton of 2 240 lb the short ton of 2 000 lb.

Capacity—For grain the old bushel of a 190.48 cubic inches its gallon = 268.8 cubic inches, this is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids the old wine gallon of 231 cubic inches five sixths of the British gallon and = 58.317 8 grains of water. It is divided into 8 pints = 7.689 7 grains of water = 16.6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455.6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DOMINIONS

Australia and New Zealand—Same as British Canada and Newfoundland

Same as British but with short ton of 2 000 lb, as in U S A

Channel Islands

The weights and measures in use in the Channel Islands are those of Great Britain the cental of 100 lb being used as well as the cent of 112 lb. The *Old Island Measures* are as follows—

Vergée (Normandy)	Tersey	Guernsey
100d	= 44 acre	4 acre
Bushel	= 8.9 gallons	5.8 gallons
Pound	= 7.561 grains	7.623 grains
(wt)	(104 lb) = 112 3 lb	(100 lb) = 108 9 lb

British India

1 ngul	= 75 inch
Guz usually 33 inches	also the yard
Kos	= 2 000 yards
Bu-ha (Bengal)	usually = 625 acre
(awny (Madras))	= 1 33
Tola (rupee weight)	= 180 grains
(chittak)	= 2.02 av
Seer 16 chittak or 80 tolas	= 2.204 lb
Mand 40 seers	= 82.287 lb
(Madras)	= 24.68 lb
Seer (liquid)	= 1.760 pints
(and)	= 500 lb
Visham = 3 lb	Daughali = 3 pints
Parah	= 15 gallons
(atty (Singapore))	= 1.1 lb
Pikul	100 catties = 133 lb

Irish Free State—Same as British.

Malta

Pied	= 11.166 inches
(anni)	= 2.283 yards
Ibbra	= 12 oncia = 4886 Troy gr
Rotolo	= 1.745 lb

Sudan—See Egypt

South Africa

Money, Weights and Measures—The Metric System is compulsory in the case of chemists and is permissible (along with British standard of weights and measures) in other cases. In addition the following old Dutch measures are still used—*liquid Measure* Loaguer = about 128 imperial gallons half aum = 15¹/₂ imperial gallons auker = 7¹/₂ imperial gallons *Capacity*—Muid = 3 bushels. The general surface measure is *Morgen*, equal to a 1165402 acres 1,000 Cape lineal feet are equal to 1.033 British feet. The short ton of 2 000 lb is used.

FOREIGN WEIGHTS AND MEASURES

The Metric System has been adopted by the whole of Europe (except Great Britain and Russia) and is *permissive* in all countries

China

Tael weight	=	1 33 07
Catty	=	1 33 lb
Picul	=	133 33 lb
1 s un	=	1 41 inches
1 h ih	=	1 75 feet
1 hang	=	1 75 feet
Li	=	1 15 feet

Egypt

The Metric System of Weights and Measures and the foot and pound and their multiples are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use with their British equivalents are as follows—

Length—

Dira Baladi (used for piece goods)	=	29 83 inches
Dira Mamari, or Pic (used by architects)	=	29 53 inches
Qasaba (used for agricultural land)	=	11 65 feet

Area—

1 Qirat	=	209 3 sq yards
1 Feddan (= 24 qirats)	=	1 038 acres

Capacity—

1 Kela	=	454 bushel
1 Ardeb (= 12 kela)	=	5 444 bushels

Weight—

1 Rotl	=	99 lb
1 Oke	=	2 75 lb
1 Qantar (= 100 rotl)	=	99 05 lb
A Qantar of unginned cotton = 315 lb of ginned cotton = 100 lb an <i>Idel</i> of wheat = 150 kilogrammes of barley = 120 kilogrammes of beans = 155 kilogrammes of maize = 140 kilogrammes of whole lentils = 157 kilogrammes of split lentils = 132 kilogrammes		

Greece

1 ocque	=	2 84 lb
1 quintal	=	132 2 lb
	1 livre	= 1 1 lb
	1 drachma	= 0 11 oz

Japan and Formosa

The Metric System and

Shaku (10 Sun)	=	11 921 inches
Ken (6 Shaku)	=	1 9884 yards
Ri	=	2 4403 miles
Square ri	=	5 9553 sq miles
Cho	=	5 423 chains
Square cho	=	2 4507 acres
Isabo	=	3 9538 sq yards
Liquid koku	=	37 7033 gallons
Dry koku	=	4 9629 bushels
Koku of capacity	=	0 1 ton
1 liquid sho	=	1 5881 quarts
Dry sho	=	0 1985 pecks
Min (160 Momme)	=	1 3228 lb
Kwan (1000 Momme)	=	8 2673 lb

Russia

The standard of length is the *Sajen* which is equal to seven British feet. The standard of weight is the *Funt* = 0 60282 lb

Length

26 vershok	=	1 arshin	55
3 arshin	=	1 sajen	
500 sajen	=	1 verst	
1 verst	=	1166 66 yards (0 66288 mile).	

Surface

1 sq vershok	=	3 0625 sq inches.
1 sq arshin	=	5 4444 sq feet
1 sq sajen	=	5 4444 sq yards
1 sq verst	=	0 4394 sq miles

Weight

1 zolotnik	=	65 8206 grains
3 zolotnik	=	1 loth
32 loth	=	1 funt
40 funt	=	1 pood (36 1128 lb.)
10 poods	=	1 berkovatz

Capacity

1 tcharka	=	0 2164 pint
1 shloff (10 tcharkas)	=	1 0822 quarts
1 vedro (10 shloffs)	=	2 705 British gallons
1 chetvert (8 chetverika)	=	5 771 British bushels

Siam

Niu	=	83 inch
1 up	=	10 inches
Sen	=	44 4 yards
Roening	=	2 525 miles
1ael	=	936 25 17 gr
Chang	=	2 675 lb

Turkey

Oke	=	400 drams = 2 8264 lb
Batman	=	6 okes = 16 958 lb
Antar	=	44 okes = 124 3516 lb
Cheki	=	180 okes = 508 752 lb
Kileh	=	0 9120 bushel
Vuscal (Fss of Rose)	=	1 5 drams = 74 171 grains
Arshin (cloth)	=	26 96 inches
Fudae	=	25 555 inches
Arshin (land)	=	29 830 inches
Deunum	=	1008 765 sq yards
Djerb (hectare)	=	2 47 acres

OLD MEASURES

Old British and Irish Measures

Cubit	=	18 inches
English Ell	=	45 inches
Scottish Ell	=	37 2 inches
Hand (horses)	=	4 inches
Scottish mile	=	1 084 yards
Irish mile	=	2 240 yards
Scottish acre	=	6 150 4 sq yards
(unimproved) acre	=	6 250 sq yards
Irish acre	=	7 840 sq yards
(hectare) acre	=	10 240 sq yards
Hide	=	120 acres (average).
Yard of land	=	1/4 of a hide

Old French Measures.

Toise of 6 feet	Foot = 12 789 in
Aune (ell) of 4 Roman feet	= 46 77 in
League 3,000 toises = 2 6 miles	
Parch 22 feet or 6 aunes = 23 44 feet	
Arpent 100 sq perches = 1 26 acres	
Pound = 7 554 grains	Setier = 34 317 gallons
Boisseau (1) = 2 86 gallons	Pinte = 1 76 pints

Old Hebrew Measures

Talmud Cubit	=	21 924 in	Egyptian Cubit	=	18 24 in
Cubit of Ezekiel	=	25 26 in	Reed	=	15 6 in
Kikkar (Alexandrian talent)	=	50 minas of 60 shekels			
Shekel	=	1/4 oz. of 8 gerah or (Shekel of the Sanctuary) of 2 beka, 4 reba, 20 gerah			
Bath (fluid), Fpha (corn)	=	of 6 hin, 18 cab, 72 log			
	=	6 477 British gallons.			
Cor or Homer (10 ephas)	=	8 351 bushels			

DOUBLE CONVERSION TABLES FOR WEIGHTS AND MEASURES

NOTE.—The central figures in **heavy type** represent either of the two columns beside them, as the case may be. *Examples*—1 centimetre = 0.394 inch and 1 inch = 2.540 centimetres
1 metre = 1.094 yards and 1 yard = 0.914 metre 1 kilometre = 0.621 mile and 1 mile = 1.609 kilometres

						IN PERPETUITY					
						33 33	25 00	20 00	16 66	14 28	

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100 interest being reckoned at 4 per cent? ANSWER.—19 14 years purchase or £19 14

EXAMPLE 2.—A man aged 54 in the receipt of a pension or annuity of £100 a year net wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER.—Looking at the Table of Expectation of Life (q v) it will be seen that the expectation for age 54 is about 17 years and

from the above table an annuity certain for 17 years interest at 5 per cent is worth 12 27 years purchase. The present payment required would therefore be £12 27 approximately

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age when properly calculated according to a given mortality table and a given rate of interest are always somewhat less than those given by the method used in this example

DISTANCE FROM LONDON TO EUROPEAN CITIES (with the Mails)

FROM this table the distance which separates twenty one cities of Europe can be ascertained at a glance e.g., (1) London is 270 miles from (6) Antwerp and 1915 from (18) Moscow while (3) Paris is 243 miles from (18) Moscow and 1219 miles from (21) Stockholm

When the annuity is payable at the beginning instead of at the end of the year the amount for the following year less £1 must be taken. Thus for £1 at 4 per cent for 25 years take 26 years £36 012 and deduct £1—£35 012

REPAYMENT OF PUBLIC LOANS

Sums needed annually for the liquidation of a debt (principal and interest) of £100, at the stated percentage, in 10, 20, 30, 40, 50, 60 and 80 years. If the loan be for £100, each annual instalment must be multiplied by 10, and so on. Thus, a municipal loan of £100 000 at 5 per cent, repayable in 50 years would cost the ratepayers £54 781 5s. annually for that period.

THE DERBY, 1880-1923

For particulars of the Derby from 1780-1879 see 1921 edition

The Distance of the Derby is 2 mile 4 furlongs 29 yards. Sir J. Hawley scored four successes with Teignington, Foulman, Maud and Blue down the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde and Flying Fox. Lady James Douglas was the first lady to win the Derby.

Year	NAME AND OWNER OF WINNER	Beating	Trainer	Jockey	No of Runs
1880	Duke of Westminster s Bend Or	2 to 1	F Archer	R Peck	19
1881	Mt P Ioillard s Iroquois	11 to 2	F Archer	J Pheas	15

THE TURF IN 1923

(At the close of the Newmarket Hounlton Meeting)

THORNTON racing in 1923 produced no outstanding horse with the exception of Mumtaz Mahal the flying filly, a two year old, who won five races in effortless fashion and broke the five furlong record for the Bous Course at Newmarket covering the distance in 57 1/2 secs. The Aga Khan had paid 900 guineas for her as a yearling. She showed lack of stamina in her sixth attempt and was beaten. The five classic races were won by four different animals. Lord Derby's Tranquil taking the One Thousand Guineas and the St. Leger. Ellangowan winning the Two Thousand, Papyrus the Derby and Brownhylda the Oaks. Papyrus only ran second in the St. Leger in which race Ellangowan was also a failure. Brownhylda heavily penalised lost the Yorkshire Oaks to Splendid Jay but afterwards won the Park Hill Stakes run over the St. Leger course and therefore like Tranquil may be classed as a good stayer. Papyrus the Derby winner, belonged to Mr. B. Irish, a Midland farmer who in 1921 won the Ascot Gold Cup with Perlestone. These two with a moderate animal called Bar (old) are the only horses this lucky owner has possessed.

The Kings stable had some success for Weathervane won the Royal Hunt (up at Ascot for His Majesty) 10y Gallant (the previous years Galante colt) beat several classic candidates in the Newmarket Stakes but subsequently trained off. The Ascot Gold (up was taken by Mr. Hardy's Happy Man, a fine stayer) 12th 1/2 won the Goodwood (up and Lord Derby's Silurian the Doncaster (up) This was a French victory through Fipnaird in the

Stewards (up at Goodwood, and another in the Cesarewitch through Rose Prince.

Of the two year olds, Mumtaz Mahal has been mentioned. She won over £12,000 in stakes and like her sire the Tetrarch won the Champagne Stakes. Lord Derby won the old time Gimcrack Stakes with Sansovino in a field of moderate juveniles. Other good youngsters were Druid's Orb and Stratilace.

Papyrus was sent to the 1 4 to run a match with 7y the American champion but the Derby winner was easily beaten on the track at Bells. Lord Derby was an easy first in the list of winning owners, the Aga Khan and Lord Astor being next. R. (Dawson) headed the winning trainers with Elliott and Donoghue leading in jockeys list. Lord Rosbery and Lady Sykes were the most successful breeders.

Although there were no sensational prices at the Doncaster Sales if we except the filly by Gay Crusader from Lady Josephine a half sister to Mumtaz Mahal, which fetched 6,800 guineas and the colt by Phalaris from Waffles (630 guineas) the average for bloodstock was maintained. The 304 lots sold averaged 642 guineas as against 654 the previous year. At the July Sales (12th 1/2) 5,000 guineas made the highest price. The most successful sires as regards the sales were the Tetrarch, Gay Crusader, Phalaris, Buchan and Swynford.

Trotting—Fastest m in America 2 min 54 1/2 secs. by Uhlan 1912. Fastest pacing m 1 min 55 1/2 secs. Dan Patch, at St. Paul U.S.A. Sept 8 1906. At Lexington (Ky) last October Peter Manning trotted a mile in 2 min 54 1/2 secs. unplaced and without wind shields which were used in China's case.

CRICKET IN 1923

Yorkshire retained the County Championship with a truly wonderful record. They met every other county and of their 34 matches they won 25. Only one defeat was sustained, by Notts, at Leeds by 3 runs only. Four of their five unfinished matches resulted in a first innings win the fifth resulting in a first innings loss to Hampshire, also at Leeds. Notts were again second in the table. Lancashire advanced from fifth place to third, above Surrey and Kent, and Essex dropped from eighth to thirteenth place. The bottom four were again Leicestershire, Northants, Glamorgan and Worcestershire, with Northants taking the 'wooden spoon'.

Middlesex scored 642 for 3 wickets against Hants the first four batsmen all making centuries. The lowest score was Glamorgan's 35 against Surrey. Frank Woolley had the highest innings of 270 for Kent against Middlesex, and Hobbs (Surrey) completed his 100 centuries.

COUNTY CHAMPIONSHIP TABLE

County	Played	Won	Lost	No Result	Points	Position	Percentage
Yorkshire (1)	26	25	1	1	123	155.85	80
Notts (2)	26	15	4	3	1	85	125.68
Lancashire (5)	30	15	6	4	1	87	145.60
Surrey (3)	26	11	6	4	3	67	115.58
Kent (4)	26	15	0	3	9	75	135.55
Essex (9)	30	15	8	1	9	79	150.54
Hampshire (6)	26	10	6	5	1	52	135.45
Middlesex (7)	22	7	5	3	7	45	110.40
Somerset (10)	24	9	1	3	11	0	47
Derbyshire (12)	22	4	6	4	7	32	105.30
Gloucester (13)	26	7	3	3	16	0	41
Warwick (15)	26	6	12	4	12	1	36
Essex (8)	26	6	12	0	11	36	120.27
Leicester (14)	26	5	4	4	13	0	33
Worcester (17)	26	5	1	4	16	0	37
Glamorgan (16)	22	2	3	3	17	0	14
Northants (18)	22	2	1	3	16	0	12

In all 222 games were played of which 159 yielded a definite result. 58 were won on the first innings and in 5 no result was arrived at.

The figures in parentheses indicate the order of finishing in the competition of 1922.

ETON AND HARROW

Year	Winner
1912	Eton won by 6 wickets
1913	Eton won by 9 wickets
1914	Eton won by 4 wickets
1915	1915 18 no match
1916	Eton won by 221 runs
1917	Eton won by 9 wickets
1918	Eton won by 7 wickets
1919	Match drawn
1920	Match drawn

Totals Eton 3 Harrow 35 drawn 20

An England team, visiting South Africa under the leadership of F. T. Mann was successful in a series of 5 test matches, winning 4 and drawing 1. South Africa's win Russell (Essex) equalled W. Bardsley's record of scoring two centuries in one test match.

Mr. A. C. MacLaren captained an M.C.C. team in New Zealand and Australia. Of the 3 tests in New Zealand, M.C.C. won 2 and drew 1. None of the 8 matches against Australian State teams were won, 3 being lost and 5 drawn.

BATTING AVERAGES, 1923.

Batsman	Number of Innings	Times Not Out	Total Runs	Most in an Innings	Average

Bestwick	660	2	1263	91	16.29
Bettington R. H.	393	4	60	120	16.55
Freeman (Kent)	990	261	2648	157	16.82
Robertson C. Glasgow R.	670	4	126	108	17.40
Cilligan A. P.	1075	4	235	163	17.50
Garv	983	308	2121	122	17.55
Waddington	484	4	126	128	18.23

Wilfrid Rhodes, Yorkshire, is on top for the second year in succession a great feat considering his age. He also scored his 1,000 runs. Tate and Parkin exceeded 200 wickets. Twenty-four bowlers took 100 wickets or more.

MISC. LLANFOUS CRICKET RECORDS

Highest individual scores—A. E. Stoddart, 428, for Hampshire at St. Ives, 1886, in first class cricket in England. A. C. MacLaren, 424, for Lancashire v. Somerset at Taunton July 1896, in Australia W. H. Ponsford, 429, for Victoria v. Tasmania Feb. 5, 1923.

Highest totals—In England Yorkshire 887 v. Warwickshire 1896. In Australia, New South Wales 928 v. South Australia, Jan. 1901. Victoria 1059 v. Tasmania Feb. 5, 1923.

Smallest totals—Oxford University (one man absent) 22 v. M. C. at Oxford May 1877. Northants 22 v. Gloucestershire June 21, 1897.

Most runs made in a year—T. Hayward (Surrey) 1,258 in 1900. T. Hayward (1906) 1,181 v. 1901 and E. Hendren (1923) hold the record of 13 centuries in one season. T. Hayward exceeded 2,000 runs in 20 seasons.

Aggregates of 3,000 runs in a season—Hayward R. Abel, Mead K. B. Ranjitsingh C. B. Fry J. Tyldesley and E. Hendren.

ASSOCIATION FOOTBALL

ENGLAND v SCOT	ASSOCIATION CUP
1914-9 No match—War	1914 Sheffield United 2-0 No match
1920 England 2 1-0	1920 Aston Villa 5 Huddersfield 1-0
1921 England 2 1-0	1921 Tottenham 2 Wolverhampton 1-0
1922 England 2 1-0	1922 Huddersfield 5 Preston 1-0
1923 England 2 1-0	1923 Bolton Wanderers 5 West Ham 1-0

The record attendance for a football match is 127,307 at the International between Scotland and England at Hampden Park on Mar. 23, 1924. The largest gate receipts were £57,776 at Cup Final at Wembley Stadium April 26, 1923, between Bolton Wanderers and West Ham, when 126,047 persons passed the turnstiles, besides many who broke in. This is a record England attendance the previous best being 120,081 at Crystal Palace in 1923.

ASSOCIATION FOOTBALL IN 1922-23

For the third year in succession Scotland won the championship beating Ireland and Wales and drawing with England 2 goals each. Wales was at the bottom though they drew with England. Results—

Oct. 22 at West Bromwich England beat Ireland 2-0
Mar. 3 at Belfast Scotland beat Ireland 1-0
Mar. 5 at Cardiff Wales drew with England 2-2
Mar. 17 at Paisley Scotland beat Wales, 2-0
April 14 at Glasgow Scotland drew with England 2-2
April 14 at Wrexham, Ireland beat Wales 3-0
Totals (including ties) Scotland 7, England 2, Wales 2, Ireland 2. This series started in 1883-84.

AMATEUR INTERNATIONALS

Three Amateur Internationals were played the fixture with Belgium having been resumed. Results—
Nov. 22 at Preston England beat Ireland, 4-0.
Jan. 27 at Middlesbrough England drew with Wales 4-4.
May 5 at Brussels Belgium beat England 3-0.

INTER LEAGUE MATCHES

The English Football League won both their matches with the Irish and Scottish Leagues. Results—
Oct. 4 at Bolton English 1, beat Irish 1, 5-1
Oct. 18 at Glasgow Scottish 1, beat Irish 1, 3-0
Feb. 17 at Newcastle English 1, beat Scottish 1, 2-1

PRINCIPAL CUPS

FRESHMAN—Bolton Wanderers beat West Ham United, 2-0 at Wembley Stadium on April 28, where the crowd broke the barriers and 126,047 passed the turnstiles receipts £57,776 but a large amount was returned to ticket-holders who failed to gain admission.

AMATEUR—London Caledonians beat Freshman 2-1.

AMATEUR F.A.—Aquarians beat Eastbourne 3-2.

SCOTTISH—Celtic beat Edinburgh Hibernians 1-0.

WELSH—Cardiff (City) beat Aberdare Athletic 3-0.

IRISH—Lindfield beat Lenton 2-0.

LEONOV—Charlton Athletic beat Crystal Palace 2-1.

LONDON AMATEUR—Nunhead beat Bromley 1-0.

LEAGUE COMPETITIONS

LEAGUE I—Liverpool, 66 pts.

LEAGUE II—Notre County, 53 pts.

LEAGUE III (Southern Section)—Bristol City, 59 pts.

LEAGUE III (Northern Section)—Nelson, 51 pts.

SCOTTISH—Glasgow Rangers, 55 pts.

WELSH—Cardiff (City), 74 pts.

LONDON—Millwall United, 43 pts. (First Division).

LONDON COMBINATION—Arsenal, 49 pts.

SOUTHERN—Bristol (City) Res. (English section).

Philw Vale (Welsh section).

CENTRAL—West Bromwich Albion, 63 pts.

MIDLAND—The Wednesday Res., 63 pts.

BIRMINGHAM—Shrewsbury Town, 59 pts.

IRISHMAN—Clapton, 37 pts.

ATHLETIC—Bromley, 40 pts.

RUGBY UNION IN 1923

England wrested the International Championship from Wales by winning all four matches against Scotland, Ireland, Wales and France. Scotland was second with 3 wins and 1 lost game. Ireland, Wales and France each won 1 match. There were no drawn games. Results—

Jan. 20 Twickenham—England beat Wales 10 to 3
Jan. 26 Edinburgh—Scotland beat France 16 to 8
Feb. 8 Cardiff—Scotland beat Wales 11 to 8
Feb. 20 Leicester—England beat Ireland 23 to 5
Feb. 24 Dublin—Scotland beat Ireland 13 to 3
Feb. 24 Swansea—Wales beat France 16 to 8
Mar. 20 Dublin—Ireland beat Wales 8 to 6
Mar. 27 Edinburgh—England beat Scotland 8 to 6
Apr. 3 Paris—England beat France 28 to 3
Apr. 14 Paris—France beat Ireland 14 to 8
At Twickenham Cambridge University beat Oxford University by 3 goals 6 tries (42 points) to 2 goal 1 try

(5 points). Oxford have in the series won 20 games Cambridge 16 and 9 have been drawn.

The County Championship was won by Somerset who beat Leicestershire in the final by 1 goal 1 try (6 points) to 2 tries (6 points).

THE RUGBY LEAGUE IN 1922-23

Formerly the Northern Union the Rugby League held its many competitions having no rivaling team from overseas. The four top clubs in the League Table were Hull Huddersfield Swinton and Hull Kingston Rovers. These met for the championship. Huddersfield and Hull Kingston Rovers met in the final and the Rovers won by 25 points to 5. Leeds won the Challenge Cup. York beat Batley for the Yorkshire Cup and Wigan beat Leigh for the Lancashire Cup. Yorkshire and Lancashire jointly held the County Championship.

AVIATION

Aerial Derby (1914-23).

1914 W. L. Brock	Morane 80 h p	72 m p h
1919 G. G. Atherton	Aircro 40 h p	123 5
1920 F. T. Courtney	Martinsyde	153
1921 J. H. James	Bamel	163 34
1922 J. H. James	Napier Lion 450 h p	178
1923 L. L. Carter	Napier Lion 450 h p	192 4

The King's Prize (1923) over a course from Hendon to Glasgow was won by Birmingham and Newcastle and back via Manchester and Bristol (about 80 miles) was won by F. T. Courtney with a 300 h p. Jaguar air-cooled engine (Biddle's Siskin aeroplane) in 5 hrs 24 min. 51 secs flying time average speed 109 miles an hour.

The Schneider Cup for flying boats in the Solent was won by the United States (Lieut. Rittenhouse) another American seaplane being second, with Great Britain third. The distance was 28½ miles, which the winner covered in 1 hr 12 min 26 secs a speed of 175 miles per hour which is a seaplane record.

Gordon Bennett Aerial Cup (1910-30)

Place	Won by	Pilot	M p h	Machine
1910 New York	St. Britain	G. White	60	Bleriot
1912 Eastchurch	America	Weyman	79	Nieuport
1913 Chicago	France	Vedrine	104	Dupont-Dumas
1913 Reims	France	Prost	124	Dupont-Dumas
1920 Le Havre	France	Leconte	75	Nieuport

* The Cup was won outright by France.

Ballooning

Gordon Bennett (cup) in 1923 was won by Belgium (E. Demuyter pilot) distance covered about 620 miles. The event was accompanied by tragic incidents four out of fifteen balloons being struck by lightning and brought down. Five persons were killed. An English balloon fell into the Cattegat but the passengers were rescued. The Ballooning Record is 286 miles held by German. British record is 127 miles French record (Blenheim 1912) is 375 miles.

A new airship record was made in 1923 by the French dirigible Dixmude with a non-stop flight of 128 hrs 41 min covering 4,600 miles. The previous record was held by the R. 34 (British) which crossed the Atlantic

Champion Cup—Robots beat Indian Tigers
Inter Regimental—XVII-XXI Lancers beat XV-XIX Hussars
Universities—Cambridge beat Oxford
Madrid Cup—Welch Guards beat Coldstream Guards
Patrician Cup—England beat Ireland
Harrington Cup—Commons beat Lords
Public Schools—Old Rugbians beat Old Etonians

BILLIARDS IN 1923

The Professional Championship of Billiards changed hands. W. Smith, of Darlington, wresting the title from T. Newman of London. The match was 16,000 up and Smith won by 800 points. Smith held the title in 1920 but had stood down till this occasion on account of a quarrel with the ruling body. There was a representative entry for the contest those beaten in preliminary heats being: T. Reece, A. F. Peall, M. Inman and C. Falkner.

Apart from the championship the most interesting event during the year was a match between Smith and Newman. This consisted of a series of 7 games (each 16,000 up) the winner to receive £2,000 and the maker of the highest break £500. Smith won 4 games out of 7 and aggregated 250 points, Newman 8,200. Newman won the best prize with a break of 972. Smith's highest being 732.

AMATEUR CHAMPIONSHIP—W. P. McLeod (Middlebrough) beat in the final J. Graham Symes (the holder) by 333 points in 3,000 up. This was a reversal of the previous year's result.

BREAKS—On Feb. 27, 1920, Falkner made 870 with ivory balls. On May 6, 1920, T. Newman scored an all round break of 1,024 with ivory balls, this being the largest apart from George Gray's (red ball) and anchor cannon break. T. Reece also made a break of 872. Best spot-barred break (exhibition match), 3,396, by W. J. Peall. 1820, match for money, 2,032, by W. J. Peall. 1820. Best spot-barred breaks 1,324, by John Roberts 1824, and 1,467, by T. Taylor 1821. With composition balls the highest breaks are 2,190 (1924) and 2,600 (off the red), by George Gray 1823, 2,600, by H. W. Stevenson (under R.C.C. Rules) Oct. 1922. Other large breaks with ivory balls under either B.A. or B.C.C. Rules are 1,324 by G. Gray 1924, by H. W. Stevenson 1922, by T. Newman (October, 1922) and 822, by John Roberts in 1902. By means of the now abolished cradle cannon W. Cook in June 1907 scored 42,796. The highest freak break was 499,133, by T. Reece with the anchor cannon in 1907. In 1904, with composition balls Walter Lindrum made a break in 1922 of 1,427.

CHIEF GOLF EVENTS IN 1923

INTERNATIONAL POLO

ENGLAND v AMERICA

In 1886 the Westchester Club of America

invited the Hurlingham Club to send a team

to the U.S.A. to compete for a challenge cup

and the following matches have been played—

1886 *England beat America 2 matches to 0

1890 *England beat America 2 matches to 0

1909 *America beat England 2 matches to 0

1912 *America beat England 2 matches to 0

1921 *America beat England 2 matches to 0

1922 *England beat America 2 matches to 0

1922 *America beat England 2 matches to 0

1923 *America beat England 2 matches to 0

In 1922 Played in America. 1 Played in England.

In 1922 Both the British and American Championships

were won by Argentina.

In 1923 Meadowbrook (U.S.A.) beat British Army for

the Waterbury Cup and also in the International

Close-Times for Game, Wild Birds, and Fish. 453

CLOSE SEASON FOR GAME, WILD BIRDS, &c

It is illegal to pursue the different kinds of game between the following dates (inclusive) —

GAME.	ENGLAND	SCOTLAND
Black Game or Heath Fowl	11 Dec. to 19 Aug. (31 Aug. in Somerset, Devon and New Forest)	11 Dec. to 19 Aug.
Bustard	1 Mar. to 31 Aug.	None
Deer Male	None	None
" Fallow Male	None	None
*Grouse or Red Game	11 Dec. to 11 Aug.	11 Dec. to 11 Aug.
*Hare	None	None
*Heath or Moor Game	None	As 'Muir fowl
Landrail, Quail	As "Wild Brds.	As "Wild Brds.
*Muirfowl, or Ptarmigan	None	11 Dec. to 11 Aug.
*Partridge	1 Feb. to 1 Aug.	1 Feb. to 1 Aug.
*Pheasant	1 Feb. to 1 Sept.	1 Feb. to 1 Sept.

It is also unlawful to kill the game marked * on a Sunday or Christmas Day

In *England and Wales*, hares rabbits wood cock, snipe, quail, landrail and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close time for all these birds is, under the Wild Birds Protection Acts 1880 to 1908, from 1 March to 31 July, both inclusive. Otherwise this close time applies to all wild birds throughout Great Britain. The penalty for killing any wild bird in such close time, or for selling or having in possession between 16 March and 31 July, both inclusive (unless the killing can be proved to have occurred at a time and place to which the Act does not apply), is a reprimand and costs for the first offence, and £2 and costs for each bird for every subsequent offence, or in the case of the undermentioned birds £1 for each bird for each offence. In any case the Court may also order the forfeiture of any bird (or eggs, where protected—see next column) in respect of which the offence was committed. In the Island of St. Kilda the fork tailed petrel and St. Kilda wren are deemed to be included in the following list, and the birds marked ‡ to be omitted

Auk	Dotterel	‡Guillemot.
Avocet.	Dunbird	Gull (except black backed)
Bee eater	Dunlin	Hoopoe
Bittern	Elder duck	Kingsfisher
Bonxie	Fern-owl	Kittiwake.
Colin.	‡Fulmar	Lapwing
Cornish chough	‡Gannet.	Lark.
Cooterneb.	Goatsucker	Loon
Cuckoo.	Godwit.	Mallard.
Curlew	Goldfinch.	Marrot.
Diver	Grebe.	‡Merganser
	Greenshank.	

Murre.	Redshank	Spoonbill
Night hawk.	Reeve or Ruff	Stint
Night jar	Roller	Stone curlew
Nightingale.	Sanderling	Stonehatch.
Oriole	Sandpiper	Summer snipe
Owl	Scout.	Tarrock.
Ox bird	Sealark.	Teal
Oyster catcher	Seamew	Tern
Peewit	Sea parrot	Thicknee.
Petrel	Sea swallow	Tystey
Phalarope	Shearwater	Whaup
Plover	Sheldrake	Widgeon.
Ploverspage	Shoveller	Wild duck.
Pochard	Skua	Willcock.
‡Puffin	Smew	Wimbrel
Purie	Snipe	Woodcock
‡Razorbill	Solan goose	Woodpecker

Offenders refusing their names and addresses are liable to a further penalty of 20s., but the Acts do not apply to any person shooting on his own land, or authorising anyone so to shoot, any wild bird not included in the above list

On the application of the local authorities the Secretary of State in England and Wales or the Secretary for Scotland in Scotland has power to vary or abolish the close time for any bird or birds in any county by order to be published in the *Gazette*. They may also direct that the above enactments shall apply to any wild bird not specified in the list, and may further prohibit the taking of the eggs of any wild bird in any county or part thereof. The Secretary of State in England and Wales or the Secretary for Scotland, may also on the application of the local authorities make an order providing that in any specified area the taking or killing of any particular kinds of wild birds shall be illegal during any period specified in the order. These various powers have been exercised in many cases—too numerous to recapitulate here

Penalties are imposed on persons setting springs guns &c., on poles, trees mounds &c., so as to injure wild birds. Persons permitting such acts are equally liable. The use of a hook or like instrument for taking wild birds is forbidden.

HUNTING AND GROUND GAME.

There is no statutory close time for fox hunting or rabbit shooting, nor for deer or hares but there is an unwritten law" which the sportsman respects as much as he does the enactments of Parliament. The first Monday in November is the recognised date for the opening of the fox hunting season, which continues till the following April. Other hunting lasts from mid April to mid September. The period for deer hunting, or stalking varies from about 12 Aug. to 12 Oct. for stags, and from 20 Nov. to the end of March for hinds. By an Act passed in 1824 the sale of hares or leverets in Great Britain is prohibited from March to July inclusive under a penalty of a pound.

ANNUAL CLOSE-TIME FOR SALMON

Salmon and Freshwater Fisheries Act, 1923—This new Act comes into force on 1 Jan. 1924. It is "an Act to consolidate and amend the enactments relating to Salmon and Freshwater Fisheries in England and Wales" [26 July, 1921]. By this Act the numerous Acts relating to our inland fisheries have been consolidated and brought up to date with a view to meeting modern requirements

The new Act comprises 94 sections and it should be of considerable benefit to fishery boards, riparian owners, anglers and to the inland fisheries generally. The so-called "coarse fish" (freshwater fish in the Act) have received additional protection. The important question of pollution is dealt with in three sections —

Section 3 enables police court proceedings to be taken where an effluent causes water to be poisonous or injurious to fish or the spawning grounds spawn or food of fish. The same section provides for notice being given to the fishery boards or to the Minister of Agriculture and Fisheries where the construction of new works or the alteration of existing works are contemplated.

Section 55 authorizes a fishing board to institute or aid any person or local authority in instituting proceedings under the Rivers Pollution Prevention Acts 1876 to 1893, and, subject to certain safeguards, to extend the scope of those Acts to tidal waters.

Section 59 (1) (p) enables fishery boards to regulate by bye law the discharge of specified effluents. These sections do not interfere with the common law right of procedure by action for injunction and damages. Although the Act provides powers for dealing with pollution procedure in the nature of peaceful persuasion on the lines adopted by the Standing Committee on Rivers Pollution is likely to have much more comprehensive results than litigation.

Power has been given fishery boards to acquire fisheries, by purchase or lease and to let the fishing rights and also to acquire obstructions to the passage of salmon and migratory trout.

Anglers who fish for trout and coarse fish are now entitled to representation on the Fishery Boards, the number of such representative members not to exceed one third of the total number of members of the fishery board in the preceding year. These representatives will be appointed under schemes approved by the Minister and pending the constitution of schemes, by the Minister.

The Minister may by Order on any application he may deem sufficient, require anglers to take out licences to catch freshwater fish i.e. coarse fish, in a fishery district.

Coarse fish as well as salmon and trout, illegally bought, sold or exposed for sale or in the possession of any person for sale may be seized by an authorized officer.

WEEKLY CLOSE TIME

In England and Wales net fishing for salmon is prohibited from noon Saturday to 6 a.m. Monday, with an extension to 48 hours in certain districts.

In Scotland, from 6 p.m. Saturday to 6 a.m. Monday, and rod fishing on Sundays.

1. ENGLAND AND WALES (including the Fek in Dumfries). The close time for salmon (including all migratory fish of the genus salmon) begins, for nets, on 1 Sept., and for rods on 1 Nov. for both nets and rods it ends on 1 Feb. For putts and putchers the annual close season is from 1 Sept. to 1 May. By an Act of 1907 the Ministry of Agriculture and Fisheries may make provisional orders varying the law on these and other points. The close time may also be varied by bye law by local boards of conservators, provided it begins for nets not later than 1 Nov. with a minimum of 134 days, and for rods not

later than 1 Dec. with a minimum of 92 days. The statutory dates have been varied as follows —

No fresh salmon may be sold between 31 Aug. and 1 Feb., except such as come from parts beyond the seas, or as have been taken if in the United Kingdom, by legal netting. During that period all packages containing salmon consigned by any common or other carrier must be clearly marked with the word "Salmon." Salmon, dried, pickled or cured abroad, or, if within the United Kingdom between 1 Feb. and 31 Aug., may be sold after that date. The onus of proof that the fish were caught out of the United Kingdom or, if within the kingdom, that they were caught during the legal netting season by legal means or that, if pickled, they were pickled between 1 Feb. and 31 Aug., lies with the person selling or exposing, for sale. The exportation of salmon from any part of the United Kingdom is prohibited between 31 Aug. and 30 April, unless caught at a time at which its sale in the place where it was caught would be legal if in the United Kingdom. The onus probandi lies on the person exporting. The

CLOSE TIME FOR TROUT AND CHAR

In Scotland there is a close time for trout from 15 Oct. to 28 Feb. For pollan the close time is from 14 Nov to 31 Jan.

Between Sept. 3 and Feb. 1 all packages in England and Wales consigned by any common or other carrier and containing trout or char must be distinctly marked with the word "Trout" or "Char," as the case may be.

The capture of trout and char in England and Wales is prohibited between 2 Oct. and 1 Feb. except (1) in the Thames and Lee, where the close season is from 21 Sept. to 31 March, and (2) in the cases noted below, where, under an Act of 1876, the close-time (for rods and nets, except where specified) has been varied by bye-law by local boards of conservators. In the districts marked * the close-time applies only to trout. The sale of trout and char is prohibited throughout England and Wales between 31 Aug and

1 March, unless for fish propagation stocking or re-stocking of waters or for some scientific purpose —

CLOSE TIME FOR FRESHWATER FISH

By the Freshwater Fisheries Act 1876, a close time for catching, selling or buying "freshwater fish" (which are defined for this purpose to include all kinds of fish other than pollen trout, and char, which live in fresh water, except those kinds which migrate to or from the open sea) is fixed from 15 March to 15 June both inclusive, for England and Wales except small parts of Norfolk and Suffolk under a penalty of £5 for a first and £15 for a subsequent conviction. The close season, however, does not apply to eels taken otherwise than by angling or to freshwater fish other than grayling taken in certain private waters by leave of the owner or to angling in public waters by leave of a board of conservators, or in private waters by leave of the owner or to taking fish in certain cases for bait or for scientific purposes. Fishery districts may be wholly or partially exempted from this close-time with the sanction of the Ministry of Agriculture and Fisheries. The

- 1 River Avon between Amesbury and Bickton only above Amesbury 15 Oct. to 31 Mar
- 1 Char close-time throughout district 1 Nov to 1 Mar
- 1 2 Oct. to 1 April for R. Duddon and 16 Sept. to 15 Feb for R. Bela.
- 11 April 30 between Lostwithiel and St. Wunnow.
- 1 2 Oct. to 30 June from R. Gwith to G. W. R. Bridge.
- 1 2 Oct. to 15 Mar in certain reservoirs.
- ** Or Thursday preceding Good Friday whichever date is the earlier.
- 11 In area of Norfolk Fisheries Provisional Order only; elsewhere in Norfolk close-time for nets 28 Sept. to 10 Jan.
- 11 Bela Lake 14 Sept. to 24 Jan

* Except Ears, rods, 1 Nov to 31 Jan

Axe, Avon (Devon), Wye, Eden, and Towy districts have been so exempted, also the Kent and Bela and Severn as regards pike, the Usk as regards eels and parts of the Severn as regards fish other than grayling. For eels a separate close time exists (so far as regards fixed engines in salmon rivers) in England from 1 Jan to 24 June in Ireland, with one or two exceptions, from 11 Jan to 30 June. In the Severn, eel fry are protected between 1 Jan. and the last day of Feb., and between 25 April and 25 June both inclusive. Certain other local close times exist for fresh water fish, under local Acts or bye laws.

PROTECTION OF CRABS AND LOBSTERS

Under the Fisheries (Oyster, Crab, and Lobster) Act, 1877, it is prohibited to buy or sell crabs under 4½ inches, measured across the largest diameter of the back or lobsters under 8 inches measured from tip of beak to end of tail when spread out flat. The capture of "soft" crabs and crabs with spawn is also prohibited. By local bye laws of Sea Fisheries Committees (*vide infra*) the minimum size of lobsters and crabs that may be lawfully taken in different parts of the territorial seas has been increased, and in

some cases the taking of lobsters with spawn is prohibited, or a close season fixed.

CLOSE TIME FOR OYSTERS.

There are also local regulations for the protection of oysters and by the Fisheries (Oyster, Crab, and Lobster) Act, 1877, a close time for the capture and sale of "Deep-Sea Oysters" is fixed for England and Scotland, from 15 June to 4 Aug. and for all other kinds of oysters—except oysters taken in the waters of a foreign state—from 14 May to 4 Aug. By the Sea Fisheries Act 1868, fishing for oysters is prohibited from 16 June to 31 Aug in the English Channel between lines drawn (1) from North Foreland to Dunkirk and (2) from Land's End to Ushant—the territorial seas of England and France being excepted. This close time, however, cannot be enforced till the Convention between England and France, included in the Act is ratified until that is done, the Convention concluded in 1899, which prohibits oyster fishing in those limits from 1 May to 31 Aug., remains in force so far as French fishermen are concerned. But both Powers usually agree to suspend the close season till 16 June in each year.

Licences for Fishing and Shooting

FISHING LICENCES.—In all fishery districts in England and Wales, and in Ireland, a licence to fish for salmon is necessary, and in most English and Welsh rivers a similar licence is necessary for trout or char, except that a salmon licence includes the latter. In the Lune, Derwent, Severn, and Wye and in Norfolk licences for "freshwater fish" are in force. No licence is required for Thames trout or general fish. In Scotland no licence is needed. A licence is available only in the district, and for the season, in which it is issued. The rates on salmon nets and other like instruments range from £50 downwards in England and Wales. The rate on draft nets in England and Wales varies from £3 to £5. In England and Wales different rates are charged in different districts for a salmon rod and line as follows (an asterisk signifies that lower rates of duty are chargeable for short periods, or for certain parts of the district) —

*Dee, 40/- *Eden, *Derwent, *Exe, Hampshire, *Wye, *Itak 30/- Taw and Torridge, 24/- *Lune, *Ribbles Cwyd & Elwy, *Conway, *Dovey *Teify, Avon (Devon), *Dart, *Teign, *Trome, *Stour (Kent), *Yorkshire, *Tees, *Tyne, 20/- *Dwyfach, Towy, 21/- *Seilont, Avon, Brue & Parret Axe, *Camel, *Yowey, 15/- Cledy, Taff & Ely, Ogmone, W. Cumberland, 10/6. *Kent & Leven, Rhymney, *Ayrton, Severn, Axe, Trent, Tamar & Plym, 10/- *Eak (Yorkshire), 7/6 Ouse (Sussex), Wear, Coquet, Cuckmere, Bother, Adur, 5/-

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes, proprietors, or tenants, on enclosed land, killing rabbits, persons hunting deer, or hares, with hounds, owners or occupiers, or their servants, killing deer on their own enclosed land, beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so,

without a licence but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, territorial soldiers, or constables, on duty or at practice, need not take out a gun licence nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows —

GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following	£3 0 0
After 31st July, to expire following 31st October	2 0 0
After 31st Oct., to expire 31st July	2 0 0
Licence for a continuous period of fourteen days	1 0 0
Gamekeeper's (Great Britain), to expire 31st July	2 0 0
Game-Dealers' Licence, to expire 1st July, annually	2 0 0
DEPUTATION or Appointment of a Gamekeeper	0 10 0
GUN LICENCES (gun or pistol)	0 10 0

Payment is now rigidly enforced, even to the carrying of a revolver or air gun. Persons holding game licences, soldiers and volunteers carrying a gun in the performance of duty or when engaged on target practice are exempt, but the licence cannot be transferred to a son or to a servant. Expire 31st July

Fishery Districts, Boards of Conservators, &c.

457

ENGLAND AND WALES.—The administration of the laws of close season, &c., for salmon and freshwater fish is placed by the Salmon and Freshwater Fisheries Acts, 1861 to 1907, and the Ministry of Agriculture and Fisheries Act, 1903 in the hands of local boards with the Ministry of Agriculture and Fisheries as the central authority

qualified by ownership of lands or fisheries of a certain value and representative members, elected annually by persons who have paid licence duty on instruments other than rod and line for salmon fishing, in public waters. In certain cases there are also members representative of freshwater anglers. Districts

Tyne	Souter Point to Newbiggin Point	—
Coquet	Newbiggin Point to Hawick Burn	—

ity Districts may be formed and Boards of Conservators appointed, and the following districts have been formed, including generally all rivers running into the sea between the points named. Except in the cases marked † they also include the sea for three miles from the shore, or to the mid channel in estuaries.

These Boards of Conservators consist mainly of three classes of members—those appointed annually by the Councils of the various counties through which the rivers flow, ex-officio members,

where Provisional Orders are in force are marked thus *

There are also certain bodies created by local statutes, having authority over the fisheries e.g., the Thames Conservancy Board, Port of London Authority, Lee Conservancy Board, and Conservators of the Medway.

The above-mentioned Boards have power to make bye-laws, not only for the regulation of the fisheries for salmon and freshwater fish, but also, in certain cases, for the regulation of other

kinds of fishing which are prejudicial to such fisheries. They are also empowered to issue licences for fishing for salmon, trout, and in some cases freshwater fish generally.

SCOTLAND—In Scotland there are 105 Fishery Districts, nearly each separate river forming a district of itself, but only 37 Boards of Conservators. The powers of these Boards are limited to the Salmon Fisheries.

IRELAND—In Ireland there are 24 districts, embracing between them the whole country, each with a separate Board of Conservators.

SEA FISHERIES DISTRICTS—Under the Sea Fisheries Regulation Act, 1888 to 1894 the Ministry of Agriculture and Fisheries has power to form sea fisheries districts within the territorial waters of England and Wales and to constitute local Fisheries Committees either for a single county or borough, or for several jointly. These committees have power to make bye laws to be confirmed by the Ministry of Agriculture and Fisheries regulating or prohibiting the use of

instruments for the capture of sea fish (including shell fish and crustaceans, but excluding salmon), the deposit of rubbish on fishing grounds, &c. The following districts have been created, including in each case the adjoining coast and territorial seas between the points respectively mentioned—
1. Northumberland (coterminous with that county). 2. North Eastern from Northumberland to Donna Nook in Lincolnshire. 3. Eastern, Donna Nook to Yarmouth. 4. Kent and Essex, Dovercourt to Dungeness including the Thames estuary to London Stone near Yantlet Creek. 5. Sussex (coterminous with that county). 6. Southern Western boundary of Dorset to Hayling Island. 7. Devon, and 8. Cornwall (each coterminous with the respective counties). 9. South Wales, Eastern boundary of Cardiff to Penmaes Head. 10. Lancashire and Western, Penmaes Head to Haverigg Point. 11. Cumberland, Haverigg Point to Park Foot.

Similar districts may be formed in Scotland under the Sea Fisheries Regulation (Scotland) Act 1895.

Seasonable and Unseasonable Fish

THE following table shows the periods when the different kinds of edible fish mostly in use are in season and out of season.

The letter *p* signifies that the fish are then

in their prime or most plentiful, the letter *x* signifies that the fish may be obtained, but are not at their best, the letter *a* signifies that it is "close time" as fixed by statute.

(a) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh water cray fish from March to June.

(b) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(d) In the close season, salmon from Holland and also from certain British rivers where hot fishing is permitted later in the year than usual are largely sold.

(e) For the first six months the bulk of our London supply of shrimps comes from Holland but Dutch shrimps are far inferior to the English which are plentiful from July to December.

Hunts and Hounds.

21. Oxford v. Cambridge (Hockey) at Beckenham—Army v. Navy (hockey)—Newmarket Chases
22. Kempton Park Chases
23. Scotland v. Ireland (Rugby)
24. Edinburgh—England v. France (Rugby)
25. Twickenham—Ireland v. Wales (hockey)
27. Derby N.H. Meeting
28. R.A.F. v. Navy (hockey)—Plumpton Meeting
29. Met P. H. v. Eborac (hockey)
30. Gatwick N.H. Meeting

March

1. Wild Bird shooting ends—Scotland v. Ireland (Hockey)
3. Hawthorn Hill Chases
5. Sussex County Coursing (3 days)—Manchester Chases
7. Lingfield Park N.H. Meeting
8. Wales v. Ireland (Rugby) (Cardiff)
9. England v. Wales (hockey)
11. National Hunt Meeting at Cheltenham (3 days)
12. Army v. R.A.F. (Football)
15. England v. Scotland (Rugby)
16. Twickenham—England v. Scotland (hockey)—Hurst Park Chases
17. Welverhampton Chases
20. Sandown Park Meeting
21. Grand Military Meeting—Sandown
22. England v. Ireland (hockey)
24. Flat racing opens at Lincoln
25. Oxford and Cambridge (Hockey)
27. Liverpool races (3 days)—France v. Wales (Rugby)
29. Lingfield races
31. Warwick flat races.

April.

1. Derby flat races—Household Brigade Meeting—Hawthorn Hill
2. British v. Belgium Army (Football) at Woolwich
4. Windsor and Ayr races.

April (continued).

5. University Boat Race
5. Final F.A. Amateur Cup
7. Leicester races
9. Army v. Navy (Football) at Alder shot—Amateur Boxing (Champion ships)—Gatwick races
11. Newbury races—Eglington Hunt races (a day)
14. Nottingham races
16. Folkestone Utoxeter and United Border Hunts Meetings
19. England v. France (hockey)
21. Kempton Birmingham and New castle flat races—Ireland v. France (hockey)—Manchester Chases
22. Aldershot Chases (a day)
23. Newmarket Craven Meeting
25. Catterick Bridge races
26. Alexandra Park races—Final F. H. Cup at Wemley
28. Edinburgh flat races
29. Epsom Spring Meeting
30. Pontefract races

May

1. Sandown Park races
2. St. Albans races.
3. United Hunts at Lingfield
4. Newmarket First Spring Meeting
7. Hexham and Newton Abbot Meetings (a day)
8. Worcester N.H. Meeting
9. Thirsk races
10. Hurst Park races
12. Lower races—Southwell Hunt
13. Chester races
14. Wye N.H. Meeting
16. Kempton Jubilee Meeting—Ripon
19. Utoxeter N.H. Meeting (a day)
20. Newmarket and Spring Meeting
21. Gatwick and Haydock races
23. York races
25. Bath races
26. Salisbury and Doncaster races
30. Ayr races
31. Lingfield Second Spring Meeting

June

1. Shirley Hunt races
3. Epsom Summer Meeting opens
4. Derby Day
6. Oaks Day
7. Kempton races
9. Hurst Park Redcar and Wolveshampton races
11. Manchester and Yarmouth races
12. Folkestone races
17. Ascot Meeting opens
18. Royal Hunt Cup
19. Ascot Gold Cup
21. Windsor races
23. Birmingham and Brighton races
25. Newbury and Newcastle races
27. Sandown Park races

July

1. Newmarket and Carlisle races
3. Worcester races
4. Harrod Park races
5. Alexandra Park
7. Nottingham races
8. Ribury Club races at Salisbury
9. Pontefract races
11. Lingfield races
12. Ayr races
15. Newmarket Second July Meeting
16. Llanwrthwl races
18. Sandown Park (Eclipse) Meeting
21. Leicester races
23. Liverpool Summer Meeting
25. Hurst Park Summer Meeting
29. Goodwood races (a day)

August.

1. Catterick races
3. Alexandra Park races
4. Bank Holiday—racing at Sandown, Birmingham and Ripon.
5. Brighton races.

August (continued)

8. Lewes races
11. Nottingham and Folkestone races
12. Grouse shooting begins
13. Kempton and Redcar races
15. Windsor races
16. Wolverhampton races
19. Stockton races
20. Bath Summer Meeting
21. Hurst Park races.
25. York August Meeting
26. Devon and Exeter Chases (a day)
29. Gatwick and Haydock Meetings

September

1. Partridge Shooting begins—Lewes races—Southwell Hunt
2. Derby Summer Meeting
3. Plymouth Chases (a day)
5. Manchester September Meeting
8. Folkestone September Meeting
9. Doncaster September Meeting
10. Race for the St. Leger
13. Alexandra Park races
15. Warwick Autumn Meeting
16. Wye Chases
17. Yarmouth and Ayr races
19. Lingfield Park races
20. Windsor September Meeting
22. Leicester and Llanwrthwl races.
24. Edinburg and Gatwick races.
25. Newbury and Catterick races
26. Birmingham races—Wye Chases
29. Newmarket St. October Meeting

October

1. Pheasant Shooting begins.
2. Thirsk races (a day)
4. Alexandra Park races
6. Nottingham races (a day)
8. Bath and Pontefract (a day)
10. Kempton Park and Haydock races (a day)
13. Wolverhampton races (a day)
14. Newmarket St. and October Meeting (a day)
16. Endulow N.H. Meeting (a day)
19. Lingfield Park races (a day)
21. Newbury and Newcastle (a day)
23. Doncaster Meeting (a day)
24. Sandown Park races
25. Stockton races
27. Nottingham Chases (a day)
29. Newmarket Houghton Meeting
30. Worcester races
31. Wetherby Chases (a day)

November

1. Alexandra Park races
1. Lincoln Autumn Meeting (a day)
3. Wolverhampton N.H. Meeting
5. Liverpool Meeting (a day)
7. Windsor races (a day)
10. Leicester races (a day)
12. Derby races (3 days)—Cheltenham Chases (a day)
15. Hurst Park races
17. Warwick Meeting (3 days)
19. Worcester New Meeting
22. Flat racing ends
24. Birmingham N.H. Meeting
26. Newbury Chases (a day)
27. Kempton Park Chases (a day)

December

1. Leicester N.H. Meeting (a day)
2. Gatwick N.H. Meeting (a day)
5. Haydock Park and Sandown Park Chases (a day)

- Workman, C. H., the Savoyard, aged 69.—*May 1.*

Principal Charitable Bequests of the Year.

463

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share of the residuary estate, or consisting wholly or in part of business interests, or of blocks of shares for which a definite value cannot be given. The outstanding feature of the year is furnished by the bequests of Lord Northcliffe. These bequests are reversionary and subject to life interests and it will probably be many years before the whole sum becomes available for the charitable purposes for which it was left principally for press and printers charities. Hospitals and educational trusts account for the bulk of the bequests, although orphanages and the Lifeboat Institution figure somewhat more prominently than usual. The Stock Exchange Benevolent Fund receives £25,000 under the will of Col Sir Robert Inglis and the Grand Lodge of Scotland £5,000 for the children of necessitous Freemasons under the will of Mr John D Forrest. There appears to be a prospect that *bona fide* hospitals may, in the near future, be relieved from payment of the duty of 10 per cent on legacies received by them in the same way as they are relieved, in certain circumstances from the payment of income tax on their funds.

Name	Gross Value £	After Tax £	
Northcliffe Viscount, of 1 Carlton Gardens S W	3,250,000	2,000,000	Reversionary bequest of residue to Newspaper Press Fund, Newsend's Provident Institution and Printers' Almshouses and Orphan Asylum.

Sir Auckland Geddes and Mr Mellon signed final and formal War Debt Agreement. **July 30** Condition of President Harding gave cause for anxiety. **Aug 2** After showing improvement Mr Harding died suddenly from stroke cerebral apoplexy. **3** Mr Coolidge the Vice President was sworn in as 30th President and declared his intention of carrying out the Harding policies. **8** Body of Mr Harding conveyed, with impressive ceremony, from White House to the Capitol Rotunda. **10** Funeral took place quietly at Marion the nation paying tribute by a two minutes silence. **20** Report of Sir Auckland Geddes on Ellis Island Immigration Station severely criticised certain of arrangements. **Sept 9** Seven destroyers went ashore on rocks near Santa Barbara, California, and were all total losses, 25 of crews being drowned. **24** Mr Coolidge delivered his first public address as President. **Oct 5** Mr Lloyd George warmly greeted on arrival in New York with his party. **16** After visiting Canada Mr Lloyd George gave public address at Minneapolis, and was adopted into tribe of Sioux. **20** Derby winner, Papyrus, beaten by Zev on dirt track at Belmont. **25** Mr Lloyd George arrived at Washington and visited White House.

FRANCE

(1922) **Nov 20** Marquis of Crewe appointed British Ambassador at Paris. (1923) **Jan. 2**

Allied Conference upon reparations and inter Allied debts met in Paris. Mr Bonar Law and M. Poincaré submitted British and French proposals respectively. **4** Differences between French and British views appearing irreconcilable, conference came to an end. **Feb. 4** Speaking on the Ruhr question M. Poincaré said France would not give way, but would examine sincere proposals from Germany. **Mar 26** Madame Sarah Bernhardt died. **May 6** France rejected Germany's new offer to Allies for settlement of reparations question including proposal to limit payments to 30 milliard gold marks. **21** M. Poincaré telegraphed message of sympathy to Mr Bonar Law on his resignation. **24** After Senate's decision that it could not try Communists for conspiring against the State, M. Poincaré tendered his resignation but this was refused, and then withdrawn. **June 10** Pierre Loti (Captain Julien Vland) died. **16** Chamber of Deputies passed vote of confidence in M. Poincaré by 326 to 162. **July 3** Duke of Connaught inaugurated Canadian monument at Ypres. **15** M. Poincaré at Seville, declared France would make no more concessions to Germany. **Aug 18** Thousands of acres of forest in the Riviera destroyed by fire. **Sept 19** Mr Baldwin and M. Poincaré met in Paris and established a common agreement of views. **Oct 28** France partially accepted Britain's proposal for conference on reparation problem but to consist only of economic experts.

GERMANY

(1922) **Nov 20** Dr Cuno's new Cabinet completed. (1923) **Jan 8** As result of Germany's default in regard to reparations French troops entered the Ruhr. **11** French occupied Essen and other places in the Ruhr without disorder. Transport of coal to Berlin and Belgium having been discontinued by Berlin orders French troops occupied Bochum. **18** Further towns occupied and coal seized. German miners struck work on appearance of French troops. **20** Six of leading German industrial magnates arrested by French. **24** Court martial at Mainz inflicted heavy fines on the six mine directors and officials. American troops left Cologne amid general regret. **28** Reparation Commission declared Germany in default in regard to whole of her obligations. **Feb 1** French proclaimed severe state of siege throughout the Ruhr, and prohibited despatch of coal and coke to unoccupied Germany. **3** French made further advance into South Germany. **4** Dr Cuno visited Essen Bochum and Dortmund and conferred with leading residents. **12** Franco-Belgians prohibited export of all metallurgical and other manufactured products from the Ruhr to non occupied Germany. **Mar 12** Several Germans killed by French troops in the Ruhr following hostile demonstrations. **31** French fired upon menacing crowd of German workmen at Krupp's factory, 21 being killed. **May 13** British Note replying to German reparations offer declared latter too indefinite. **24** Communists assumed control of Gelsenkirchen. **June 3** Germany made new offer for settlement of reparations questions. **30** Bomb exploded in Belgian leave train, 22 men being killed and 30 wounded. **July 1** Occupied Germany completely severed from unoccupied territory by French and Belgians for 14 days. **Aug 12** Dr Cuno resigned, and

Dr Gustav Stresemann formed new administration **Sept. 28** Martial law proclaimed in Bavaria, and a Civil Dictator appointed **30**. Fighting took place in Dusseldorf between Separatists and Communists. **Oct. 6** After considering formation of a Directory Dr Stresemann formed new Coalition Cabinet. **13** Reichstag, by large majority passed Bill enabling Government to issue decrees as it considered necessary. **21** Separatists proclaimed a Rhine Land Republic at Aix-la-Chapelle and revolt spread to other towns. **27** Saxon Government rejected Chancellor's demand for their resignation because of Communist members' provocation of populace to resist Reich forces. **31** Announced that British Ambassadors in Paris and Brussels had strongly protested against any attempt to back up the Separatist movement on ground that it would be a breach of Treaty of Versailles and would necessarily reduce Germany's capacity to pay reparations. **Nov. 2** Socialist Party decided to withdraw its three Ministers from the Berlin Cabinet owing to action taken against Saxony. **6** Ambassadors Conference called upon Berlin Cabinet to take measures to make possible re-establishment of inter Allied military control in Germany. **8** Monarchists in Munich arrested Bavarian Premier and proclaimed General Ludendorff military dictator. **9** Ludendorff arrested by loyal troops and rising collapsed. **10** Ex-Crown Prince of Germany left his home at Wieringen, Holland in motor car and proceeded to Germany. **13** Ex-Crown Prince arrived at his castle at Oels Silesia and was welcomed by his wife and family.

OTHER COUNTRIES

(1922) **Nov. 2**. National Assembly at Angora decided to dethrone Sultan of Turkey and choose successor. **5** Angora Government request that Allies should evacuate Constantinople was emphatically refused. Ex-Kaiser William married Princess Hermine von Reuss at Doorn. **11** Serious earthquake occurred in Chile many lives being lost. **17** Sultan of Turkey left Constantinople secretly on British battleship. **18** Abdul Medjid elected Caliph by Angora Assembly. **20** Near East Conference opened at Lausanne. **30** Five Greek ex-Ministers and a general were shot, having been found guilty of high treason. British Minister in consequence left the country. **Dec. 16** First President of Poland, M. Narutowicz was shot dead at Warsaw a week after his election. (1923) **Jan. 11**. Ex-King Constantine of Greece died suddenly at Palermo from cerebral hemorrhage. **27** The three Commissions of Lausanne Conference held their final meetings. **Feb. 4** Turks refused to sign Peace Treaty formally presented to them at Lausanne, and Conference terminated. **6** Angora Government ordered all foreign warships to leave Smyrna Harbour but order was not obeyed. **16**. After years of investigation by Lord Carnarvon, tomb of Tutankhamen at Luxor was entered and revealed wealth of treasures. **Mar. 4**. As a result of two bomb outrages in Cairo, several Egyptians were arrested and interned. **8** Angora Government forwarded counter-proposals to the Allies. **27** Archbishop Clepihak and Father Butkevitch condemned to death at Moscow for opposing Soviet, former's sentence being commuted to ten years imprisonment.

Zaghlul Pasha released from Gibraltar. **31** Ministers of Bulgarian Cabinet which joined Central Powers sentenced to heavy terms of imprisonment and fines. Father Butkevitch executed at Moscow. **April 1** Allied reply to Turkey published. **8** Turks agreed to resume negotiations at Lausanne. **19** New Constitution for Egypt signed by King Fuad. **23** Lausanne Conference re-assembled. **28** Prince of Wales at Brussels presented monument of British gratitude to Belgian nation and attended State banquet. **May 7** King George and Queen Mary arrived in Rome for a week's stay, and State banquet was given in their honour. Russian Red Church Convention declared the Patriarch Tikhon unfrocked and reduced to a layman. **8** British Note handed to Soviet Government requesting cessation of anti-British propaganda and withdrawal of two Soviet communications. **9** King and Queen were received by the Pope. **10** Russian delegate at Lausanne assassinated by Russian ex-officer who gave himself up. **17** M. Krassin saw Marquis Curzon regarding Russia's reply to British Note. **27** Greeks and Turks at Lausanne reached understanding on reparations question. **28** M. Krassin and Lord Curzon again discussed Soviet's reply. **June 4**. Cardinal Archbishop of Saragossa shot dead by Syndicalists. **9** Bulgarian Government overthrown by the Army who arrested leading Ministers the chief, Stambulsky, being later killed. **15** Mount Ftna eruption started and continued for seven days, large area of vineyards being devastated. **28** Patriarch Tikhon released by Soviet on alleged recantation. **July 17** Lausanne Conference ended, agreement reached on all questions. **20** The Mexican raider, Villa shot dead in ambush. **24** Peace Treaty with Turkey signed at Lausanne. **Aug. 19** Spanish troops lost heavily in fighting in Morocco. **23** Angora Assembly ratified Lausanne Treaty. Evacuation of British troops from Constantinople began. **31** Following murder in Greece of Italian General Italy presented ultimatum and shelled and occupied Corfu. **Sept. 1** Greece appealed to the League of Nations. Terrible earthquake in Japan, enormous damage being done at Tokio and Yokohama where some 200,000 lives were lost. **2** Italy refused to refer Greek trouble to League of Nations but accepted Ambassadors Conference. **7** Italy and Greece agreed to terms of Ambassadors Conference regarding reparations and sanctions. **11** Ambassadors Conference imposed penalties on Greece and enquiry into murder and Italy agreed to evacuate Corfu. **13** Spanish Army, discontented at Government's policy in Morocco, revolted and demanded Cabinet's resignation. **16** King Alfonso agreed to appointment of Military Directorate in place of the Cabinet and Cortes was dissolved. **19** Greek fleet saluted Allied flags as punishment for murder of Italians. **27** Italians evacuated Corfu. **30** Greece paid the 50,000,000 lire in demnity to Italy. **Oct. 2** Constantinople evacuated by Allied troops. **5** Senhor Teixeira Gomes installed as President of Portuguese Republic. **10** Tsoo Kun inaugurated as Chinese President. **21** Duke and Duchess of York arrived at Belgrade to attend christening of infant Crown Prince of Serbia and wedding of Prince Paul to Princess Olga. **22** Revolution in Greece quickly suppressed by Government. **30** Proclamation issued declaring Turkey a Republic with Kemal Pasha President.

The British Commonwealth of Nations.

AREA AND POPULATION

Continental Distribution	English Square Miles.	Estimated Population
In Europe	121,512	48,000,000
In Asia	1 824,550	333,000,000
In Africa	4,652,000	50,000,000
In North America	3,893,020	9,000,000
In Central America	8,600	50,000
In the West Indies	12,300	1,730,000
In South America	97,800	314,000
In Oceania	3 300,000	8,000,000
Total	13,909,782	460,094,000

GEOGRAPHICAL DISTRIBUTION—The British Commonwealth occupies over one quarter of the known surface of the globe, and its population exceeds one quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one third in the Western Hemisphere. The distribution of the surface over the Northern and Southern Hemispheres causes a complete alternation of the seasons: one half of the Dominions enjoying summer while the other half is under winter conditions. In spite, however, of the uneven distribution east and west, daylight and darkness are almost equally divided, in account of the position of Australasia near the limit of east and west.

ETHNOLOGY—By far the greater portion of the Commonwealth lies within the temperate zones and is suitable for white settlement: the tropical areas being Southern India, West, East and Central Africa, parts of the West Indies, British Guiana and Honduras, Northern Australia, Borneo, and the various settlements in the Malay Peninsula. The estimated white population of the Dominions in 1911 was 60,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

RELIGIONS—Of the total population over 210,000,000 are Hindus, 100,000,000 Mohammedans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and idol worshippers.

CONSTITUTION AND GOVERNMENT—There is no fundamental law upon which the Constitution of the Commonwealth rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid

from the central Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference* (post).

SELF GOVERNMENT—(1) *Great Britain*.—The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people and a limited monarchy, the power of the monarch being in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King, the Legislature (House of Lords and House of Commons), the Executive appointed by the Sovereign and responsible to Parliament and the Judicature. (See also p. 496).

(2) *The Indian Empire*.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to and represents the authority of Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than 20 are government officials), and the Legislative Assembly of 144 members (26 official and the remainder elected).

(3) *Imperial Dominions*.—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion it is to the extent to which it is repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent, by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a self-governing Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—

(a) *Those having responsible government* i.e. 'Dominion Status'. The executive is entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The Dominions thus governed are the Irish Free State, Northern Ireland, Canada, Newfoundland, Australia, New Zealand, and the Union of South Africa. Malta and Southern Rhodesia have "responsible government, but certain powers are reserved."

(b) *Where there is government by legislative assembly wholly or partly elected and an executive council nominated by the Crown or the Councils representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(c) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(d) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(e) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown. The protectorates of the British Commonwealth include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(f) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation, such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are:

(g) *Mandatory Spheres* where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

SELF SUPPORT.—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, e.g., the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons, "this principle." "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF DEFENCE.—The Dominions, generally provide for the defence of their immediate area, but the general strategical defence of the Commonwealth is undertaken by the Central Government. Questions affecting the general strategical defence of the Commonwealth are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea, land, and air forces of the Commonwealth. In the Great War of 1914-1918 the Dominions provided Armies or contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1897) of the Premiers of the various self-governing Dominions, representing their nations at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1917 and 1928 the Conference was called the Imperial War Conference and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference* under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Commonwealth as a whole. The constitution of the Conference, which met in 1923, is as follows—*President*, The Prime Minister of Great Britain *Chairman* (in the absence of the President), The Secretary of State for the Colonies, *Members*, The Prime Ministers and other Ministers of Canada, Australia, New Zealand, Union of South Africa, Newfoundland, and the Irish Free State, the Secretary of State for India and other representatives of India *Secretary*, Sir H. C. M. Lambert *K.C.M.G.*, *C.B.*, *Assistant Secy.*, C. T. Davis, *C.M.G.*, *E. J. Harding, C.M.G.*

THE LEGISLATURE.—The Parliament of Great Britain is the supreme legislative authority of the Commonwealth. This Parliament has, with the consent of the King Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Commonwealth affairs. The Secretary of State for the Colonies is a Cabinet Minister, his active participation in the government of the nations of the Commonwealth varying with the measure of self-government accorded to them. Parliament also exercises a control over Indian affairs through a Secretary of State.

THE JUDICATURE.—The Supreme Judicial Authority of the Commonwealth is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (see p. 257) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION—Educational systems, on a more or less uniform plan are developed throughout the Commonwealth under the control of the respective governments. Universities and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and the German Empire. The German scholarships were abolished by Act of Parliament in 1926, and re-allocated to various parts of the British Dominions, while the trustees have from time to time created other scholarships as the funds in their hands permitted. *Rhodes Scholarships* are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony). In New Zealand, Newfoundland, Jamaica, Bermuda and Malta they are of the annual value of £300 (with the addition in present circumstances of a bonus of £50) and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 300 of whom 156 come from the British Empire and 144 from America. *Secretary to the Rhodes Trustees* Lt Col Sir F W M (1919) KCIO CMG, DSO MI 17, Waterloo Place, London, SW 1. *Oxford Secretary* F J Wylie MA 9 South Parks Road Oxford.

In 1923 the *Darwin Scholarships* to enable 3 undergraduates from Oxford and 3 from Cambridge to attend the Universities of Harvard Yale and Princeton, U.S.A. were founded by Mrs Henry P Davison of New York, U.S.A. *Secretaries of the Selection Committee* Prof S E Morison 5, Norham Gardens, Oxford. A L Goodhart, Corpus Christi College Cambridge.

Statistics issued by the Universities Bureau of the British Empire show that the total number of students from overseas attending Universities and Colleges in the United Kingdom is 4,121 of whom 1,172 are from Africa, 764 from America, 1,401 from Asia, 542 from Europe, and 223 from Australasia. The principal figures are: India, Burma and Ceylon 1,094; South Africa and Rhodesia 803; United States 402; Egypt, 298; Australia, 166; Canada and Newfoundland, 127; West Indies and Bermuda 120; China, 119; Russia, 91; New Zealand 90; France, 52; Japan 51; Switzerland 43; Rumania 38; Greece, 37; Netherlands 35; Denmark, 33; Norway, 32; Spain, 32; Poland 21.

FINANCE—Complete financial autonomy is enjoyed, in fact by all British Dominions, and customs tariffs are in most cases the principal source of revenue. Until the close of the War of 1914-1918 the tariff of the United Kingdom was imposed without distinction on foreign and Commonwealth merchandise but recent legislation foreshadows a general change of fiscal policy. The tariffs of the self governing Dominions are generally lower for merchandise of British origin than for importations from foreign countries. There is no Commonwealth Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. In the Civil Service Estimates for 1921-22 the following 'Grants in Aid of Local Revenues' were included—*Wei hai-wei*, £2,000, *Somaliand*,

£100,000 *St Helena*, £3,200 *Nyasaland*, £100,000, *Tanganyika*, £214,000 *Uganda*, £250,000 and *Cyprus* £50,000 in addition the sum of £10,000 is set aside for Scientific Research in connexion with the Development of the Economic Resources of the Colonies and Protectorates.

PRODUCTION—In 1923 the wheat crop of the world was about 3,617,600,000 bushels, of which 690,000,000 bushels were produced in the British Commonwealth. Canada, India, Australia, and Great Britain are the principal wheat producing units and Mesopotamia (with irrigation) has great potentialities. In 1923 Canada produced nearly 500,000,000 bushels, a total yield surpassed by the U.S.A., but by no other country and only one sixth of the cultivable area of Canada has been occupied by cultivators. Barley, oats, rice and maize and tea, coffee and rubber are largely cultivated while 197,072 metric tons of cocon were produced in British Dominions in 1922 out of a world production of 283,155 metric tons. In 1921 Great Britain imported 8,603,385 cwt of frozen beef of which about 25 per cent came from Australasia, and 6,738,700 cwt of frozen mutton, of which more than two thirds came from New Zealand and Australia. Nearly 6,800,000 cwt of bacon and hams were also received of which only 950,000 cwt came from British Dominions (Canada). Cane sugar is produced in India (for local consumption), West Indies, Australasia, Natal and Mauritius, and beet sugar in Canada and elsewhere. Australia and New Zealand are the greatest wool producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the U.S.A. Coal is also abundant in Australia, Canada, India and South Africa. Cotton is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia (value of Australia output in 1922-3, £600,000), but of the 11,725,521 cents imported in 1921 only 500,000 cents came from British Dominions. The world consumption of cotton is about 13,000,000 bales, the U.S. producing 10,000,000 bales and consuming in 1922 5,911,000 bales (Southern Mills, 3,723,000 Northern Mills, 2,178,000). In 1921 the imports of chemical and mechanical wood pulp for paper making amounted to over 500,000 tons, but Canada produced half as much again her product being largely sent to the United States, while Newfoundland sent 26,825 tons to Great Britain. Iron ore is found in many of the Dominions, and pig iron is largely produced. Tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while more than half the world's supply of gold is drawn from South and South West Africa and Australasia. It is produced also in Borneo, British East Africa, British Guiana, Canada, Ceylon, India, Malay States, Sarawak, Sudan and West Africa. The output of various metals in 1922 was as under—

Metal	World Tons	Brit. Empire Tons
Iron ore	73,000,000	5,752,000
Pig iron	34,500,000	3,927,000
Steel ingots and castings	36,700,000	4,770,000
Copper ore (metal)	137,000	45,000
Smelter copper	320,000	83,000
Lead ore (metal)	269,000	129,000
Smelter lead	289,000	136,000

Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India (232,126 834 gallons in 1920) Trinidad (72,204,947 gallons in 1920) and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf. The estimated total production of oil in the world (1921) was 759,000,000 barrels as against 695,000,000 in 1920, the output of the U.S.A. representing 61.9 per cent (1921) and that of Mexico 19.3 per cent (1921). Canada is the second greatest producer in the world of newsprint paper (2,250,251 tons of pulp, valued at \$84,947,598 paper and paper products 1,366,815 tons, value \$107,085,766).

SHIPPING.—On June 30, 1921, there were 11,432 vessels (over 200 tons) flying the British flag, of which total 9,220 were registered in Great Britain and Ireland, 615 in Australia and N.Z., 951 in Canada, 190 in India and Ceylon and 623 in other parts of the Commonwealth. These figures

include 10,324 steam vessels of 21,588,606 tons (Brit. 8,572 vessels of 19,300,053 tons), and 1,209 sailing vessels of 482,122 tons (Brit. 455 vessels of 251,501 tons). In the Great War of 1914-1918 there were lost through enemy action 2,774 merchant vessels of 9,538,918 gross tonnage of this total 1,197 (7,638,000 tons) were British, 238 (656,845 tons) French, 230 (742,365 tons) Italian, 29 (120,176 tons) Japanese, and 80 (341,512 tons) U.S.A.

TOWNS.—Capital, London (England). Population (1921) 4,483,249 (with suburbs, 7,476,168).

At the Census of 1921 there were in the British Commonwealth 21 cities with over 1,000,000 inhabitants, 9 with 500,000 to 1,000,000 (see p. 112), and 88 others with over 100,000 inhabitants. Of these 99 cities 49 were in Great Britain (England 42, Wales 3, Scotland 4, Irish Free State 1, Northern Ireland 1), 29 India, 4 Canada, 5 Australia, 3 New Zealand, and 1 each in South Africa, Ceylon, Hong Kong, and the Straits Settlements.

FACTS CONCERNING NEW ZEALAND

Contributed by the Right Hon. W. F. Massey, P.C., Prime Minister of New Zealand

THE facts concerning the national life and achievements of the Dominion of New Zealand require only to be known for due appreciation to be given to the virile, industrious, and enterprising character of the people comprising this young community, and the promise that the future holds for them. The Dominion's greatest asset, besides a wonderful climate, and a remarkable fertility of soil has been her parent British stock and the thoroughness of their colonisation for it is upon the foundations which they have laid and the British traditions implanted, that the present Dominion has arisen. A number of causes contributed to the selection of the early settlers from the very best of the citizens of the United Kingdom. In the first place none but the hardiest and most intrepid cared to face the voyage which at that time seldom occupied less than six months. The ships were small and uncomfortable, while the country to which they were going was comparatively unknown though there was knowledge that the aboriginal inhabitants were particularly warlike race. But these difficulties, instead of discouraging the intending settlers, seemed to appeal to the spirit of adventure which they inherited from Viking ancestors. It is interesting to note how those first comers settled down in respect of nationality. The Scottish chose that part of the South Island, where the great brown mountains reminded them of their own land, the climate resembled that which they had left, and the similarity was increased by giving the name of Dunedin, the ancient name of Edinburgh to their principal city. The province of Canterbury with its city of Christ Church, became the headquarters of settlers from England many of whom were university and public school men. The Wellington province was settled chiefly by English emigrants while the Auckland district became peopled with representatives of almost every county in the United Kingdom.

Two factors make for character of race—heredity and environment. It would be difficult to discover a young nation with a finer ancestry than the present generation of New Zealanders,

and as far as environment is concerned one has only to look at New Zealand's position on the map, a long, narrow country running due north and south, laved by the blue waters of the Pacific, a land of mountains and plains, hills and valleys, sunshine and plenty, a land fitted to be the home of a great race, where liberty, justice and righteousness will reach to greater heights than they have attained in any other country where every man will "sit under his own vine and fig tree no one daring to make him afraid." As a race the New Zealanders are virile, physically strong and active, mentally keen and alert, possessing energy and enterprise. Loyal to King, country and empire they are building up a young British nation in the Pacific, which in years to come will play a prominent part, not only in the affairs of Empire, but in those of humanity.

It is interesting to remember that the sovereignty of New Zealand was vested in Queen Victoria and her successors by the Treaty of Waitangi, which was signed by the native chiefs in 1840 and also by the representative of the Sovereign. Even now the Maori race look to the Treaty of Waitangi as their Magna Charta, giving them practically all the privileges possessed by the European residents of New Zealand.

It is rather a remarkable achievement that New Zealand, the Dominion farthest from the heart of the Empire, should be Britain's greatest supplier of foodstuffs. Yet such is the case. This surely, is a tribute to business enterprise and industry, particularly of those earlier settlers who in the "eighties" saw the great possibilities of refrigeration, and immediately gave practical effect to their vision. The Dominion is now the largest supplier to Britain of dairy produce, mutton and lamb, and also sends to British ports very large quantities of wool and other commodities.

The social structure of the Dominion is essentially British in every respect. To preserve this characteristic has been the aim of her legislature. The Dominion's educational facilities are the equal of any in the world, the child of

the humblest citizen being able through liberal scholarships, to aspire to the highest attainments. The principle followed in regard to this and almost all her social services is that they are a direct charge upon the State revenue. Child welfare is the particular attention of the community. New Zealand's death rate is the lowest in the world. Rural settlement is encouraged to the greatest possible degree, partly by a system of financial advances from the State and to day there is not the same unequal preponderance of city population as in many other young countries. It is this wide distribution of settlement which sometimes induces the statement that New Zealand has no spare lands, but though very few large tracts remain untenanted there is nevertheless ample room for many times the present population, with a commensurate return from the soil by more intensive cultivation. Another important advantage possessed by the Dominion is, that with her mild climate it is possible for the producers in certain instances to divert from any unprofitable branch of industry to another commanding better markets for the time being, and her ability to do this has, on more than one occasion in the past, tided her over threatening periods. The Dominion's resources are unbounded and they include latent stores of minerals which will be available to manufacture when the demands of an increased population render extended enterprise in that direction profitable. Industrious people from Great Britain, prepared to throw in their lot with this young country need have no fear of the future. The latest records show that the per capita wealth of the Dominion is the highest in the world.

In the great War New Zealand willingly accepted her responsibilities as a partner in the Empire, was the first overseas Dominion to despatch a force to seize enemy territory, and ultimately sent to the fighting fronts over 100,000 men.

The Dominion has emerged from the stress of the post war period, and at present her financial future is very bright. Her developmental works are in vigorous progress, and the burdens of heavy taxation which war expenditures place upon the backs of the people are gradually being lightened. The trade outlook also is healthy, and a lengthened period of prosperity is anticipated. Necessarily New Zealand depends for her prosperity upon British markets for her produce, but apart from the commercial aspect of this bargain there exists among the people a deep desire that their chief business transactions should always be with their fellow citizens of Britain, and that the Mother State should remain as she was in the first instance and is now, the chief partner in New Zealand's success.

THE GOVERNMENT AND EXPORT TRADE

Contributed by Lt. Col. A. Buckley, D.S.O., M.P., Secretary, Department of Overseas Trade—Development and Intelligence (Joint Department of the Foreign Office and the Board of Trade), 38 Old Queen Street, S.W. 1

THERE is, of course, nothing novel in the fact that the Government assists in the progress of British overseas trade. Indeed, so familiar have many of the forms of assistance become that they are apt to be overlooked when the question of Government assistance is under discussion. International commercial treaties, the safe guarding of sanctity of contracts, tariff questions, the maintenance of communications—these, and many others, are forms of assistance and protection which have for long been undertaken by the British Government and by the Governments of other commercial nations and without which overseas trade would be a hazardous and difficult undertaking.

There are, however, many other directions in which a Government can support and foster the export trade of its country. Up to a few years ago Germany and to a somewhat lesser extent, the U.S.A. were the two countries of which the respective Governments had gone furthest in their endeavours to extend their organisation for rendering commercial assistance, and British traders were not slow to point to these examples, and to draw comparisons between the activities of these Governments and their own.

A very satisfactory change has, however, taken place during the past few years, and from being laggards in the race, the British Government has moved up into the front rank. So pronounced, indeed, has been the progress made in building

up an organisation for fostering and assisting in the development of British overseas trade, that the Governments of other countries have recently been closely and openly studying our organisation with a view to developing their own upon similar lines.

Undoubtedly the War, and the trading difficulties which it brought in its train were largely responsible for bringing about a realisation that greater assistance to exporters was an urgent necessity, and, starting with the Commercial Intelligence Branch of the Board of Trade as a nucleus, a far reaching commercial intelligence system has been built up having as its head quarters the Department of Overseas Trade (Development and Intelligence), Old Queen Street, Westminster.

The work of this organisation divides itself under the following main heads viz., securing commercial information from all parts of the world, disseminating this information to British manufacturers and exporters, undertaking such special constructive activities as may be found possible and assisting traders in the removal of difficulties which from time to time arise.

To carry out the first of these functions a widespread and efficient overseas intelligence system is necessary. This has been attained by means of the Trade Commission Service in countries of the Empire and the Commercial Diplomatic and Consular Services in foreign

countries. The first two Services are entirely concerned with commercial matters. Consular officers have many and varied functions, but under theegis of the Department of Overseas Trade, which now directs their activities, a much greater amount of time is devoted to commercial matters than was formerly the case.

These services form a network of commercial intelligence officers covering every important market in the world. From them the Department is in constant receipt of a steady flow of valuable trade information which it brings to the attention of such portions of the British commercial community as are likely to be interested.

It is perhaps unnecessary to go into details as to the methods by which this is done but a brief outline may be of interest. The Headquarters staff comprises a number of officers who have had actual business experience either in the countries or of the trades, with which they are now dealing. By co-operation between these officers, viewing the information, the one in the light of his overseas experience, and the other his experience in the trade in this country, the value of the information to British traders is assessed and the best method for dissemination decided.

The information may then be issued in a number of ways, the chief media being circular letters, which are issued to all British firms likely to be interested in the trade press, the 'Board of Trade Journal, Chambers of Commerce Journals &c.

The following few examples will give some idea of the nature of the information daily being received: notifications of foreign or colonial contracts open, or likely to be open, for tender and other openings for British trade existing and probable future demand for specific lines of British goods, the extent and nature of competition and the best methods for meeting it; usual methods of business, terms of credits, payment, &c., Customs regulations and tariffs, regulations covering commercial travellers, certificates of origin, &c. sources of supply and prices of trade products, &c.

In addition to supplying such information, the Department is in a position to supply information on all commercial questions in response to direct enquiries. The Department has frequently been able to solve difficulties which may have arisen in connection with contracts, and to enable traders to effect satisfactory settlements.

Further, at the request of British firms or Associations the Department undertakes special enquiries entailing extra financial outlay, with no charge other than the refunding by the firm or association of the additional expense incurred.

The Department further assists trade by placing British exporters in touch with firms or individuals in overseas markets who are considered suitable to act as agents or representatives, and advising the British firm as to the agency conditions usual in the country in question or, in the case of an exporter desiring to introduce his goods into a given market, by supplying names of likely importers.

The difficulties caused by abnormal rates of

exchange, and the financial situation in a number of European countries led to the institution of the Export Credits Scheme, which is administered by the Department of Overseas Trade. With financial conditions still unsettled, and in view of the use made of the scheme by exporters the period within which credits can be granted has been extended to September 8, 1924, the date of final liquidation remaining unaltered, viz., September 8, 1927. It is possible that the scheme may be further extended.

For a trader successfully to compete in an overseas market it is a necessity that he should have actual knowledge of the kind of goods with which his own must compete. To meet this requirement the Department has formed an extensive collection of samples of foreign competitive goods and commercial products. These samples are exhibited to, and inspected by British manufacturers who thus gain a first hand and valuable insight into the nature of the competition which they must expect to meet.

The Department is kept closely in touch with the requirements of the commercial community and its activities are directed, upon those lines considered by business men to be most useful by its Advisory Committee of business men. All the members of this Committee are men with very wide experience, ranging over almost all our industries and the countries with which we trade, and are thus well qualified to assist the Department in its endeavours to meet the needs of British traders.

The Department further works in close co-operation with Chambers of Commerce, Trade Associations and other representative bodies. There is thus obtained not only a common effort to avoid overlapping and duplication of work, but also a further guidance towards the most effective and useful activities.

A form of co-operation which has borne many good results is the visiting of industrial centres in this country by Trade Commissioners or Commercial Diplomatic Officers home on leave, or special duty. In the main, Chambers of Commerce or Trade Associations are visited, and members of these are thus enabled to obtain at first hand valuable information concerning conditions in various overseas markets, while at the same time the officer himself refreshes his knowledge concerning home conditions and is so much the better able efficiently to perform his duties on his return. Not only are representative bodies visited, but also individual firms who are particularly interested.

The outcome of this co-operation has been measured already in the success which has attended investigations undertaken by the Department, either on its own initiative or at the request of some such body as the above, in which the Department and the Association have worked in conjunction.

A number of other similar functions are performed by the Department, but the above will serve to indicate the nature and extent of the assistance which it extends to British manufacturers and merchants.

Albert Buckley.

THE IMPERIAL CONFERENCES OF 1923.

DECISIONS REACHED AT THE DISCUSSIONS

For the first time since the statesmen of the Overseas Dominions were summoned to London to discuss Empire problems with the representatives of the Home Government, two Imperial Conferences took place in the capital in the autumn of last year. In addition to the regular Imperial Conference which meets periodically as a result of a decision of an earlier assembly, an Imperial Economic Conference was held to consider the possibilities of developing Empire trade in view of the disorganisation of European markets. The two Conferences were held concurrently, and decisions of the greatest importance to the Empire were arrived at. The main Conference commenced its deliberations on Oct. 1 and concluded on Nov. 8 sixteen plenary meetings being held in addition to eleven meetings of committees and technical discussions on defence questions, while the Economic Conference proceeded during the same period.

The Overseas Prime Ministers who attended were Mr. W. L. Mackenzie King (Canada), Mr. M. Bruce (Commonwealth of Australia), Mr. F. Massey (New Zealand), General Smuts (Union of South Africa), and Mr. W. E. Warren (Newfoundland). India was represented by Viscount Peel the Secretary of State, the Maharajah of Alwar and Sir I. J. Bahadur Sapiu, and the Irish Free State—participating for the first time and warmly welcomed by all the delegates—by the Ministers of Education and External Affairs, while Mr. Cosgrave took part in some of the meetings. Each of the Dominion Premiers was accompanied by other Ministers, and Great Britain was represented by Mr. Baldwin, the Marquess of Salisbury, Marquess Curzon and the Duke of Devonshire. Others who attended at various times included Lord Robert Cecil, Mr. Neville Chamberlain, Mr. Bridgeman, the Earl of Derby, Sir Samuel Hoare, Mr. Amery, Sir Philip Lloyd-Graeme, General Mulcahy, Earl Beatty, the Earl of Cavan, Sir Hugh Trenchard and Sir Fabian Ware.

During the progress of the Conferences a considerable amount of information regarding the deliberations was made public, although certain portions of various speeches notably that of Marquess Curzon concerning the foreign situation were regarded as confidential. In addition, immediately the proceedings of the two bodies had been concluded, approved official summaries were issued, a notable departure from the practice followed at former Conferences. The most important decisions, as announced in these authorised reports, are outlined below. The delegates inaugurated and closed the Imperial Conference by loyal addresses to the Throne, they passed a resolution of profound regret at the death of Mr. Bonar Law at whose invitation issued when he assumed office, they had met, and they sent a message of sympathy to Japan on learning of the terrible earthquake which wrought such havoc. Before separating they placed on record a resolution expressing their unanimous view that the consultations would do much "to facilitate the work of achieving unity of thought and action on matters of common concern to all parts of the Empire."

THE FOREIGN SITUATION

One of the first subjects considered and one of the most important, was the question of foreign relations. The Secretary of State for Foreign Affairs reviewed the general situation in every part of the world and gave the most frank exposition both of the main problems which have confronted the Empire during the last two years and of those which seem most likely to arise in the near future. This was followed by a general discussion on foreign relations. Frequent and detailed examination was given not only to the main features of the international situation, but to the different aspects of that situation as they developed from day to day. "Nor did the Imperial Conference terminate its sittings: the official report declared 'until each subject had been carefully explored and a common understanding reached upon the main heads of foreign policy'."

The United States and Reparations—While the Conference was sitting the President of the United States renewed the offer of his Government to take part in an international conference or inquiry to investigate the European Reparation problem and to report upon the capacity of Germany to make the payments to which she is pledged. The Conference cordially welcomed and decided to take immediate advantage of, this overture, and communications were at once entered into with the other Allied Powers to obtain their co-operation. The Conference after careful consideration of the policy which had been pursued, was of the opinion that the European situation could only be lifted on to the plane of a possible settlement by the co-operation of the United States of America, and that if the scheme of common inquiry to be followed by common action were to break down, the results would be inimical both to the peace and to the economic recovery of the world. It felt that in such an event it would be desirable for the British Government to consider very carefully the alternative of summoning a Conference itself in order to examine the financial and the economic problem in its widest aspect. The Conference regarded any policy which would result in breaking up the unity of the German State as inconsistent with the Treaty obligations entered into both by Germany and the Powers, and as incompatible with the future discharge by Germany of her necessary obligations. The strongest representations on this subject were accordingly made to the Allied Governments. The conclusion of peace between the Allies and Turkey and the advance made towards a pacific settlement of the complex problem of Egypt were noted with satisfaction, as were the results of the Washington Conference, which had added immensely to the security of the world without disturbing the intimate relations that had for so long existed between the Empire and Japan. Upon another question which arose during the deliberations, the Conference, while affirming and safeguarding the principle of the three mile limit "as a cardinal feature of British policy," arrived at the conclusion that it was both desirable and practicable to meet the request of the United States Government for an extension of the right of search beyond

this limit in cases of suspected liquor smuggling, and negotiations were at once opened with the United States Government for the conclusion of an experimental agreement with this object in view.

The League of Nations—After listening to a detailed exposition of the work of the League of Nations during the past two years and more particularly of the recent sitting of the Council and the Assembly at Geneva, the Conference placed on record its emphatic approval of the action taken by, and the support given to, the representatives of the British Empire on the latter occasion. There was full accord that the League should be given the unabated support of all the British members of the League as a valuable instrument of international peace and as the sole available organ for the harmonious regulation of many international affairs.

THE NEGOTIATION OF TREATIES

The principles governing the relations of the various parts of the Empire in connection with the negotiation and ratification of Treaties were regarded as of the greatest importance and accordingly the subject was fully examined by a Committee of which Marquess Curzon was chairman. This Committee drew up a resolution which the full Conference unanimously approved. It laid down the procedure to be observed with regard to international agreements the main provision declaring that bilateral treaties imposing obligations on one part of the Empire only should be signed by a representative of the Government of that part. The full power issued to such representative should indicate the part of the Empire in respect of which the obligations are to be undertaken and the preamble and text of the treaty should be so worded as to make its scope clear. At the same time it was urged that no treaty should be negotiated by any of the Governments of the Empire "without due consideration of its possible effect on other parts of the Empire or, if circumstances so demand, on the Empire as a whole, and that any government of the Empire contemplating the negotiation of a treaty should allow the other governments of the Empire to express their views."

EMPIRE DEFENCE

The Conference gave special consideration to the question of defence and the manner in which co-operation and mutual assistance could best be effected after taking into account the political and geographical conditions of the various parts of the Empire. In addition to statements by the First Lord of the Admiralty, the Secretary of State for War, and the Secretary of State for Air, there were discussions at which naval and air defence were dealt with in detail by the Chiefs of the Naval and Air Staffs. After the whole field of defence had been surveyed, the Conference decided that it would be advisable to record its conclusions in a series of resolutions. These affirmed "that it is necessary to provide for the adequate defence of the territories and trade of the several countries comprising the British Empire," and recognised that the nature and extent of any action which should be taken was a matter for each Government to decide. The Conference suggested a number of "guiding principles," including the primary responsibility of each portion of the Empire for its own local defence, adequate provision for safeguarding

the maritime communications of the several parts of the Empire, the desirability of the maintenance of naval strength within the limits of the Washington Treaty, the provision of naval bases and facilities for repair and fuel so as to ensure mobility, and the desirability of a common system of organisation and training for the Air Forces of the Empire.

The Singapore Base—Special reference was made to the deep interest of Australia, New Zealand and India in the provision of a naval base at Singapore as essential for ensuring the mobility necessary to provide for the security of the territories and trade of the Empire in Eastern waters while the Conference took note of "the necessity for the maintenance by Great Britain of a Home Defence Air Force of sufficient strength to give adequate protection against air attack by the strongest air force within striking distance of her shores." The Conference while deeply concerned for the paramount importance of providing for the safety and integrity of all parts of the Empire expressed in conclusion its earnest desire so far as was consistent with this consideration, for the further limitations of armaments and its hope that no opportunity might be lost to promote this object.

POSITION OF BRITISH INDIANS

A long discussion took place on the position of British Indians in other parts of the Empire. The Indian delegates proposed that committees should be appointed by the Home and Dominion Governments to negotiate with a committee appointed by the Indian Government as to the best means of giving effect to the resolution of the Conference of 1922, to which South Africa was not a party. Agreement with the proposal was indicated by the Prime Ministers of Canada, Australia and New Zealand but General Smuts held out no hope of any further extension of the political rights of Indians in South Africa, and could not accept the suggestion. The Secretary of State for the Colonies agreed to the Indian request and referred to the British Government's decisions as to Kenya, which Sir Tej Sapru said the people of India could not accept as final.

NATIONALITY QUESTIONS

Certain matters connected with the law of British nationality were brought before the Conference at the instance of Australia, and were referred to a committee whose recommendations received approval by the Conference. The most interesting decision was embodied in a resolution expressing the opinion that the principle of the existing law that the nationality of a married woman depended on that of her husband should be maintained, but proposing that power should be taken to re-admit a woman to British nationality in cases where the married state, though subsisting in law, had to all practical purposes come to an end. Another recommendation was that the power of granting certificates of Imperial naturalisation should be extended so as to cover persons resident in the territories administered under Mandates in Africa and the Southern Pacific and in Protectorates. The Committee made no recommendation regarding the law relating to the validity of marriages between British subjects and foreigners, which, though validly contracted in British law, might in certain circumstances be invalid in the law of the foreign country concerned.

IMPERIAL PREFERENCE

The official report regarding the Imperial Economic Conference consisted almost entirely of the resolutions adopted, the most important being those on the subject of Imperial Preference. The Conference, holding that especially in present circumstances all possible means should be taken to develop the resources of the Empire and trade between the Empire countries desired to reaffirm the resolution on the subject of Imperial preference passed by the Imperial War Conference of 1917. The British Government intimated that they intended to submit to Parliament a series of proposals on the subject, a decision which led to the general election at the close of the year. These suggestions may be summarised as follow—

Dried Fruit—Dried figs raisins and plums (including apricots) to be admitted free of duty from the Empire thus enjoying a preference of 10s 6d per cwt, instead of 18 9d dried currants to be admitted free instead of existing duty of 4d. The Government to consider what increase in the duty on foreign currants (then 2s per cwt) would be necessary to make the preference effective. Other dried fruit to be admitted free (as hitherto) a duty of 10s 6d per cwt to be imposed on such foreign dried fruit (such as apples pears and peaches) as the Dominion representatives might consider of interest to their trade. Other preserved fruits hitherto dutiable only in respect of sugar contents to be admitted free from the Empire, but with an all round duty of 2s per cwt on the principal forms of preserved fruit from foreign countries not at present dutiable except fruit pulp for jam manufacture, which would remain free of duty.

Sugar—Empire sugar at present enjoys a preference of 4s 3½d per cwt (nearly a halfpenny a pound on refined sugar). The British Government guaranteed that if the duty were reduced the preference should for a period of ten years not fall with it but be maintained at its present rate.

Tobacco—The British Government proposed a similar course to stabilise the existing preference for a term of years or alternatively to increase the preference from one sixth of the present duty to one quarter. The second alternative was adopted after consultation with the overseas representatives concerned.

Wine—The proposals were to double the existing preference of 2s per gallon on the duty of 6s per gallon on wines of a strength exceeding 30° and not exceeding 42°, the rate of duty on such wines coming from the Empire being thus 2s per gallon and to increase from 30 per cent to 50 per cent the preference on the surtax of 12s 6d per gallon on sparkling wines.

Raw Apples—It was proposed to levy a duty of 2s per cwt on raw apples of foreign origin and to admit raw apples from the Empire free of duty, as at present.

Canned Salmon and Lobster, Crayfish and Crabs—It was proposed that a duty of 10s per cwt should be imposed on these foods from foreign countries and that they should be admitted free of duty from the Empire.

Honey—It was proposed that a duty of 10s per cwt should be imposed on foreign honey, and that honey of Empire origin should continue to be admitted free of duty.

Lime, Lemon and other fruit juices—It was proposed that a duty of 6d per gallon should be

imposed on these foods from foreign countries, other fruit juices to be considered. Same duty on fruit syrups exclusive of the duty on sugar content of such syrups. Fruit juices from the Empire continuing to be admitted free of duty.

Public Contracts—The Economic Conference affirmed the principle that in all Government contracts effective preference should be given to foods made and materials produced within the Empire except where undertakings entered into prior to the Conference precluded such a course or special circumstances rendered it undesirable or unnecessary. So far as practicable, it was held efforts should be made to ensure that the materials used in carrying out contracts should be of Empire production.

DEVELOPING MUTUAL TRADE

A number of resolutions were adopted with the object of improving mutual trade. Among these were several on the subject of Imperial communications. It was suggested that the Imperial Shipping Committee should be maintained owing to the work it had accomplished. The British Government were asked to prepare a draft procedure designed on a reciprocal basis to secure more rapid and more extensive interchange of information in regard to civil aeronautics. The importance of establishing as quickly as possible an efficient Imperial Service of Wireless Communication was affirmed and the view was expressed that the several Governments of the Empire should take immediate action to remove any difficulties which were delaying the accomplishment of this. It was urged that all possible support should be given by the Governments of the Empire to the State-owned Atlantic cable route which had now been provided and that in any concessions given in the British Empire to private enterprise in respect of cable or wireless services (including broadcasting stations) preference should be accorded to British companies of any part of the Empire.

Navigation Laws—In view of the vital importance to the British Empire of safeguarding its overseas carrying trade against all forms of discrimination by foreign countries whether open or disguised the representatives of the Governments of the Empire declared that it was their established practice to make no discrimination between the flags of shipping using their ports and that they had no intention of departing from this practice as regarded countries which treated ocean going shipping under the British flag on a footing of equality with their own national shipping and that in the event of danger arising in future to the overseas shipping of the Empire through an attempt by a foreign country to discriminate against the British flag, the Governments of the Empire would consult together as to the best means of meeting the situation.

Imperial Economic Committee—Canada dissented from a resolution passed by the Conference expressing the opinion that it was desirable to establish an Imperial Economic Committee to consider and advise on matters of an economic or commercial character (except those dealt with by the Imperial Shipping Committee) referred to it by any of the Constituent Governments, provided that no question which had any reference to another part of the Empire should be referred to the Committee without the consent of that other part of the Empire.

Religion and Languages

The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the 'Established Religions'. The Church was disestablished in Ireland in 1869, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership, the *Church of England* having 2,250,000 communicants in England at Easter 1920, the *Roman Catholic Church* claiming 2,000,000 members in England and Wales, 546,000 in Scotland, and 3,242,670 in Ireland (1920). The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts have been made, under *Sinn Féin* auspices, to revive the Gaelic language in Ireland. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 10,314 persons speaking Gaelic only, and 151,159 speaking Gaelic and English at the Census of 1921.

* The totals given above refer to movements to and from *Places out of Europe*. The number of Passengers from and to Great Britain and Ireland and Europe in 1913 was: *Outwards* (to the Continent), 1,224,412, and *Inwards* (from the Continent), 1,209,874. The figures for 1914-22 were *Outwards* (1918) 1,292,225 (1919) 869,022 (1920) 1,280,000 (1921) 890,000 (1922) 1,280,000. *Inwards* (1918) 1,272,225 (1919) 869,022 (1920) 1,280,000 (1921) 890,000 (1922) 1,280,000. For the first six months of 1922, Passengers to *Places outside Europe* exceeded *Inward Passengers* by 22,000. During the same period the Emigrants from the British Isles to Australia and New Zealand numbered 15,567 to Canada 14,222 and to U.S.A. 4,665.

CENSUS POPULATION OF GREAT BRITAIN AND IRELAND

Previous to 1801 there existed no official return of the population of either England or Scotland nor was it till 1823 that statesmen had anything more than surmise to guide them respecting Ireland and the census then taken of that country was far from correct. The estimate formed of the English population at various periods calculated from the numbers of baptisms burials and marriages was in the years—

1570	4 160 221	1670	5 773 646
1600	4,811 718	1700	6 045 008
1630	5,600,517	1750	6 517 035

The first general *Census* of Great Britain and Ireland was taken in 1801, and since the time named there has been a fresh numbering every ten years with the following results

1801	16 345 646	1871	31 845 379
1811	18 509,116	1881	35 241,488
1821	21 272 187	1891	38,104,975
1831	24,392 485	1901	41,976 827
1841	27 036 450	1911	45,370 530†
1851	27 724 056	1921	48 767,530§§
1861	29,321 288		

** The population of Great Britain and Ireland a month before the outbreak of the Great War was officially estimated at 46 089 249. The number of persons to the square mile was in 1921 England and Wales 649 Scotland 164 Ireland (1911) 135 6

CENTRAL GOVERNMENT

THE BRITISH CONSTITUTION—The British Constitution is mainly unwritten and customary but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215) the *Habeas Corpus Act* (1679) the *Act of Settlement* (1701) the *Act of Union with Scotland* (1707) the *Act of Union with Ireland* (1801), the *Parliament Act* (1911) the *Government of Ireland Act* (1920), and the *Irish Free State (Agreement) Act* 1922. The first secured annual parliaments and the equal administration of justice, the second established the liberty of the person, the third provided for the Protestant succession to the throne, the fourth and fifth created the United Kingdom, the sixth enabled the Commons to pass certain Acts without the adherence of the other Chamber, the seventh created the Government of Northern Ireland, and developed into the eighth which established the Irish Free State.

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign*—The throne is hereditary in the British house of Windsor with mixed succession: the sons of the sovereign and their descendants having precedence of daughters but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament but in practice his veto is almost obsolete.

The King can do no wrong is a maxim of the constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress while if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney General.

2. *The Legislature*—Parliament consists of two Houses, the Lords and the Commons.

(a) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right (2) creation by the King (3) official position or election. English bishops (24) Irish peers (28) elected for life and Scottish peers (26) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act 1911. Thus if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords in three successive sessions provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(b) *The House of Commons*—This body consists of 707 members, elected by the registered male and female electors in county, borough, and university constituencies. Roughly speaking, about one third of the population are electors. The maximum duration of Parliament is five

years. Members of the House of Commons receive annual salaries of £400.

3. *The Executive*—The Crown (the King in Council) makes peace and war issues charters, increases the peerage, is the fountain of honour, of office and of justice. The Cabinet under the presidency of the Prime Minister consists of Ministers drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister. Ministers receive salaries of varying amounts (see page 165). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

4. *The Judicature*—(a) *England and Wales*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London but civil cases arising in the country are tried on circuit by judges of the King's Bench (Assizes). The Chancery division has exclusive jurisdiction to try certain classes of actions. In the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts too have jurisdiction to try cases arising under certain special Acts of Parliament e.g. the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that except for certain minor offences every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are (1) the judges of the High Court sitting at Assizes for the trial of cases out of London, and at the Central Criminal Court ('The Old Bailey,' see p. 575) for the trial of cases arising in and around London; (2) Courts of Quarter Sessions holden for every county and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions; (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate; (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(b) *Scotland*—Scottish civil law is administered by the Court of Session which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (see p. 548) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(c) *Northern Ireland*—The higher courts in Northern Ireland are very similar to the English courts but the County Court Judges are also the Chairmen of Quarter Sessions.

LOCAL GOVERNMENT

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1919). The subjects which local bodies administer are *inter alia* the poor law the laws relating to public health the maintenance of the police the control of the sale of intoxicating liquors the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and other schools. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each County (under Chaimen), for each City and County Borough (under Lord Mayors or Mayors) and for Urban and Rural Districts (under Chaimen) every parish being thus included. Scotland has elective County Councils under a Convener Burgh Councils under a Lord Provost or Provost or Parish Councils with Chaimen.

POLICE

The strength of the Police force was 56,908 in England and Wales (1921) and 6,124 in Scotland (1919). The Police of England and Wales are administered by the Home Office those of Scotland by the Scottish Office. The London Police consists of the City Police and of the Metropolitan Police. The City Police district comprises an area of 675 statute acres and contains two courts of justice those of the Guildhall and Mansion House where the Lord Mayor and the Aldermen are the Justices (see p. 233). Although the area is comparatively small the rateable value is enormous and there are 19,657 night residents. The Force comprises 1 Assistant Commissioner 3 Superintendents 6 Chief Inspectors 25 Inspectors 17 Sub-Inspectors 103 Sergeants and 1,006 Constables also 19 Constables on private service duty.

The Metropolitan Police district embraces an area of 447,626 statute acres with a population of about seven millions. There are within this area fourteen Police Courts (see p. 233). The Force on Oct. 1, 1922, consisted of 39 Superintendents, 678 Inspectors, 3,035 Sergeants and 17,267 Constables making a total of 21,029 with 282 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 24, 1922, was 12,576. The cost of the maintenance of the Metropolitan Police in 1921-1922 was £7,928,499 (the fines at Metropolitan Police Courts reduced the gross amount by £68,075). On March 31, 1921, there were 11,143 Police pensioners and 324 widows.

LOSSES FROM FIRE

The annual cost of fire defence in Great Britain may be estimated at about £25,000,000. The average annual direct loss from fire in Great Britain is about £12,000,000. In the United States it is estimated to have exceeded £100,000,000 in 1922. The number of fires attended by public fire brigades in Great Britain is about 22,500 per annum, varying from 77 per 100,000 population in London to half that figure in other large cities and urban districts. The average for England and Wales is 56 per 100,000 population, and 83 per 100,000 population in Scotland. The cost of public fire brigades in Great Britain amounts in the aggregate to about £3,000,000 per annum, and varies from the produce of a 3d rate in London to the produce of a halfpenny rate in an urban district.

CRIME

England and Wales

Indictable Offences—The number of persons tried for indictable offences was slightly higher than in 1920 and was not much below the level of 1913. The figures for the principal groups of offences compare as follows—

	1913	1920	1921
Violence against the person	1,387	1,107	906
Bigamy	133	722	570
Other sexual offences	1,806	1,607	1,535
Burglary robbery etc.	3,984	4,722	4,280
Fraud and frauds	54,356	51,679	53,022
Other offences	1,703	780	982

Totals 63,269 60,617 61,335

Non Indictable Offences—Persons proceeded against for less serious offences numbered 523,718 compared with 611,821 in 1920 and 680,290 in 1913. The totals for certain groups of offences and the corresponding figures for 1920 and 1913 are—

	1913	1920	1921
Game laws	4,262	4,050	5,620
Pool law	6,256	2,044	3,128
Sundry trading	11,555	16,290	18,426
Vagrancy	27,523	6,209	7,246
Education Acts	44,030	42,320	26,529
Highway Acts	76,011	105,790	133,405
Drunkenness	204,038	98,606	81,383
Gaming	29,384	24,323	24,474

Assizes and Quarter Sessions—Of 8,934 persons brought up for trial in Courts of Assize and Quarter Sessions 43 were not actually tried—in 13 cases the prosecution was not proceeded with, and in 30 cases the jury found that the accused were insane and unfit to plead. There remain 8,891 persons actually tried of whom 7,712 were acquitted and 7,152 convicted while 27 were found guilty but insane.

Court of Criminal Appeal—The Court of Criminal Appeal granted leave to appeal in 43 out of 439 applications. In addition there were 18 appeals on grounds involving questions of law and 26 appeals against sentences of preventive detention making a total of 80 appeals for hearing, as against 111 in the preceding year and 157 in 1913. In 31 cases the conviction or sentence was affirmed and in 49 cases the conviction or sentence was quashed, including 30 cases in which other sentences were substituted.

Husbands and Wives, &c.—Separation orders granted in 1921 numbered 5,952 compared with 5,713 in 1913. 9,065 orders were made for the maintenance of illegitimate children (against 6,914) and 9,469 orders for the maintenance of wives (against 7,959).

Juvenile Offenders*—The total number of persons brought before juvenile courts in 1921 was 32,359, namely 15,222 children, 15,031 young persons and 2,106 persons aged above 16. Including those dealt with by ordinary Courts of Summary Jurisdiction there were 33,994 juvenile offenders. Of those brought before Juvenile Courts 3,764 were acquitted, orders

* Children under 14 may not be sentenced to imprisonment nor committed to prison in default of payment of fines damages or costs. Nor may young persons aged 14 to 16 years be so dealt with unless the Court certifies that the young person is of so unruly a character that he cannot be detained in a place of detention or that he is of so depraved a character that he is not fit person to be so detained. (Children Act 1908 sec. 102.)

without conviction were made against 12,680 and 13,669 were convicted. Only seven youthful offenders were sentenced to imprisonment 608 were committed to reformatory schools 603 males were ordered to be whipped, and 12,288 (or 20 per cent. of the number convicted) were sentenced to pay fines. In 2,446 cases the fine was ordered to be paid by the parent or guardian of the defendant. During the year probation orders were made in respect of 10,293 persons.

Homicide—Apart from cases of infanticide and deaths from illegal operations 85 cases of supposed murder came to the knowledge of the police in England and Wales during 1921 compared with 107 in 1920 and 100 in 1919. In 22 cases (1921) the murderer committed suicide in 56 cases arrests were made involving 59 persons and in the remaining 7 cases no arrests were made. In 1921 out of 13 sentences of death 8 were commuted to penal servitude for life. The results of the proceedings taken are shown in the appended table—

	1913	1920	1921
Sentenced to death	27	28	13
Guilty, but insane	13	12	8
Ordered to be detained	—	1	—
Convicted of manslaughter	28	13	14
Accessory after fact	1	—	—
Malicious wounding	—	—	1
Discharged or acquitted	12	26	14
Found insane on remand	5	9	7
Extradited, died &c	3	2	—

Totals 79 91 59
Drunkenness—The total number of convictions for drunkenness in 1921 was 76,347 (63,253 men and 13,094 women) against a total of 128,877 in 1913 and 29,075 in 1918. In 516 cases the condition is reported to have arisen from the drinking of methylated spirit.

EDUCATION

I—ELEMENTARY

Statutes require parents in England and Wales to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age. In Scotland, to provide efficient education up to 15 years. In Ireland, to cause their children to attend school from 6 to 14 years.

In order to give effect to these requirements *Local Authorities* are empowered to make free provision for school accommodation attendance of pupils and teaching staffs, whilst the State supplies nearly one half of the maintenance funds conditionally upon receipt of satisfactory reports from government inspectors appointed by the Board of Education for England and Wales, by the Committee of Council on Education for Scotland and by the Commissioners for National Education in Ireland. It may be remarked—(i) that there is no definition of "school" in the Acts (ii) that efficiency of instruction given is not tested except in publicly managed schools (iii) that Local Authority schools increase in number though still fewer than voluntary (non provided) schools. The latter are maintained by the Authorities whilst the responsibility for the buildings remains with the foundation managers.

In 1921 there were 21,534 public elementary, special and certified efficient schools in England and Wales with accommodation for over 7,150,000 pupils, and 3,113 in Scotland with accommodation for 957,000. Teachers number

200,000, women preponderating. Except in Scotland there is a considerable proportion of teachers who are not fully qualified. The War lessened the number of male teachers which was already diminishing. State grants for pensions on a more liberal scale than formerly are now offered under the Superannuation Act of 1912, by which it is hoped to render the profession more attractive.

Twenty per cent. of the population are of the pupil age. School life is over in the great majority of cases after about seven years of schooling, the minority proceeding to some other kind of day school. Recent legislation requires Local Authorities in England, Wales and Scotland to make schemes for consideration by the Board of Education to provide suitable practical instruction to give advanced instruction to those pupils who stay beyond 14 and to improve the facilities towards preparing pupils for higher education and the teaching profession also nursery schools for children under five.

Elementary school education includes teaching in practical matters—needlework, drawing, gardening handicrafts cookery &c.—and the sections upon health medical attendance, physical training evening play centres, home study future employment &c. show that the schools are valuable agencies in child welfare generally.

II—EDUCATION BEYOND ELEMENTARY

The Education Act 1918 has in view powers for compulsory and therefore free, education of a continuative kind in part time day schools up to 16 and ultimately 18 years and implies free secondary education of some type hereafter.

Secondary

The aims methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute undifferentiated 4 year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial commercial &c. employments.

(i) *England*—The number of Secondary schools deemed efficient by the Board 1920 21 was 1,465 containing 386,000 pupils, of whom about one fourth come up from elementary schools with 'free places' others with scholarships. Nine tenths of these schools receive State grants and nearly one third are controlled by Local Authorities. Fees are charged to most of the pupils. Of these efficient schools about 40 per cent. receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas. Most of them are endowed or under trusts, and their trust incomes and property form a considerable asset in secondary school finance. The Authorities aim at securing graduate teachers as far as possible. As in Elementary schools there is a shortage of fully qualified teachers but the recent Act for providing Pensions for School Teachers may be expected to make the posts more attractive.

(ii) *Wales*—The system is much the same as in England, though the schools are under earlier statutory provisions and are called 'intermediate' in many cases. The number of efficient schools was (in 1921) 122 and of pupils, 22,000 girls preponderating. Three per cent. of the schools do not receive government grants, and 82 per cent. were provided by the Local Authorities. In Wales there is a Central Welsh Board.

(iii) *Scotland Intermediate and Secondary Schools*—Three kinds of courses are provided "Higher Grade and Intermediate with post Intermediate." The former are taken in 196 schools by 35,000 pupils, and the latter in 56 schools by 20,000 pupils. All are under the same Commissioners and Local Authorities as are the Elementary schools.

(iv) *Ireland*—Intermediate Education is under a Special Board who have recently gained fresh statutory powers and a State grant analogous to those in force elsewhere in the United Kingdom. Up to 1917 their operations were chiefly examinational though grants for inspection results had already been authorised and are made. Their report (1917) contains reference to schools in so far as their pupils (11,000) were presented for examination. It seems that 346 schools were affected with some 12,000 pupils. There are also Commissioners of Education in Ireland, whose powers are confined to certain endowed schools (800 pupils) mostly in Ulster.

Technical

Technical Education in England and Wales is provided in Evening and similar schools (mostly controlled by Local Authorities) 3,143 in number and attended by 417,148 students on whom State grants are paid, and of whom about one half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses (294) Tutorial Classes (100) Technical Institution Courses (24) with 1,169 grant earning students. Day Technical Classes (127) held in 38 Institutions with 97,295 students on whom State grants are paid, and also 151 Schools of Art, 19 Branch Schools of Art, and 49 Art Classes.

In Scotland Technical Education is provided in like manner, but in Ireland by a Department of Agriculture and Technical Instruction.

Training

Training is provided by the State for Elementary School Teachers of whom 50 per cent have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the training of

Teachers for Secondary Schools, a small annual State grant being made for the purpose.

Universities

Many of these institutions now receive annual State grants mainly in the form of block grants paid by the Treasury on the advice of the University Grants Committee. Substantial grants are also received from local Education Authorities in England and Wales. State grants to Irish Institutions were transferred from the Treasury to the Irish Governments as from April 1922.

In 1922-23 the Professors and Undergraduates were approximately as under—

	Professors	Undergraduates
Universities	16	16
England (10)	3,077	31,030
Wales (1)	294	2,530
Scotland (4)	747	11,190
Total (15)	4,118	44,750

FINANCE

The Revenue and Expenditure of Great Britain and Ireland for the eleven years ended March 31 1924 are stated as follows—

Year	Revenue	Expenditure
1913-14	£198,743,000	£197,493,000
1914-15	226,694,080	1,134,654,000
1915-16	336,767,000	1,559,700,000
1916-17	573,428,000	2,198,113,000
1917-18	707,435,000	2,696,221,000
1918-19	889,021,000	2,579,301,000
1919-20	1,339,571,000	1,665,773,000
1920-21	1,425,985,000	1,195,428,000
1921-22	1,124,880,000	1,079,187,000
1922-23	914,012,452*	812,496,604
1923-24*	818,000,000	816,416,000

* Budget Estimate (see also p. 490)

THE RISE IN TAXATION

In 1913-14 the amount raised by direct taxation in the United Kingdom was £163,035,000.

ESTIMATED AND ACTUAL REVENUE AND EXPENDITURE 1922-23.

Revenue		Expenditure			
	<i>Estimated</i>	<i>Actual</i>	<i>Estimated</i>	<i>Actual</i>	
Customs	£112,250,000	£123,043,000	Permanent Debt Charge	£16,000,000	£14,809,421
Excise	160,750,000	157,275,000	Interest &c on War Debt	319,000,000	309,780,511
Motor Vehicles Duties	10,600,000	12,321,000	Road Fund	10,000,000	11,778,043
Estate Duties	48,000,000	56,871,000	Payments to Local Taxation Accounts	9,788,000	10,471,016
Stamps	18,250,000	22,222,000	Payments to Northern Ireland Exchequer	2,500,000	3,328,939

<i>Total Revenue</i>	£970,775,000	£914,012,452	<i>Total Expenditure</i>	£920,069,000	£812,496,604
			* Including Supplementary Grants.		

* Including Supplementary Grants.

of £3 10s per head of the population at that period, in 1921-2 the amount raised was £865,713,000, or £18 4s per head. In France the amount raised in 1913-14 was 3 360,000,000 francs, or 84 francs 50 centimes per head in 1921-22 the amount was 18 523 000 000 francs, or 47s francs 40 centimes per head. In Germany the amount in 1913 14 was 2 119 000,000 marks, or 31 marks 30 pf per head in 1921-22 it was 61,991 000 000 marks, or 1033 marks 20 pf per head. In the House of Commons on Feb 22 1923 the Chancellor of the Exchequer (Mr Baldwin) stated that the taxation per head in the United Kingdom, France and the United States was —

Country	Indirect	Direct
U K	£6 2 0	£10 10 0
France	fr 193	fr 242
U S A (Federal Taxes)	\$12 70	\$13 60

NATIONAL DEBTS

Great Britain	£7 766 000 000 = per head £181
United States	\$5,147 000,000 = £47
France	£6,340 000 000 = £162

THE BRITISH INCOME TAX

Before and after the Great War

	1912-13	1920-21
Gross income brought under review	£ 111 456 413	£ 3 000 000 000
Deductions for exemptions, repairs to property wear and tear &c	204 304 600	500 000 000
Actual income liable to tax before deduction of personal allowance &c	907 151 813	2 500 000 000
Total income on which tax was received	755 577 547	1 340 000 000
Total net produce	41 574 277	350 000 000
Normal rate in the £	1s 2d	6s
Produce for each 1d of the normal rate	2 969 591	4 860 000

The Geddes Report

In 1921 a Committee was appointed by the Government (with the Rt. Hon. Sir Eric Geddes, C.B., M.P. as Chairman) to review the National Expenditure. The various spending departments of the Government had undertaken to

reduce their expenditure by £75,000,000 and the task of the Committee was to enquire whether a further economy of £100,000,000 could be effected. The three Reports of the Geddes Committee recommended a total additional saving of £86 844 175, which fell short of the total aimed at by £13 155 825 but the Committee point out that the full sum can be made good (i) in Naval Expenditure (a) as a result of the Washington Conference, and (b) under the heading of oil stocks and oil storage and (ii) in Military Expenditure, upon a review of the garrison abroad. The Estimates reviewed and the Reductions proposed were as under —

Report	Estimates	Reductions
First	£390 000 000	£74 471 875
Second	18 000 000	3 500 000
Third	102 500 000	8 782 300
Totals	£510 500 000	£86 844 175

The Budget 1923-1924

Summary of Provisions

The Budget of Great Britain for 1923-1924 was introduced on April 16 1923 by the Chancellor of the Exchequer (Mr Stanley Baldwin). The financial year 1922-1923 ended with a realized surplus of £102 516 000 which was applied in reduction of the National Debt and the estimated revenue for 1923-1924 showed an estimated surplus of £1 884 000 after allowing for certain remission of taxation.

Changes in Taxation

The Income Tax is reduced from 5s to 4s 6d in the £, the Corporations Profits Tax from 1s to 6d, the Beer Duty is reduced by £1 per barrel, the tax on Sweetened Table Waters is reduced from 4d to 2d per gallon, the Cider Duty of 4d per gallon is abolished. The Rates of Postage are reduced for Inland Letters to 1½d for 2oz, the additional charges being ½d for every additional 2 oz. Letters to British Dominions and the U.S.A. reduced to 1½d for 1 oz, and 1d for each additional ¼ oz. Foreign Letters 1 oz for 2½d instead of 3d. Postcards reduced from 1½d to 1d, and Inland Printed Papers reduced to 2 oz ½d. Certain concessions are made to Telephone users.

Estimated and Actual Revenue 1923-1924		
Service	Budget	Six months
Customs	£116 900 000	£63 043 000
Excise	142 850,000	68 999 000
Motor Vehicle Duties	13 850 000	3 629 000
Estate Duties	52 000 000	26 730 000
Stamps	20 000 000	9 360 000
Land Tax House Duty and Mineral Rights		
Duty	3 000 000	510 000
Income Tax	261 000 000	104 707 000
Super Tax	58 000 000	20 620 000
Excess Profits Duty	12 000 000	Nil
Corporation Profits Tax	20 000 000	10 320 000
Postal Service	33 200 000	15,000,000
Telegraph Service	5 250 000	2 500,000
Telephone Service	14 150 000	7,100,000

STATE EXPENDITURE, 1913-14 AND 1923-24

THE expenditure of the various departments of the State is met from two main sources (1) supply grants (2) receipts appropriated in aid. Together these form the *gross* expenditure for the year, the *net* expenditure being the amount raised by taxation for the particular purpose. In order to measure the actual total expenditure of public departments the more significant figures are the *gross* estimates that is the supply grants and appropriations in aid combined, as these figures represent the total cash sums placed by Parliament at the disposal of departments.

The total cost of the Consolidated Fund and Supply Services in 1913-14 (the last complete year before the (real War) in 1918-19 (when expenditure reached its maximum) and in 1923-24 (Budget estimates) are given below (in Thousands of £) —

Services	1913 14. (Actual)	1918-19 (Actual)	1923 24 (Est.)
Consolidated Fund Services	37 323	281 345	380 470
Fighting Services	86 028	1 415 534	144 922
Civil Services	55 006	1 399 552	285 455
Revenue Departments	29 461	50 055	64 688
Total (Gross)	207 818	3 246 476	875 535

(CIVIL SERVICE DECREASES)

Reductions in staffs and the accelerated liquidation of war commitments have enabled further considerable savings to be effected in the expenditure of the Civil Departments. The estimates for salaries and expenses in 1923-24 amount to £10,821,749 (including £639,915 attributable to war services) giving a net reduction on the total for last year of £3,347,555. On balance only seven of the forty departments and services show increases. These together amount to £447,725 while the decreases under the other heads reach a total of £3,795,280. For the first time the Departmental votes include provision for payment to the Post Office for telephone services, which will appreciably add to the Post Office revenue. An increased charge of £3,585,500 to meet the cost of the withdrawal and redemption of silver and bronze coin is covered by additional appropriations in aid to the extent of £3,130,800, leaving a net increase in the estimate for the Mint of £199,990. The grant in aid to the Forestry Commission is raised from £20,000 to £163,000. It is stated that legislation may shortly be introduced to transfer the Crown woods and forests to the Commission. The expenditure and revenue connected with these woods are at present debited and credited to the account of the land revenues of the Crown—the annual surplus on which is paid into the Exchequer. If the proposed legislation is carried the land revenues will be relieved of and the Forestry Fund will be charged with, a net sum in 1923-24 which is estimated at £10,000. Higher grants in respect of unemployment schemes and for agricultural education and research, and the improvement of live stock increase the *Scottish* estimates by £107,399. For the ordinary services of the Ministry of Agriculture £12,047,000 is required, but owing to a decline of £60,200 in the vote for the agricultural training of ex-officers and men, the total expenditure of £1,764,451 shows a net

reduction of £47,253. The main items compared as follows

	Estimates 1923-24	Increase (+) or decrease (-) on 1922-23
Salaries and allowances	511 351	- 34,039
Education and Research	666 440	+ 74 560
Live stock grants &c	89 360	- 97,525
Land settlement and improvement	923 710	+ 178 985
Kew Gardens	46 562	- 5 220
Sugar beet	12 500	—
Fisheries Department	76 826	- 8 216
Training of ex-officers and men	12 800	- 60 200

In the case of the Board of Trade the estimates for the ordinary services amount to £472,133 and that for war services to £560,415. These figures represent decreases of £134,068 and £702,632 respectively. Compared with last year's estimates the war services show the following increases and reductions —

	Estimates 1923 24	Increase (+) or decrease (-) on 1922-23
Food Department	16 500	- 54,155
Claims Office (Enemy Debts)	634 000	+ 261 064
Russian Claims Dept.	2 350	- 2 510
Reparation claims Dept.	22 100	- 17 660
Other war services	8 090	- 22 357
Diverted cargoes (cotton)	40 000	- 110 000
Reparation dyes	99 800	+ 50 300
Assistance to industry	5 625	- 1 250
Air raids compensation grants	750	- 850
Australian zinc concentrates	2 120 000	+ 701 100
Australian spelter	500	- 849 500

The cost of administration of the *Enemy Debts Clearing Office* will be covered by fees and the vote for reparation dyes represents the costs of distribution which will be met out of the proceeds of the sale of the 3,000 tons due from Germany in 1923-24 under the Peace Treaty. It is expected that the sales of Australian zinc concentrates which the Government may be required to take under the contract of April 1918, will produce £2,005,000.

As regards the *Other Departments* the decreases as a rule represent the aggregate of savings on a large number of items, but especially on salary lists. Apart from the automatic reduction of £1,283,363 on *Irish services*, the principal decrease is in stationery and printing, which at £1,644,592 is lower by £1,033,090. The main reductions on last year are Printing £245,000 paper £247,000 salaries wages and allowances £161,875 office supplies, £112,000, and binding, 70,000.

EX-SERVICE MEN

Statistics issued by the Treasury show that out of a total staff (permanent and temporary) in Government offices on Aug 1, 1922, of 324,667, of whom 233,461 were men ex-Service men numbered 124,963.

THE NATIONAL DEBT

The National Debt was raised almost entirely for foreign wars. There was a trifling sum of £664,263 until the 'Glorious Revolution' of 1688 which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II about £87,000,000 were added, but the first twelve years of George III saw £10,000,000 of this paid off. The American War added £121,000,000 making the total nearly £250,000,000 which was reduced considerably until 1793 when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty three years £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised—

Year	£	Year	£	Year	£
1793	4,877,956	1801	27,305,271	1809	12,298,375
1794	6,998,389	1802	14,638,254	1810	7,792,444
1795	30,464,831	1803	8,754,761	1811	19,143,953
1796	22,244,922	1804	14,570,763	1812	24,790,697
1797	30,356,873	1805	16,649,801	1813	39,649,282
1798	16,858,503	1806	13,035,344	1814	34,563,603
1799	21,714,863	1807	10,432,924	1815	20,241,807
1800	23,030,520	1808	12,095,044	1816	514,059

The amount of the Debt in January 1816 was £900,436,000 (Funded £816,312,000 Unfunded £44,727,000 Annuities £39,397,000) the annual charge being nearly £33,000,000 but the following amounts were paid off from 1817-1837—

Year	£	Year	£	Year	£
1817	1,826,814	1824	7,456,559	1831	2,673,858
1818	1,624,666	1825	9,900,725	1832	5,696
1819	3,163,130	1826	1,195,531	1833	1,023,784
1820	1,218,019	1827	2,022,028	1834	1,776,378
1821	4,104,457	1828	4,667,965	1835	1,270,050
1822	2,962,564	1829	2,760,003	1836	1,590,727
1823	5,621,725	1830	1,935,465	1837	1,985,885

At the accession of Queen Victoria the amount stood at nearly £788,000,000 with an annual charge of £29,000,000. Small sums were paid off annually from 1837-1854 when the Russian War added £33,000,000 to the Debt. Repayments were made from 1858 onwards with slight increases in 1868, 1875, 1878, 1879 and 1886 the following being the actual amounts paid off—

Year	£	Year	£	Year	£
1858	2,971,727	1874	3,443,023	1886	Nil
1859	58,441	1875	6,899,370	1887	5,993,723
1860	2,888,254	1876	15,004,807	1888	30,703,615
1861	381,691	1877	Nil	1889	7,426,812
1862	1,038,371	1878	7,094,132	1890	8,636,931
1863	968,099	1879	1,106,831	1891	4,709,820
1864	9,236,915	1880	Nil	1892	5,412,351
1865	4,054,429	1881	4,034,595	1893	6,894,203
1866	8,789,050	1882	5,350,543	1894	4,543,540
1867	1,886,986	1883	15,647,752	1895	8,943,417
1868	Nil	1884	6,669,421	1896	7,620,502
1869	1,092,700	1885	9,952,555	1897	7,630,265
1870	4,073,603	1886	6,923,283	1898	6,643,365
1871	5,303,406	1887	6,873,119		

On March 31 1890 the Dead Weight total was £635,070,635 being a decrease since 1837 of £153,000,000. For the South African and China wars £124,752,190 were raised, but from April 1 1903 to March 31 1914 the sum of £115,518,571 was paid off and the total Debt on March 31 1914 was £661,473,765.

The total gross liabilities of the State for the financial year 1922-23 was £774,526,127 as against £763,128,332 for 1921-22. There are increases of £265,769,829 in the Funded Debt and £17,492,396 in Other Capital Liabilities (total £283,262,225) and reductions of £1,506,924 under Terminable Annuities and £173,377,486 under Unfunded Debt (total £174,884,410).

The unfunded debt was increased by additional creations under the War Loan and other Acts by £500,097,918. Treasury bonds as counting for £429,636,031 and National Savings Certificates for £56,969,826. On the other hand reductions were effected in War Loan Victory Bonds, Exchequer Bonds, National War Bonds, Treasury bills etc to the aggregate amount of £673,475,404. Included in this sum were sur-renders for death duties totalling £31,635,088.

At March 31 1923 the aggregate National Debt consisted of the following—

External Debt	£1,088,669,915
Internal Debt floating	1,020,915,500
Other Internal Debt	5,566,709,694
Other capital liabilities	66,221,038
Total	£7,742,526,127

	£6 111,121 473	£6 614 989 639

The total of the *floating Debt* outstanding on Nov 10 1923 was £811 271 500 a reduction of £102,902 000 since Nov 11 1922

Paper Money

Current Notes (Paper Money) in circulation on Nov 7 1923 amounted to £259 875 735 a decrease since Dec 1920 of £87 625 000

The External Debt

The External Debt consists of loans from British Dominions the United States and other countries and was stated at the following total: on March 31 1921 and 1922 —

	1921	1922
Canada	£53 339 000	£27 418 000
Mauritius	538 000	538 000
Straits Settlements	7 656 000	7 656 000
U.S.A.	963 622 000	920 490 000
Allied Governments —		
France		*53 500 000
Russia		*60 000,000
Italy		*14 500 000

Sweden	826,000	Nil
	£1 161 563 000	£1 090 184 000

In the three financial years 1920-1922 the sum of £274,666 000 was paid off the External Debt

* See Estimated Assets below

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at \$4 604 128 085 of which \$4 128 085 was to be repaid at once in cash and the balance funded at 3 per cent for 10 years and 3½ per cent thereafter until redeemed by the operation of an accumulative sinking fund of ¼ per cent in 62 years. Interest is payable on June 15 and Dec 15 in each year at the rate of 3¼ per cent for the first 10 years and 4 per cent thereafter to include the sinking fund.

Estimated Assets

The estimated value of the Debts owing to Great Britain by British Dominions and Foreign Countries and of Investments made by the

British Government in various Loans and undertakings is shown below (as on March 31, 1923) —

War Loans

Dominions —	
Australia	£91 453,000
New Zealand	29 623 000
Canada	13 810 000
South Africa	12,286 000
Other Dominions and Colonies	3 260 000
	£150 432,000

Allies —

Russia	£655 000 000
France	601 645 358
Italy	527 865 000
Yugo-Slavin	26 194 265
Poland	89 701
Rumania	23 548,900
Portugal	20 467 200
Greece	22 399 590
	£1 877 210 054

Fulfil Loans

Austria	£10 238 386
Poland	4 156 033
Rumania	2 231 753
Yugo-Slavin	2 135 045
Czecho-Slovakia	478,845
Hungary	148 765
	£19 478 827

Reconstruction Loans

Belgium	£ 9 000 000
Austria	2 546 501
	£11 546 501

Other Loans

Czecho-Slovakia	£901 082
Total Loans &c.	£1 900 136 424
Miscellaneous Assets	£112 609 234
Exchequer Balances	11 173 530
	£2 121 243,764

Included in the Miscellaneous Assets are *Suez Canal Shares* valued at £19 206 335 and investments in various registered companies the amounts paid for the shares being: Anglo-Persian Oil Company £5,200 000 Cunard Steamship Company £2 600 020 British Dye stuffs Corporation £1 700 001 British Cellulose and Chemical Mfg Co £1 450 000 Commercial Bank of Siberia £1 198 371 Standard Ship building Co (T. Finch Ltd) and Chepstow Property Co £656 250 British America Nickel Corp of Canada £629 618 British Farina Mills £325 000 Home Crown Sugar Ltd, £187 500 Turkish Petroleum Company £22,105

Reparations

The British share of the capital obligations of the enemy Powers on the existing basis as determined by Inter Allied Agreements is twenty nine milliard gold marks (£1,450 000 000) to which approximately 2,200 000,000 gold marks (£110 000,000) must be added in respect of reimbursement of the Belgian War Debt to Great Britain the liability for which was transferred to Germany. These figures are subject to adjustment on the one hand on account of sums already received, and, on the other, in respect of interest in arrears, but these adjustments are not sufficiently important in amount appreciably to modify the total figures. Figures are not given separately for Austria, Hungary, and Bulgaria, which are included in the figures given above.

Debit and Credit Balances

The figures presented to the Reparations Commission as balanced on March 31, 1923, were stated in *milliards of gold marks* as under:—

Country	Credits	Debits	Balance	
			Credit	Debit
U.S.A.	48 7	ml	48 7	
Gr. Britain	67 2	19 8	47 4	
France	68 6	21 5	47 1	
Belgium	8 8	1 1	7 7	
Italy	12 2	17 9		5 7
Other States	8 5	9 3		0 8
Russia		19 2		19 2
Germany		5 3		5 3
German Reparations		119 9		119 9
Totals	214 0	214 0	150 9	150 9

What Germany has Paid Great Britain

The Chancellor of the Exchequer (Mr. Baldwin) stated in the House of Commons the amounts Germany has paid by way of reparations under the *Treaty of Versailles* from Nov. 11, 1918 to April 30, 1923:—

Gold and paper currencies	740 000 000
Deliveries in kind	413 000 000
Total	1 153 000 000

At twenty gold marks to the pound the total would represent £57 600 000 on which the cost of the Army of Occupation was a charge prior to Reparations proper. Between May 1, 1922 and December 1922 a further sum of approximately 100 000 000 gold marks (or about £5 000 000) was received in respect of loans under the Reparation (Recovery) Act due to the U.S.A.

U.S. Loans to Foreign Governments

The following figures show the amounts due to the United States by the different foreign governments on May 15, 1923. The figures include interest accrued and unpaid up to the last interest period as well as the principal amounts:—

Armenia	\$13 137 456	Italy	\$1 801 514 634
Austria	25 220 723	Latvia	5 522 206
Belgium	418 056 217	Lithuania	28 869
Bulgaria	8 147 000	Nicaragua	5 479 791
Czechoslovakia	103 106 420	Poland	170 85
Estonia	15 604 148	Poland	148 504 423
Finland	5 005 000	Romania	4 089 387
France	3 770 906 656	Russia	227 801 950
Gr. Britain	4 045 872 500	Yugo-Slavia	57 872 196
Holland	15 375 000		
Hungary	1 837 501	Total	\$18 456 383 050

The whole amount advanced by the United States to foreign Governments plus unpaid interest, was on May 15, 1923, \$11 456 383 000, of which the share of Great Britain was \$4 685,862 500. According to a statement in the House of Commons by the Financial Secretary to the Treasury in April, 1922, the actual amount advanced to Great Britain after the United States entered the War was \$4 197 000,000 the difference of \$488,000,000 representing added interest. When the statement was made the Financial Secretary added that during the period in which the British Government was borrowing from the United States it was lending £897,000,000 to Allied Governments, in addition to £828 000,000

lent to them before the United States entered the War. Had the British Government been relieved of the necessity of lending this £897 000,000 to the Allied Governments it would have been so far as could be judged unnecessary for the British Government to ask financial assistance from the United States Government.

The Bankers Trust Company of New York has provided details of the expenditures made in the United States by the British Government during the period in which loans were made to Great Britain by the United States Government. The figures show that while the total cash advances of the United States to Great Britain amounted to \$4 277 000 000 the British Government expended in the United States during the same time the sum of \$7 220 000,000 or \$2 943 000 000 more than the total amount lent to Great Britain. The items upon which these British expenditures were made in the United States were as follows (April 1917 to November 1920):—

Munitions (including horses, &c.)	\$ 536 000,000
Cotton cereals (to July 1917) and bills of exchange bought to meet expenditures in U.S.	1 683 000 000
Cereals after July 1917	1 375 000 000
Other foods	1 169 000 000
Tobacco	99 000 000
Other supplies	215 000 000
Payments for shipping	49 000 000
Interest paid to the U.S. Treasury	388 000 000
Repayment of loans raised in the United States	353 000 000
Purchases of silver	262 000,000
Paid in miscellaneous ways	91 000 000
Total	7,220 000 000

A number of the above purchases notably cereals, sugar and munitions were made by the British Government for other Allied Governments and those Governments subsequently repaid Great Britain \$2 854 000 000 after deducting those repayments the net expenditures by Great Britain in the United States for British purposes were \$2 366 000 000 or over \$1,000 000 000 more than was lent to the British Government by the United States.

The above expenditures were provided for as follows (April 1917 to November 1920):—

Loans by U.S. Treasury (net after deducting repayments)	\$ 4 197 000 000
Dollars paid by U.S. Government to British Government for sterling required to make payments in England	449 000 000
Dollars paid to British Government for rupees and gold from India sold to U.S. Treasury	81,000,000
Money raised by the British Government from other sources	639 000,000
Total	5 366,000 000

The final item includes any payments to Great Britain for services rendered such as transportation of troops, &c. which the United States made in dollars in America together with such sums as accrued to the British Government from interest on or sales of American securities owned by it, shipments of gold and other exports, &c.

Defaulting Debtors

The Council of Foreign Bondholders reported in 1923 that a total of £1,782,544 201 of principal is owing by states which do not pay their debts in addition to over £486,000,000 for interest due. The principal defaulter is Russia (£1,746 274 12s), and included in the list are certain Southern States of the U S A and certain cities of South America.

OTHER CAPITAL LIABILITIES

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension for the purchase of land for Government offices, &c. On March 31, 1922 these liabilities stood at £66,231 038, an increase of £17 492 356 over the total for the previous year, an amount of £20 574 715 having been created and £3 082 319 having been redeemed during the year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to creditors of bankrupt estates.

Loans Guaranteed by British Government—The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31, 1922 to be as follows—
 Turkish Loan £3 815 200 Egyptian Loan £5 661 800 Greek Loan £3 899 100 Mauritius Loan, £255 167 Transvaal Loan £27 226 549 Sudan Loan £6 440 000 Welsh Church Loan £2,350,000 Local Loans £217,309 766, Irish Land Purchase Stock £8 232 913 (do) £56,621 017 (do) £60 920 212 and Temporary Advances, £670 000

LOCAL GOVERNMENT DEBTS

In addition to the *National Debt* there are considerable amounts outstanding as Loans of *Local Authorities* in England and Wales Scotland and Ireland. These amounts were raised for the provision of baths cemeteries electricity supply, gasworks harbours, piers, docks, canals and quays, light railways, markets tramways waterways and other purposes. On March 31, 1919 there were outstanding loans in England and Wales to the amount of £544,184,848 including £49,806,762 Metropolitan Water Board Stock and £28,340,459 of the Port of London Authority against the total the sum of £55,720,756 stood at the credit of various Sinking Funds. The total amount of outstanding loans and capitalized annuities in Scotland (on March 31, 1918) was £61,887,957 and in Ireland (on March 31, 1919) £25,453,114.

LOCAL RATES

The Gross Rental of Rateable Hereditaments in England and Wales in 1917-18 was £291,535,480 the Rateable Value being £230,746,781. The following particulars relate to the 154 boroughs and urban districts, and to 100 typical rural parishes out of an aggregate of some 13,000 in England and Wales. In 1921-22 the amounts levied were in most of the urban areas between 12s 6d and 17s 6d in the £ and in most of the typical rural areas between 10s and 15s. The extreme range recorded for urban areas was from 5s 11d in Bromborough (Cheshire) to 34s 7d in Ebbw Vale, and that for rural areas was from 5s 11d in a Isle of Wight parish to 28s 6d in a parish in Carmarthen. Taking England and Wales as a whole, the average amount of the local rates rose from 13s 3½d in 1920-21 to 14s 9½d in 1921-22, an increase of 13 per cent. It is estimated that the average amount levied in the urban areas in 1921-22 was double the average for 1913-14, and in the rural parishes considerably more. The estimated increases per cent were—

	Per cent
Metropolitan boroughs (including City)	101
County boroughs	108
Other boroughs and urban districts	100
100 typical rural parishes	139

As a result of the quinquennial valuation in 1921 the total assessable value of all the rateable property in England and Wales rose from £223,660,000 to £234,080,000 or by 4.6 per cent. The increase in value in the several boroughs and other areas was very unevenly distributed. In London it ranged from less than 1 per cent for some boroughs to upwards of 13 per cent for others.

By far the larger part of the increase in recent years in the amount of the rates required by the local authorities is attributable to the increases in the cost of living, salaries and wages, and the prices of the materials required for the carrying on of the local services. Great arrears of work (especially on the roads) have been put in hand and paid for since the Armistice and the industrial depression has been accompanied by an abnormal increase in the number of persons receiving relief at the expense of the rates. The highest point was reached in the second half of the year 1920-21 and the latter half of 1921-22. In the second half of the last year there was a

marked decrease in many places. Some part of the decrease is attributable to an increase in the valuations on which the rates are levied, but in many instances there is a fall in the amount required from the ratepayers due to a reduction in the expenditure of the authorities.

In the following table are set out the total amounts of local rates collected in England and Wales from 1913-14 to 1921-22—

Year	Total receipts from rates	Average amount collected	
		Per £	Per head
1913-14	£71,276,000	6 8½	£1 18 11
1914-15	73,734,000	6 10½	1 19 11
1915-16	75,851,000	7 0¼	2 0 8
1916-17	72,885,000	6 8½	1 18 10
1917-18	75,377,000	6 10½	2 0 1
1918-19	84,700,000	7 8½	2 5 8
1919-20	105,590,000	9 6½	2 16 4
1920-21	148,750,000	13 3½	3 19 1
1921-22	173,000,000	14 9½	4 11 4

LOCAL EXPENDITURE

The estimated *Rate expenditure* of Local Authorities in Great Britain for 1921-22 was £192,008,000 of which England and Wales accounted for £173,000,000 and Scotland for £19,008,000. The estimated total was allocated as under—

Service	England & Wales	Scotland
Poor Relief	£35,700,000	£3,689,000
Education	35,600,000	4,697,000
Police	10,200,000	1,141,000
Other Services	91,500,000	9,541,000
	<u>£173,000,000</u>	<u>£19,008,000</u>

PAYMENTS TO LOCAL TAXATION ACCOUNTS

In addition to the amounts raised by Local Authorities from the Rates the sum of £10,471,016 was paid by the Exchequer to Local Taxation Accounts in the financial year 1922-23.

England and Wales received £1,107,260 in respect of Additional Beer and Spirit Duties, £1,804,850 in respect of Liquor and £835,222 in respect of Other Licences, £3,581,301 in relief of Rates, £418,552 in relief of Rates on Tithe Rent Charges, £1,321,756 under the Agricultural Rates Act and £60,000 for the cost of collection of Licence Duties, a total of £9,128,911.

Scotland received a total of £1,342,104.

CENTENARIANS

In 1921 the deaths were recorded of 59 persons (21 males and 38 females) aged 100 years and upwards in England and Wales. The ages recorded were—

Age	Males	Females	Total
100	9	16	25

GREAT WAR PENSIONS

THE rates of disability retired pay and pensions in respect of disablement due to service in the Great War are contained in the Royal Warrant of July 2, 1920 (*Officers and Nurses*) the Royal Warrant of December 6 1919 (*N C O s and Men*) and the corresponding Orders in Council and Orders applicable to the *Royal Navy* and *Royal Marines* and the *Royal Air Force*

DISABILITY

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury and disease attributable to or aggravated by war service. Such temporary award usually runs for a period of 12 months and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act 1917 and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation the effect of which is to stabilise pensions gradually to eliminate recurring medical examinations and to bring about finality as to the amount of pension to be awarded. A man on receiving notification that a final award has been made to him has a right of appeal subject to certain conditions to an independent Assessment Appeal Tribunal whose decision is final and binding on both the Ministry of Pensions and the appellant.

Disablement for the purpose of pension is assessed on a percentage scale. Total disablement is reckoned at 100 per cent and the lowest degree entitling to pension is 20 per cent. Where the disablement is assessed at less than 100 per cent the disablement pension and any allowances attached thereto are proportionately reduced. For instance a man 50 per cent disabled would receive 50 per cent of the full rate of pension and 50 per cent of any allowances for wife and children to which he might be entitled.

Disablement assessed at less than 20 per cent is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks subject in either case to a maximum payment of £200.

RATES OF PENSION

The following are the principal rates of weekly pension for a private soldier 100 per cent disabled and of pensions or allowances for dependants of a private soldier (except in the case of wife and children's allowances the rates for other ranks are higher) —

Private—over 40 with children 26s 8d; child 10s; allowances—7s 6d for first child and 6s for each other child (if there is no wife 10s for the first 7s 6d for the second and 6s for each other child).

Widow—over 40 or with children 26s 8d; under forty and without children 20s; allowances for children 10s, 7s 6d, 6s.

Parents—need pensions not exceeding 20s. Provision is also made for other dependants.

A totally disabled man who is certified to

require constant attendance may receive an additional allowance not exceeding 20s a week.

Alternative Pensions

Alternative pensions are based upon the man's ascertained pre War earnings. Application for alternative pension must be made within a year after the notification of the first award of disablement pension.

The Ministry of Pensions provide medical treatment for disabilities attributable to or aggravated by service and if in consequence of a course of treatment a man is unable to provide for his own support and that of his family treatment allowances may be granted in lieu of his disablement pension and allowances.

NUMBER OF AWARDS

Officers and Nurses—From the beginning of the War to March 31 1923 the following awards of retired pay were made to officers (Navy Army and Air Force) and their relatives and to Nurses —

Officers	58 671
Widows	11 173
Children	12 300
Other Dependents	7 796
Nurses	2 314

Men's Awards—The following awards were made to N C O s and men (Navy Army and Air Force) and their dependants from the beginning of the War to March 31 1923 —

<i>Navy</i> —Stamen and Marines	32 375
Children's Allowances	20 702

<i>Army and Air Force</i> —N C O s and Men	1 227 675
Children's Allowances	994 008

<i>Widows</i> (Navy and Army)	240 113
Children of Widows	388 228

<i>Motherless Children</i>	15 056
----------------------------	--------

<i>Other Dependents</i>	427 657
-------------------------	---------

PENSIONS AND ALLOWANCES IN PAYMENT
(on March 31 1923).

The following pensions (approx) were in payment as at March 31 1923 —

Officers	28 200
Nurses	1 300
Officers Widows	9 400
Children	8 500
Dependants	6 600
Men	605 000
Men's Widows	154 500
, Motherless Children	18 000
Dependants	357 000

The following allowances were also in payment as at March 31 1923 —

Men's Final Weekly Allowances	120 000
Allowances for Men's Wives and Children	877 000
Allowances for Children of Men's Widows	320 000

PRODUCTION AND INDUSTRY OF GREAT BRITAIN AND IRELAND

Total	414 715	76 001	572,574

(a) Exclusive of Allotments under the Small Holdings & Allotments Act 1908 of which there were estimated to be 500,000 (1914) and 1,300,000 (1921) in England and Wales. (b) Classification for Ireland only.

Fisheries

The quantities and values of the sea fish of British taking landed in Great Britain and Ireland in 1922 (exclusive of river salmon) are shown in the following table. The total catch exceeded that of 1921 by 60,000 tons but was 177,000 tons less than the 1920 quantity (by far

the largest since the outbreak of the War) and 203,000 tons less than the record catch of 1913. Representing the 1913 catch by 100, the catches during 1920, 1921 and 1922 were respectively 90, 70, and 75. Notwithstanding the larger quantity, the total value in 1922 was £3,255,000 (15 per cent) less than in the previous year.

The selling value (at the mines and quarries) of all minerals won in 1922 was £4,277,445,000. The total number of persons employed in 1922 at the 3,428 mines in work was 1,156,928, and 924,629 (males) were employed underground and 226,071 males and 6,238 females above ground. In the 4,362 quarries 69,979 persons were permanently employed of these 43,017 (males) worked inside the quarries and 25,962 (410 females) outside the quarries.

Accidents in Mines and Quarries

In 1922 1,073 fatal accidents (causing 1,153 deaths) occurred in the mines and quarries of Great Britain. In coal mines the number of reported fatal accidents was 1,020 while the number of deaths resulting was 1,100.

The year 1923 was marked by two serious colliery accidents. The first was on July 28 at the *Waltham Main* Colliery near Rotherham. As a result of 100 fires the work of coal getting had been given up but 130 men were below endeavouring to stop the fires when an explosion took place in a byway off the main haulage road. The men were in small parties working at different spots, and consequently the majority escaped but 27 lives were lost despite the efforts of rescue parties. The second occurred in the early morning of Sept. 25. The *Redding* pit about two miles from Falkirk was flooded by an inrush of water from disused workings at a higher level. There were 75 men working in the pit at the time and of these 10 escaped at the first inrush. 21 were rescued a few hours later from the shaft of another disused working and three bodies were brought up. Strenuous efforts were made to reach the remaining men and splendid heroism was displayed. Day after day this work was continued and when hope had been all but abandoned early on the morning of Oct. 4, five men were brought up alive after 214 hours imprisonment.

The World's Coal Output

The United States Geological Survey has estimated the total output of coal for the world in 1922 at 1,332,000,000 short tons (£2,000)

Country	Metric Tons (2,204 lb)	
	1921	1922
United States	448 600 000	417 000 000
Germany		
Coal	145 400 000	141 000 000
Lignite	120 000 000	137 000 000
Great Britain	166 992 000	256 000 000
France	29 000 000	25 000 000
Japan		25 000 000
Poland		24 000 000
Belgium	21 807 160	21 000 000

Coal Production of Great Britain and Ireland

Year	Persons employed	Output	
		Tons	Value
1913	1 127 890	287 411 869	145 535 669
1914	1 131 746	265 664 393	132 596 853
1915	953 642	253 206 081	157 830 670
1916	998 063	256 348 351	200 014 626
1917	1 021 240	248 473 119	207 786 894
1918	1 008 867	227 748 654	238 240 750
1919	1 191 313	229 779 517	314 113 160
1920	1 248 224	229 205 000	396 871 864
1921	1 126 000	163 250 897	213 745 652
1922		250 808 767	

In 1922 there was a stoppage of production for 88 days ending in a settlement of the Coal Dispute on June 28 1921

Coal Exports

Admiralty shipments of coal (34 500 000 tons in 1918) are not included in these figures. Before the Great War of 1914 1918 the value of the coal consumed by the ships of the Royal Navy was about £2 500 000 annually. Oil has taken the place of coal in most of the recently built ships.

Year	Exported		Bunkered
	Tons	Value	
1913	73 400 118	50 727 252	21 023 693
1916	41 157 746	50 670 604	12 088 000
1917	37 800 705	52 341 487	10 228 000
1918	34 173 847	52 416 083	8 755 000
1919	35 249 568	92 207 685	12 021 000
1920	24 931 853	99 627 146	13 840 360
1921	24 660 552	42 951 591	10 226 444
1922	64 198 384	22 529 500	18 273 017

The average F.O.B. value of the coal exported was 13s 8d per ton in 1913 70s 11d in 1920 34s 10d in 1921 and 22s 7d in 1922. The countries to which coal was exported are shown in the table at the top of the next column, the figures representing long tons of 2,240 lb in the calendar years 1913 1921 and 1922.

Iron Ore

The production and importation of iron ore are as shown below. Values are not shown as that of iron ore produced in Great Britain is taken at the place of production while the value of imported ore is enhanced by transport and handling to the port of entry. The value of the iron ore produced in Great Britain in 1921 is stated at £2 209 200 that of the imported ore at £3 736 000.

Year	Tons Produced	Tons Imported
1913	15 997 000	7 441 000
1918	14 613 032	6 581 728
1919	12 254 195	5 200 696
1920	12 707 000	6 501 000
1921	3 477 925	1 887 872

Pig Iron and Steel

The quantity of pig iron and steel ingots and castings made is shown below. In 1905 the quantity of coal used in the manufacture of pig iron was 19 255 555 tons. In 1921 the quantity was 651 000 tons of coal and 3 076 000 tons of coke. In 1905 there were 345 blast furnaces at work, and in 1922 they numbered 189.

	1921	1922
Pig Iron (tons)	2 611 400	4 899 600
Steel Ingots and castings (tons)	3 624 800	5 832 000

Pre War and Post War Personnel

	April 1914	Nov 11 1918	April 1922
Navy	174 500	436 000	121 400
Army	145 600	3 996 000	196 000
Air Force		293 000	27 300
Govt Depts	277 900	418 025	317 722
Total	598 000	5 143 025	662 422

Joint Stock Companies

On Dec 31, 1920, there were registered in Great Britain and Ireland 79,542 Joint Stock Companies with a total paid up capital of £3,508,012,486, the number of companies registered during 1920 was 11,011 with share capital £593,189,032

Building Societies

In 1919 there were 1,315 Incorporated Building Societies in Great Britain and Ireland, with liabilities on shares £54,000,000, to depositors etc., £15,868,245 a total liability of £70,769,167 the assets consisted of mortgage securities, £56,323,135 and other assets, £18,845,812 showing a balance of undivided profits and reserve funds of £4,389,780 there were also 44 unincorporated societies in England and 1 in Scotland

Municipal Trading

Local taxation returns for England and Wales show that in 1919-20 the ratepayers contributed in public rates a total of £45,647,767 towards the expenses of the larger municipal bodies namely the City Corporation the London County Council the Metropolitan Borough Councils, the Metropolitan Police the Metropolitan Water Board and the 82 county borough councils. These local authorities also received in that year in aid of current expenses charged on their rate funds Exchequer grants amounting to £22,557,074 and fees tolls rents, and other miscellaneous receipts amounting to £9,299,445

In addition their trading undertakings produced an aggregate revenue of £54,695,996 while the net income of their reserve and other special funds was £4,765,068, and their receipts on capital accounts amounted to £14,055,602. The total sums received by these 114 authorities to meet their own expenditure constituted 52.7 per cent of the aggregate receipts of all the local authorities—some 25,000 in number—in England and Wales

Municipal trading, by the 82 county borough councils resulted in a net deficiency over all the undertakings of £130,597. While certain undertakings produced an aggregate surplus of £299,512, others realised a loss of £1,060,109. The account stood as follows—

	Surplus	Deficiency
Water Supply	£16,319	£512,953
Gas	139,704	
Electricity	185,365	36,990
Trams and buses	546,744	67,099
Markets	42,722	16,864
Harbours, Docks, &c.	2,500	201,592
Cemeteries		199,847
Light Railways	5,000	7,407

Trade Union Membership

The International Labour Office stated in March, 1921 that the number of Trade Unionists in the twenty leading countries of the world was 32,680,000 at the end of 1920, Germany having the largest number (9,000,000) and Great Britain and Ireland 8,024,000, the smallest number being 20,000 in Serbia

Returns for 1920 furnished to the Registrar of Friendly Societies relating to 602 Trade Unions in Great Britain and Ireland show that at the end of the year the total membership was 7,091,721 an increase in twelve months of over 400,000. The aggregate income of the Unions was £12,052,536 (against £9,723,255 in 1919). At the end of 1920 the funds amounted to £15,989,025

Industrial and Provident Societies

In 1919 there were 3,119 Societies making returns to the Registrar of Friendly Societies, with 4,393,570 members share capital, £73,207,701, liabilities, £46,919,686, and sales to the value of £348,805,920

Co Operators' Profits

The half yearly balance sheet of the Co operative Wholesale Society submitted to the business meetings in October 1920 shows sales of £32,000,000. During the half year the supplies from the various productive works were just over £10,000,000. After providing for all the expenses of production and distribution and £994,634 for interest on capital and depreciation of property, there is a net profit of £23,521

Unemployment Statistics

The live registers of the employment exchanges in Great Britain contained the highest figures for unemployment on June 24, 1921 subsequent figures being appended for comparison—

	June 24 1921	June 26 1921	June 25 1921	Oct. 15 1921
Men	1,459,639	1,173,276	908,731	936,584
Boys	81,252	41,699	35,887	42,653
Women	439,541	260,985	212,122	235,937
Girls	64,223	29,333	32,299	38,968
Total	2,044,655	1,405,293	1,189,059	1,254,142

Cost of Unemployment

Total sums paid by way of State grants to the Unemployment Funds including the Unemployed Workers Dependents Fund—

1920-21	£2,168,640
1921-22	8,123,430
1922-23 (8½ months)	8,273,350
	£18,565,420

In addition repayable advances had been made out of the Consolidated Fund during the last eighteen months totalling £14,580,000

Unemployment Relief Works, 1923-4

New expenditure amounting to not less than fifty millions had been undertaken or initiated by the Government to relieve unemployment.

Road and bridge programme	£14,000,000
Viscount St. David's Unemployment Grants Committee (additional)	10,000,000
Trade facilities	12,000,000
Railway companies (approximately only but probably not less than £10,000,000-£15,000,000)	10,000,000

Unemployment Insurance

The Unemployment Insurance Bill provides for a further extension of the periods of "unconvenanted benefit and fixes the maximum rates of contribution which are to become operative at the end of the deficiency period at the following rates—

	Employers	Employed
Men	6d	6d
Women	5d	4d
Boys	3d	3d
Girls	2½d.	2d

When these rates come into force the State contribution is to be the same as in the Unemployment Insurance Act, 1920, namely, one

fourth of the joint contributions of employers and employed instead of the present proportion of approximately one third. If the maximum reduced rates are adopted the State contributions will be about £6,000,000 annually as compared with the present amount of about £11,500,000 while the combined contributions from employers and employed will be annually £24,000,000 instead of the present figure of about £35,000,000. During the interval between the end of the deficiency period and the date at which the reduced contributions come into force the State contributions will be at a figure of about £130,000 a week in excess of that required under the maximum rates set out in the bill and the corresponding excess in the combined contributions of employers and workers will be about £220,000 per week. The aggregate amount of benefit payable from April 19 1923 to October 1924 is estimated at £64,500,000 assuming that the number of persons unemployed (including an allowance for short time workers) may be on the average 1,250,000. It is estimated that on this basis the deficiency on the Unemployment Fund, which will be approximately £18,500,000 on April 19 will increase to the following figures: October 1923 £20,000,000 April 1924 £22,500,000. The maximum borrowing power as fixed by the Act of 1922 is £30,000,000. The further grant of benefit does not involve any increase in the rates of contribution from employers, employed, or the State during the deficiency period but as it must prolong the deficiency period and consequently postpone the date at which the present rates of contribution can be reduced, the effect is to increase the total amount of the contributions to be paid by all three parties during the deficiency period. The total amount of Unemployment Benefit covenant and uncovenant (the 'dole') and of Allowances for Dependents paid from November 3 1920 to June 30 1923 is about £128,304,000 paid in weekly amounts ranging from 12s to 22s each about 170,000,000 separate payments have been made. The total contributions from the initiation of the scheme to July 1 1923 have been approximately as follows—

From Employers	£48,000,000
From Employed	44,600,000
From Exchequer	33,100,000

Total £125,700,000

Loss through Strikes and Lock outs

The aggregate number of working days lost through industrial disputes in Great Britain and Northern Ireland by workpeople involved in the disputes or thrown out of work at the establishments where the disputes occurred in consequence of them were approximately as follows—

Year	Days Lost
1919	34,966,000
1920	26,535,000
1921	85,872,000
1922	19,012,000
1923 (Jan to Sept)	8,347,000

Workmen's Compensation

Particulars of the operation of the Workmen's Compensation Act issued by the Home Office show that although in recent years the number of claims has declined, the total payments, owing to the higher wage ruling, have largely increased. The high water mark was attained in 1920 when the aggregate compensation paid

in the seven principal groups of industries was £1,978,000. In 1921, when unemployment increased and wages began to fall the total declined to £5,599,395, but the decrease was by no means commensurate with the decline in the number of cases. The figures for the three years following the Armistice compare as follows with those for 1913—

	Cases		Compensation	
	Fatal	Non fatal	Fatal	Non fatal
1913	3,748	476,920	595,012	2,761,538
1919	3,293	365,176	687,477	3,929,246
1920	3,531	381,986	755,057	5,222,352
1921	2,385	283,361	518,064	4,991,311

In the seven groups of industries the aggregate number of workers employed in 1921 was 7,315,866 compared with 8,348,150 in 1920 and 7,509,353 in the pre-war year. In 1921 the average payment in case of death was £217 against £214 in 1920 and £161 in 1914. In case of disablement the average amount (including cases settled by payment of a lump sum) was £17 12s against £6 7s in 1914. While in the year before last the number of non fatal cases fell by 25 per cent there was a reduction of only 4 per cent in the compensation. An increase occurred in the average amount of compensation paid both in lump sums and in weekly payments. In 1921 the average amount paid in lump sums was £73 as against £62 in 1920 while the average amount in the weekly payment cases rose from £11 in 1920 to £13 in 1921. This increase is attributed largely to the depression in trade and consequent lack of employment which would have the effect of delaying the return of the disabled workmen either to full employment or light work. The figures given above represent only the actual amount paid to workmen or their dependents and not the total charge on the industries in respect of compensation. Adding the legal, medical, administrative, and other expenses the aggregate outlay in respect of the 285,746 cases in 1921 can hardly have been less than £8,500,000. For a total of 442,116 cases in 1921 the estimate was £5,000,000. Taking the seven groups of industries together the annual charge for compensation averaged 15s 1d per person employed compared with 9s 6d in 1914. Below are the figures for the various groups—

	Number employed	Total paid	Charge per employee
		£	s d
Shipping	201,464	156,525	15 6
Factories	5,218,311	2,493,782	9 5

Totals	7,315,866	5,599,395	15 1

Decreased Industrial Profits

A table, compiled by the Central Council for Economic Information, of the net profits made

by 555 representative industrial companies mainly engaged in production during the years 1920, 1921, 1922 shows that the decrease in 1921, as compared with 1920 was £21 275 819 and in 1922, as compared with 1921 £21 161 062. Since 1920, therefore, the net profits of these 555 representative companies have declined by £42 436 881. It is pointed out that the table is made up from reports which were published in the years mentioned, and that the actual period dealt with probably precedes the date of publication of each report by from 3 to 6 months and therefore, the last quarter of 1922 at least is not covered by the figures given. The figures show that profits have borne their share with wages in the efforts to reduce prices and so regain markets. The table given below compares the net profits made during 1921 with those of 1922, as set forth in the companies' reports—

Companies	No of Net Profits Comps	1921	Net Profits 1922
Breweries	83	£2,091,570	£7,806,196
Canals, Docks, and Harbours	5	554,471	254,565
Electric Lighting, and Power	26	1,742,441	1,834,322
Gas	32	94,836	1,681,015
Hotels and Rests	24	1,500,441	1,537,555

	555	76,435,187	55,274,125

BRITISH TRADE IN 1923

A GENERAL INCREASE OVER 1922

EARLY in January 1923, the hardening of the money market indicating a reduction in bank deposits and the release of additional money for commercial enterprises pointed to an expected revival of British trade. This favourable indication was however followed by unsettled political conditions in Europe—the occupation of the Ruhr and internal disorder in Germany and the Italo Greek incident after the Albanian murder—while the commercial possibilities of Soviet Russia remained unexpectedly in abeyance and a high tariff wall was maintained in the United States. It is therefore satisfactory to find a general increase in British trade, as shown below and in the comparative statement of 'Total Exports by Months for the years 1921, 1922 and 1923 on the following page.

EXPORTS

British Exports to Foreign Countries show an average monthly increase of £3 259,000, mainly to the United States, Germany and South America. A small increase is also shown in the exports to the British Dominions but this is mainly due to the inclusion of figures for the Irish Free State when these are excluded the increase is small, but the exports to British Dominions are at least maintained at the same rate as in 1922. The estimated total value of the Exports of 1923 is £760,000,000 against £720,500,000 in 1922.

Raw Materials—The increase in the value of Raw Materials exported in 1923 is £23,500,000, thus accounting for the greater part of the total increase in exports. The additional weight of these Raw Materials is 14,000,000 tons, to which the chief contributor is coal.

Manufactured Articles—An increase of about £3,000,000 is indicated, with a total of £585,000,000 in 1923. Iron and steel manufactures show an increase of 864,000 tons out of the total increase in weight of 1,750,000 tons. Textiles show an increased value of £1,950,000 with a slight decrease in weight, cotton piece goods having been taken in larger quantities, particularly by British India.

IMPORTS

The total value of the Special Imports (i.e. Imports retained for Home Consumption) in 1923 will probably be £945,000,000 against £900,000,000 in 1922, the increase being food, drink and tobacco £26,000,000 and manufactured articles £19,000,000.

Raw Materials—The total value will be approximately the same in 1923 as in 1922. American cotton has remained at a very high price on the average about 122 per cent higher than in 1921. The ordinary annual consumption of cotton in Great Britain is 4,500,000 bales and efforts are being made in Australia (70,000 acres) and in Africa to supply the needs of British mills.

Manufactured Goods—There are increases in almost all items of manufacture, the decreases being negligible. The chief increases are in textiles (£5,020,000), apparel (£1,800,000), chemicals (£1,890,000) and vehicles (£1,520,000).

TRADE OF 1923 AND 1923

Exports—In spite of the advance in 1923 on the figures of 1922 there is still a deficit in British Exports of £168,000,000 in comparison with 1921. If the figures for that year are advanced to 1923 values, in 1923 the value of the exports was £525,250,000 and in 1922 the value is expected to reach £760,000,000 but if the 1923 figures are advanced to 1922 values the exports of 1923 will amount only to 81.5 per cent of the 1921 total, the principal decrease being under the heading of Food, Drink and Tobacco, with a slight increase in Raw Materials which weigh 5,000,000 tons more (chiefly coal). Almost every article of Manufacture shows a decrease in weight or quantity, the net decrease in value being £2,560,000 although woollen textiles show an increase in certain directions. The total value of the shortage of Manufactured Goods exported may be estimated at over £68,000,000 in comparison with 1921 (at 1923 values).

Imports—The Special Imports of 1923 were valued at £659,000,000 and those of 1922 may be expected to reach £945,000,000 but if the 1923 values are advanced to those of 1922 there will be a deficit in 1923 of 17.5 per cent. This deficit is accounted for under the heading of Manufactured Articles (£30,000,000), Raw Materials (£27,320,000), and Food, Drink and Tobacco (£10,000,000).

EXTERNAL TRADE OF GREAT BRITAIN AND IRELAND (MERCHANDISE)

IN statistics of Trade the term GENERAL TRADE refers to the whole volume of Imports (including, such as are temporarily detained and afterwards exported) and to the whole volume of Exports. The term SPECIAL TRADE includes only Imports for consumption in the country receiving them and Exports of home produce or manufacture. Imports are taken at their C I F value (which includes the cost of the merchandise

and the charges for Insurance and Freight) whereas Exports are taken at their F O B (free on board) value which includes only the Cost of the merchandise delivered to the exporting ship. Exports have an added value by the time they reach their destination, having become loaded en route with Insurance and Freight. They leave the country of origin with an F O B value and arrive with an acquired C I F value.

The World's Trade 1922

Some improvement in world trade conditions is indicated by the official comparison of the trade of the United Kingdom and certain Dominions of Foreign Countries for the first nine months of 1920, 1921, and 1922. It will be seen that in certain cases the figures for 1922 exceed those for 1921 and having regard to the substantial fall in values, it is apparent that the total volume of trade considerably expanded during 1922 —

International Trade Balances

Statistics of world trade prepared by the Index (the organ of the New York Trust Company) show that five leading countries have now reached the pre-war stage as regards the trade balance. The value figures, with the exception of Germany are much higher than in 1913, but the following table shows that in 1922 Great

Britain France Denmark, Sweden, and Japan had practically achieved pre-war balance.

Country	Percentage of Exports to Total Trade	
	1913	1922
Brazil	49.4	58.3
Canada	35.6	54.1
Denmark	45.8	44.7
France	44.9	46.3
Germany	48.4	39.0
Great Britain	45.2	45.0
India	60.4	53.9
Italy	40.8	37.4
Japan	46.4	46.5
Sweden	48.9	50.0
U S A	58.1	55.1

Britain's Customers

The amount per head of population of our total exports to Foreign Countries to Self governing Dominions, and to the rest of the British Empire for the years 1913, 1921 and 1922 —

DESTINATION OF EXPORTS

	1913	1921	1922
	£ s d	£ s d	£ s d
Foreign Countries	0 4 10	0 6 0	0 6 5
Self gov. Dominions	4 9 8	4 17 1	5 11 7
British India	0 4 6	0 6 10	0 5 9
Rest of Empire	0 15 6	1 1 6	0 18 6

The values per head of population of the importing countries have been calculated on the basis of the latest census returns and of the best estimates available in cases where no recent census has been taken.

Imported Foodstuffs

The value of Imported Foodstuffs in 1913 and 1922 is shown below —

	1913	1922
Butter	£24,084,000	£37,316,000
Cheese	7,035,000	12,438,000
Poultry	992,000	1,243,000
Eggs in shell	9,591,000	11,302,000
Bacon	17,429,000	35,530,000
Hams	3,068,000	8,586,000
Pork	1,665,000	3,536,000
Barley	8,077,000	6,069,000
Vegetables raw	5,492,000	12,040,000
Fruit, raw	9,844,000	24,725,000

Total

£87,277,000 £152,784,000

In comparing the values of the imports of 1922 with those of 1913 the higher level of prices in 1922 must be taken into account. The imports in 1922 of the articles specified represent a value approximately 70 per cent greater than if those imports had been returned at the same average values as in 1913, so that the aggregate increase in the volume of these goods imported was about 2 per cent. The increase of the population of the United Kingdom during the same period was about 4 per cent.

Refrigerated Meat

Imports from various countries compared —

Country	Tons 1913	Tons 1922
Argentina	409,211	451,908
New Zealand	122,224	179,829
Australia	150,666	107,533
Uruguay	29,727	62,227
U S A	74	3,200
Other Countries	8,355	15,934

THE INTERNATIONAL TRADE OF THE WORLD IN 1920 AND 1921

By J I CRAIG, M.A., F.R.S.E., F.R.ECON.SOC.

THE accompanying tables exhibit in sterling, the total value of the exports and imports that go to make up international trade in 1920 and 1921, together with details in the case of the principal and some other specially interesting participants. In compiling them the values of exports and imports have been treated for some 200 Countries, States and Dependencies, whereof 69 belong to the British Empire. Whenever possible figures have been taken first from the official publications of the various places, next, from the publications of the Board of Trade, then from the publications of the League of Nations. WHITAKER'S ALMANACK for 1922 and 1923 has been in constant use for checking and interpreting figures obtained from other sources and for filling gaps in the data. In all the principal cases, with the exception of China and the Malay States, the values of the exports and imports have been obtained in the local currency of the place. Where this differed from sterling, the average value of the rate of exchange on London was found for the year and the local value of the trade figures converted by means of it into sterling. In a few cases (none of very great importance) figures for one or both of the years under discussion could not be obtained and a reasoned estimate had to be made use of. In all such cases the figure so obtained has been placed in parentheses. This does not necessarily

mean, however, that the figure is unreliable, or even materially in error. Japan is a case in point. Accurate statistics are available for the country itself, and for Korea but not for Formosa, which, for economy of space, has had to be included with the two others. But the trade of Formosa is so relatively unimportant that the total is practically correct.

Difficulties have been encountered in some cases in one or other of the following ways—
(a) It is not always stated whether the currency unit is taken at its conventional, i.e. pre-war or par value or at its actual value as above to sterling, as shown by the rate of exchange.

(b) The values adopted for imports are not always the C.I.F. (cost + insurance + freight) values, but sometimes (as in the case of the United States for example) the F.O.B. value at departure from the exporting country. To allow for the omission of the charges for freight, some 15 per cent. should be added to the import values in such cases.

(c) The trade recorded in the official publications is not always the special trade, i.e. imports for home consumption and exports of produce and manufactures of the country. Hong Kong and the Malay States are the chief cases in point. An enormous *entrepôt* trade is carried on in these places and is made to appear in the returns. To include it, however, in the

(e) In some cases (Afghanistan for example) the commerce is accurately recorded in some directions but not in others. This source of error cannot be avoided, in the present state of customs statistics in such countries.

Where, as often happens, differences are found to occur between the figures given in this note and those to be found elsewhere the explanation will generally lie in one of these causes of difficulty.

THE FOREIGN TRADE OF THE WORLD
IN 1921

In handling questions of foreign trade at a time when large price movements are in progress several points have to be borne in mind. The volume of monetary transactions will change from one year to another (x) because the level of prices generally has changed, and (a) because the actual volume of merchandise which changes hands varies also. The second cause will be to some extent, a consequence of the first, unless the change of price has proceeded *pari passu* with currency changes so that it may be attributed entirely to these causes.

A second important fact is that quite apart from the difference due to freight charges the monetary value of the imports from one country to another in a given year will not correspond exactly to that of the exports from the second to the first, during the same year, but will differ by an amount which depends on the lapse of time necessary to bring goods from one to the other. When, as in 1921, prices are falling rapidly, the value of merchandise arriving in say the United Kingdom during 1921 will exceed that of the goods recorded as having left other countries during the same year, with the United Kingdom as destination. Quantities remaining the same, there should be between 1920 and 1921 a difference of some 6 to 7 per cent on this account.

A further caution may be given that prices must not be compared on the basis of index numbers without taking into account the change in the purchasing price of gold. This is to be done by reducing index numbers to a gold parity through the exchange rate with some country, such as the United States, where there exists a free market for gold. In fact the unit adopted for measuring values should strictly have been some gold unit, such as the U.S.A. dollar, instead of the pound sterling.

The year 1921 was one when the level of prices, measured in terms of gold, reached its culminating point in nearly all countries. The necessary data for the comparison may be taken from the index numbers and exchange rates of the United Kingdom and the U.S.A., which were as follow—

Index numbers—

United Kingdom (average of <i>Economist</i> and Board of Trade)	1920	1921
United States	295.2	189.2
Rate of exchange New York	\$3.65	\$3.86
British index number reduced	221	150
Average, U.K. and U.S.A.	223.5	148.5

fall in price level 1920 to 1921 66.4 per cent or very closely one third. This fall may be used without much error for world comparisons. A fall in freight rates which will also be wanted, took place to the extent of some 55 per cent according to index numbers of freights published by the *Economist*.

The total value of the export trade of the world was 8,201 million sterling in 1920 and 5,049 million in 1921, or 61.5 per cent of its value in the preceding year. Had the volume remained steady the fall would have been only to 66.4. The rest is due to a diminution of the amount of commodities exported which works out at just over 7 per cent.

Imports cannot be treated in the same fashion, since they are affected by charges for freight and other shipping services. If 1 per cent is allowed for these miscellaneous services the freight charges in 1920 amounted to about 1,100 million sterling and in 1921 to 510 which figures represent the difference of the respective export values from the import values diminished by 1 per cent. These figures agree with the above estimated fall in freights mentioned above.

It should, however, be remarked that these estimated earnings of cargoes are subject to corrections for the practice of the U.S.A., mentioned above, and for the fact that the goods which are exported in say, 1920 are not the same as those which arrive at their destination in the same year. A further correction should be made for such goods as are lost at sea but this error will not be great.

Cargoes then earned some 1,250 million sterling (corrected value) in 1920, and 575 in 1921. Since some 34 per cent of the tonnage of the world belongs to the British Empire, and 30 per cent to the United Kingdom, the earnings of Empire shipping may be estimated from these figures at about 425 million sterling in 1920, and 200 million in the following year. The shares of the United Kingdom may be put at 375 million and 175 million respectively. These are, of course, the earnings from cargo traffic alone.

The values of the goods exchanged in international trade were 8,200 millions in 1920, and 5,050 millions in 1921, of which quantities 2,350 million and 1,400 million respectively were exported from the British Empire, corresponding to 29 and 28 per cent in the two years. There

was thus a slight falling off in the trade of the Empire as a whole from 1920 to 1921 relative to other countries

An analysis of the figures available gives approximately results, which may be summarised in the following tables—

ANALYSIS OF INTERNATIONAL TRADE, 1921
Unit one million sterling Percentages in parentheses

Imports to	From			
	United Kingdom	Dominions	Other Countries	Totals
United Kingdom		274 (4.9)	694 (12.5)	968 (17.3)
Dominions	310 (5.5)	65 (1.2)	405 (7.2)	780 (13.8)
Other Countries	490 (8.8)	436 (7.8)	2936 (52.3)	3862 (68.9)
Totals	800 (14.3)	775 (13.8)	4035 (72.0)	5610 (100.0)

Exports from	To			
	United Kingdom	Dominions	Other Countries	Totals
United Kingdom		253 (5.0)	450 (8.9)	703 (12.9)
Dominions	240 (4.7)	60 (1.2)	393 (7.8)	693 (12.7)
Other Countries	630 (11.5)	360 (7.1)	2664 (52.7)	3654 (67.4)
Totals	870 (17.2)	673 (13.3)	3507 (69.4)	5050 (100.0)

The tables A and B show clearly which countries have a favourable balance of trade (excess of exports) and which an unfavourable. The difference must be made good (a) by imports of bullion, (b) by loans to foreigners, (c) by payment of money previously borrowed abroad or the interest on such money and (d) by payment for services rendered by foreigners. The United Kingdom has always an unfavourable balance, which is accounted for by payments for services rendered by this country to foreigners in shipping, banking and insurance and by the payment of interest on money previously lent abroad. Belgium and France have unfavourable balances which may be explained by their receipt of reparations payments. Germany's unfavourable balance is due to foreign borrowing partly to services rendered abroad and possibly partly to the exhaustion of foreign credit balances. In the case of Italy the unfavourable balance is explained by the large sums remitted to that

country by emigrants therefrom in the United States and other countries. Norway gives foreign service with her shipping, as do the Netherlands. Poland, Spain, Portugal, Rumania and Yugoslavia are probably borrowers of foreign capital. In the case of Switzerland the excess is paid for partly by remittances from emigrants, but chiefly by payments made by tourists in the playground of Europe. The enormous balance in favour of the United States is met by receipts of gold by remittances to Italy and other emigrant countries of Europe by payment of interest due by the States in excess of that paid to her. Normally India and Egypt are exporting countries, like Australia, owing to payment of interest and capital on previous loans but the two former are at present exhausting the large credit balances accumulated during the War. South Africa's unfavourable balance is liquidated by the export of gold to the amount of over 30 million sterling annually.

HEAT, COLD, RAIN AND WIND

BRITISH ISLANDS. The maximum temperature of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The lowest temperature of the air recorded in the shade at 4 feet above the ground is -25° Fahr., or 54° below freezing point, at Blackadder, Berwickshire, on Jan. 27, 1881.

The greatest rainfall in a day was at Bruton, Somerset, when 9.56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 66½ tons of water per acre.

The total rainfall for a year at stations in the British Islands during the 20 years 1824 to 1903

ranged from 24.05 inches at the summit of Ben Nevis in 1898 to 12.01 inches at Chatteris Cambs in 1884.

The maximum wind velocity on record in the British Islands was recorded at Quilly, west coast of Ireland, on Jan. 27, 1920, when a gust exceeded the rate of 110 miles per hour.

GENERAL. The maximum temperature on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1922.

The wettest station in the world is generally allowed to be Cherra Poonjee in Assam where the total fall for the year has exceeded 55½ inches. From June 12 to 18, 1876, 224¼ inches was collected, or an average daily fall of 22½ inches. On one of these days, June 24, 40.80 inches fell in 24 hours.

Petroleum Imports

Whilst the imports of oil into the United Kingdom have increased during the last few years, their value has fallen. In 1920 rather more than 879,000,000 gallons were worth £66,500,000, compared with 1,161,000,000 gallons at £54,500,000 for 1921 and 1,213,000,000 at £39,000,000 for 1922. The extent to which oil is used in different services will be realised when it is noted that in 1922 fuel oil accounted for 359,618,470 gallons, motor spirit 311,190,222, crude oil 217,133,915 illuminating oil, 152,537,292, while lubricating oil and gas oil were about 70,000,000 gallons each. At Swansea the great refining plant was responsible for the importation of 200,000,000 gallons of Persian crude oil during the twelve months and the treatment of still larger quantities is anticipated.

Imports and Exports of Bullion 1922

During the twelve months ending Dec. 31 the aggregate value of the gold and silver exported was £58,087,186. Of the exported gold and silver bullion and coin £26,634,408 went to the United States, £20,034,609 to India, £4,029,737 to France and £3,381,700 to China. Of the total imports of coin and bullion (£44,644,143) £30,433,312 came from the Transvaal, £4,064,816 from the United States, £3,410,237 from West Africa, and £2,081,359 from Rhodesia. It has been stated that the cost of transporting a ton of gold from the Transvaal to London is £370 as against £25 per ton for silver, £1 7s 6d for wheat, £3 15s for wool, and £2 7s 6d per ton for copper.

COMMUNICATIONS

Roads

The total mileage of public roads in Great Britain and Ireland is approximately 240,000 miles of which 150,000 are in England and Wales, 26,000 in Scotland, and 60,000 in Ireland. The cost of maintenance in 1913-14 was £20,082,000 and in 1920-21 £50,000,000.

The maintenance and repair of bridges and main roads is within the jurisdiction of the County Authorities, other roads being maintained by Borough, Urban, Rural, and Parish Councils. The increase of motor traction and the consequent use of highways by other than county or district residents has led to a movement in favour of the nationalisation of the highways. The special sum set aside for the year ending March 31, 1920, for the road and bridge programme of the Road Improvement Fund amounted to £10,536,000, of which £8,250,000 was a grant from the Treasury and £2,286,000 a contribution from the Road Improvement Fund. Under the Act of 1919 the functions and duties of the Road Board were transferred to the Ministry of Transport, which now controls all matters previously dealt with by the Road Board.

Road Taxes

The total receipts from the taxation of road vehicles between Dec. 1, 1921, and Nov. 30, 1922, amounted to £11,523,831. The aggregate number of motor licences issued during this period was 933,308 while licences in respect of private and hackney horse-drawn carriages numbered 237,342. The details are—

	No of Licences	Tax Receipts.
		£
Motor cars	293,740	4,884,161
Motor cycles	352,340	952,740
Invalid vehicles	384	96
Commercial vehicles	158,865	3,280,067
Road locomotives	2,268	55,875
Motor ploughs &c	17,293	4,323
Motor tractors &c	1,301	21,937
Motor cabs	72,263	1,727,398
Tramcars	13,797	10,346
General identification marks	9,527	76,918
Horse drawn carriages	199,613	156,475
Horse drawn cabs	37,729	28,239
Miscellaneous receipts		1,325,256

Motor Vehicles in the World

The National Automobile Chamber of Commerce (New York) estimates the number of Motor Vehicles in the world as under—

United States	10,448,632
United Kingdom	497,522
Canada	469,310
France	236,148
Australia	81,000
Argentina	70,000
Germany	60,000
Italy	53,000
India	45,983
All other countries	366,667

Total

12,528,264

When population is taken into account, the use of automobiles in the United States is nine or ten times that of the United Kingdom, and in Canada about five times as much. The figure for the United Kingdom is however, relatively high when compared with totals for other European nations. The use of motor vehicles is growing rapidly in all the self governing Dominions. So far, in Latin America bad roads have handicapped the development of this traffic.

Railways

On Jan. 1, 1923 the Railways of Great Britain were amalgamated into four groups, composed as under—

The Southern Railway (2,129 miles), consisting of the L & S W, S E & C, and L B & S C lines.

The Great Western Railway (3,765 miles), consisting of the G W and the Barry, Rhymney, and Taff Vale lines.

The London, Midland & Scottish Railway (7,464 miles), consisting of the L & N W, Midland, Furness, Glasgow & S W, Highland, North London, and North Staffordshire lines.

The London & North Eastern Railway (6,464 miles), consisting of the G E, N E Great Central G N, North British, and G N of Scotland lines.

The combined mileage of these four groups is 20,822 miles, the total capital involved is about £1,060,000,000. Ireland had 3,422 miles of railway open on Dec. 31, 1920, with capital of £45,500,000.

At March 24 last the total number of railway workers in Great Britain was 681,778, an increase on the figure for the corresponding date in 1922 of 4,276, or 0.74 per cent. A return issued by the Minister of Transport shows that the

numbers employed by the four new groups and the London railways compared as follows —

	1922.	1923.
Southern	71 769	70,479
Great Western	108,121	109 376
L.M. & Scottish	263 082	268 835
London and North Eastern	202,170	202,232
London Electric Lines	6 340	6,170
Metropolitan	3,895	4 001
Metropolitan District	3 306	4 080

Of the 647,021 adults employed on all railways in 1924 were women. This is a decrease on the previous year of 708.

Canals

There are 4,673 miles of canals and canalised rivers in Great Britain and Ireland (England and Wales 3,641 miles Ireland 848 miles Scotland 184 miles) no additions to the mileage having been made for several years. In 1905 the inland waterways carried 43,161,927 tons of merchandise the revenue being £2,680,710 and expenditure £1,891,213. In 1921 the tonnage returns from 2,879 miles of canals were 11,893,000 tons. Of the total mileage 1,363 miles were (1905) owned or controlled by railway companies (the longest systems being the Shropshire Union, 202 miles Grand Junction 189 miles Birmingham 159 miles and Leeds and Liverpool 145 miles). The total paid up capital of all the canals was (1905) £47,550,768. The existing system is at its greatest development in the midland counties of England and in Lancashire and Yorkshire. A Royal Commission, appointed in 1906 reported in 1909 in favour of a development scheme under an *Inland Waterways Board* to improve the existing system. Their principal proposal was the formation of four main routes (from a centre in south Staffordshire) to the Thames (London), the Mersey (Liverpool), the Humber (Hull) and the Severn (Gloucester) the proposed routes to accommodate barges up to 1,000 tons. On Jan. 1, 1922, there were 1,222 miles of inland waterways in England and Wales and 304 miles in Ireland under the *Canal Control Committee* appointed by the Government on March 1, 1917. There were also 1,025 miles controlled by the *Railway Executive Committee*. The *Manchester Ship Canal* opened in 1894, has a total length of 36 miles and connects Manchester with the Mersey port of Liverpool. In 1913 the tonnage carried through the canal was 5,780,161 tons, and in 1922 the tonnage of toll-paying traffic was 4,273,544 tons the tolls, dues, etc. amounting to £1,332,544.

Tramways

The total mileage of tramways and light railways open in Great Britain and Ireland on Dec. 31, 1922, was 2,728 of which 2,647 miles were worked by electric traction 1,754 miles were worked by Local Authorities and 974 miles by Companies. The total receipts in 1922 were £24,635,266 the working expenses £17,751,277, and the net receipts £6,883,989, the total paid up capital being £79,049,287, showing a return of £8.448 ad per cent on the capital. In 1919-20, 4,997,525 passengers were carried. In addition there were 21 miles of "trackless trolley" routes a system which obviates the necessity of rails.

Mercantile Shipping

On June 30, 1922 the Maritime Marine of Great Britain and Ireland consisted of 8,430

steam and motor vessels (19,088,638 tons) and 419 sailing vessels (206,999 tons) a total of 8,849 vessels (19,295,637 tons). In 1921 the "engagements of seamen for service on ocean going ships numbered 422,445, as against 604,830 in 1913, the percentage of British subjects being 94.45 of foreigners other than Asiatics 3.05, of Chinese 0.6, and of other Asiatics and Africans 1.0.

Shipbuilding — The output of the various countries of the world in 1922 was 852 vessels of 2,467,084 tons, the principal totals being —

	Tons		Tons
Great Britain	1,031,081	U.S.A.	119,138
Germany	575,264	Italy	101,177
France	184,509	Japan	83,479
Netherlands	163,121	Other countries	209,364

Vessels lost, broken up, condemned etc. numbered 716 of a total tonnage of 887,822, of which 127,974 tons were British.

Wrecks — In 1913 140 sailing vessels (23,082 net tons) and 108 steam vessels (103,824 net tons) a total of 248 vessels (126,906 net tons) were totally lost at sea. In 1920 the figures (exclusive of losses due to mines) were 64 sailing vessels (11,793 gross tons) and 158 steam vessels (116,321 gross tons) a total of 222 vessels (128,114 gross tons). In 1913 the passengers lost by wrecks numbered 172 and members of crews 466 a total of 638 lives. In 1920 (exclusive of losses due to mines) the passengers numbered 3 and the members of crews 173 a total of 176 lives. The years with the heaviest losses of life at sea were 1912 and 1914. In 1912 the total of 335 included 673 of the crew and 825 passengers on *S.S. Titanic* in 1914 the total of 1,778 included 121 of the crew and 840 passengers on *S.S. Empress of Ireland*.

Ocean Shipping in British Ports

Net tonnage of British and Foreign sailing and steam vessels engaged in overseas trade entered and cleared (with cargoes and in ballast) at all ports in Great Britain and Ireland —

Year	Entered	Cleared	Total

Coastwise Shipping

The net tonnage of all vessels with cargoes and in ballast engaged in the coastwise trade of Great Britain and Ireland in 1913 was 65,273,838 net tons for arrivals and 65,111,086 net tons for departures. In 1922 the net tonnage of arrivals was 41,406,000 and of departures 41,048,000.

Posts, Telegraphs and Telephones

The carriage and custody of the mails has been maintained by the State "from time immemorial. The telegraphs were transferred to the State on Jan. 28, 1870; the telephones on Jan. 1, 1912. The submarine telegraph cables connecting the British Isles with the various Dominions and Foreign Countries are maintained and worked partly by the State and partly by private companies.

Since 1914 telegraph and telephone plant has been extended, as indicated below—		
	March 31, 1922.	March 31, 1923.
Mileage of wire		
Overhead	947,392	1,033,000
Underground	1,925,743	3,305,593
Telephone Stations	774,821	1,050,672

* Excluding Irish Free State
† Including interest
‡ Excluding submarine cables

The number of telephones per 100 of population in Great Britain and Ireland, U.S.A., and certain other countries (1922), is shown below—

U.S.A.	13.5	Great Britain and Ireland (1922)	2.7
Denmark	8.4	N. Ireland (1922)	1.3
Sweden	6.6	France	1.3
Norway (1921)	5.8	Italy (1921)	0.3
Germany	3.1		

Savings Banks—On Dec 31, 1922, there were 11,733,564 active deposit accounts in the *Post Office Savings Banks*, with the sum of £268,143,235 due to depositors. In 1921 there were 2,340,371 accounts open in the *Trustee Savings Banks*, with £99,304,794 due to depositors. On Dec 31, 1922, Government Stock to the amount of £206,301,968 stood to the credit of depositors in the *Post Office Savings Banks* and £29,442,788 was held for depositors in *Trustee Savings Banks*.

Wireless Telegraphy—In 1909-1910 the wireless telegraphy stations on the coasts of Great Britain and Ireland were acquired by the Government, except the long distance stations at Poldhu (Cornwall) and Clifden (County Galway), which are maintained (and worked under licence) by the Marconi Company. The total expenses of the Leasfield (Oxford) and Cairo stations, including interest and depreciation, are estimated at about £36,000 and £49,000 per annum respectively. In addition to the Anglo-Egyptian service which was inaugurated in April, 1922, the Leasfield station is used for the broadcasting of British official communiqués and for the transmission of Press telegrams to Halifax (Nova Scotia), India and ships at sea. The revenue earned by the stations since the end of April 1922, has been as follows—

Station	Total for 9 mths
Leasfield	£24,200
Cairo	4,700
	£28,900

It is estimated that about 25 per cent of the total revenue is derived from traffic on behalf of other Government departments. If this traffic did not go *via* these stations it would have to go by other routes at an equal or greater cost. The total expenses of the Northolt Station, including interest and depreciation are estimated at about £8,750 per annum. The station was completed in August 1922, but its working for some time afterwards was on a more or less experimental basis. The amount of Government traffic handled by the Northolt Station is negligible. It should be borne in mind that the services conducted through these stations have in most instances been only recently started and as they are developed, the revenue derived from them will continue to expand.

Communication by Air

In 1919 a *Trans-Atlantic Aerial Post* was inaugurated by the successful flight of an aeroplane from St. Johns, Newfoundland, to Clifden, Ireland, and by the voyage of H.M. Airship R.34 from Scotland to New York, and from New York to England. The *Air Mail Services* now in operation are shown on pp. 377, 521.

The Air Council subsidies to *British Commercial Air Lines* for 6 months from Sept. 1, 1922, are—*Handley Page* (London-Paris) £15,000; *Instons* (London-Brussels-Cologne) £25,000; *Daimler-Hire* (Manchester-London-Amsterdam-Berlin) £55,000.

The largest *Airship* yet constructed was the R.38 which was wrecked while over the Humber (Aug. 24, 1921) with the loss of 44 lives. The remaining British airships are as follows—

R33	cubic feet of gas	1,058,000
R80	"	1,800,000
R36	"	2,101,000
R37	"	2,101,000
L.64*	"	2,950,000
L.71*	"	2,480,000

The L.64 is 642 feet long the L.71 is 743 feet long. The R.38 had a capacity of 2,700,000 cubic feet and was 695 feet in length.

It is estimated that the times by airship for the following journeys would be—

England-Egypt	2½ days
England-Karachi (India)	5 "
England-Johannesburg (S. Africa)	7 "
England-Perth (W. Australia)	10½ "

Great War's effect on Sea Routes

The following comparison of the proportions of ships engaged in the various trades with the corresponding figures for 1911, gives some indication of the changes brought about by the Great War and the consequent dislocation of trade—

Route	Percentage of Tonnage Employed	
	April 1921	June 1922
East Indies	17.22	20.49
South America East Coast	15.53	12.55
United States, West Indies and East Coast of Canada	15.00	24.39
Mediterranean	12.24	3.28
Australia	11.35	14.61
China and Japan	9.15	9.02
Pacific, North and South	7.48	2.15
Baltic France Spain, Portugal and Home Trade	4.57	6.41
West Africa and Cape of Good Hope	3.00	4.71
Coasting Trade	4.46	2.46
	100.00	100.00

The tonnage of all trading vessels recorded as employed on the selected dates fell by 33.7 per cent in the ten years.

LUNACY

ON Jan. 1, 1923 the number of notified insane persons under care in England and Wales was 125,279 an increase of 2,565 since Jan. 1, 1922. This increase follows one of 3,370 in 1921 and of 3,580 in 1920, and may be compared with the average annual increase of 2,251 during the decade immediately preceding the Great War. The relative percentage distribution of the sexes (males 43.8 females 56.2) shows a slight reversion towards the proportions which obtained immediately prior to the Great War (males 45.4 females 54.6). The average weekly cost of maintenance for the financial year 1922-23 (excluding the cost of repairs, additions and alterations) was—

In County Mental Hospitals	26 s. d.
In Borough " "	29 6½

Mental Deficiency—On Jan. 1, 1923 the mentally defective patients under care numbered 25,785 males 7,283 females 18,502.

* Surrendered Zeppelin airships.

THE KINGDOM OF ENGLAND

Position and Extent—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between $55^{\circ} 46'$ and $49^{\circ} 57' 30''$ N latitude (from the mouth of the Tweed to the Lizard) and between $1^{\circ} 46'$ E and $50^{\circ} 43'$ W (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills which form a natural boundary with the Kingdom of Scotland on the south by the English Channel on the east by the Straits of Dover (Pas de Calais) and the North Sea and on the west by the Atlantic Ocean (which washes the Cornish coast), the Principality of Wales and the Irish Sea. The total area of the kingdom is 50,851 square miles; the population numbering 35,678,530 at the Census of 1921 (an increase of 1,633,240 over the figures of the 1911 census).

Relief—There is a natural orographic division of England into the hilly districts of the north-west and south-west, and the undulating downs and low lying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west and divide England from Scotland, culminating in the Cheviot at 676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the Pennine Chain running N by W to S by E, with their highest point in Cross Fell at 930 feet above mean sea level. West of the Pennines are the Cumbrian Mountains, which contain in Scafell Pike (3,210 feet) the highest land in England, and east of the Pennines are the Yorkshire Moors, their highest point being Urra Moor (1,489 feet). South of the Pennines there are heights above 1,000 feet in the Peak of Derbyshire (highest point 2,088 feet) and in Dartmoor (High Willhays at 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Long Mynd (1,674 feet) and Brown Clee (1,805 feet). In Herefordshire the Black Mountain reaches 2,310 feet. In Worcestershire the Malvern Hills reach 1,395 feet. In western Monmouthshire are the Sugar Loaf (1,955 feet) and Cony (1,905 feet), and the Cotteswold (or Cotswold) Hills of Gloucestershire contain Cleve Cleve (1,134 feet).

Hydrography—The Thames is the longest and most important river of England, with a total length of 210 miles from its source in the Cotteswold Hills to its outflow into the North Sea. The lower river is navigable by ocean-going steamers to London Bridge and small craft reach Lechlade, 100 miles from the mouth. The Thames is tidal to Teddington (50 miles from its mouth), and its upper stream is connected with the Severn by a canal at Lechlade. The Wilts and Bucks canal enters at Abingdon and the Wye canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course and on its banks are situated the capital of the British Empire Windsor Castle, the home of the Sovereign Eton College, the first of the public schools and Oxford, the oldest university in the kingdom. The Severn is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire with a total length of 230 miles from its source to its outflow into the Bristol Channel where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrrwy, Tern, Stour, Teme and Upper (or War

wickshire) Avon. The Severn is tidal below Gloucester and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16½ miles), which admits vessels of 350 tons to Gloucester, other canals connecting with the Thames, Trent, Dee and Mersey. The Severn Tunnel, which carries the Great Western Railway under the river 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, &c. The tunnel is 4 miles 624 yards in length (of which 2½ miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range; the Great Ouse (160 miles) from the Central Plain; and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills, and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lakes are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ulleswater and Derwent water.

Islands—The Scilly Islands form part of the county of Cornwall, and are distant 25 miles from Land's End. The group consists of about 40 islands with a total area of about 4,000 acres, only St. Mary's, Islesc, St. Martin's, St. Agnes and Bryher being inhabited; the total population in 1921 being 1,740. The capital is Hugh Town, in St. Mary's. The climate of the Scilly Islands is unusually mild and vegetation is luxuriant; semi-tropical plants flourishing in the open. The Isle of Wight forms an administrative county and is separated from Hampshire by the Solent and Spithead. The total area is 147 sq. miles with a population in 1921 of 94,697. The climate is mild and healthy, and many watering places have grown up during the last century. The capital is Newport, at the head of the estuary of the Medina. Cowes (at the mouth) being the chief port, other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay and Bembridge.

Climate—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahr., ranging from 52° in the Scilly Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash.

EARLY INHABITANTS

Prehistoric Man—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age and stone implements of the remote Eolithic Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. E. Chubb to the Nation in 1908, and now preserved as a national monument). Stonehenge (10 miles N. of Salisbury, Wiltshire) consists of two circles of monoliths (the largest monolith being 27½ feet in height), only 16 remaining in position in the outer circle while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion—In the latter part of the Bronze Age the *Goidels* a people of Celtic race and in the Iron Age another Celtic race of *Brythons* invaded the country and brought with them Celtic civilization and dialects place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest—Julius Cæsar raided Britain in 55 B.C. and 54 B.C. and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius who sent Aulus Plautius with a well equipped army of 40,000 men and himself visited Colchester (Camulodunum) and Londinium. The British leader from 48-51 A.D. was *Caratacus* (strictly Caratacus) who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly Boudicca) Queen of the Iceni (Norfolk) being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart known as *Hadrian's Wall* from Wallsend to Bowness (Lyne to Solway) remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a Roman municipal system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Callewa Atrebatum), 12 miles south of Reading and since 1890 the whole site has been investigated. Four main groups of roads radiated from London and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash

to Spithead, while about 350 A.D. incursions in the north of Irish (Scotti) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome. Officials were no longer sent to the island; the garrison was left to defend itself and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants whose language and customs re-emerged.

Anglo Saxons and Normans—The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall) the name of *Welsh* (old English *Walis* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms of which the chief were Northumbria (Bernicia and Deira) Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods 11 Woden, Thunor and Frigg are commemorated in Tuesday, Wednesday, Thursday and Friday) were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia is stated to have built a wall and rampart afterwards known as *Offa's Dyke* from the mouth of the Dee to that of the Wye as a protection against the Welsh. The greatest of the English kingdoms was *Wessex* with its capital at Winchester and the greatest of the Wessex kings was *Alfred the Great* (871-901) who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes but subsequent rulers were unable to resist the invaders and England paid tribute (*Danegeld*) for many years, and was ruled by Danish kings from 1013 to 1042 when Edward the Confessor was recalled from exile. In 1066 Harold (brother in law of Edward and son of Earl Godwin of Wessex) was chosen King of England but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadrada of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the *Battle of Hastings* (or *Sautlache*) on Oct. 14, 1066 and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

ENGLISH COUNTIES

For Administrative purposes England is divided into 50 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative counties differ in many cases from those of the older Geographical Counties, while the areas of the 75 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

ENGLISH COUNTIES AND SHIRES
LORDS LIEUTENANT, HIGH SHERIFFS, AND CHAIRMEN OF Q.S.

County or Shire.	Lord Lieutenant.	High Sheriff 1923-4	Chairman of Q.S.
(1) Bedford	Samuel H Whitbread, C.B.	John George Murray	Anthony H Wingfield
(2) Berks	James Herbert Bunyon	Lt Col J A Fairhurst, T.D.	Sir R. B. D. Acland, K.C.
(3) Bucks	Col. Lord Cottesloe, V.D.	Sir W B Savory, Bart.	Lord Farmoor, K.C.V.O.
(4) Cambridge	Charles R. W. Adeane, C.B.	Col D J Proby	(1) Musgrave Francis
(5) Isle of Ely	Col W Bromley Davenport, C.B., C.M.G., C.B.E.	Hon Wm Hulme Lever D.S.O.	(His Hon Judge Barrant H C Yates
(6) Cheshire	John C Williams	Lt Col Hon Henry W Trefusis	G T Petherick, Col E Trefry, C.M.G., O.B.E.
(7) Cornwall	Earl of Lonsdale	Maj R H Ballantine Dykes, D.S.O.	G A Rimington
(8) Cumberland	Duke of Devonshire, K.G.	Edwin Clay Barnes, C.B.E.	H St J D Raikes, K.C.
(9) Derby	Earl Fortescue, K.C.B.	Col W E Pollexfen Bastard, O.B.E., T.D.	Lord Coleridge, Sir T H Kekewich, Bt, Sir F G Newbolt, K.C.
(10) Devon	Earl of Shaftesbury, K.P.	Maj Gen Sir Reginald J Pinney, K.C.B.	J C S Hanham
(11) Dorset	Earl of Durham, K.G.	Capt R B Webster	(C.B.E.) His Hon Judge Greenwell,

AVERAGE HEIGHTS AND WEIGHTS

The average heights and weights of men in the United Kingdom have been tabulated as follows. The weights include clothing, which is generally calculated at one twenty fourth of the whole

	Average Height	Average Weight
Scotsmen	5 ft 8½ in.	11 st. 11 lb
Irishmen	5 ft 8 in.	10 st. 13 lb
Englishmen	5 ft 7½ in.	11 st. 1 lb
Welshmen	5 ft 6½ in.	11 st. 4 lb.

THE PRINCIPAL ENGLISH CITIES

LONDON

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, 50 miles from its outflow into the North Sea. The various areas of London, with the population of each (according to the Census of 1921), are shown below

Area	Acreage 1921	Population 1921
County of London	74,816	4,483,249
City of London	675	13,706
London Police Districts	443,424	7,476,168
Proposed London Health Area	3,045,120	9,610,234

The City of London (see pp 561-3) administers London within its ancient boundaries where the Saxon Port Reeve became Bailiff in 1066, Mayor in 1192, and Lord Mayor in 1354. The City is the financial and business centre of London, and includes the head offices of the principal English banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 14th century Guildhall, to the massive splendour of St Paul's and the architectural beauty of Wren's spires (Bow Church, St Bride's, St Dunstan's in the East, etc.) for which (and for other City buildings) see pp 570 et seq.

The City of Westminster which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north and by the Thames and Chelsea on the south was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct 19 1900 the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens and from Oxford Street to the Thames it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St James's and the principal Government offices, Clubs and Theatres are situated in Westminster which also includes the fashionable residential districts of Mayfair and Belgravia, the chief buildings being described on pp 570-584. Westminster is the richest of the London areas, the rateable value of property being £8,131,854 in 1922, the product of each rd in the £ being £33,883.

Metropolitan Boroughs—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs (see p 560) of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham eastwards to Woolwich, and westwards to Hammersmith.

London County Council—For County purposes the affairs of London are administered by the London County Council (see pp 566-69) which was created by the Local Government Act of 1888.

Miscellaneous Authorities—The Poor Law is administered in the Metropolitan area by the *Metropolitan Asylums Board* (see p 206), and by 31 *Boards of Guardians*, for Police purposes the administration is invested in the City Corpo-

ration as to the *City Police* (see p 233) and in the Home Office as to the *Metropolitan Police* (see p 233). The authority for the supply of water is the *Metropolitan Water Board* (see p 207), while the River Thames is administered as to its tidal portion by the *Port of London Authority* (see p 212) and above Teddington by the *Thames Conservancy* (see p 220) the light house and pilotage authority being *Trinity House* (see p 224). The bridges (see p 574) are maintained in the City of London by the *Bridge House Estates Committee* of the Corporation of the City, and in the remaining area by the London County Council. The lighting of London is carried out by private enterprise and in some cases by the Borough Councils, while locomotion is provided by the London County Council as the *Irway* authority and by private enterprise as to underground or other railways and motor vehicles.

BIRMINGHAM

BIRMINGHAM (Warwickshire), the chief centre of the hardware trade of the world, is 113 miles N W of London. The municipal area is 43,601 acres (about 68 square miles) with a population at the census of 1921 of 919,438.

The chief industries are brass working, jewellery and precious metals, iron machinery, small arms and ammunition, railway rolling stock, glass making, electro plating, motor engineering, cycles and chemicals.

The principal buildings are the Town Hall, built in 1832-1850 on the lines of the Temple of Jupiter Stator at Rome with a large hall, the Council House and Corporation Art Gallery and Museum (1878), the University (Aston Webb 1909), the Central Library, the 13th century Church of St Martin (rebuilt 1873), the Cathedral (formerly St Philip's Church built by Aicher a pupil of Wren's), the Roman Catholic Cathedral of St Chad (Pugin) and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was incorporated as a borough in 1838 and was created a city in 1889. It is governed by a Lord Mayor and City Council of 30 Aldermen and 90 Councillors. The city returns 12 members to Parliament. The origin of the name is obscure as Bromwychem, 'the home on the hill by the heath' is disputed. The city was a Saxon town and William de Birmingham was Lord of the Manor in the early part of the 13th century.

Principal City Officers

Rt Hon Lord Mayor (1923-24) T O Williams
Recorder Sir Ryland Dent Adkins & C^y M P (1920)
Stipendiary Magistrate, The Rt Hon Lord Ilkeston (1920)
Town Clerk J H C Wiltshire (1928)
Clerk of the Peace Joseph James (1905)
Coroner Isaac Bradley (1897).

LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 201 miles N W of London is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,102 acres (which includes 2,883 acres in the bed of the river Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1921 of 803,126. The total net register tonnage

of vessels on which dues were paid during 1929 was 13 678 751 tons while the value of the sea-borne trade of the port was stated at £835,849,867 for 1929, and at £1,091,657,022 for 1920. The docks, on both sides of the river have a linear quayage of about 37 miles, and the Gladstone dock will accommodate the largest vessels afloat. The dock authority is the Mersey Dock and Harbour Board. The chief import is cotton those next in importance being grain, provisions, sugar fruit, oil timber and tobacco.

The principal buildings are St George's Hall erected 1838-1854 from the designs of Harvey Lonsdale Elmes at a cost of £300,000 and regarded as the finest modern example of classical architecture. The Town Hall erected 1754 from the designs of Wood the Cathedral (in course of erection from the designs of Bodley and Gilbert Scott), which will be the largest ecclesiastical building in England the Walker Fine Art Gallery the University the Royal Infirmary the Municipal Offices and the Custom House.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 37 Aldermen and 122 Councillors. The City returns 11 members to Parliament. The name is believed to be derived from Norse words meaning the Pool of the Slopes.

Principal City Officers

Rt Hon. Lord Mayor (1923-1924), A. Rushton
Recorder, Edward G. Hemmerde K.C. (1909)
Police Magistrate, Stuart Deacon (1910)
President Court of Passage, Sir Wm F. Kyffin Taylor, K.B.E., & C.
Coroner, A. G. Inglis
Town Clerk, Walter Moon, £3,300 (1922)
Clerk of the Peace, R. D. Cripps
Medical Officer of Health, E.W. Hope, O.B.E., M.D.

MANCHESTER

MANCHESTER (Lancashire) the centre of the world's cotton trade is 18½ miles N.W. of London. The municipal area is 21,690 acres (about 34 square miles) the population at the census of 1921 being 730,307.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, India rubber goods chemicals &c. The city is connected with the Mersey by the *Manchester Ship Canal* (opened in 1894) which has a total length of 35½ miles, a depth of 28 feet and a minimum width at the bottom of 120 feet. The value of the sea-borne trade of the port is stated at £146,890,745 for 1929, and at £207,756,312 for 1920 the net tonnage of ships entered and cleared in 1920 was 2,280,579 and 2,262,933 respectively.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A. the Royal Exchange built in 1869, enlarged at cost of £800,000 and reopened by the King 1921, the Free Trade Hall, erected from the designs of Walters, in 1856, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields, the Art Gallery the Whitworth Institute the 17th century Chetham Library the Rylands Library (1895), which includes the Althorp collection the University (Owens College) and

the 15th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political literary and scientific advancement, and the Halle Concerts have placed the city in the forefront of musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The Lord Mayor presides over a Corporation of 35 Aldermen and 109 Councillors. Manchester returns 10 members to Parliament. The Latin name of the city was *Mancunium*.

Principal City Officers

Rt Hon. Lord Mayor (1923-1924), W. T. Jackson
Recorder, Arthur Jacob Ashton K.C. (1914)
Stipendiary Magistrate, Edgar Brierley (1902)
Town Clerk, P. M. Heath (1922)
Clerk of the Peace, E. M. Redhead

IPFDS

LEEDS (Yorkshire West Riding) is favourably situated in the coal and iron districts of England 18½ miles N.W. of London and is the centre of the woollen industry and the wholesale clothing trade. The city has also the largest share of the leather trade of the United Kingdom, in addition to large rope works, and factories of thread linen glass and earthenware with metal casting, machinery and machine tools steam engines, railway wagons, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal with the Humber in the east by the Aire and Calder Navigation and is an important railway centre.

The municipal area is 28,090 acres (nearly 44 square miles) the population at the census of 1921 being 458,320.

The principal buildings are the Town Hall (1858), the Royal Exchange (1872) the Philosophical Hall the Municipal Buildings and Art Gallery the University and the Leeds Institute of Science Art and Literature (1865). The Parish Church (St. Peter's) was rebuilt in 1840 the 17th century St. John's Church has a fine interior with a famous Renaissance screen the 17th century Mill Hill Chapel was rebuilt in 1849 Kirkstall Abbey (about 3 miles from the centre of the city) founded by Henry de Lacy in 1152 is one of the most complete examples of Cistercian houses now existing.

Leeds was first incorporated by Charles I in 1626 made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a Corporation of 17 Aldermen and 51 Councillors. The city returns 6 members to Parliament. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

Principal City Officers

Rt Hon. Lord Mayor (1923-1924), Sir Edwin Airey
Recorder, John Albert Compston, K.C. (1919)
Stipendiary Magistrate, Horace Marshall (1910)
Clerk of the Peace, Sir Arthur Copson Peake (1896)
Town Clerk, Sir Robert Fox (1904)

SHEFFIELD

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire 150 miles N.W. of London at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 31,625 acres (about 49 square miles), with a population at the

census of 1921 of 519,239. The principal industries are the manufacture of heavy steel (armour plates, rails, tyres axles, engine castings, &c.) cutlery, and instruments in addition to engines and general machinery, tanning, confectionery bicycles, iron and brass founding silver refining brush making, and many other industries Sheffield plate (silver rolled on other metals) made during the years 1742-1840, when electro plating superseded the process, is greatly prized by collectors.

The principal buildings are the 14th century Parish Church (St Peter's) the Town Hall (1897) the Cutlers Hall (1832) Corn Exchange, Market Hall, Museum Mappin Art Gallery Ruskin Museum and the University.

The Saxon town of *Escafeld* was created a county borough in 1888 and a city in 1893 the Chief Magistrate becoming a Lord Mayor in 1897. The Corporation includes 17 Aldermen and 51 Councillors. Sheffield returns 7 members to Parliament.

Principal City Officers

Rt Hon Lord Mayor (1923-1924) A. T. Blanchard
Recorder, William James Waugh K C (1915).
Master Cutler (1923-1924) James Neill
Town Clerk, William E Hart (1913).
Clerk of the Peace, G. E. Smith

BRISTOL

BRISTOL (Gloucester and Somerset) astride the River Avon and within 8 miles of the estuary of the River Severn (Bristol Channel) is a city and seaport 119 miles W of London, with a municipal area of 18,445 acres (29 square miles) and a population at the census of 1921 of 375,975.

The principal industries are shipbuilding rope making chocolate, sugar and tobacco factories glass and earthenware, soap, leather and chemical works, breweries, and copper, lead and iron works. The docks comprised within the Port are the City Docks 6 miles from the entrance to the river Avon the Royal Edward and Avon mouth Docks, at the mouth of the river and the Portishead Docks, to the westward of the river entrance. The net tonnage of ships entered in 1922 was 2,965,014 tons, and of those cleared 2,898,138 tons, the value of the seaborne trade being stated at £41,328,272 for 1921. The principal imports are grain fruit, oils, ore, timber hides, cattle and general merchandise, and the chief exports are galvanised iron, tin plates, machinery manufactured oils, chemicals, strontia, and unmanufactured clay.

The chief buildings in addition to the 14th century Cathedral (rebuilt by Street 1868-1888) the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth as 'the fairest, goodliest and most famous parish church in England') and the 15th century Temple Church are Canynges House, the Merchant Venturers Almshouses, St Peter's Hospital the Council House, Guildhall Exchange (erected from the designs of John Wood in 1743), Colston Hall the University and Clifton College. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon was projected by I. K. Brunel (the designer of the *Great Eastern*) in 1836, but was not completed until 1866.

Bristol was a Royal Borough before the Norman Conquest, and in 1899 its Chief Magistrate (Sir Herbert Ashman) became a Lord Mayor. The Corporation includes 23 Aldermen and 69

Councillors. The city returns 5 members to Parliament. The earliest forms of the name are *Brigatowe* and *Brustow*.

Principal City Officers

Rt Hon Lord Mayor (1923-1924), A. A. Seunington
High Steward, His Grace the Duke of Beaufort, T. D.
Recorder, William Blake Odgers, K C. (1912).
Sheriff, F. Burris
Town Clerk, Edmund J. Taylor

KINGSTON UPON HULL

HULL (officially Kingston upon Hull) is situated in the East Riding of Yorkshire at the junction of the Hull with the Humber 22 miles from the North Sea and 121 miles N of London. The municipal area is 9,359 acres (about 15 square miles), with a population of 290,808 at the census of 1921.

Hull is the principal seaport for shipping the manufactures of Yorkshire and Lancashire to Northern Europe, and among its principal imports are grain from Russia and America and timber from Scandinavia, in addition to iron, fish butter (from Denmark and Siberia), and fruit. The net tonnage of the shipping entered and cleared in 1920 was upwards of 3,000,000 tons, the value of the seaborne trade of the port being stated at £128,023,115 for 1919, and at £172,951,919 for 1920.

The chief buildings in addition to the Docks, are the Parish Church (Holy Trinity), 272 feet in length (the longest parish church in England), the Guildhall (1515), Exchange (1866), Chamber of Commerce, Corn Exchange, Market Hall, Custom House, Dock Offices, Royal Institution (1854), Wilberforce's House and Trinity House (1753). A Municipal Art Gallery is in course of establishment under the gift of Mr. T. R. Ferens.

The name of *Wyke upon Hull* was changed to Kingston upon Hull by Edward I in the 13th century. The town was incorporated in 1276 and made a county borough in 1888. The Corporation consists of a Lord Mayor 16 Aldermen and 48 Councillors. Hull returns 4 members to Parliament.

Principal City Officers

High Steward, Rt Hon T. R. Ferens P C
Rt Hon Lord Mayor (1923-24), E. E. Keighley
Recorder, Henry Thomas Kemp K C (1917)
Sheriff, Benno Pearlman
Town Clerk, H. A. Learoyd, M. A.
Coroner, Col. Alfred Thorney

BRADFORD

BRADFORD (Yorkshire, West Riding) 129 miles N N W of London and 8 miles W of Leeds, in the coal and iron district, is the centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 22,879 acres (about 36 square miles), with a population at the 1921 census of 285,579.

The principal textile industries are worsteds, woollens, silks and cottons and there are also important engineering and iron works, and quarries of freestone.

The chief buildings, in addition to the 15th century Cathedral (formerly the Parish Church), are the Town Hall (1873), Exchange (1867), Cartwright Memorial Hall (1904), commemorating the inventor of the power loom, Temperance Hall (1837), Grammar School, Technical College (1886), and the Mechanics Institute (1832).

The Saxon township was created a parliamentary borough in 1832 a county borough in 1888, and a city in 1907. The Corporation consists of a Lord Mayor, 21 Aldermen and 63 Councillors. Bradford returns 4 members to Parliament.

Principal City Officers

Rt Hon Lord Mayor (1923-1924) H. M. Trotter
Recorder Thomas Rowland Drake Wright (1905)
Stipendiary Magistrate, Beaumont Morrice (1914)
Town Clerk, N. L. Fleming (1920)

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Northumberland) on the north bank of the Tyne estuary 8 miles from the North Sea and 27½ miles N. of London has an area of 8,452 acres (13 square miles) and a population of 278,400 at the Census of 1921.

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. Its exports include coal, chemicals, pig iron, iron and steel manufactures and machinery. The chief imports being wheat and grain, fruits, iron, iron ore and steel, petroleum, sulphur, oil, timber and wood and potatoes. The net tonnage of ships cleared in 1921 was 7,343,323 tons. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware, and rope making.

The principal buildings are the (11th century) "New" Castle, of which the walls, keep and chapel are well preserved; the Cathedral (St Nicholas), St. Andrew's Church (11th century), St. John's (14th century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, the Corporation Buildings, Guild Hall (1658), Moot Hall (1820), Exchange (1860), Central Public Library and Laine, Art Gallery, Wood Memorial Hall (1870) and the Custom House. The city is connected with the south bank of the Tyne by four bridges, of which the old High Level Bridge (1849) was designed by Robert Stephenson and carries the railway and roadway; the new High Level Bridge (1906) carries the railway only.

The pre-Norman borough of *Monkchester* was renamed Newcastle in the 11th century when the castle was erected as a defence against the Scots. In 1400 it was made a county borough and in 1850 was incorporated. The City Corporation now includes a Lord Mayor (1906), 19 Aldermen and 57 Councillors. Newcastle upon Tyne returns 4 members to Parliament.

Principal City Officers

Rt Hon Lord Mayor (1923-1924), S. Eastern, O.B.E.
Recorder, His Honour Llewellyn Archer Atherley Jones, K.C., (1905)
Sheriff, Arthur William Lambert
Town Clerk and Clerk of the Peace, Arthur Maule Oliver, O.B.E. (1907)

NOTTINGHAM

NOTTINGHAM (Nottinghamshire) the principal manufacturing centre of hosiery and lace stands on the left bank of the Trent where the tributary stream Leen enters the river 12½ miles N.N.W. of London. The municipal area is 10,935 acres (17 square miles), and includes an open market place of 5½ acres in the centre of the city, with a population at the Census of 1921 of 266,400.

The city is connected with the North Sea and the Atlantic by the river Trent and canals and is

an important railway centre. The principal industries are cotton, silk and merino hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, and the manufacture of tobacco, &c.

The chief buildings are the 11th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), St. Mary's, St. Peter's and St. Nicholas Churches, the Roman Catholic Cathedral (Pugin, 1842-4), the Guildhall and Sessions Court (1887), Shire Hall, Albert Hall, Exchange, University College, Hospital and Eye Infirmary.

Snotengaham or *Notingeham*, 'the home of the sons of Snod' (the Wise) is the Anglo-Saxon name for the Celtic *Fusogobauric*, 'Cave Homes'. The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation comprises a Mayor, 16 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

Principal City Officers

Mayor (1923-1924), John Houston
Recorder Hugo J. Young, K.C. (1920)
Sheriff (1923-1924) Arthur Ludd
Town Clerk and Clerk of the Peace (1921), William John Board, O.B.E.
City Coroner Charles Lambert Rothera

Urban and Rural Population.

The population of England and Wales in 1926. Urban and 672 Rural Districts showed the following changes at the Census of 1921 compared with that of 1911—

	1911	1921
Population—		
Urban	28,162,936	30,034,385
Rural	7,907,595	7,850,857
Percentages of Total—		
Urban	78.1	79.3
Rural	21.9	20.7

In 1891 the percentages were Urban 78.0, Rural 22.0. In 1901, 77.0 and 23.0.

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY

Position and Extent—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 sq miles and a population (1901) of 2,206,712. It is bounded on the N by the Irish Sea, on the S by the Bristol Channel, on the E by the English counties of Cheshire, Salop, Hereford and Monmouth, and on the W by St George's Channel. The greatest length from N to S (Point of Air to Barry Island) is 126 miles and the greatest breadth from W to E (St David's Head to the English border) is 92 miles.

Separated from the mainland of Wales by the Menai Straits is the Welsh island county of Anglesey (or Mon) (276 sq miles) communication with which is facilitated by the Menai Suspension Bridge (1,000 ft long) built by Telford in 1826, and by the tubular railway bridge (1,100 ft long) of the L & N W Railway built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N W of Anglesey) provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Relief—Wales is generally mountainous the chief systems being those of North Wales (Snowdon 3,571 ft, Carnedd Llywelyn 3,484 ft, Carnedd Dafydd 3,426 ft), Berwyn (Aran fawdd 2,970 ft), Powys (Plinlimmon 2,462 ft, Drygarn Fawr 2,115 ft, Radnor 2,163 ft) and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 6,324 ft, Brecon Beacon 2,862 ft, Pen y gawr fawr 2,660 ft).

Hydrography—The principal river of those rising in Wales is the *Severn* (see England) which flows from the slopes of Plinlimmon to the English border dividing Montgomeryshire on its way. The *Uye* (130 miles) also rises in the slopes of Plinlimmon and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Telf* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles) and *Conwy* (24 miles) the last named broad and navigable are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire 4 miles long and about 1 mile wide. *Lake Vyrnwy* is an artificial reservoir about the size of Bala and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

EARLY HISTORY

Celts and Romans—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caradog* (Caratacus), King of the Silures, a tribe inhabiting the present counties

of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Caerleon on Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo Saxon Attacks—The Anglo Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelsc* or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall while the battle of Chester (612) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dyke). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N), *Powys* (Mid) and *Deheubarth* (S) were divided among his three sons—Anarawd Mervyn and Cadell—the son of the last-named being Howell Dda, who codified the laws of the country, while Llewelyn ap Iorwerth (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1155-1202.

The Norman Conquest—After the Norman conquest of England William I created Palatine counties along the Welsh frontier, and Robert Fitzhamon the Norman Earl of Gloucester raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leader ship of *Griffith ap Rhys* and routed the Norman Flemish forces at the fords of the Telf (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendancy over the whole of Wales and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign, but Llewelyn the son of Iorwerth, was killed in 1242 during hostilities between the Welsh and English and his brother David was captured and executed by the English in 1282. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I, was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorhedd* (assembly), which is believed to date from the time of Pryddan, a ruling prince in an age many centuries before the Christian era.

CARDIFF

CARDIFF (Glamorgan) at the mouth of the river Taff († aer Taff) the port of the South Wales coal fields has a municipal area of 13,628 acres and a population at the census of 1921 of 219 688. The net tonnage of ships entered at the port in 1922 was 10 029 029 tons and of those cleared 10 609 280 tons. The principal industries include ship repairing rope making steel copper, lead and zinc works, iron and steel foundries, patent fuel works engine wagon works flour mills chemical factories paper mills, breweries, jam vinegar and ice factories tin plate and paint works. The chief imports are grain, timber pitwood ore fruit, butter cheese, frozen and chilled meat, potatoes. The exports include coal, coke patent fuel iron and steel manufactures tin plates, &c.

The principal buildings are Cardiff Castle, built in the 12th century the National Museum of Wales Public Library the University College of South Wales and Monmouthshire the Registry of the University of Wales, Technical College City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

City Officers

Rt Hon Lord Mayor (1923-24) S O Jenkins
Spendary Magistrate W St J F Williams.
Recorder, Lt.-Col Sir Rhys Williams, Bart.,
D.S.O., K.C., M.P. (1922)
Town Clerk & Clerk of the Peace Cecil G Brown

SWANSEA

SWANSEA (Glamorgan), at the mouth of the River Lawe is the chief centre of the copper, tinplate and spelter industry of the United Kingdom and contains the largest tube works in the country. The trade of the port also includes coal patent fuel, ores and the import and export of oil (National Oil Refineries). There is also a large ship repairing industry. The net tonnage of ships entered in 1922 was 3 359 327 tons and of those cleared 2 53 605 tons. The trade is principally with France Italy and Belgium. The municipal area is 24 193 acres with a population at the census of 1921 of 159 600. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re built in 1330) the Royal Institution of South Wales founded in 1835 (containing Museum and Library), and the 17th century Grammar School founded by Hugh Gore. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns a member to Parliament.

City Officers

Mayor (1923-24), G N Colwill.
Recorder, R E L. Vaughan Williams, K.C.
Town Clerk, H Lang Coath

THE KINGDOM OF SCOTLAND

Position and Extent—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides and the Orkney, Shetland and many other islands. The Kingdom lies between $60^{\circ} 51' 30''$ and $64^{\circ} 38' 14''$ N latitude and between $1^{\circ} 45' 38''$ and $6^{\circ} 14' 14''$ W longitude its southern neighbour being the Kingdom of England with the Atlantic Ocean on the N and W and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,520 square miles (land and water), with a population (at the census of 1921) of 4,388,288 an increase of 121,394 since the census of 1911 or 2.5 per cent.

Relief—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet) and Cairnsmur of Carsphairn (2,612 feet) in Kirkcudbright. Hartfell (2,651 feet) in Dumfriesshire and Whitecomb (2,605 feet) in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde and the cities of Edinburgh, the capital of the Kingdom and Glasgow its principal seaport. The heather clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands and are divided into a northern and southern system by the *Great Glen* they contain, in the central Grampian Hills *Ben Nevis* (4,406 feet) the highest point in the British Isles, and *Ben Muich Dhui* (4,266 feet). The *Chenot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (3,676 feet).

Hydrography—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Dae and Portrail water and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles. Binningburn Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet) and Stonebyres Linn (80 feet) all occurring within a stretch of 4 miles above and below Lanark. The *Tweed* (96 miles) forms a boundary between Scotland and England at Berwick and has important woollen industries (Tweeds) in its valley. The *Tay* noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards) opened in 1887 to replace that destroyed by a gale (Dec 28, 1879). The *Dee* (90 miles) a noted salmon

river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling is spanned by the *Forth Bridge* constructed 1883-9 at a cost of £3,000,000 with a length of 5,330 feet (with approaches 8,205 feet).

The *lochs* are the principal hydrographic feature of the Kingdom both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Erchie in the Grampian valleys. *Loch Ness* (24 miles long and 800 feet deep) with Lochs Oich and Lochy, in the Great Glen and Lochs Shin (20 miles) and Mearns in the northern Highlands.

Orkney—About 6 miles N of the Caithness coast, separated from the mainland by the *Pentland Firth* is the island county of Orkney a group of 90 islands and islets (holms and skerries) of which one third are inhabited. The total area of the group is 375½ square miles, with a population (1921) of 25,896. Kirkwall, in *Lomona* (or mainland) the largest island of the group is the capital of the county. Many of the Orkney (and Shetland) Islands contain *bicachs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow* between Pomona and Hoy was the war station of the Grand Fleet from 1914-9 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Shetland—About 50 miles N of Orkney (with the detached Fair Isle at 25 miles N) is the island county of Shetland a group of about 100 islands and islets of which 29 are inhabited. The total area of the group is 751 square miles, with a population (1921) of 27,911. Lerwick in *Mainland* (the largest and principal island) is the capital of the county. *Fair Isle* the southernmost of the group is famous for hand knitted hosiery, and *Unst* for the finest of the Shetland woollen work for which the county is famous. *Muckle Flugga*, about 2 miles N of Unst is the most northerly of the group and of the British Isles ($60^{\circ} 51' 30''$ N lat.).

Western Islands—Off the W coast at varying distances, and extending from Sutherland to Argyll are over 500 islands and islets of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree famous as the refuge of Prince Charlie after his defeat at Culloden, Invernesshire, in 1746), which contains the *Cuillin* (Sgurr na Banachdich, 3,243 feet). *Red Hills* (Ben Allach, 2,403 feet), and many other picturesque mountains. *Mull* (367 square miles).

* *Land's End to John o' Groats*—The customary measurement of the island of Great Britain from the site of John o' Groats' house near Duncairn Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity) a total distance of 397 miles in a straight line and (approximately) 900 by road. But the site of the house of John o' Groats (with its 4 doors and octagonal table to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncairn Head, while Dunnet Head (also in Caithness) extends further N than Duncairn. John o' Groats is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488-1513).

* *The Hebrides*—Until the eleventh century of the 13th century. The Hebrides included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire) the Isle of Man, and the Irish Isle of Rathlin. The origin of the name is stated to be the Greek *Hebouda*; latinized as *Hebrides* by Pliny and corrupted to its present form. The Norwegian name *Sudreygar* (Southern Islands) was latinized as *Sodoracene*, a name that survives in the Anglican Bishopric of Sodor and Man.

containing *Ben More* (3,785 feet), *Ben Bui* (3,354 feet), and *Ben Creach* (3,289 feet) *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura*, *Beinn an Oir* (3,571 feet), and *Beinn Chaolais* (3,407 feet) *Islay* (235 square miles), and many smaller islands. *The Outer Hebrides* separated from the main land by the *Munich*, include *Lewis* with *Harris* (770 square miles) celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well preserved series of monolithic circles, cruciform in general arrangement but generally regarded as a heathen monument of the remote Stone Age. *Climate*—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift* which emerges from the Gulf of Mexico as a strong current about 30 miles in width with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler until at about 35° N lat (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England; the average duration of sunshine on the east coast being greater than on the east coast of England, while the south western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35° and that of summer about 58° Fahrenheit.

EARLY HISTORY

Prehistoric Man—North Britain appears to have been invaded in Palaeolithic times by a succession of races who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The *Picts* seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the *Picts* were driven northwards by later Celtic immigrants. Celtic *Goidels* and *Brithons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into Caledonia as far as the "Grampian" Hills but after a victory at *Mon Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius* towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about 450 A.D.

The Scots—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brithons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between *Pict* and *Brithon* is still to be seen in the *Catraig*, or *Picts' Work Dyke*, of Roxburgh (from *lorwoodie* near Galashiels, to *Peel Fell* in the Cheviots). Christianity was introduced into Southern Caledonia about 580 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the *Picts* and *Scots*, the *Brithonic Waelisc* (Welsh) of Strathclyde (South west Scotland and Cumberland), and the Anglo Saxons of the Lothians. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613) and towards the close of the 6th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I (943-954) the *Brithons* or *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm I (1005-1040). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England; the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV and many of his nobles fell at the disastrous battle of *Flodden* (1513) and in 1603 James VI, the Stuart King of Scotland and the heir to the Tudor line of England (his mother Mary 'Queen of Scots' was the great granddaughter of Henry VII), succeeded Queen Elizabeth on the throne his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII and II, the crown devolved upon William III (grandson of Charles I) and Mary (daughter of James VII and II) and, their issue failing upon Anne (second daughter of James VII and II), Anne's children died young and the throne devolved upon George I (great grandson of James VI and I). In 1689 Graham of Claverhouse 'roused the Highlands on behalf of James VII and II, but died after a military success at Killiecrankie. In 1715 armed risings led to the indecisive battle of Sheriffmuir, but the movement died down until 1745, when the 'Young Pretender' defeated the Royalist troops under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby, the adherents of "James VII and III" (the title claimed for his father by the Young Pretender), fell back on the defensive, and the Jacobite movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266 when they were ceded to Alexander III by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III, in 1469, the Danish suzerainty being formally relinquished in 1590.

HIS MAJESTY'S HOUSEHOLD IN SCOTLAND

Great Steward of Scotland H R H the Prince of Wales K.G. (Duke of Rothesay)

HIS MAJESTY'S HOUSEHOLD

Hereditary High Constable, Earl of Erroll, K.T. C.B.

SCOTTISH NATIONAL LIBRARY

By the public spirited generosity of Mr. Alexander
 Grant managing director of McVitie and Price Ltd
 biscuit manufacturers Edinburgh the project for
 the institution of a National Library for Scotland has
 now been rendered possible. Mr. Grant has made
 the munificent gift of £100,000 as a permanent endow-
 ment for the proposed library. The provision of this
 endowment has enabled the Government to accept
 the offer made by the Faculty of Advocates to transfer
 to the nation as a gift the contents of the Advocates
 Library

EDINBURGH

EDINBURGH the Capital of the Kingdom, has a municipal area of 32,402 acres and a population (Census of 1921) of 420,281 (over the enlarged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St Giles's Church (restored 1899-82), and St Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St Margaret's Chapel, the oldest building in Scotland), Parliament House (the present seat of the judicature, containing the Advocates and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and Holyrood Palace (containing parts of the royal palace of James IV and V). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1923-24) W Lowrie Sleight

Town Clerk, Andrew Grierson, S.E.C., J.P.
City Chamberlain, Robert Paton

GLASGOW

GLASGOW a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 19,183 acres, and a population of 1,034,074 at the Census of 1921 (an increase of 55,687 since 1911). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued at £94,701,689 in 1921, the tonnage of the ships entering being 6,449,602 tons, of those cleared 6,373,593 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin weaving, distilling, inkle making, tobacco, cotton mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt Hon. Lord Provost (1923-24) Matthew Walker Montgomery

Town Clerk, Sir John Lindsay, J.P., D.L.
City Chamberlain, John A. Reid, J.P.

In Scotland the principal local court is the Sheriff Court. The Sheriff is the Appeal Judge, but the Judge Ordinary is the Sheriff-Substitute. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of all serious crime with the exception of murder and three other charges, but the power of punishment is limited to fine and imprisonment. It does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

The Procurator Fiscal is peculiarly a Scottish official (criminal prosecutions are in Scotland conducted by Crown officials at the public expense the Lord Advocate and his deputies prosecute in the High Court the Procurators-Fiscal in the Sheriff Court).

The Address of the Secretary of the *Sheriffs Substitute Assoc.* is County Buildings, Dunfermline.

† NORTHERN IRELAND — Under the *Government of Ireland Act, 1920*, six of the Ulster Counties (Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone) with the Parliamentary Boroughs of Belfast and Derry comprising a total land area of 3,351,970 acres (5,263 square miles), and a population (census 1911) of 1,250,531, form the Government of Northern Ireland, with its capital at Belfast.

‡ IRISH FREE STATE — Under the *Irish Free State (Agreement) Act 1922*, the Provinces of Leinster, Munster and Connaught, with the Ulster Counties of Cavan, Donegal and Monaghan, comprising a total land area of 17,019,155 acres (26,592 square miles), and a population (census 1911) of 3,139,688 form the Irish Free State, with its capital at Dublin.

PHYSIOGRAPHY

Position and Extent—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St George's Channel. The land area of the island is 32,531 sq miles and its geographical position between $51^{\circ} 26'$ and $55^{\circ} 21'$ N latitude and from $5^{\circ} 25'$ to $10^{\circ} 30'$ W longitude. The greatest length of the island, from N to S W (Torr Head to Mizen Head), is 302 miles, and the greatest breadth from E to W (Dundrum Bay to Armagh Head) is 174 miles.

Relief—The island is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 250 ft above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawcl 2,240 ft) of County Tyrone in the North, the *Mountains of Mourne* (Sieve Donard 2,796 ft) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft) in the North-East, the *Derryneagh Mountains* (Craigal 2,466 ft) of County Donegal in the North-West, the *Connemara Mountains* (Twelve Pins 2,695 ft) of County Galway in the West, *MacGillcuddy's Reeks* (Carrantuohill 3,414 ft, the highest point in Ireland) in the South-West, and the *Malin Mountains* (3,018 ft) of County Tipperary and the *Knockmealdown* (2,609 ft) and *Comeragh Mountains* (2,470 ft) of County Waterford in the South.

Hydrography—The principal river of Ireland (and the longest in the British Isles) is the Shannon (240 miles), rising in County Limerick and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir*, *Nore*, and *Bann* to Waterford Harbour.

As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough Neagh (150 sq miles) in the north-east, is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Bodry*, *Korbes*, *Ree* and *Derg* and the Fine Chain of *Couno*, *Oughter*, *Lower Erne* and *Fine*, in the central plain, *Ulster*, *Lill Gara* and *Conn* in the north, and *Corrib* and *Nash* (joined by a hidden channel) in the south. In County Kerry, to the east of MacGillcuddy's Reeks, are the famous *Lakes of Killarney*.

Climate—The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N and 62° in the S.

HISTORICAL SKETCH

Primitive Man—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Coudeles* appear to have invaded the island and in the early Iron Age *Bruthons* from South Britain are believed to have effected settlements in the south-east while *Picts* from North Britain established similar settlements in the north. The Roman invaders of Britain did not penetrate to Ireland and during the first century of their occupation of Britain the dominant tribe in Ireland was called by the Romans *Scoti*, and this tribe eventually established themselves in the north of the neighbouring island.

Legendary History—According to Irish legends the island was settled by a Milesian race, who came from Scythia by way of Spain and established the *Kingdom of Tara* about 500 B.C. The supremacy of the *Ardrí* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Osasry) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Grant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn McCool (Fingal) to connect Antrim with Scotland (Staffa).

Christianity—Christianity appears to have been known to many of the people of Ireland before the 4th century A.D. although it did not become general until the advent of St. Patrick. St. Patrick was born in Britain about 389 and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

The Northmen—The Roman conquest of Britain was not extended to Ireland and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as *Hindgall* (White Strangers) and the Danes as *Dubgall* (Black Strangers) names which survive in 'Fin Gall', 'MacDougall' and 'MacDowell' while the name of the island itself is held to be derived from the Scandinavian *Ira land* (Land of the Irish) the Provinces of Ulster, Leinster and Munster being survivals of the Norse *Ula-stadr*, *Laign-stadr* and *Munan-stadr*. The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980) at which the Hy Neill king Maelsechlainn II defeated the Scandinavians of Dublin and the Hebrides under their king Anlaib Cuarán and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Briens of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes.

The Anglo Norman Invasion.—In 1152 Dermot MacMurrough (Diarmait MacMurchada), the deposed king of Leinster sought assistance in his struggle with Ruadri Ó Conor (the Ardri or high king, of Ireland) and visited Henry II, the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom and Dermot enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*. Strongbow landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster where he eventually settled, after marriage with Dermot's daughter. In 1172 (Oct. 18) Henry II himself landed in Ireland with a force larger than Strongbow's and obtained homage from the Irish kings but Anglo Norman rule underwent many fluctuations in the succeeding centuries being confined in the early 15th century within the English 'Pale' of 600 square miles.

Judors and Stuarts.—In the reign of Henry VII English rule was greatly extended and the administration of Irish affairs was anglicised by *Robert Poyning* Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494) at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law* making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII the title of king of Ireland and in Elizabeth's reign the conquest of the island was completed. In the time of James I an apparently trivial incident the introduction of the *potato* (1606) profoundly influenced the future of the nation as it required little labour to cultivate and Raleigh's fatal gift soon became so much the main food of the Irish that a potato famine caused almost universal starvation. In the same reign also many of the leading families of the north eastern counties fled the country after participation in an abortive rebellion, and their lands were distributed amongst English and Scottish colonists adherents of the Reformed Church the number of Protestant settlers constantly increasing in succeeding years.

The Commonwealth.—Cromwell's campaign in Ireland (1649-1650) was carried on with ruthless cruelty and universal military success terminating in the subjugation of the island and the legislative union with England but further estrangement was caused between the Roman Catholics and the Protestant Colonists.

The House of Orange.—At the Revolution of 1688 the Irish Protestants adhered to the cause of William and Mary, and *William III* defeated the Roman Catholic adherents of James II at the *Battle of the Boyne* (July 1, 1690) and at the *Battle of Aughrim* (July 12, 1691).

The Act of Union.—The Jacobite risings of 1715 and 1745 found no adherents in Ireland but various insurrections took place in the 18th century, culminating in the rebellion of 1798, after the suppression of which the *Act of Union* (Jan. 1, 1801) combined the Irish and British legislatures. Catholic Emancipation was enacted by the Parliament of the United Kingdom in 1829, and extensive relief works were carried out to mitigate the severities of famine from 1831-1847. In 1845 the population reached its highest point (8,295,061) of whom the vast majority were dependent for food on the success of the potato crop.

Home Rule.—The demand for a separate Parliament for Ireland was first advanced at Westminster by an Irish party under the leadership of *Isaac Butt* (born 1813 died 1879) who was succeeded by *Charles Stewart Parnell* (born 1846 died 1891) by whose efforts the necessity of granting a measure of Home Rule to Ireland was impressed upon one of the great political parties of Great Britain. After many failures to pass a Bill through both Houses of Parliament a Home Rule Bill was eventually placed on the Statute Book in 1914 with a suspensory clause for the duration of the War. In the later stages of the War however, the extreme party of Irish politicians developed their organization under the name of *Sinn Féin* ('Ourselves Alone') and demanded complete severance from Great Britain and the recognition of an Irish Republic and of its elected legislature (*Dail Eireann*). Various efforts were made by the Cabinet of the United Kingdom to arrive at a solution of the Irish problem, which was complicated by the separatist demands of the extremists (in open rebellion against the Government) and the desire of the Protestants of Ulster to remain united with Great Britain with the additional problem of the minorities of Protestants in the Southern counties. The *Government of Ireland Act 1920*, superseded the Act of 1914 and established two governments in Ireland with an executive and legislature of two chambers in Southern Ireland and in Northern Ireland, and a Council of Ireland to co-ordinate the work of the two legislatures. This Act was accepted and was brought into operation in Northern Ireland, the Northern House of Commons being duly elected and the Senate formed Sir James Craig becoming the first Prime Minister of Northern Ireland. The Republicans (*Sinn Féin*) of Southern Ireland refused to accept the Act and lengthy negotiations took place between *Sinn Féin* representatives and the Cabinet of the United Kingdom resulting ultimately in the signing of a Peace Treaty Dec. 6 1921, which was ratified by *Dail Eireann* Jan. 7, 1922.

The Irish Free State.—Under this Treaty there was set up in Southern Ireland the *Irish Free State* (*Saorstát Éireann*) a coequal member of the Commonwealth of Nations forming the British Commonwealth of Nations.

TRADE OF IRELAND

Trade of Ireland.—The value of the Irish import and export trade is shown below—

Year	Imports	Exports
	£	£
1913	74,467,000	73,877,000
1918	126,016,000	152,931,000
1919	158,716,000	176,032,000
1920	203,750,000	204,715,000
1921	118,971,000	129,621,000

The trade of 1921 was classified as under—

	Imports	Exports
	£	£
Farm Produce Food and Drink	46,500,000	74,089,000
Raw Materials	13,082,000	2,966,000
Manufactures	59,389,000	51,564,000

Trade with Great Britain, 1921

Imports from Great Britain	£53,000,000
Exports to Great Britain	127,000,000

Northern Ireland.

The Irish Free State—Saorstát Éireann.

THE GOVERNOR GENERAL

His Excellency Timothy Michael Healy, K.C., born 1855, appointed Governor General Dec 6, 1922 £10,000

CONSTITUTION AND GOVERNMENT

UNDER the *Irish Free State (Agreement) Act 1922*, the Irish Free State (*Saorstát Éireann*) is a coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown June 16 1922 contains five Sections of which Section I is declaratory of Fundamental Rights. (1) The coequality of the Irish Free State (2) Power of government derived from the people in accordance with the Constitution (3) Irish domicile for seven years or Irish parentage on either side conferring Irish nationality, and men and women having equal rights as citizens (4) Irish the national language English being recognised as an official language (5) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council (6) Liberty of the person inviolable (7) Inviolability of each citizen inviolable (8) Freedom of conscience and profession and practice of religion and no law establishing or prohibiting religion may be passed (9) Free speech and right of lawful assembly (10) Free education for all citizens (11) Natural resources of the State inalienable

Section II provides for a legislature (*Oireachtas*) of the King and two houses the Chamber of Deputies (*Dáil Éireann*) and the Senate (*Seanad Éireann*) the former elected by secret ballot and by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population. The latter consisting of 56 Senators and 4 Senators from each University elected by all citizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies. The Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year and members are required to take the following oath

I do solemnly swear true faith and allegiance to the Constitution of the Irish Free State as by law established and that I will be faithful to His Majesty King George V. his heirs and successors by law in virtue of the common citizenship of Ireland with Great Britain and her adherence to and membership of the group of nations forming the British Commonwealth of Nations

Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register, and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people

In this Section also Article 45 declares that the Parliament (*Oireachtas*) has the exclusive right

to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State and every such force shall be subject to the control of the Parliament. Save in the case of national invasion the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament

Section III vests the Executive Authority in the King and provides that it shall be exercised in accordance with the law, practice and constitutional usage governing the exercise of the executive authority in the case of the Dominion of Canada by the representative of the Crown. The Executive Council (*Aireacht*) is responsible to the Chamber and consists of not more than twelve Ministers (*Airí*) appointed by the representative of the Crown, of whom four Ministers shall be members of the Chamber and a number not exceeding eight chosen from all citizens eligible for election to the Chamber who shall not be members of Parliament during their term of office and who if at the time of their appointment they are members of Parliament shall by virtue of such appointment vacate their seats provided that the Chamber may from time to time on the motion of the President of the Executive Council determine that a particular Minister or Ministers not exceeding three may be members of Parliament in addition to the four members of the Chamber above mentioned

Section IV establishes a Judiciary consisting of Courts of First Instance and a Court of Final Appeal to be called the Supreme Court (*Cúirt Oachtarach*). The Courts of First Instance include a High Court (*Ard Chúirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact civil or criminal and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever. Provided that nothing in the Constitution shall impair the right of any person to petition His Majesty for special leave to appeal from the Supreme Court to His Majesty in Council or the right of His Majesty to grant such leave

Section V contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c

Education — Primary Education, with compulsory attendance in many counties, is directed by the State which also pays the teachers and contributes to the cost of the buildings, the estimated expenditure on Primary Education in 1922-3 was £3,863,921. Secondary Education is in private hands and is largely conducted by Religious Orders, the State contribution in

1922-3 being £132,750. There are two Universities in Dublin, of which the National University has 3 constituent colleges (Cork, Galway and Dublin). In 1922 the Professors etc. at the two Universities numbered 220, and the students 3,410.

Finance—The Budget for 1923-4 estimates the expenditure of the State at £42,000,000 (Army, £10,664,500. Compensation for property losses £10,385,000, Old Age Pensions, £3,277,000 Secret Service £50,000 Civil Guard, £1,147,939 Criminal Investigation Department £47,554 General Prisons Board £225,631 Local Government, £955,202 Agriculture £400,982 Education, £3,954,489 Post Office, £2,831,864 Industry and Commerce, £295,445 Metropolitan Police, £327,537. Government General Establishment, £11,423. The principal source of revenue is a duty of 33½ per cent on Imports. The estimated revenue in 1922-3 was £27,000,000 the estimated expenditure was £37,709,000.

The transfer of administrative functions in Southern Ireland to the Irish Provisional Government did not take place until the 1st April, 1922. Southern Ireland therefore, continued to be administered during the whole of the year 1921-22 as part of the United Kingdom for all purposes of the Internal Revenue duties.

MINISTERS AND OFFICERS

Executive Council

(a) *Ministers who are members of, and who constitute the Executive Council of the Irish Free State*—

President of the Executive Council Liam T. MacCosgair (William T. Cosgrave), £2,500
Vice President and Minister for Home Affairs Caoimhghín Ó hUigín (Kevin O'Higgins) £1,700

Minister for Finance, Eamán de Blagd (Ernest Blythe) £1,700
Minister for Industry and Commerce, Seosamh MacGrath (Joseph McGrath), £1,700
Minister for Education Eóin Mac Néill (Professor John MacNeill) £1,700
Minister for External Affairs Deasamhain MacGearailt (Desmond Fitzgerald) £1,700
Minister for Defence, Risteard Ua Maolchátha (General Richard Mulcahy) £1,700

Other Ministers

(b) *Ministers who are not members of the Executive Council*—

Minister for Agriculture Pádraig O hógáin (Patrick Hogan)

Minister for Fisheries Fionán O Loingsigh (Finian Lynch)

Postmaster General, Seamus Breatnach (James J. Walsh)

Officers

Parliamentary Secretary to the Executive Council Eamon O Dugan (Edmund Duggan)

Parliamentary Secretary to the President, Domhnall MacCarthaigh (Daniel McCarthy)

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. $54^{\circ} 3' - 54^{\circ} 25' N$ and long. $4^{\circ} 28' - 5^{\circ} 47' W$, nearly equidistant from England, Scotland and Ireland. The total land area is 145,345 acres (227 sq miles) with a population (1921) of 49,232. The cultivated area (1922) was 83,847 acres and the live stock included 5,123 horses, 12,250 cattle, 75,507 sheep and 4,350 pigs. In the 9th century a body of malcontents from Norway emigrated to the western isles of Scotland and their prosperity drew upon them the anger of the Norwegian monarch Harald who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles and Man. For three centuries the Norwegian rule remained intact but when in 1263 Alexander III defeated the famous Hacon at the battle of Largs all these islands fell under Scottish rule. On his accession to the English throne Henry IV seized on the Isle of Man and in 1406 bestowed it on the Stanley family. In 1877 the Crown purchased it for the sum of £417,144.

The land is rich in minerals: lead, iron, blende and slate and exports large quantities of agricultural produce. Fifty miles of railway have been constructed, and about 23 miles of electric tram road.

Man is governed by a separate Legislature called the Tynwald consisting of two branches—the Governor and Council and the House of Keys. The House of Keys (possibly from the Scandinavian *keese* = chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members elected by the male and female owners and occupiers of property, 3 from each *shiring*, 3 from Douglas and 2 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. In 1923 the Tynwald offered the Imperial Government the sum of £200,000 as the Islands' contribution to the cost of the Great War.

CAPITAL Douglas. Pop. (1921) 20,102 (Castle town is the ancient capital). The other towns are Peel and Ramsey.

THE CHANNEL ISLANDS

situated off the north west coast of France (at distances of from ten to thirty miles) are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have all been attached ever since the Conquest. They consist of Jersey (28,777 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,235), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 47,083 acres, or 73 1/4 square miles. The 1921 Census population of Jersey was 49,494, and of Guernsey, &c., 40,120, total 89,614.

The climate is mild and the soil exceptionally productive. The land under cultivation in 1926 was 49,678 *verées* (2 1/2 *verées* = 1 acre) the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops and oats, fruits and tomatoes. The famous Jersey and Guernsey breeds of cows have earned a well deserved celebrity. The principal officer in each island is the *lieut. Governor*, who represents the King Emperor (the Duke of Normandy). French is the official language of the local legislatures called the *States* and of the Royal Court, and is still spoken by the people but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown presides over the *States* and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St Helier on the south side, the principal town of Guernsey is St. Pierre Port on the east coast.

The Government of London. THE CORPORATION OF THE CITY OF LONDON.

561

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter which is still preserved. It is addressed to William the Bishop Godfrey the Portreeve, and all the Burgesses, and promises that they shall be 'law worthy' (i.e. possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve however received the Norman title of Bailiff, which in 1192 was changed to Mayor the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually which has ever since been done though in early times the same individual often held the office more than once. A familiar instance is that of Whittington thrice Lord Mayor of London (in reality four times, A.D. 1397 1398 1406 1419) and many modern cases have occurred. The title of *Lord Mayor* was not in general use in the outer world until about 1545. The Lord Mayor is elected at Michaelmas he is sworn into office on November 8 and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the *Lord Mayor's Show*.

Aldermen were first appointed by a charter of Henry III in 1242 and were elected annually between 1377 and 1394, when a charter of Richard II directed them to be chosen for life. The *Common Council* was at an early date substituted for a popular assembly called the *Folk mote*. At first only two representatives were sent from each ward, but the number has since been greatly increased some wards having as many as 16 members and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown and were named by the Barons of the Exchequer but King John gave them in the first year of his reign, permission to choose their own Sheriffs. The citizens however lost this privilege as far as the election of sheriff of Middlesex is concerned by the Local Government Act 1888 but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day and enter on office at Michaelmas.

Officers—The Recorder is first appointed in 1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance c. 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk (called Common Clerk) and Common Sergeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II A.D. 1319, but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1923-1924

Col Sir Louis Arthur Newton Kt, born Dec 17 1867 *Common Councilman* 1905 *Alderman of Cordwainer Ward* 1916 *Sheriff of London* 1916-17 *Lord Mayor of London* 1923 *Address* The Mansion House E.C. 4 *£10,000*
Private Secretary (49th year) Sir Win J. Goulshay K.C.V.O. (C.B.C.I.)

* The above is abstracted from the 260th City's Cash Account of the services to A.D. 1833 to 1922-23. The Accounts earlier than A.D. 1833 were believed to have been destroyed in the fire of London, but two years ago (1920) Queen Elizabeth had been discovered among the Corporation Archives as exceptions to that belief. The Volumes are in full detail signed by the Auditors and in perfect preservation. The above extract is from the 1923 Annual Printed Account of the Corporation A.D. 1914 to 1922-23. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June 1903, and the 14th December 1905, upon Reports of the Civil and Finance Committees and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts are made up to the end of March and are issued in the form prescribed by those Orders and show the Income and Expenditure applicable to the year on the various Funds.

THE CITY GUILDS (LIVERY COMPANIES)

In the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild the Broderers (Embroiderers), Cord wainers (cobblers), Fletchers (arrow makers), Loriners (bridle bit and spur makers), Poulterers (poulterers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

8083 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (see p. 561). The actual net number is, however, smaller, as many belong to more than one Guild and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district.

The Liveries of the Haberdashers and the Loriners are the most numerous, each possessing 350 liverymen, the Fletchers the least, comprising only twenty.

COMPANY	No. of Livery	Corpo rate Income	Trust Income	Total Income	Master or Prime Warden 1923-1924	Clerk	Hall

Parliamentary Boundaries—In consequence of changes under the Representation of the People Act (1918) the Administrative County of London now includes the whole of the Metropolitan Parliamentary Divisions. It also comprises the City of London and the 28 Metropolitan Boroughs.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross exclusive of the City of London, with an assessable value for 1923 of £61,413 718 and embraces an area of upwards of 699 square miles. The number of new houses built since 1879 up to and including the year 1918 is 602,529.

THE LONDON COUNTY COUNCIL

Offices, The County Hall, Westminster Bridge, S E 1, and Old County Hall Spring Gardens, S W 1

Hours 9.30 to 5 (Monday to Thursday), 9.30 to 5.30 (Friday) 9.30 to 12.30 (Saturday)

Meets on Tuesday at 2.30 p.m.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for non administrative purposes such as quarter sessions justices &c. and the Metropolis outside the City is a county for non administrative purposes, by name the County of London in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen and 124 councillors, together 145, or, if the chairman be also an elected member or alderman 144. The term of office for aldermen is 6 years and half retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules subject to the reservation to the Council itself of all questions of principle and to periodical reports of action taken.

The Finance Committee have important statutory powers. No costs debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money raising body for all the local authorities in the county, and has a net debt, according to the latest returns of £55,180,000 (of which £21,930,000 represents debt incurred for revenue producing undertakings) and an annual expenditure of about twenty seven millions of which about twelve and a half millions are expended on education. The Mental Hospitals Committee administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913. The Council has mental hospitals with accommodation for over 20,000 patients. The Housing Committee perform the duties cast upon the Council by the various Housing Acts including the clearance of insanitary areas and the building of working class dwellings. These duties have involved expenditure under two main heads: (a) Non Assisted Schemes (the dwellings on which are self supporting) which were carried out prior to the passing of the Housing, Town Planning &c., Act, 1919 and (b) the Assisted Scheme under the Act of 1919. Any financial loss on the latter scheme in excess of the produce of a penny rate is borne by the National Exchequer. The total capital expenditure by the Council up to March 31, 1922, in respect of Non Assisted Schemes was: Clearance of insanitary areas, £2,700,000, working class dwellings, £2,095,000, and in respect of the Assisted Scheme £18,848,000. Owing to financial stringency the Government required the Assisted Scheme to be considerably curtailed and the number of houses to be built by the Council under the Scheme apart from dwellings for rehousing in connection with clearance schemes, was reduced from 29,000 to about 8,800. As,

however it became increasingly evident that the supply of houses was not overtaking the demand the position was reviewed by the Government, and the Housing &c. Act, 1923 was passed in order to encourage the building of new houses. The Act provides, *inter alia* for State assistance to local authorities by means of an annual contribution of £6 for 20 years in respect of each house of a specified type and size completed before October 1925 (or June, 1926 in certain circumstances). The Council is taking steps for the rapid development of new schemes in accordance with the provisions of the Act.

The Improvements Committee are responsible for the carrying out of street improvements and the construction of bridges (outside the City of London) and tunnels across the river Thames. The largest improvements carried out in recent years are the new streets between Holborn and the Strand now known as Kingsway and Aldwych tunnels under the Thames at Rotherhithe and Woolwich and an extensive improvement at Westminster including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge.

The Metropolitan Main Drainage system covers about 149 square miles including certain districts outside the county and comprises 370 miles of main storm relief intercepting and outfall sewers eleven pumping stations two sewage precipitation stations and six sludge vessels. The sewage is conveyed to the outfalls at Barkin, and Crossness and there the solid matters held in suspension are precipitated, and the sludge is taken out to sea. The Council is carrying out experimental work in connexion with other systems of sewage treatment. The total capital outlay in main drainage is nearly £14,000,000, and further expenditure, amounting to several millions is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain.

The Council is the Tramway Authority for London. The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 163 street miles, all of which are electric lines (mostly underground conduit). Practically the whole of this great system is worked by the Council and through running with various systems outside the County of London and convenience of the travelling public. The total capital outlay on tramways amounted, on March 31, 1923 to £16,084,000 and the net debt outstanding, to £9,136,000. The results of working for the year 1922-23 were gross receipts £4,895,605, surplus on working £873,668, net surplus after payment of interest on capital outlay and providing for repayment of debt £122,327.

The Education Committee comprises thirty eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. In accordance with the Education Act 1918 the Council has submitted to the Board of Education a scheme for the development of educational facilities of all kinds, but owing to the general financial situation it is

sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total stock outstanding at 31st March, 1923, was £77,664,389 out of total issues of £84,632,379. These figures are exclusive of the issues of Bonds, the amounts outstanding at 31st March, 1923 being £2,705,300 London County 5½ per cent Bonds and £3,954,280 6 per cent Local Bonds for Housing. The Rating for the year 1923-24 as shown by

the statement on p 567 (which relates to rate and debt accounts only), amounts to 3s 9½d in the pound over the whole county including the City, and a further rate over the county outside the City of 2½d in the pound, together 4s. Of the total rate 2s 5d. is for education. The total rate for 1922-23 was 4s 6d and for 1921-22, 4s 5d. The Assessable Value of the County of London on 6th April, 1923 was £49,422,498—a 2d rate over the whole county producing £205,927.

THE TENTH LONDON COUNTY COUNCIL

Elected March 2, 1922, for three years

Chairman (1923-24)
Vice Chairman
Deputy Chairman

Henry Cubitt Gooch
Henry Vincent Rowe
The Earl of Haddo, OBE, D.S.O.

CATHEDRALS AND CHURCHES

ST PAUL'S CATHEDRAL City of London E C 4.—The masterpiece of Sir Christopher Wren (1675-1750) cost £747,660. Splendid architecture monuments to celebrated men famous music. The cross on the dome is 365 ft above the ground level, the inner cupola 218 ft above the floor. Great Paul in S.W. lower weighs 27 tons Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). Fragments of rock from Mount Calvary and carved stones from the Temple at Jerusalem affixed to wall of south choir aisle. Nave and transepts free. Pews to the following parts (on week-days only). Library, whispering gallery and stone gallery 6d. Golden gallery 2s. crypt 6d. hall 2s. total 3s. Service on Sundays 1s. 1s. 4s. 7s. 15s. and 7s. Week days at 8 * 10 12 15. 4. (Services are choral.) Among the distinguished statesmen, warriors and artists buried in the crypt or commemorated in the Cathedral are Nelson Wellington Napier St Vincent Rodney Cornwallis Abercrombie Moore Gordon Wolsey Roberts Brock Ross of Bladensburg Pakenham Gibbs Dundas Wren (at monumentum iugulum circumspicit) Rey holds Donne Turner Benjamin West Abbey Leighton Sullivan and many others. In 1922 a bust of George Washington presented by American subscribers was placed in the crypt. The garden contains in 8 portion an ornamental device with legend varied from year to year. At the N.E. corner of the Cathedral is St Paul's Cross erected in 1590 on the site of a cross and open air pulpit removed by order of the Long Parliament. To the S of the Cathedral are remains of the Chapter House and Cloisters of Old St Pauls, destroyed by the fire of London in 1666. Cut into the paving stones at the foot of the steps at W entrance is an inscription commemorative of Queen Victoria's thanksgiving in 1897.

WESTMINSTER ABBEY near the Houses of Parliament, S.W. 1 (built A.D. 1050-1750).—Open on week days at 8 a.m. Admission to Royal Chapels by fee of 6d. except on Mondays (open free). Wax effigies 6d. Norman undercroft, 3d. Open on Sundays for service only. Holy Communion at 8. Morning Prayer and Holy Communion at 10.15. Evening Prayer at 3. Litany and Sermon at 6.30. Daily—Holy Communion at 8 a.m. School Service at 9.30. Choral services at 10 and 3. Chapel of Henry VII. Chapter House and Cloisters. King Edward the Confessor's shrine A.D. 1269. Tomb of Kings (Edward, Edward III, Henry V. Mary Queen of Scots, Queen Elizabeth) and many other monuments and objects of interest especially the grave of "An Unknown Warrior" at the W. end of Nave (1920) and Poets Corner. The Coronation Chair encloses the Stone of Scone, brought from Scotland by Edward I in 1297. Graves of Gladstone Isaac Newton Charles Darwin Charles Dickens Lord Macaulay Dr Johnson Chaucer Tennyson Browning Haude memorial to Viscount Howe (killed before Fort Mifflin 1758) the memorial to Major John André, Adjutant-General of the British forces in America the tombs of General John Burgoyne and of Colonel Enoch Mordaunt memorials to Wolfe (Quebec) and Col Townshend (Ticonderoga) bust of Longfellow memorial window to British Airmen and British Y.M.C.A. who fell

in the Great War coloured window and tablet to Lowell and tablet to Walter Hines Page, in vestibule of Chapter House.

SOUTHWARK CATHEDRAL, south side of the Thames S.E. 1.—Finest medieval building in London after the Abbey, and mainly 13th century. Known as St Mary Overie previous to 1540. Burial place of Gower Massinger, and 1540 Andrews &c. Open 7.30 a.m. to 6 p.m. free. Sunday services 7.30 8 and 11 a.m. (choral) and 6.30 p.m. (choir). Week days 7.30 8, and 5 p.m. (choral). The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle the altar screen (erected 1520) has been partly restored. The Early English Lady Chapel (behind the choir) is the scene of the Consecration Courts of the 16th of Mary (Gardiner and Bonner). Shakespeare memorial in S. aisle with recumbent figure and window above the gift of British and American subscribers. The Chapel of St John the Divine, in the north transept once used as a magistrate's court was restored at the cost of Harvard students as a memorial of their founder John Harvard who was baptized in the Church Nov. 29 1607 (part of Harvard's estate was derived from the sale of the Queen's Head Inn, Southwark inherited from his mother).

ALL HALLOWS Barking by the Lower E.C. 3.—15th century church containing a very fine series of brass effigies. Jacobean pulpit with Sussex ironwork and font cover ascribed to Grinling Gibbons. William Penn Quaker was christened here and a tablet has been erected by the Pennsylvania Society of New York. John Quincy Adams sixth President of the United States, was married here in 1797.

ALL SAINTS Margaret Street W. 1.—Built by Butterfield in 1859. Ritualistic and noted for its music.

BOW CHURCH (ST MARY IE BOW), Cheapside E.C. 2.—Rebuilt by Wren (see p. 570) after the fire, with beautiful steeple (222 ft.) 17th century crypt and church open daily (except M.) 10 A.M. to 5 P.M. Since 17th century anyone born within sound of the bells of Bow Church has been designated a Cockney. The 11th century church was built on stone arches or bows.

CHRIST CHURCH GREEKFRIARS F.C. 1.—The church of the former Greyfriars Monastery was destroyed in the fire, and Christ Church was rebuilt by Wren. The organ (repaired 1922) is by Renatus Harris, and the marble font is attributed to Grinling Gibbons. Until removal to Horsham (1902) the boys of Christ's Hospital (Blue Coat School) the site of which is now occupied by the G.P.O. attended services at Christ Church and the galleries contain seats with raised benches for the "Grecians." Blue Coat School boys still attend annually on St. Matthew's Day (Sept. 21). "Spital Sermon" is preached at Christ Church at Easter.

CHRIST CHURCH, Westminster Gate, S.W. 1.—Rev P. R. R. Kirk, M.A.

GUARDS CHAPEL, Wellington Barracks (Birdcage Walk, St James's Park, S.W. 1).—Chapel redecorated in 1876. Open to visitors Tuesdays, Wednesdays Thursdays and Fridays, 10 to 12 and 4 to 6. Parade service on Sundays at 11 a.m. (tickets of admission can be obtained on application to the Chaplain R.M. Chapel Wellington Barracks) evening service (open to the public) at 6 p.m.

HOLY TRINITY, Minorities Aldgate, F 1—(Dis-mantled and now a Sunday school) Contains a mural monument with the arms of the Earls of Dartmouth and of a member of that family (Legge) in which the arms of George Washington are quartered with those of the Legges

MARYLEBONE CHAPEL High Street, Marble-bone, W 1—The former Parish Church of the village of Marylebone (now replaced by St. Marylebone Church) was rebuilt in early 18th century. In the churchyard lie Allan Ramsay (poet), Hoyle (whist) Ferguson (astronomer) Charles Wesley (hymn writer) and his son Samuel Wesley (musician)

ST ALBAN Brooke Street Holborn, E C 1—A brick building by Butterfield (1858). Ritualistic and noted for its music organ by Willis. Vicar Rev H. Ross. Services on Sundays Holy Eucharist at 7 and 8 choral at 9.25 solemn with sermon, at 11 matins 10.30 litany baptisms, and churchings at 1.15 children's service and catechising 3 evensong, at 6.30 frequent mission services. Open daily 6.45 a.m. to 9 p.m.

ST ANDREW BY THE WARDROBE Queen Victoria Street, E C 4 (near the site of the Kings Wardrobe). Rebuilt by Wren

ST ANDREW UNDERSHAW St. Mary Axe Leadenhall Street F C 3—An early 16th century church, contains a monument of Stow the London antiquary and a memorial of Holbein. The organ is by Renatus Harris, the rival of Father Smith

ST ANNES Wardour Street Soho, W 1—Built in 17th century and noted for its rustic Monument of William Hazlitt in the churchyard

ST BARTHOLOMEW'S Priory Church Smithfield E C 1, the oldest church in London (A.D. 1123)—Rector, Rev W. F. G. Sandwith M.A. Fine old Norman building with tomb of the first prior Rahere. N transept restored and reopened in June 1893. Crypt and Lady Chape open cloisters opened Dec. 2, 1905. Services daily 12.30 p.m. except Sat. 11 a.m. and Thurs 1.15 and 6.30 p.m. Open free daily (Sundays for service only 8.45 to 6.30)

ST PENNY Paul's Wharf, Upper Thames Street E C 4—Rebuilt by Wren 1683. Ingio Jones 1573 1625, and his father and mother were buried in former church. St. Benet is the Metropolitan Welch church

ST BRIDGES Church Fleet Street E C 4—Rebuilt by Wren with beautiful spire (226 ft.) Samuel Richardson the novelist is buried in the nave. In the old church Lovelace Sackville and Wynkin de Worde were buried, and Samuel Pepys was baptized

ST CLEMENT DANES Strand W C 2—Rebuilt by Wren on site of earlier church assigned to the Danish settlers. The traditional burial place of Harold Harefoot (King Harold I. see p. 98) son of Canute. The organ is by Father Smith, the bells are those celebrated in the familiar nursery rhyme 'Oranges and Lemons' and the altar is among those played on the chimes (since 1920). Owing to the historical association of this church with the kingdom of Denmark Danish ceremonies are now and then performed there. Dr. Johnson's pew in gallery and monument outside E end

ST CLEMENTS, Clements Lane Lombard Street E C 3—Rebuilt by Wren contains hand some carvings on pulpit and font, and some chained books

ST DUNSTON IN THE EAST, Idol Lane, Lower Thames Street E C 3—Rebuilt by Wren with

fine tower and spire, rest of church rebuilt, 1877 1882 contains many monuments

ST FIDELITY KING AND MARTYR, Lombard Street E C 3—Rebuilt by Wren, with altar at north end organ by Renatus Harris. Restored and re opened 1919, after damage by Air Raid, July 7, 1917

ST ETHELBURGA'S, Bishopsgate, E C 2 (14th and 15th century).—On April 19, 1607, Henry Hudson (the navigator who gave his name to Hudson's Bay and to the Hudson River), his son John, and his ten sailors took communion in St. Ethelburga's, "purposing to goe to sea foure days after"

ST GEORGES Hanover Square, W 1 (18th century famous for fashionable marriages).—George Eliot Mr Asquith and Theodore Roosevelt were among those married here

ST GEORGES Southwark S E 1—(Rebuilt 1736) contains the tombs of Bishop Bonner (1497-1569) and Edward Cocker (1632-1675) the author of Cocker's 'Arithmetick' (The expression, "ac-cording to Cocker" refers to this book)

ST GILES, Giltspate E C 2 (14th century).—Contains the graves of John Milton John Foxe and Sir Martin Froisher the Elizabethan seaman, who attempted to discover a north west passage to Cathay and commanded the *Primrose* as vice admiral to Drake in his expedition to the West Indies

ST HELPS Bishopsgate, E C 2—The 'Westminster Abbey of the City' from its numerous monuments building, dates from 13th century. Contains a Shakespeare memorial window presented by Mr. William Prentice an American. In St. Helen's Place the foundations of an earlier church were uncovered during rebuilding operations in 1222

ST JAMES'S GARICKHITHE, Garlick Hill E C 4 has four stained glass windows one of which was seriously damaged by a bomb by a German air raider on June 13 1917. It is pro-posed that the window should not be completely replaced and that year by year on the anni-versary of the outrage the congregation should assemble for a service of thanksgiving for mer-ciful preservation from sudden and violent death. The Bomb Sermon will be a modern counter-part of the "Lion Sermon" (see St. Katherine Cree, below)

ST JAMES'S, Piccadilly, W 1—Built by Wren with font and wood carvings by Grinling Gibbons. Lord Chesterfield and Lord Chatham were baptized in St. James's

ST JOHN'S St. John's Square, Clerkenwell, E C 1—Built in early 18th century, includes part of the ancient priory of St. John (12th century crypt)

ST KATHERINE CREE Leadenhall Street, E C 2. Rebuilt in early 17th century and ascribed to Ingio Jones. Contains a Catherine wheel E. window, an organ by Father Smith, Archbishop Laud's prayer book and bible and a monument of Sir Nicholas Throgmorton. The "Lion sermon" is preached here annually before the Lord Mayor and Corporation of London to commemorate the escape of a Lord Mayor (Sir John Gayle) from a lion in Algeria (Oct. 16, 1600)

ST MAGNUS THE MARTYR Lower Thames Street, E C 3—Rebuilt by Wren, with steeple (85 feet) and lantern of great beauty, contains the tomb of Miles Coverdale (1488-1568) trans-lator of the Bible, who was rector of St. Magnus (1564-1566) and Bishop of Exeter (1557-1557)

ST MARGARET Lothbury E C 2.—Rebuilt by Wren, contains Grinling Gibbons carvings (font, chancel screen, and pulpit).

ST MARGARET'S, Westminster, N W 1.—Founded 11th or 12th century buildings date from 15th century, with frequent restorations. The parish church of the Dominions beyond the Seas and perhaps the most American spot in all London. The window over the western door was put up in 1882, at the cost of Americans to the memory of Sir Walter Raleigh who was executed in Old Palace Yard hard by, and whose headless body, and the body of his son Carew lie in the chancel. The quatrain below is by James Russell Lowell (*See also* tower of London). The Milton window at the west end of the north aisle was the gift of Mr G W Childs of Philadelphia and bears an inscription by Whittier. Below the window is a tablet to Sir Peter Paiker who sailed the *Menelaus* up the Chesapeake during the war of 1812 and was killed while leading a landing party. On the south wall is a memorial window to Phillips Brooks, Bishop of Massachusetts and over the vestry door is a window erected to Lady Arabella Stuart by an American lady. The church also contains the grave of Elizabeth daughter of Robert Dinwiddie Governor of Virginia.

ST MARGARET PATERNER Rood Lane Eastcheap E C 3.—Rebuilt by Wren with a leaden spire contains two canopied pews and other curious survivals and relics.

ST MARY Aldermanbury F C 2.—Rebuilt by Wren contains the tomb of Judge Jeffreys and a marble monument to Lieutenant John Smith 'drowned off Staten Island in 1782. John Heminge and Henry Condell (Shakespeare's editors) were buried in the older church.

ST MARY WOOLNTHORPE (above the City and South London Tube Station) King William Street and Lombard Street, E C 3.—Built by Hawksmoor early 18th century organ by Father Smith contains a memorial to Sir Wm Phipps Governor of Massachusetts who died in London in 1695.

ST MICHAEL PATERNOSTER ROYAL, College Hill Upper Thames Street E C 4.—Rebuilt after the Fire by Strong (a pupil of Wren's) contains the tomb of 'Dick Whittington' (*see* p 561) and a Grinling Gibbons altarpiece.

ST OLAVE, Hart Street Mark Lane E C 3.—A 15th century church, which survived the Fire of London contains the tombs of Samuel Pepys and his wife and a monument of John Watts President of the Council of New York also a memorial (formerly in All Hallows Staining) to Monkhouse Davison and Abram Newman, the exporters of the chests of tea which were thrown into Boston Harbour, Dec 16 1773. On Trinity Monday the Master and Brethren of Trinity House (*q v*) attend service here.

ST PAUL'S, Covent Garden W C 2.—Built by Inigo Jones. The tombstones round the exterior of the church record the burial places of Samuel Butler (Hudibras), Sir Peter Jeyes (Painter), Wycherley (Dramatist), Grinling Gibbons (Wood Carver), Dr Arne ('Rule Britannia'), and Macklin (Actor).

ST PETER'S Cornhill E C 3.—Rebuilt by Wren, contains a carved choir screen also ascribed to him. The organ is by Father Smith.

ST SEPULCHRE, Holborn E C 2.—Part of this church escaped the Fire (*see* footnote col. 2). The organ is by Renatus Harris, in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's

tutor) and Capt John Smith 'sometime Governor of Virginia and Admiral of New England, who would have been put to death but for the intercession of Pocohontas (Princess Pocohontas is buried in Gravesend *see* p 562).

ST STEPHEN'S (Coleman Street), F C 2.—The Rev John Davenport, who with other refugees, landed at Boston in 1637 and founded the colony of New Haven Connecticut in the following year was vicar of this church from 1642 to 1633. The colony was composed in part of former residents of this parish. The tablet in the church to Davenport's memory was erected by one of his American descendants.

ST STEPHEN'S Walbrook F C 4.—Rebuilt by Wren (and considered with Bow Church *q v* and St. Brides, *q v* one of his greatest successes) contains the tomb of Sir John Vanbrugh (architect and dramatist), and a painting by Benjamin West.

SAVOY CHAPEL Savoy Street Strand, W C 2 (re built about 1505 on site of 13th century Savoy Palace restored after disastrous fire in 1864).—A Chapel Royal since 1780. Graves of Gavin Douglas and George Withulph and memorials of Dr Oly Carle. Sunday services at 11 15 and 6.

ST WITHIN'S CHURCH, St Within's Lane E C 4 (re built by Wren after the Fire of London, but since modernised).—Contains embedded in its external (S) wall *London Stone* the milliarium from which in Roman times the miles (*millia passuum*) were measured. This stone is mentioned in King Henry VI Pt II.

THE TEMPLE CHURCH south side of Fleet Street, F C 4.—The largest of the five remaining round churches in England the other four being the Churches of the Holy Sepulchre at Cambridge, Northampton Little Maplestead (Essex) and Ludlow. The Norman church, restored 1840 1845 is open to the public on week days 10 30 a m to 4 p m Saturdays excepted. Organ by Father Smith. Church service (famous music) on Sunday afternoons at 3 without orders. Orders for service on Sundays at 11 a m may generally be obtained by writing to the Master of the Temple or Under Treasurer, E C 4. Service is discontinued in Aug and Sept. *Master of the Temple* Rev W H Draper M A.

WREN'S CHURCHES—Many of the Churches in the City of London were destroyed by the Fire of London (Sept 2 6, 1666). Fifty of these were rebuilt by Wren during the rebuilding of St Paul's Cathedral, and many of them contain wood carvings attributed to Grinling Gibbons. The total cost of the fifty churches was £267 786 10s 4½d, the most expensive being St. Mary le Bow, £15 450 6s 8½d (£7 388 8s 7½d for 'Bow Tower') and the cheapest, St Vedast Foster (£1 853 15s 6d).

Church of Scotland

SCOTTISH NATIONAL CHURCH, Crown Court, Russell Street, Covent Garden, W C 2. Sundays 11 15 and 6 30. Minister Rev J Moffet, B A.

ST COLUMBA'S, Pont Street, Belgrave Square, S W 1. Sundays 11 and 6 30.

*The City Churches now standing which survived the Fire of London are—All Hallows Barking by the Tower. St. Andrew Underwall. St. Bartholomew the Great. St. Ebbwburga. Bishopsgate. St. Giles, Cripplegate. St. Helen. Bishopsgate. St. Katherine Cree and St. Olave Hart Street. Of St Sepulchre Holborn, only the south porch and the tower remain; of All Hallows Staining only the tower. St. Andrew Holborn, escaped the Fire but it was in a ruinous condition at the time and was reconstructed by Wren the old tower being refaced with Portland stone in 1704.

Congregational

BRIXTON INDEPENDENT CHURCH, 364 Brixton Road, S.W. 9.—Rev B. Snell M.A. Sundays 11 and 6.45, Thursdays at 8 p.m.

CITY TEMPLE, Holborn Viaduct E.C. 1.—Sunday morning at 11 evening at 7. Thursday, suspended.—Rev F. W. Norwood, D.D.

CHRIST CHURCH, Westminster Bridge Road S.E. 1.—*Pastor*, Rev William C. Poole D.D. (*Pastor Emeritus*, Rev F. B. Meyer D.D.) Opened on July 4, 1876 the centenary of American Independence. The Lincoln Tower and Spire 200 feet high shows the Stars and Stripes wrought into the stone, and the British Lion and the American eagle at the angles of the tower. The cost of the tower and spire £7,000 was largely defrayed by Americans in gratitude for Dr. Newman Hall's sympathy with the Union during the American Civil War. Sunday services, 11 a.m. and 7 p.m.

FELLOWSHIP GUILD SERVICES instituted by Miss Maude Royden and Dr. Percy Dearmer at Kensington Town Hall in March 1920 and removed in June 1922 to Eccleston Guildhouse Eccleston Square S.W. 1. Sundays 3.30 and 6.30.

HARECOURT CONGREGATIONAL CHURCH, St. Paul's Road (Canonbury N. 1).—Founded about 1628 in Hare Court, Aldersgate and removed in 1857 to Canonbury. John Bunyan died at the House of a Deacon of Harecourt and the communion plate is of the Cromwellian period. *Pastor* Rev Hugh Parry. Sundays 11 and 6.30. Wednesdays 7.30 p.m.

THE KING'S WEIGH HOUSE, Duke Street Grosvenor Square, W. 1.—Rev W. E. Orchard D.D. Sundays, 11 a.m. and 7 p.m. Thurs. 7.30 p.m.

PILGRIM FATHERS MEMORIAL CHURCH, New Kent Road S.E. 1.—The oldest Congregational Church in London (A.D. 1616), was enlarged by American subscribers in 1856 as a memorial to the Southwark men who sailed in the *Mayflower*.—Sundays at 11 and 6.45. Tuesdays at 8.

UNION CHAPEL, Islington.—Sundays, 11 a.m. and 7 p.m. Wed., 8 p.m.

WESTMINSTER CONGREGATIONAL CHURCH, Buckingham Gate S.W. 1.—*Pastor*, Rev J. A. Hutton D.D.—Sundays, 11 and 7.

WHITEFIELDS CENTRAL MISSION (London Congregational Union), Tottenham Court Road W. 1.—Founded by the Rev George Whitefield, M.A., in 1756 (Whitefield with the Wesleys brought about the great Evangelical revival of the 18th century. He also established an orphanage in Georgia U.S.A., and died at Newburyport, Mass.). Institutional Church founded by Rev. C. Silvester Horne, M.A., M.P. in 1903. *Superintendent Minister* Rev S. Maurice Watts B.D. *Organizing Sec.* Harry E. Gaze. Sunday services, 11 and 7. Men's Meetings 3.15. Tuesday Service, 8 p.m. Institute and Club for young people open daily.

Baptist

METROPOLITAN TABERNACLE, Newington S.E. 1. (Mr. Spurgeon's, 1826-1896).—(Built 1861, reopened, after destruction by fire in 1895, free of debt, Sept. 1, 1900, cost of rebuilding £44,576.) Sunday 11 and 6.30. Thursday, 7.30. *Pastor*, Rev H. Tydeman Chilvers, *Asst. Pastor*, Rev Wallace Pettman.

WESTBOURN PARK, Rochester Rd. Baywater, W.—*Pastor* Rev S. W. Hughes. Sundays, 11 a.m. and 7 p.m. Wednesdays, 7.30 p.m.

REGENTS PARK CHAPEL, Park Square East, N.W.—*Minister* Rev F. C. Spurr. Sundays 11 and 7.

Wesleyan

WESLEY'S CHAPEL, City Road E.C. 1. The Cathedral of Wesleyan Methodism. Contains many relics of Wesley and Fletcher.—Sunday morning at 11 evening at 6.30. John Wesley's tomb in graveyard behind chapel. In front is Wesley's House and Museum. *Minister*, Rev Walter H. Armstrong. Opposite Wesley's Chapel is *Bunhill Fields Burial Ground* (City Road the burial place of Dr. John Owen (1583), John Bunyan (1688), Daniel Defoe (1731), Dr. Watts (1748), William Blake (1828) and Susannah Wesley (1742) also the tomb (which however cannot now be identified) of Nathaniel Mather the second son of Richard Mather, the founder of the family from which came Increase Mather, of Boston, U.S.A. To the west of the cemetery is the *Friends Burial Ground* with the grave of George Fox founder of the Society of Friends.

CENTRAL HALL, Westminster, S.W. 1.—Open daily, 10 to 6. *Sunday Preacher*, Rev Dinsdale T. Young.

KINGSWAY HALL, Kingsway and Great Queen Street W.C. 2.—Sundays at 11. 3.30, and 7.

Roman Catholic

WESTMINSTER CATHEDRAL, Ashley Place Westminster S.W. 1 (close to Victoria Station), built 1895-1903 from the designs of J. F. Bentley (the campanile is 283 feet high).—*Sundays* Low Masses 6.30, 7, 7.30, 8, 8.30, 9 (with short sermon). Capitular High Mass 9.30. Low Mass with Sermon 12. Solemn Vespers and Benediction 3.15. Compline, Sermon and Benediction 7. *Week-days* Low Masses 7, 7.30, 8, 8.30, 9. Capitular High Mass 10.30. Vespers, Compline and Benediction 3.15. Matins and Lauds 6. Sermon and Benediction 8.15. *Holidays of Obligation* Low Masses 6.30, 7, 7.30, 8, 8.30, 9. Capitular High Mass 10.30. Low Mass 12. Solemn Vespers, Compline and Benediction 3.15. Devotions, Sermon and Benediction 8.15. Church open 6.30 a.m. to 9.30 p.m. Cardinals Wiseman and Manning buried in crypt.

ST. GEORGE'S CATHEDRAL, Lambeth Road E.C. 1.—Built by Puglisi 1840-8 (tower not yet built), near Waterloo Station and Lambeth North tube. *Sundays* Low Masses, 7, 8, 9.30 (children) 12 (with short sermon). High Mass, 10.30. Vespers (Sermon and Benediction), 6.30 p.m. *Week-days* Low Masses 7, 7.30, 8, 8.30. Thursdays and Saturdays, 4.30. Benediction Great Day—St. Philips, 26 May, High Mass, 11, Solemn Vespers, 4.30. Benediction 8.

Dutch Reformed

AUSTIN FRIARS, Old Broad Street, E.C. 4.—14th century church, assigned by Edward VI. to Protestant refugees and ultimately to the Dutch, contains many 14th century and later tombs.

Christian Science

CHRISTIAN SCIENCE—*First Church of Christ Scientist* (Sloane Terrace S W 1) *Second* (Palace Gardens Terrace, W 1), *Third* (7 and 8, Curzon Street, Mayfair, W 1).

Jews

SPANISH AND PORTUGUESE SYNAGOGUE Bevis Marks, E C 3.—Founded during Commonwealth present building erected in 1701. The oldest Jewish synagogue in the country.

GREAT SYNAGOGUE St James's Place Duke Street, Aldgate, E C 3.—Founded in 1692 (present building 1790).

PUBLIC AND PRIVATE BUILDINGS

ADELPHI, Strand, W C 2.—Adelphi Terrace and district commemorate the four architect brothers (*adelphi* = brothers) James, John Robert and William ADAM who laid out the district (formerly Durham House) at the close of the 18th century. James John Robert, and William Streets (the last now is now Durham Street) commemorate the brothers who were the founders of the Adam style of architecture and internal decoration. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens q v) the commemorative streets being Charles Street 1 *silver* Street, Duke Street Of Lane Buckingham Street (Of Lane is now "York Place").

AUSTRALIA HOUSE, Strand, W C 2.—A handsome and imposing building erected 1911-4 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. MELBOURNE HOUSE the office of the Agent General for Victoria adjoins the W end. The Agents-General for NEW SOUTH WALES SOUTH AUSTRALIA and TASMANIA are accommodated in Australia House. QUEENSLAND and WESTERN AUSTRALIA have separate offices in the Strand.

BANK OF ENGLAND Threadneedle Street E C 2.—(Not open to sightseers).—The Bank of England was founded in 1694 and although a joint stock bank has always been closely connected with the Government. The present building was erected from the designs of Sampson (1734) and Sir John Soane (1788). A Bank Guard is furnished every evening by the Battalion of Foot Guards on duty.

BEDLAM (BETHLEM ROYAL HOSPITAL) St George's Circus, Blackfriars Road S E 1.—The oldest institution in the world for treatment of persons of unsound mind (originally founded in Bishopsgate in first half of 13th century) was removed to present site in 1815. Cribbs figures of Madness from the intermediate (17th century) buildings in Moorfields are now in the Guildhall Museum.

BLDGRAVIA—A fashionable district of London west of Buckingham Palace and south of Hyde Park extends from Grosvenor Place on the east to Sloane Street on the west, and includes Belgrave, Chester, Lowndes, and Eaton Squares and Cadogan Place.

BRIDGES.—The bridges over the Thames (from East to West) are the Tower Bridge (opened in 1894), with its bascules affording a fine view of the Pool and of the metropolis. London Bridge (opened after rebuilding in 1831, and until 1750 the only bridge over the Thames in London), with the Monument (q v) and Fishmongers Hall. Southwark Bridge (opened in 1829, and rebuilt by the Corporation of London 1901), St Paul's Bridge (proposed to be built by the Corporation of London), Blackfriars Bridge

(opened in 1869 and widened by the Corporation of London in 1908), Waterloo Bridge (opened in 1817) commanding a fine view of western London, Hungerford Bridge (for pedestrians only). Westminster Bridge (built in 1750 and then presenting a view that inspired Wordsworth's sonnet rebuilt and reopened in 1862) with Thornycroft's *Boudicca* at the north western end. This bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall (q v) and St Thomas's Hospital. Lambeth Bridge (opened in 1862) leading to Lambeth Palace and Bethlem Hospital (now open for foot passengers only). Vauxhall Bridge (rebuilt in 1906) leading to Kennington Oval. Victoria Bridge (1858) and Albert Bridge (1873) Chelsea, leading from Chelsea Hospital to Battersea Park. Battersea Bridge (opened in 1891). Wandsworth Bridge (opened in 1873). Putney Bridge (opened in 1886) where the Oxford and Cambridge Boat Race is started for Mortlake. Hammersmith Bridge (rebuilt 1889). Barnes Bridge (for pedestrians only) and King Edward VII Bridge Kew (rebuilt in 1902) leading to the Royal Botanic Gardens Kew. A new bridge at Richmond is projected by the County Councils of Surrey and Middlesex.

BUCKINGHAM PALACE, St James's Park S W 1.—(Not open to the public).—Was purchased by King George III in 1762 from the Duke of Buckingham and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Refronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

BURLINGTON HOUSE Piccadilly W 1.—Occupied by Royal Academy of Arts (for annual exhibitions see "Picture Galleries"). British Academy. Royal Antiquarian Astronomical, Linnean Chemical and Geological Societies.

CANONBURY POWER, Canonbury, N 1.—A social club for tenants of the Maquess of Northampton's estates in the vicinity (in the remains of the 16th century house of the Priors of St Bartholomew). Contains the "Spencer" and Compton oak panelled rooms. Other relics of Canonbury House can be seen in the vicinity.

CENETERRIES.—For Bunhill Fields see p 573. In Kensal Green Cemetery North Kensington, W 10 (70 acres) are tombs of W M Thackeray, Anthony Trollope Sydney Smith Shirley Brooks Wilkie Collins, Tom Hood, W Mulready, George Cruikshank, John Leech Leach Hunt, Brunel ("Great Eastern") Ross (Arctic) Charles Kemble and Charles Matthews (Actors), Robert Owen (Social Reformer). The Highgate Cemetery, N 6, are the tombs of George Eliot Herbert Spencer, Michael Faraday, and G J Holyoake. In Abney Park Cemetery, Stoke Newington, N 16, are the tomb of General Booth founder of the Salvation Army, and memorials to many Nonconformist Divines. In the South Metropolitan Cemetery, Norwood S E 27, are the tombs of C H Spurgeon, Lord Alverstone, Douglas Jerrold, John Belcher R.A., Theodore Watts-Dunton, Dr Moffat (Missionary), Sir II Beesmer, Sir H Maxim, Sir J Barnby Sir A Manns, and J Whitaker, F.R.S. (Whitaker's Almanack). CREMATORIA.—Ilford (City of London), Norwood, and Golders Green (22 acres), adjoining Hampstead Heath. Since cremation was first instituted in 1885 there have been 25,428 cremations in Great Britain. Of these, 10,394 have been carried out at Golders Green, 4,853 at Woking, 3,476 at Manchester, and the remainder at 12 different centres in Great Britain.

CENOTAPH, Whitehall, S W 1—(Literally "empty tomb") Monument erected to the Glorious Dead, as a memorial to all ranks of the Sea Land and Air Forces who gave their lives in the service of the Empire during the Great War. Erected as a temporary memorial in 1929 and replaced by a permanent structure in 1930. Unveiled by the King Emperor on Armistice Day, 1930.

CENTRAL CRIMINAL COURT, Old Bailey, E C 4—Built by Corporation of London, 1903-1907. Fine mural paintings by Sir W. B. Richmond and Professor Gerald Maile in Great Hall. To be viewed on Tuesdays and Fridays (from 10 to 4) when sittings of the Court so permit. Application to be made to the Keeper.

THE CHARTERHOUSE, in Charterhouse Square, E C 1—A Carthusian monastery purchased in 1531 by Thomas Sutton and devoted by him as a home for aged gentlemen (60). "Brothers of the Charterhouse, for particulars see *Times* p. 11 Feb. 5, 1921. The buildings are partly 14th (but mainly 16th) century. Chapel, great hall and staircase. Mon. Wed. and Fridays admission 12 at 3 p.m. Service on Sundays at 11 a.m. and on week days at 9.30 a.m. and 6.7 or 8 p.m. Buildings not shown on Sundays. Roger Williams the founder and governor of Rhode Island, U.S.A. was on June 25, 1621, elected a scholar of Sutton's Hospital.

CHELSEA S W 3—A western metropolitan borough (see p. 560) with a fine embankment between Victoria and Battersea bridges over the Thames (see p. 578). Chelsea Old Church (All Saints) contains memorials of Sir Thomas More, Sir Hans Sloane, Shadwell (poet laureate), Woodfall (printer of "Junius") and many others. Steele, Smollett, Fumet, Rossetti, Whistler, Leigh Hunt and Carlyle (see p. 582) lived there. The borough was formerly famous for buns and porcelain.

CHELSEA ROYAL HOSPITAL (founded by Charles II in 1662 and built by Wren, opened in 1694). Royal Hospital Road, Chelsea, S W 3, for Old and Disabled Soldiers. Flags and other War Trophies in the Great Hall. Accommodation for 550. In Pensioners. The extensive grounds include the former Ranelagh Gardens. Open on Sunday afternoons. Governor, General Rt. Hon. Sir Neville G. Lytton, C.B., C.V.O., *Lieut. Governor and Secretary* Maj. Gen. H. C. Sutton, C.B., C.M.G.

COLLEGE OF ARMS or HERALDS COLLEGE (see also p. 190) Queen Victoria Street, E C 4—The Royal "Offices of Arms" ("Kings Heralds and Pursuivants of Arms") were incorporated by Richard III, and acquired Derby House on the site of the present College building from Queen Mary I. The building now in use was rebuilt after the Fire of London. The Powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to all State ceremonial, and the granting and use of Armorial Bearings, are exercised by this College. Enquiry may be made to the Officer on duty in the Public Office every day between 10 a.m. and 4 p.m.

COUNTY HALL, Westminster Bridge, E C 1—The Headquarters of the London County Council (see pp. 566-568) built on the Pedlar's Acre, Lambeth, from the designs of Ralph Knott with a river facade of 700 ft. Cost £3,339,293. The building contains a council chamber, reception hall, &c.

CUSTOM HOUSE, Lower Thames Street, E C 3—Built early in 19th century, with a wide quay on Thames. The Long Room is 190 ft. long.

DEVONSHIRE HOUSE, Bishopsgate, E C 2—Built in late 16th century and since 1667 the headquarters of the Society of Friends, where many documents relating to William Penn &c. may be seen.

ELY PLACE, Holborn Circus, E C 1—The site of the London house of the Bishops of Ely. The 14th century chapel, now St. Etheldreda's (R.C.) Church is open daily. A charge of 3d. is made for admission to the crypt.

FIFTH MEMORIAL HOSPITAL (Commercial Road, Poplar, E 14)—"A memorial from the Empire to those splendid men of both sea services who have lost their lives in the service of their country. The hostel contains 240 beds, a restaurant and recreation rooms.

FOUNDLING HOSPITAL, Gullford Street, Russell Square, W C 1—Founded in 1739 by Capt. Coram of the Merchant Marine for exposed and deserted young illegitimate children. Coram also bequeathed funds for the benefit of King's Chapel, Boston, Mass. The chapel services are largely attended by the public. The hall contains many fine pictures by Hogarth, Gainsborough, &c.

FULHAM PALACE, Bishops Avenue, Fulham, S W 6—The courtyard is 15th century, remainder 18th century. Residence of the Bishop of London. Grounds of 37 acres surrounded by ancient moat. Previous application to visit should be made to the Bishop's Secretary.

GUILDHALL, King Street, City, E C 2 (dating from early 15th century)—Grand Civic Hall, where Sovereigns and Princes are entertained. Freedoms conferred and the great City functions take place. Offices and Council Chamber of the Corporation of the City of London (see p. 561). Admission free to library (containing Plan of London in 1570. Deed of Sale with Shakespeare's signature, first second and fourth folios of Shakespeare's plays, William I's Charter to the City &c.), and Newspaper Room 10 a.m. to 6 p.m. Librarian, Bernard Hettle.

GUY'S HOSPITAL, St. Thomas's Street, S E 1—Founded by Thomas Guy (a bookseller) in 1721, the main entrance and quadrangle (with statue of founder) are early 18th century. 650 beds.

HOLBORN VIADUCT, E C 1, was constructed in 1867-1869 by order of the Corporation of the City of London from the designs of William Haywood, to carry the roadway over the valley of the Fleet river (the Holebourne). The Holborn Valley Viaduct is 1,400 ft. long and is mainly of iron construction. The cost (£1,571,000) was borne by the City of London, the loan raised for the purposes of the improvement being secured on the Coal and Corn dues. These dues were abolished in 1889 and 1902 and the loan is otherwise discharged.

HONOURABLE ARTILLERY COMPANY'S HEAD-QUARTERS, City Road, F C 1—The H.A.C. (Sec. Maj. G. G. Walker, D.S.O., M.C.) received its charter of incorporation from Henry VIII. In 1537, and has occupied its present ground since 1642. Four of its members—Duncan Keayne, Sedgwick and Spencer—who emigrated in the seventeenth century founded in 1638 the Ancient and Honourable Artillery Company of Boston, U.S.A. American soldiers and sailors may view the armoury, on request.

HORSE GUARDS, Whitehall, S W 1—Archway and offices built ab. ut 1750. The headquarters of the Commander in Chief until 1904. The mounting of the guard (1st or 2nd Life Guards, or Royal Horse Guards) at 11 a.m.

(10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into Horse Guards Parade. *Horse Guards Parade* where the Colour is "trooped on the King's Birthday," has been enlarged to 300,000 sq. ft. (Trafalgar Square is 168,850 sq. ft., Parliament Square, 136,900 sq. ft., Leicester Square 100,000 sq. ft.).

HOUSE OF PARLIAMENT Westminster, S.W. 1.—The "Palace of Westminster" was rebuilt in 1845-1850 from the designs of Sir Charles Barry and Augustus Pugin, at a cost of £2,108,000.—Open to visitors on Saturdays, and on Easter and Whit Mondays and Tuesdays if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above mentioned days from 10 a.m. to 3.30 p.m. Admission to the Strangers Gallery of the House of Commons, during session by members order or order obtained on personal application at the Admission Order Office in St. Stephen's Hall. The Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains 'Big Ben' (15½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliament is sitting.

INNS OF COURT—The *Inner and Middle Temple*, S. of Fleet Street E.C. 4, and N. of Victoria Embankment to which the gardens extend occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the *Temple Church* (q.v.) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI, Pt. I) places the incident which led to the "Wars of the Roses" (1455-1485). *Lincoln's Inn* from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 12th century. The new Hall is modern, the Library is 15th century and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres) the Square contains many fine old houses with handsome interiors. *Gray's Inn* Gray's Inn Road, W.C. 1 was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1594). The Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other Inns are active but *Staple Inn* is worth visiting as a relic of Elizabethan London, it has a picturesque gabled front on Holborn (opposite Gray's Inn Road) and the Hall, with hammer beam roof, is intact. In rear of the hall is a picturesque Dutch garden restored by the present owners of Staple Inn (the Prudential Assurance Company). *Clement's Inn* (near St. Clement Dane's Church) *Clifford's Inn*, Fleet Street and *Thavies Inn* Holborn Circus (*Serjeants Inn*, Fleet Street and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants at-Law, the last of whom died in 1800.

KENSINGTON PALACE, W. 8.—Enlarged by Christopher Wren for King William III (1691), and continued as a royal residence until 1750. The birthplace of Queen Victoria in 1819. Closed to the public. *Kensington Gardens* (q.v.) adjoin.

LAMBETH PALACE S.E. 1.—The official residence of the Archbishop of Canterbury, on south bank

of Thames, the oldest part is 13th century, the house itself is early 18th century. Nor leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

LAMBETH PALACE LIBRARY—Open to readers on Mondays Wednesdays Thursdays, and Fridays 10 to 4 (May to July, 10 to 4.30) and forenoon of Tuesdays. A large collection of English books, prints, and Diocesan history. Closed at Christmas and Easter, in September, and early part of October.

LAW COURTS Strand W.C. 2.—The Royal Courts of Justice were erected from the designs of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1874-1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition). Until they were occupied by the Supreme Court of Judicature (established in 1873 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas Exchequer, Probate Divorce, and Admiralty) the Courts met in Westminster Hall (q.v.). The Central Hall is 138 ft. long.

LITTLE BRITAIN Smithfield, E.C. 1.—Benjamin Franklin lived in Little Britain on his first coming to London. It was then a centre of the bookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholomew's Church (q.v.).

LIVERY COMPANIES' HALLS—The "Twelve Great Companies" (see p. 564) have magnificent halls but admission to view them has generally to be arranged beforehand.

LONDON HOSPITAL Whitechapel High Street and Road E. 1.—Founded 1752. Hospital contains 230 beds.

LONDON MONUMENT (commonly called 'The Monument') Pudding Lane Eastcheap E.C. 3.—Built from designs of Wren 1671-1677, to commemorate the *Great Fire of London*, which broke out in Pudding Lane Sept. 2, 1666. The fluted Doric column is 202 feet high (the flames of fire 42 feet in addition) and is based on a square plinth, with fine carvings on W face. Splendid views of London from gallery at top of column. Admission 3d. 9 to 6 (Oct. April to 4).

LORDS CRICKET GROUND, St. John's Wood Road, N.W. 8. The headquarters (since 1814) of the Marylebone Cricket Club the premier cricket club in England and the governing body of cricket. Oxford and Cambridge, and Eton and Harrow matches in July. Lord's is also the Middlesex County Cricket Club headquarters, and the scene of some of the principal matches of the season. Admission to ordinary matches 1s. to special matches 2s. or 3s. (including tax). Tennis Court in building behind members pavilion, where interesting games are played. The public can obtain reserved seats on payment.

MANSON HOUSE, City E.C. 4.—The official residence of the Lord Mayor the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield. *Lendnall Market* (Meat and Poultry), Billingsgate (Fish), Thames Street *Spitalfields*, E. 1 (Vegetables, Fruit, &c.). *Castle Market* (Meat and Th., and Fri. for Horses) and *Abbe*

TOURS, Caledonian Road, N 1. **Foreign Cattle Market**, Deptford (temporarily closed). Other markets are—**Covent Garden**, W C 1 (established under a charter of Charles II in 1661) and **Borough Market**, S E 1, for Vegetables, Fruit, Flowers, &c.

MARLBOROUGH HOUSE, Pall Mall S W 1 (Not open to the public)—Built by Wren for the great Duke of Marlborough about 1710, and purchased as a London residence for the Prince of Wales in 1863. Now the London house of Queen Alexandra.

MAYFAIR—A fashionable district of London, north of Buckingham Palace and east of Hyde Park, extends from Oxford Street (N) to Piccadilly (S), and from Bond Street (E) to Park Lane (W), includes Curzon Street and Grosvenor and Berkeley Squares. The most fashionable shopping centres of London are included in Mayfair in Old and New Bond Street and Oxford Street. **Regent Street** almost adjoins Mayfair.

MONUMENTS—**VICTORIA MEMORIAL** in front of Buckingham Palace. **ALBERT MEMORIAL** South Kensington. **AIR**, Victoria Embankment. **BPA CONSFIELD**, Parliament Square. **REIGNAN** Victoria Embankment. **ROADICKA** (more correctly "Boudicca") Queen of the Iceni, E Anglia Westminster Bridge. **BURNS**, Embankment Gardens. **BURGHERS OF CALAIS** (replica of Rodin's statue), Victoria Tower Gardens Westminster. **CAVELL**, St Martin's Place. **CRNOTAPH** Whitehall. **CHARLES I** (elected Jan 29 1675) Trafalgar Square. **CHARLES II** (Grinling Gibbons), inside the Royal Exchange. **CLEOPATRA'S NEEDLE** (68½ ft high, erected 1878), Thames Embankment (the Sphinx, W of pedestal and the surrounding stonework, bear scars from an Air Raid). **CALTAIN LOOK** (Brook), the Mall. **CRIMEAN BROAD SANCTUARY** OLIVER CROMWELL (Thornicroft) outside Westminster Hall. **DUKE OF CAMBRIDGE** Whitehall. **DUKE OF YORK** (124 ft), St James's Park. **EDWARD VII** Waterloo Place (Mackenay). **GEORGE III** Cockspur Street. **GEORGE IV** (Chantrey) riding without stirrups Trafalgar Square. **GLADSTONE**, facing Australia House Strand. **GUARDS**, Waterloo Place. **IRVING** (Brook), N side of National Portrait Gallery. **JAMES II** (Grinling Gibbons) The Mall. **ABRAHAM LINCOLN** (St Gaudens) facing Westminster Abbey. **LONDON LIPODS** Royal Exchange. **MILTON**, St Giles's Cripplegate. **MONUMENT THH** (see above), N 1 (144 ft).

ROYAL MINT, Lower Hill, E.C. 1 (building erected 1820), where gold, silver and bronze are coined. Admission by order only, application for which should be made to the Deputy Master of the Mint about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri., 10 to 12 Sat.

ST. BARTHOLOMEW'S HOSPITAL, Smithfield, E.C. 1.—Founded A.D. 1123 by Rahere (see St. Bartholomew's Priory p. 572). Present buildings mainly 18th and 19th centuries, main entrance 1702. The Great Hall contains a series of portraits including Henry VIII, Harvey, Abernethy, Port, Radcliffe &c. Hospital for 750 beds. The Church of St. Bartholomew the Less (rebuilt 1823) is within the hospital precincts. Inigo Jones was baptised in former church.

ST. GEORGE'S HOSPITAL, Hyde Park Corner, W. 1.—Founded in 1733. Hospital for 340 beds. Present buildings date from 1829.

ST. JAMES'S PALACE in Pall Mall, S.W. 1.—(Not open to the public). Built by Henry VIII according to tradition from designs by Holbein, the Gatehouse and Present Chamber remain, and part of the Chapel. Royal A. royal residence from 1568 to 1837. Royal Leves held here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James's," and (by the King's permission) the Conference of the Allies was held there in February, 1922.

ST. JOHN'S GATE, Clerkenwell, F.C. 1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate (early 16th century) and Church (crypt 12th century) alone survive. The gatehouse may be inspected by written permission of the Secretary of the Chancery.

ST. THOMAS'S HOSPITAL, Albert Embankment, S.E. 1.—Founded 1223. Present buildings (7 red brick houses) by Curry, 1866-71, 1,000 beds.

SMITHFIELD, E.C. 1.—Sir William Wallace was executed there (1305) in the reign of Edward 1., and Wat Tyler was "despatched

by Lord Mayor * Walworth (1381) in the reign of Richard II. Anne Askew, a Protestant martyr (1546), was burned there in the reign of Henry VIII. and under Mary I. (1553-1558) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggett, Unitarian (1621) in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, 1666. Smithfield Market occupies the W. side of West Smithfield.

SOMERSET HOUSE, Strand, W.C. 2, and Victoria Embankment, W.C. 2.—The beautiful river facade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers. The remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the *Board of Inland Revenue* and by the *Principal Probate Registry* and the office of the Registrar General of *Births, Marriages and Deaths*. In the Probate Registry (Central Hall) are the wills (*inter alia*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C. 2 (strangers not admitted).—Known in the City as the "House," was founded in 1773 and now consists of about 3,500 members. A jobber does business only with other members. A broker is the intermediary with the public. Speculators for a rise in prices are "bulls," those for a fall are "bears." *Chairman of the Committee for General Purposes*, Archibald H. Campbell. *Secretary General*, Purposes Committee, Edward Satherthwaite, C.B. *Secretary, Trustees and Managers*, E. M. Brydson, Office 23, Ingham Court, St. E.C. 2.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Braselton for the Metropolitan Board of Works, 1862-1870 (the seats of which the supports of some are kneeling camel laden with spicery, and of others a winged sphinx were presented by the Grocers Company, and by Rt. Hon. W. H. Smith, M.P. in 1874). The Westminster to Vauxhall section on the S. (Surrey) side, 1866-1879, the Chelsea Embankment 1871-1874. The total cost exceeded £2,000,000. Sir Joseph William Basalgette (1810-1891) also constructed the London main drainage system, 1828-1865, at a cost of £4,600,000. A medallion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames water-side improvements ("Fluminis vincula ponit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

THAMES TUNNELS.—The *Rotherhithe Tunnel* (foot passengers and vehicles) constructed by the L.C.C. and opened in 1908 connects Commercial Road East, with Lower Road, Rotherhithe. The total length is 1 mile 440 yards, of which 520 yards are under the river. The cost of the tunnel and its approaches was £1,550,541. The *Blackwall Tunnel* (foot passengers and

* The sword of St. Paul appears in the 1st quarter of the City Arms not Walworth's dagger as once commonly believed.

vehicles) was constructed by the L.C.C. and opened in 1897, connects East India Dock Road Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly $\frac{1}{4}$ miles of which 407 yds. are under the river. The cost of the tunnel with its approaches was about £1,406,000. *Greenwich Tunnel* (foot passengers only) constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs Poplar with Greenwich. The length of the subway is 405 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station E 16, to High Street, Woolwich, S.E. 18. The length of the subway is about 500 yards, and its cost was £85,862. The *Thames Tunnel* (1300 feet) was opened in 1843 to connect Wapping (N) with Rotherhithe (S). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Lower Subway* for foot passengers was opened in 1870 and has long been closed.

TOWER HILL E.C. 1 and E.C. 3 was formerly the place of execution for condemned prisoners from the lower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LONDON E.C. 3 (built by William the Conqueror A.D. 1066-1087).—Admission to Jewel House on all week days 6d. White Tower and Armouries, including Vaults, 6d. to Bloody Tower, on all week days 6d. Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from 10 a.m. to 6 p.m. 1 Oct. to 30 April, 10 a.m. to 5 p.m. Not open on Good Friday, Christmas Day or Sunday. *Constable*, Field Marshal Lord Methuen G.C.B., G.C.M.G. G.C.V.O. Lieutenant Gen. Sir F. Davies, K.C.B., K.C.M.G., K.C.V.O., A.D.C. *Major and Resident Governor* Lt. Col. Dan Burges, F.R.C.S. *Keeper of the Jewel House* Major Gen. Sir George J. Younghusband, K.C.M.G., K.C.I.E., C.B. *Curator of the Armouries* Charles Foulkes, F.S.A. The Yeoman Warders (Beefeaters) retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II and King James I of Scotland, the 'Little Princes' (Edward V. and his brother) Anne Boleyn, Katherine Howard, Lady Jane Grey, Queen Elizabeth, Sir Walter Raleigh, William Penn (father), Ridley and Latimer and many others were imprisoned in the Tower.

TRAFALGAR SQUARE S.W. 1.—This space was laid out in the second quarter of the 19th century. In the Square are the *Nelson Monument* 142 feet high with Landseer's Lions round the base, and statues of *Havelock*, *Napier* and *Gordon*. The plinth of the Nelson Monument was badly damaged by fire during the (unofficial) celebrations on Armistice Day (Nov. 11, 1918). In the façade of the N. Wall of Trafalgar Square are metal standard measures.

WESTMINSTER HALL S.W. 1 (built by William Rufus, A.D. 1067-1100 and altered by Richard II, 1377-1399), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 16, 1834). The Hall is 200 feet long, 68 feet wide, and 90 feet high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I

was tried in the Hall. For admission, see regulations as to Houses of Parliament.

WHITEHALL, opposite Horse Guards S.W. 1.—Erected by Inigo Jones as a banqueting house for the projected Whitehall Palace. King Charles I was beheaded here.

PARKS, SPACES AND GARDENS

LONDON THEATRES IN 1922-23—The most notable theatrical events of the year were the production at His Majesty's of James Elroy Flecker's *Hasan* (with incidental music by Delius) of John Drinkwater's two plays *Oliver Cromwell* and *Robert F. Lee*, and of Czechoslovakian Robot plays at St Martin's and The Regent. Birmingham enjoyed the distinction of a G B S play, *Back to Methuselah*, which endured for the greater part of a week from the opening in the Garden of Eden to the dim and distant future. The 1430th performance of *Gay's Beggar's Opera* was given at Hammersmith on November 17, 1923.

Record Runs—The 'record run' at a London theatre, in pre-war days was held by *Charley's Aunt* (1,466 consecutive performances). The present record is 2,238 consecutive performances of *Chu Chin Chow*, which was produced at His Majesty's on Aug. 31, 1916, reached its 1,000th performance on Oct. 17th, 1921, and was withdrawn after its 2,238th performance (having brought in over £700,000) on July 22, 1922. Other long runs are *Our Boys* (1,366), *The Maid of the Mountains* (1,352), *A Little Bit of Fluff* (1,241), *A Chinese Honeymoon* (1,075), *Romance* (1,046).

London's First Theatre—A tablet has been affixed by the Records Committee of the London County Council on 88 Curtain Road, Shoreditch to commemorate the site of 'The Theatre Shoreditch, the first theatre in London. In 1592 there were 45 theatres in London, with seating accommodation for 53,341 persons, 38 music halls and variety theatres, with accommodation for 56,401 persons, and 790 other places licensed for public entertainments.

CINEMATOGRAH THEATRES—It has been stated that there are upwards of 4,000 Picture Palaces and Cinematograph Theatres in Great Britain and Ireland. The latest tendency is for first rate authors and artists to co-operate for the production of high class work, and the general level of the productions shows an upward movement.

The United States is the pioneer country for film production. One consequence is the growth in population of Los Angeles from 319,198 in 1910 to 576,063 in 1920. During 1921 although the trade declined considerably, the United States exported about 40,000,000 feet of unexposed film and about 130,000,000 feet of filmed pictures, the estimated value being approximately £3,000,000 (Canada is the largest purchaser of United States film productions importing some 8,000,000 feet of film. Great Britain's imports greatly exceed exports. From all sources, of films blank and exposed, 90,000,000 feet were imported in 1921. Re-exports amounted to 17,000,000 feet, and exports of British films to 13,000,000 feet. According to the 1922 report of his Majesty's Senior Trade Commissioner for South Africa, American films are sold in that country at an average price of 5½d per foot, whilst the British price is 3d per foot. In the United States the revenue from the Cinema industry is estimated at £120,000,000, or four times the total given for Great Britain. The number of theatres is estimated at between 14,000 and 18,000 in the United States alone. During December, 1922, every one showed films selected, for propaganda purposes, by the American Legion's Americanisation Commission.

THE NOBEL PRIZES, 1905-1923

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees for distribution to those who have contributed most largely to the common good and is divided into five shares, which are devoted to workers in the domains of (a) Physics, (b) Chemistry, (c) Medicine or Physiology, (d) Literature, and (e) the Preservation of Peace. The testator was the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. The first awards were distributed on the fifth anniversary of Nobel's death, Dec 10, 1901. The awarding

authorities are the Swedish Academy of Science—(a) Physics, (b) Chemistry, the Stockholm Faculty of Medicine—(c) Medicine or Physiology, the Swedish Academy of Literature—(d) Literature, and a committee of five persons elected by the Norwegian Storting—(e) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions &c can be obtained from Nobelstiftelsen Styrelse, Norrlandsgatan 6, Stockholm Sweden.

LIST OF AWARDS (Value about £6,500 each).

Year	(a) PHYSICS	(b) CHEMISTRY	(c) MEDICINE & PHYSIOLOGY	(d) LITERATURE	(e) PEACE
1905	P. Lenard	A. von Baeyer	R. Koch	H. Sienkiewicz	Bertha von Suttner
1906	J. J. Thomson	H. Moissan	{ Ramon y Cajal C. Golgi }	G. Carducci	T. Roosevelt
1907	A. A. Michelson	L. Buchner	A. Laveran	R. Kipling	E. F. Moneta
1908	G. Lippman	E. Rutherford	{ P. Ehrlich E. Metchnikoff }	R. Eucken	I. Renaut

1911	W. Wien	Marie Curie	A. Gullstrand	M. Maeterlinck	Bu de Constant
1912	G. Dalén	{ V. Grignard P. Sabatier }	A. Carrel	G. Hauptmann	M. Beernaert
1913	{ H. Kamerlingh Onnes }	A. Werner	C. Richet	{ Rabindranath Tagore }	Berne Intl Peace
1914	M. von Laue	Th. W. Richards	R. Barany	No award	Bureau
1915	{ W. H. Bragg W. L. Bragg }	R. Willstätter	No award	Romain Rolland	{ I. M. C. Asser A. H. Fried }
1916	No award	No award	No award	{ V. von Heiden stam }	Elihu Root
1917	Ch. G. Barkla	No award	No award	{ K. Gjellerup (H. Pontoppidan) }	Comité Interna- tional de la Croix Rouge
1918	M. Planck	F. Haber	No award	No award	No award
1919	J. Stark	No award	J. Bordet	C. Spitteler	Woodrow Wilson
1920	Ch. E. Guillaume	W. Nernst	A. Krich	Knut Hamsun	Léon Bourgeois
1921	Albert Einstein	F. Soddy	No award	Anatole France	K. H. Branting
1922	Niels Bohr	E. W. Aston	{ A. V. Hill O. Meyerhof }	I. Benavente	{ Chr. L. Lange F. Nansen }
1923	*	*	{ F. G. Banting J. J. R. Macleod }	W. B. Yeats	*

* The decisions regarding the Nobel Prizes 1923 for Physics, Chemistry, and Peace will be taken later in 1923.

THE WORLD'S LITERATURE

BOOKS.—It is estimated that over 155,000 books, pamphlets and magazines are published annually in the various countries of the world, and that over 14,000,000 separate works have been published since printing was invented in the fifteenth century. The three largest libraries in the world are the *Bibliothèque Nationale* Paris, which contains over 5,000,000 volumes, the *British Museum Library*, London, where there are 40 miles of shelves, and an estimated total of about 5,000,000 volumes, and the *Library of Congress* Washington, D.C., which contains 2,000,000 volumes. A copy of every book published in Great Britain must be sent to the British Museum, London, the Bodleian, Oxford, the University Library, Cambridge, the Advocates Library, Edinburgh, the National Library of Wales, and

the Library of Trinity College, Dublin. The Copyright Act which gives Dublin this privilege still remains in force and there is a reciprocal provision in the Free State Act by which Free State publishers supply the British copyright libraries with copies of the works they publish. In practice it is only the British Museum that receives a copy of every book published; the others, owing to restricted accommodation, limit the privilege to which they are entitled to every work they require. The "best selling" book in 1922 was *If Winter Comes* (A. S. M. Hutchinson), published in England by Hodder & Stoughton and in America by Little, Brown & Co., upwards of 175,000 copies of this novel were sold in the British Isles between the date of publication (Aug., 1922) and October, 1922.

In the Metropolitan Police Area *Motor Cabs* are fitted with a taximeter, which records the fare by a combination of time and distance. In addition to the legal fare and charges for luggage and extra persons, the Secretary of State has authorised an additional charge of 6d for every hiring of a *Horse Cab*. Notice in relation to the increased charge must be conspicuously displayed inside *Horse Cabs*.

MOTOR CABS

FARE payable for the hiring of a *Motor Cab* fitted with a *Taximeter*

- (a) Not exceeding one mile, or for a period of time not exceeding ten minutes 1 0
 - (b) Exceeding one mile or ten minutes —
 - (1) For each quarter of a mile, or for a period of time not exceeding two and a half minutes 0 3
 - (a) For any less period or distance 0 3
- In addition to the above the driver is entitled to charge the following extra payments —
- (1) Luggage — Whether hired by distance or by time—for each bicycle, child's mail cart or perambulator, 6d for each package carried outside 0 3
 - (a) Extra persons — When licensed to carry more than two persons—for each additional person beyond two the whole journey 0 9
- Provided that one child or two children under the age of ten years shall count as one person

HORSE VEHICLES

Exclusive of the extra 6d noted in the heading in paragraph

FARES BY DISTANCE (Cabs either with or without a Distance Recorder but without a Taximeter) If hired and discharged within the Four Mile Radius for any distance not exceeding two miles 1 0

The driver may notify by means to be approved by the Commissioner of Police that he is willing to accept a fare of 6d for any journey not exceeding a mile 1 0

For every additional mile or part of a mile If hired outside the Four Mile Circle wherever discharged for the first and each succeeding mile or part of a mile 1 0

If hired within but discharged outside the Four Mile Circle whole distance not exceeding one mile, 1s exceeding one mile, then for each mile ended within the circle 6d and for each mile or part of a mile ended outside 1 0

FARES BY TIME Inside the Four Mile Circle Four wheeled cabs, for one hour or less, 2s two wheeled Cabs 1 6

If above one hour, for every quarter hour of the whole time and for any less period four wheeled Cab, 6d If two wheeled Cab 0 8

If hired outside the Circle wherever discharged, for one hour or less whether a four wheel or a hansom 1 6

If above one hour then for every quarter hour of the whole time and for any less period 0 8

If hired within but discharged outside the Four Mile Circle, the same

EXTRA PAYMENTS — *Hirers of Cabs should particularly notice these regulations as disputes generally arise from their not being clearly understood*

Whether hired by DISTANCE or BY TIME, or whether within or without the radius

LUGGAGE — For each bicycle child's mail cart, or perambulator 6d for each package carried outside the carriage 0 2

NOTE. — Luggage carried on the footboard of a hansom pattern cab so that the doors do not close over it is deemed to be outside within the meaning of this clause

EXTRA PERSONS — For each above two (one child or two children under 10 years of age count as one person) 0 6

WAITING — When hired by distance and at the request of the hirer made to wait for every 15 minutes completed — If hired within the Four Mile Circle 4 wheels, 6d, 5 wheels 0 8

If hired without Circle 3 or 4 wheels 0 8

GENERAL REGULATIONS

GENERAL REGULATIONS — The fares by *Taxi meter Motor Cabs* are based upon a combination of time and distance. When the cab is kept waiting delayed by traffic, or caused to travel at the rate of less than six miles an hour then the charge is by time. When travelling at a speed of six or more miles an hour then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer expressed at the commencement of the hiring. If not otherwise expressed the fare to be paid according to distance but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER If hired by distance is not compelled to drive more than six miles nor more than one hour if hired by time. Further if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour. If required to drive more than four miles within the hour he may demand in addition to the fare regulated by time for every mile or any part exceeding four miles the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s

The driver of every cab shall have with him and when required produce the Authorized Book of Distances and every driver of any cab shall if so required, deliver to the hirer a printed ticket showing cab number, name and address of Proprietor &c

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s, if driver, having received such deposit refuse to wait or go away before the expiration of the time for which the deposit shall be a sufficient compensation or if the driver shall refuse to account for such deposit

The London Cab Act 1866 enacts that if any person hires a cab knowing or having reason to believe he cannot pay the fare, or fraudulently endeavours to avoid payment of a fare or, having failed or refused to pay a fare, refuses or gives a false address is liable in addition to the fare, to a penalty of 40s

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty four hours, if not sooner claimed by the owner such property to be returned to the

person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £50.

All inquiries &c relating to public carriages should be addressed to the Public Carriage Office New Scotland Yard but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office New Scotland Yard Office hours 10 to 4.

LAMPS TO BE LIGHTED

The following regulations apply to lighting and carrying of lamps on vehicles—

Motor Cars.—A white light placed on the extreme off side and visible within a reasonable distance toward which the car is proceeding or intended to proceed. This lamp should show a red light to the rear unless a red light is fixed on the rear of the vehicle. To be lighted one hour after sunset and kept till one hour before sunrise.

A lamp for the illumination of the rear number plate to be lighted *half an hour* after sunset to *half an hour* before sunrise.

Motor Cycles.—A white light to the front but if it has a side car attached a red light to the rear must also be shown during the period between *one hour* after sunset and *one hour* before sunrise.

The lamps need not be placed on the extreme off side unless the side car is attached or projects beyond the off side of the motor bicycle.

The front or rear plate must be illuminated *half an hour* after sunset to *half an hour* before sunrise.

Horse Drawn.—If only one lamp is carried it must be on the extreme off side to show a white light to the front visible for a reasonable distance during the period between *one hour* after sunset and *one hour* before sunrise. If a light is shown to the rear it must be red.

A B.—In certain localities a red light or red reflex light is requisite.

If a load projects more than 6 ft. to the rear a red light must be shown to the rear.

Traction Engines must show two efficient lights to the front and a red light at the rear between the hours of one hour after sunset and one hour before sunrise from April 1 to Sept 30, and between sunset and sunrise the remaining six months.

The lamps must be provided with shutters to enable them to be temporarily screened.

HARVESTING.—County Councils have power to make orders exempting vehicles used for the purpose of harvesting from carrying lights.

STAGE CARRIAGES licensed in the Metropolitan Police District must carry a lamp inside, properly lighted between sunset and sunrise when plying for hire.

HACKNEY CARRIAGE STATISTICS

During 1922 there were licensed public carriages—Hansom 15 chaises—animal 375, mechanical 7,921 omnibuses—animal 8 mechanical 4,103 tramway cars—mechanical 2,795 total 14,487 Drivers and conductors—Cab drivers—animal 550, mechanical 9,283 stage drivers—animal 4, mechanical 11,011 composite licences (stage driver and conductor)—animal 16 mechanical 2,310 conductors 12,019 total, 35,193.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive and hackney carriage drivers in addition have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets and public buildings in London. During 1922 of 835 men examined 322 were successful. The proportion of drivers to hackney carriages is approximately 13 drivers to 10 carriages.

LOST PROPERTY

Of lost property 102,225 articles were deposited of which 40,556 were claimed by the owners. The number of awards paid to drivers, &c. was 37,670.

STREET ACCIDENTS, GREAT BRITAIN, 1922

In addition to the accidents on the various railways of Great Britain there were no fewer than 70,197 accidents caused by vehicles on streets and roads in 1922. Of this number 2,768 were fatal and 67,429 non fatal compared with 2,678 fatal and 59,943 non fatal accidents in 1921.

Cause	Fatal	Non fatal
Electric tramcars	111	5,251
Horse-drawn vehicles	265	6,635
Motor omnibuses	196	2,381
Other motor vehicles	2,026	39,677
Pedal cycles	170	13,485

Totals 2,768 67,429

Division	Fatal	Non fatal
England	2,330	60,626
London	684	26,322
Birmingham	49	1,455

Glasgow	45	1,099
Edinburgh	39	1,085
Ireland (1921)	167	1,219
Dublin	40	676

METROPOLITAN PASSENGER TRAFFIC

Conveyance	1920	1921
Tramways	1,062,986,520	1,009,043,113
Omnibuses	925,046,002	931,751,042
Tube Railways	265,587,941	216,996,197
Other Local Railways (Met. District &c.)	424,000,000	371,000,000
Suburban Lines	368,000,000	324,000,000

LONDON FLAG DAYS

Since the time when accounts were first insisted upon upwards of £5,530,000 has been collected for various charitable objects at an administrative expense of, approximately 12½ per cent. Of the total amount available for charities a large proportion has gone to hospitals, which in 1922 benefited to the extent of £1,097,787 as against £53,550 in 1921. Of a total of £1,096,613 raised in 1922, £179,933 was collected, and donations amounted to £16,680. Expenses absorbed £25,502 leaving a balance for distribution of £171,111 or approximately 87 per cent.

TITHE RENT CHARGE.

THE Tithe Rent (charge is normally based on the septennial average price of wheat, barley, and oats, the basic price per imperial quarter being taken at 68s 6d for wheat 31s 8d for barley and 22s for oats but has been fixed until Jan 1 1926, by the Tithe Act (1918) at £129 3s 2d.

On Jan 1 1922, there were 20 663 Registered Clubs in England and Wales an increase of 460 since Jan 1 1921. In Wales (incl Monmouthshire) the number on Jan 1 1922 was 433 which are included in the former total.

THE CHILTERN HUNDREDS

RESIGNATION OF MEMBERS OF PARLIAMENT — No duly elected member of the Commons can resign his seat, he must apply for some office of profit under the Crown and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c 7) and the usual practice is to apply for the Stewardship of the Chiltern Hundreds or of the Manor of Poyning or Northstead or the Exchequer of Munster whereupon the seat is declared vacant (under the Place Act of 1745, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

PRIME MINISTER'S RESIDENCE

DOWNING STREET Whitehall S W 1 — Named after a politician of Charles II's reign. No 22 is the official town residence of the Prime Minister. No 11 of the Chancellor of the Exchequer and No 12 is the office of the Government Whips. 11 Lequer, a country residence for Prime Ministers (from Jan 1, 1922), was accepted by Mr Lloyd George in 1917 (with an endowment to maintain the estate, &c) from Lord and Lady Lee of Fareham. In 1922 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a Tudor mansion in the Chilterns, about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

NOTE.—WHITAKER'S ALMANACK was first published in 1868 (for the year 1869), and since 1887 there have been two editions. For 1923 the Popular Edition (in paper cover with Zodiac design) consists of 600 pages, and is sold for 3s net, the Half-Bound Edition (in red and green cloth cover), consists of 900 pages, and is sold for 6s 0d net.

The Indian Empire.

601

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India, while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52-3 Vict., c 63, s 18). There are tracts of tribal territory on the N W and N E frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povallo Schweikovsky on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N latitude, and from 61° to 101° E longitude. Delhi, the new capital, lies in 77° E long.

Area and Population—The total area of India proper is about 1,803,000 square miles, with a population of nearly 319 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent of the area, and nearly 78 per cent of the population. The details are as follows—

PROVINCE, STATE, OR AGENCY	Area in square mile (1901)	PERSONS				Difference per cent 1901 & 1901.
		1901			Total	
		Males	Females	Total		
Ajmer Merwara	2,711	269,566	283,705	495,271	501,395	- 1.2

* Districts and Administered Territories.

Physical Features—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N W to S E, with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range, and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Nain Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S F is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W and S W for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S E and E of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S, then to the W, and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal, it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea, while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N W of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan—Just as the Himalayas on the N and the Hindu Kush and Sulaiman Mountains on the N W form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghats all but complete this environing triangle of mountain ranges. In the extreme N W, south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapi flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapi, all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N E (530 m.), the Godavary (900 m.), the Krishna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S W coast, shut in by mountains,

is very primitive and moves slowly, the S E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat, further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S W monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan but is small in Sind and Rajputana. Madras benefits by the N E monsoon in the autumn.

Population—The fifth general census of India was taken on the 18th March, 1921. The final census returns gave a population of 318,942,480, as compared with 315,156,396 in 1911 (for details see p 601), an increase in the ten years of about 1.2 per cent. The census total of 1921 is divisible into 247,003,293 (or over 77 per cent) for British India, and 71,939,187 (or over 22 per cent) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1921 33 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent of the total population.

Caste—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet.

Religions—The population by religions in 1921 includes 216,734,586 Hindus (68 per cent of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3.6 per cent.), nearly all in Burma, leaving nearly 7 per cent for all other religions, including 4,754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3,238,803 Sikhs, 1,778,596 Jains (a decline), 101,778 Parsis, and 9,774,611 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations—Over 72 per cent of the population was in 1921 dependent on pasture and agriculture. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services support over 4,825,000 persons.

Sex—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945.

Languages—India has 220 vernacular languages, of extraordinary variety. The languages spoken by 312,912,624 persons in 1911 are grouped in four families, and 23 languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 82,003,235 persons), Bengali (48,367,915), Telugu (23,542,861), Marathi (19,806,636), Tamil (18,128,365), Punjabi (15,876,758), Rajasthani (14,067,590), Western Hindi (14,037,882), after which come Gujarati, Kanarese, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

A Brief Sketch of Indian History

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C. they are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*, their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes, while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshatriyas is repre-

sented as fully established. The system of caste, originating in the attitude of the Aryans (kshatriyas) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kshatriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Triptaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 250 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling, and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. According to Herodotus the twentieth satrapy

The latest principal publications relating to India presented to Parliament are—Statistical Abstract, 1900-11 to 1909-10 (Cmd. 776), Moral and Material Progress Report, 1908 (Cmd. 1908), Indian Budget for 1909-10; Home Accounts, 1908-09, Explanatory Memorandum regarding the Accounts and Estimates of 1909-10, Estimate of Revenue and Expenditure, 1908-09, Racial Distinctions Report of Committee (Cmd. 1,822), Indian Retrenchment "Inchape" Committee's Report, Indian Finance Act, 1903, Correspondence regarding (H.C. 74 of 1903). They can be purchased through any Bookseller, or direct from H.M. Stationery Office, Imperial House, Kingsway, W.C.2.

One inch Ordnance Survey Maps are published by the Survey of India, and can be obtained from the India Office Sale Agents, Messrs. E. Stanford, Ltd., 22 to 24 Long Acre, London, W.C.2 (1s to 1s. 6d. each).

of Persia at one time included part of the north-west of India. Alexander (356 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272-232 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 600 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves between about 165 B.C. and 300 A.D. over Northern India. Their invasions left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606-646), after many years of fighting, made himself master of Northern India, and ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions, but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 300 years, but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutub-ud-din, whose memory is perpetuated by the Kutub Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1394.

THE MOGUL EMPIRE.—The Muhammadan Moguls, or Moguls, after overthrowing Central and Western Asia, arrived in 1519, under Ganghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghiak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed, frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 Babur, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, Humayun (1530-56), lost the whole of the territory conquered by Babur, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Suri, who reigned from 1540-1545. After the Great Humayun's son (1556-1605), spent a

long reign in firmly establishing the empire, at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdom of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister, Abul Fazi the historian of his reign and Faiz, the poet. Jahangir (1605-27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under Shah Jahan (1627-1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. Aurangzeb (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and Bahadur Shah (1707-12) secured the crown. After four short-lived emperors Muhammad Shah (1719-48), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Marhattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam ul Mulk (ancestor of the present Nizam). In 1739, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, Ahmad Shah (1748-1754) and Alamgir II (1754-1759) occupied the throne, and were succeeded by Shah Alam (1759-1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was Shivaji (1660-1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. Balaji Vishwanath (1713-1720) Peshwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family. Shivaji's descendants thenceforth holding a merely nominal position. Under the Peshwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gajani, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally

overthrown in 1858 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780-1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the Portuguese enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505-1509), established numerous factories and fortresses, while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1545 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to other parts of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the Dutch were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1662 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. French and Dutch East India Companies were established in 1664 and 1668 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in 1612. In 1613 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George. In 1633 this settlement of Madras became a Presidency. In Charles I's reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay. In 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1667 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702, and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1756) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Cootes at Wandiwash in 1760, and in the capture of Pondicherry in 1762, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant, and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1757. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at *Buxar* (1764). In 1765 *Clive* (now Lord *Clive*) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing to *Clive's* efforts, the Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule *Warren Hastings* (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue system and judicial procedure. *Hastings* was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council. Mysore in 1760 had been seized by *Hyder Ali*, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling *Hyder Ali's* memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the *Mahrattas*, and *Hyder Ali*, *Hastings* probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of *Lord Cornwallis* (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore War, in which he defeated *Tippoo*, the son and successor of *Hyder Ali*. The rule of *Sir John Shore* (1793-98) was uneventful.

The administration of the *Marquess Wellesley* (1798-1805) was distinguished by many important events. *Tippoo*, as hostile to the English as *Hyder*, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of *Scindia*. *Wellesley* was established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. *Lord Wellesley* saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of *Seringapatam* (1799), the death of *Tippoo*, and the conquest and restoration of Mysore to a representative of the family of *Hindu Rajas* whom *Hyder Ali* had dethroned. The Treaty of *Bassem* (1800) broke up the *Mahratta* confederacy, but led to the Second and Third *Mahratta* Wars, which curtailed the power of *Scindia* and *Holkar*, and increased the strength and extent of the Company's dominions. Lastly, *Lord Wellesley* developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. *Wellesley* doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of *Lord Cornwallis* (1804), and that of *Sir G. Barlow* (1805-7), *Wellesley's* policy of subsidiary alliances was reversed.

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1823 the monopoly of Indian trade was abolished.

Under the *Marquess of Hastings* (1823-31) a severe struggle with Nepal ended with the Treaty of *Sagouli* (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the *Mahratta Peshwa* enlarged Bombay Presidency to its present dimensions. *Lord Hastings* in the same year crushed the marauding *Pindaris* of Central India, who had devastated the country in all directions. Reviving *Lord Wellesley's* policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of *Rajputana* and Central India. He encouraged education. *Lord Amherst* (1823-5) succeeded *Lord Hastings*. Encroachments on British districts by the King of *Ava* and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the provinces of *Aracon* and *Tenasserim*, and, practically, *Assam*.

While *Lord William Bentinck* was Governor General (1828-35), steam communication with India was introduced, suttee (or widow burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support *Shah Shuja* against *Dost Muhammad* brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from *Cabul*. The administration of *Lord Ellenborough* (1842-44) saw the conquest of *Sind* by *Sir Charles Napier* and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with *Sobraon* (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of *Burma* of *Pegu*. *Lord Dalhousie* promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England and the Red Sea, and opened the *Ganges Canal*. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to *Satara*, and in 1853 *Jhansi* similarly became British territory, while on the death of the last of the *Mahratta* Princes of *Nagpur*, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of *Oudh*, that kingdom was also annexed without bloodshed or fighting.

Sir Canning (1857-61), who succeeded *Lord*

Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN—The "Act for the Better Government of India" established the authority of the Crown, and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII, then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-98) was full of events. In 1898 an outbreak in Chitral made necessary a large military expedition to relieve

the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound-sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Amthill* occupied the post of Viceroy. Lord Curzon was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander in Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was

issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India, to Natal after 1 July 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 22 December, 1911, by H. M. King George, to announce his Coronation. On this occasion the King Emperor also made announcements of new and far reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut. Governorship for Bihar, Chota Nagpur, and Orissa, and of a Chief Commissioner for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed including Chota Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. A Royal Commission was appointed in 1912 to inquire into the public services in India. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. A Royal Commission was appointed in April 1913, to examine and report on Indian Finance and Currency. The outbreak of war in Europe in August, 1914, was the signal for a great outburst of loyalty and devotion to the King Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Several tribal risings on the North West Frontier were promptly and rigorously suppressed. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. A strong Commission was appointed to examine and report on the possibilities of further industrial development in India. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitu-

tional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported. Three leading Indians attended the Imperial War Cabinet. Action was taken against the Mahsuds and Mohmands on the North West Frontier. The Lahore and Burma conspiracy trials were concluded and the leaders sentenced.

Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The year 1918 was marked by some symptoms of unrest, the Rowlatt Committee, appointed in 1917, reported, and revealed evidence of the association of the Bengal seditionists with German plots, anti Moslem riots broke out in Berar, and Muhammadans organised agitation leading to disturbances in Madras and Calcutta. The operations against the Maris were closed. The Bombay Government took the first steps towards obligatory primary education, a policy of more complete local self-government was decided on by the Government of India. Reckless speculations in Broach cotton prevailed, and a certain amount of discontent due to high prices was manifested. The Home Rule League continued its activities. The influenza epidemic spread to India and it is estimated that over 7 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report. Two representatives of the Indian people, appointed by the Government of India, attended the Imperial War Cabinet in London. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were under taken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance movement" inaugurated by Mr. Ghandi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers which the Government had provided themselves during the War to deal with sedition. The movement spread to Bombay, and the local government was forced to deport Mr. Horniman, the Editor of the *Bombay Chronicle*. A Commission was appointed to enquire into the whole matter of the disturbances and the steps taken to suppress them. The murder of the Amir and the subsequent events in Afghanistan were followed by an invasion of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. A Committee was appointed to enquire into the administration and organization of the Army in India, whose conduct of the campaign on the North West Frontier, following the troubles with Afghanistan, was much criticised and (1) to advise in regard to the future of currency and exchange, (2) to investigate the system of prison administration. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for reconstituting the Indian secondary and university educational system. Noteworthy features in the progress of India during the year were the appointment of an Indian, Lord Sinha, as Under-Secretary of

State for India in the Home Government, and the representation of India at the Peace Conference by two Indians, H.H. the Maharajah of Bikanir and Lord Sinha. The policy underlying the Government of India Act, 1919, mainly based on the recommendations of the "Montagu-Chelmsford" Report, viz. the increasing association of Indians in every branch of the Administration, with a view to the progressive realisation of responsible government, was carried forward a further stage in 1920 by the Home Parliament, which, by rules, laid down the details of the constitution of the new Central and Provincial Governments (see p. 625). One section of the India Home Rule for India party, dissatisfied with the Act, threatened non-co-operation with the Government in the future working of the reforms, and with the assistance of some Muhammadans, Mr. Gandhi, a Hindu, commenced a movement to carry out the threat, but the support of the "Moderate" wing of the party, including that of Mrs. Besant, was given to the Government. A prominent and distinguished Indian, Lord Sinha, was designated as the first Governor of Bihar and Orissa. The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Bolshevik propaganda created an unhealthy political atmosphere in some quarters. Fighting with the Mahads on the North West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jampur towards the Khyber. Unrest, due in some measure to labour trouble, evidenced by an unprecedented number of strikes, and partly to unsatisfied political aspirations, was prevalent during the year. Government, in pursuance of its policy of making India commercially more self-supporting, instituted several inquiries into various trades and industries, and appointed a committee to inquire as to whether the adoption of a system of preferential tariffs would be beneficial. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. Several large work programmes were sanctioned. A committee was appointed to inquire into the administration of the railways. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, i.e., an exchange rate of Rs. 10 to the £, was adopted. With a view to increasing banking facilities steps were taken to establish a large Imperial Bank. A High Commissioner for India in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers. In January, 1921, the new Indian Legislature,

Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1921. The battle between constitutionalism and revolution continued. Unrest, riots, agrarian disturbances, strikes, and movements designed to embarrass the Government were prevalent. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ail brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ail brothers forced Government to order their arrests. The Moplahs, Muhammadan fanatics of Malabar, resisted the ordinary processes of law, and a widespread outbreak of violence ensued, directed against Government, civil officers, and Hindus, forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. The deficit in the Budget, due mainly to war commitments, compelled Government to impose additional taxation. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England. The Jails Committee reported, and Government announced its intention to abolish the Andamans penal settlement. Large development and irrigation schemes were sanctioned.

In November the Prince of Wales visited India. In 1921 the battle between constitutional and unconstitutional agitation proceeded. The Government, whilst desiring to abstain from interfering with the activities of the non-co-operation party as long as it could afford to do so consistently with its responsibility for the maintenance of law and order, avoided any excessive severity *vis-à-vis* the movement, but arrested Mr. Gandhi, who was sentenced to six years imprisonment. Attempts were made to secure greater powers for the Indian legislature, for the immediate abolition of the distinction between votable and non votable items in the Budget, and for the submission of the whole Budget to the vote of the Assembly. A Committee was appointed with a view to making retrenchments and securing economy in the national expenditure. The Budget showed a deficit necessitating additional taxation. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press, and the Indian States (Protection against Disaffection) Bill was brought forward in the Legislature, but leave to introduce it was refused. Lord Reading decided to make use of the special powers vested in the Governor-General under the Government of India Act, and, as the passage of the Bill was, in his judgment, essential for the interests of British India, certified it under section 695 of the Government of India Act.

The Fiscal Commission (Sir Ibrahim Rahim tola, President), reported and made the following recommendations:—The adoption of a policy of protection; the constitution of an advisory Tariff Board to investigate the claims of particular industries; a more industrial bias to be given to primary education; provision of opportunities for the training of Indian apprentices; development of organisations for increasing the

mobility of labour, legislation against dumping, precautions against imports from a country in which the exchange is seriously depreciated, and against any system of export bounties granted by foreign countries, measures for meeting complaints against the railway rates policy and coastal rates, and consideration of the possibility of legislation against shipping rebates. The principles recommended for the guidance of the Tariff Board, as regards an industry claiming protection are (1) that it possesses natural advantages (2) that without the help of protection it is not likely to develop at all, or not so rapidly as is desirable, (3) that it will eventually be able to face competition without protection. Industries essential for national defence should be adequately protected. Raw materials and industrial machinery should ordinarily be admitted free and partly manufactured goods, used in Indian industries should be taxed as lightly as possible. The taxation of articles to which protectionist considerations do not apply should be regulated in accordance with the financial needs of the country. The existing cotton excise duty was condemned. The British Government should announce its intention of allowing the Government of India and the Indian Legislature to decide what action is necessary in the interests of India. Export duties should be moderate and imposed only for revenue purposes, and only on articles in which India has a monopoly or semi-monopoly. The advantages of recommending the principles of Imperial Preference were pointed out, but their application should be governed by certain principles, viz.—the approval of the Legislature, no diminution of the protection required by Indian industries, and no economic loss to India after taking into account the economic gain from preference granted by the United Kingdom. In the case of other parts of the British Empire, the principle of reciprocity should be followed. No obstacle should be raised to the free inflow of foreign capital, but Government monopolies and concessions should be granted only to companies registered and incorporated in India, with a rupee capital, having a reasonable proportion of Indian directors, and affording facilities for training Indian apprentices.

A minority of the Commission, consisting of the President and four Indian members considered that immediate steps should be taken to adopt an intense policy of industrialism, and that any discrimination necessary in the interests of the consumers must be decided by the Government of India and the Legislature. Imperial preference cannot be accepted until India has attained responsible Government, but Indian opinion might be inclined to accept the immediate application of Imperial preference provided India were placed at once on the same footing as the self-governing Dominions in the matter. Even under the present political status of India matters might be arranged to bring about in practice the position which the Dominions enjoy, by arranging that the power of initiating, granting, &c., Imperial preference should vest in the non-official members of the Legislature. Negotiations might be opened with the Dominions on the basis of reciprocity, and on condition that the right of the Indian people to a status of complete equality is recognised.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of

India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. In external affairs the subject uppermost in the minds of the Indian people was the revision of the Treaty of St. Germain. There was peace on the tribal frontier except in Waziristan. Some of the Wazir and Mahsud tribal sections entered into satisfactory engagements. The Government of India engaged in attempts to arrive at a better understanding with the Union of South Africa regarding the recommendations of the Asiatic Inquiry Commission. The machinery of the Legislature was extended by the appointment of advisory Standing Committees for the various departments. Twenty-three Acts and Regulations supplementing the criminal law were repealed. The Assembly agreed to the proposal to devote 150 crores of rupees (£150,000,000), to the rehabilitation of railways during the next five years. A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province. A Royal Commission with Lord Lee of Fareham as Chairman, was appointed to consider and report on the organisation and general conditions of service, financial and otherwise, of the Indian Services, the possibility of transferring any of their present duties and functions to services constituted on a provincial basis and the recruitment of Europeans and Indians for such services. The "Incheape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs. 10½ crores (£22,533,000) at 1½ rupees to the £, the largest outlay being in military expenditure (Rs. 10½ crores = 47,000,000), railways (Rs. 4½ = 23,000,000), posts and telegraphs (Rs. 3½ = 18,130,000). The Budget again disclosed a deficiency and the Government proposed to raise the salt tax. Its proposals were defeated in the Assembly, whereupon Lord Reading certified the Bill under the provisions of section 69B of the Government of India Act as essential, for the interests of British India. A demand for the adoption of a policy of Protection was brought forward in the Assembly. The Government proposed an alternative motion, accepting the principle of Protection but declaring that it should be applied with discrimination and recommending the appointment of a Tariff Board for one year to investigate the question in a purely advisory capacity. This alternative, which aims at the fostering of the development of industries in India, was accepted unanimously, although strong speeches in favour of free trade in the interests of the agriculturist and labourer were made. The action of the Government implies a policy of discriminating protection hitherto the Indian tariff has been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border. Jandola and Razmak were held by regular troops pending the completion of this road programme. The question of the status of Indians in Kenya excited much interest and controversy. After full consideration His Majesty's Government decided on the adoption of a communal system of representation, under which Indians in Kenya

will be granted a wide franchise, and provision will be made for five elected Indian unofficial members on the Council. The policy of segregation as between Europeans and Asiatics in the townships is to be abandoned and the question of immigration is to be further examined. The highlands are to be reserved for white settlers. Indians are to be compensated with the reservation of territory in the lowlands. Whilst on three points decisions favourable to Indians were pronounced the policy of the Home Government conflicts on others with the views of the Government of India and the aspirations of Indians, and demands were made in the Indian Legislature for retaliatory measures. The Secretary of State (Viscount Peel), the Maharajah of Alwar and Sir Tej Mahadur Sapro represented India at the Imperial Conference, at which a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1902 that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, has been given effect to and to what extent it can be further applied. It appears probable that all the Dominions concerned, except South Africa, will act on this resolution. Demands for the expansion of the Indian Constitution were made in the Indian Legislature but the Secretary of State declined to submit the question to Parliament, on the ground that the experience of the working of the new Constitution had not yet been adequately tested. Under the provisions of the Government of India Act, which lays down that every Council of State shall normally continue for five years and every Legislative Assembly for three years from its first meeting, the first Legislative Assembly of the Central Government and the Provincial Legislative Assemblies (with the exception of Burma) were dissolved and new elections held towards the end of the year.

IMPERIAL LEGISLATION—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act* (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed, in 1833, on a further renewal of the charter, the trade of India was thrown open while on the next renewal in 1853 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1858 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act, as amended by Acts of 1869, 1877, 1893 and 1909, at least one-half of the members of Council must have served in India for 20 years,

and must not have left India more than 5 years prior to their appointment. The number of members may be 25 and must not be less than 12, and is at present 12. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the Imperial and Provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size and power was given to constitute executive councils in provinces under Lieut. Governors. The Government of India Act (1919) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1921) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1935. The Government of India Act, 1935 confers on provinces a larger measure of independence of the Government of India. It distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature. It provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects. It provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the major provinces shall be governed, in relation to reserved subjects by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz. the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India. A Statutory Commission is to be appointed 10 years after the commencement of the Act for the purpose of enquiring, among other matters, as to the desirability of a further extension of the principle of self government in India.

INDIAN LAW—The law administered in the Indian courts consists mainly of (1) The enactments of the Indian Legislative Councils (Imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H I M GEORGE V

Secretary of State—The Rt. Hon. VISCOUNT PEEL, G. C. B.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (e.g. foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (see pp. and

The King Emperor appoints the Governor General, the Governors of the 9 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam and Burma), the Commander in Chief, the Members of the Executive Councils of the Governor General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor General in Council. The Governor General's Executive Council now contains 7 members including the Commander in Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz. the Council of State and the Legislative Assembly (see p. 615 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council, of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to select advisers, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi, the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance, Foreign and Political, Home, Legislative, Public Works, Commerce, Industries and Labour, Education, Health and Lands, Army, and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor General and his Council. The Governor General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints &c. The *Foreign and Political Department* conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The *Political Residents* in the Persian Gulf and Muscat, look after the commercial and political interests of India in those quarters. The *Home Department* deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The *Legal Member* of Council takes charge of Government Bills in connexion with the *Legislative Department*. The department of *Commerce* deals with trade and shipping, ports, &c. The department of *Industries and Labour* deals with in industries, stores, labour, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The *Army* is under the *Army Department*, of which the Commander in Chief has charge in Council. The *Education, Health and Lands Department* has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. *Railway administration* is entrusted to a *Railway Department*, which is in the charge of the *Commerce Member* of Council.

British India is divided into 25 *Local Governments and Administrations*, viz.—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North West Frontier Province, British Baluchistan, Delhi, Ajmer Merwara, Coorg, and the Andaman and Nicobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

THE SUPREME GOVERNMENT, DELHI

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees per mensem.]
Viceroy and Governor General, His Excellency the Right Hon Rufus Daniel Earl of Reading, P.C., G.O.B., G.M.S.I., G.M.I.E., G.C.V.O., b 1860, (assumed charge April, 1921) *per mensem* Rs. 20,000

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS *

Under the Government of India Act 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as 'Central, such as defence, political relations, railways, tariffs etc. Other administrative heads classified as Provincial—viz local self government, public health education, public works, water supply, land revenue administration, famine relief agriculture, excise administration of justice, &c., are wholly or partly handed over to Provincial Governments with responsibility subject to certain limitations within their own areas for administering them. In the nine major or 'Governor's Provinces—i.e., Madras Bengal Bombay the United Provinces, Bihar and Orissa the Central Provinces, the Punjab, Assam and Burma—provincial subjects are further divided into "reserved" and "transferred" subjects the administration of, and responsibility for which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the

Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council for the administration of the "transferred" subjects but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with as a rule by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers subject to the Governor's intervention and control.

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it or of another Province and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor General for the signification of His Majesty's pleasure but in emergencies the Governor General may assent to them subject to disallowance by His Majesty in Council. The

* The areas and populations of the separate provinces are for British territory only. The populations are according to the Census of 1921.

* 26 seats reserved for Non Brahmans.

† 7 seats reserved for Maharrattas.

‡ Including 27 nominated as the result of elections in Berar.

Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor General, who may reserve them for His Majesty's pleasure.

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (28 in the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications) the payment of land revenue rent, local taxes income tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of 1921 comprised over 5,000,000 persons.

(2) MADRAS (area, 142,330 sq. miles, pop. 42,318,985) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast line of 1,730 miles the province has no good natural harbour but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet and other food grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 90 per cent of the people are Hindus. There are 1,361,000 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil and Telugu. Madurai (138,804) and Trichinopoly (220,422) famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Madras. Population, 526,911.

Governor, H. E. Sir Freeman Freeman Thomas, Baron Willington of Rotton, G.C.S.I., G.C.I.E., G.B.E. (April, 1919) Rs. 10,000.

(3) BOMBAY—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including Sind, but not Aden and Perim which are also attached to it) contains 122,979 square miles (about equal in size to the British Isles) with a population of 19,261,719. Eastern Sind is desert. The administration of Sind (which occupies about two fifths of the Presidency) is in some respects separate. About 76 per cent of the people of the Presidency are Hindus, and 20 per cent Muhammadans. The Parsis who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the Indian Midland) eastwards, south eastwards to the Madras and Southern Mahratta system, while Karachi (Sind) is the port for the extensive North Western Railway system. Ahmedabad (274,007), Poona (224,705), Sholapur (129,051), Surat (127,424), and Karachi (228,223), the capital and chief port of Sind are the most important cities. For Aden and Perim, see p. 622.

(3) **BENGAL** (area of newly-constituted province, 76,699 sq. miles, with population of 46,695,536) was placed under a Lieutenant Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa and Chota Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911 and Bengal now includes five Bengali speaking divisions. About 53 per cent. of the population are Muhammadans and 44 per cent. Hindus. The principal languages are Bengali and Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal Nagpur, south, from Calcutta, are also important. Important cities are Dacca (119,450), now the second capital, and Howrah (129,307), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta, Pop., including suburbs and Howrah, 1,227,577.

(4) **THE UNITED PROVINCES OF AGRA and OUDH**, called 'North Western Provinces and Oudh' until 1905 (area, 107,267 sq. miles, pop. 45,375,707), forms the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1855 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 15 per cent. Muhammadans. Hindi and Western Hindi are the chief tongues. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (125,530), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (129,447), the great manufacturing centre, Cawnpore (125,455), Lucknow (129,560), Bareilly (129,450), and Allahabad (127,000).

(g) The PUNJAB (area, 99,222 sq miles pop 20,685,024) occupies the N.W. angle of the great northern plain of India, and derives its name from the 'Five Rivers' which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. More than half the population are Muhammadans, and more than a third are Hindus. The Sikhs number about 2,250,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western and

Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 160,228 people.

(6) BURMA is bounded by Tibet on the north, by China, French Indo China, and Siam on the east and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 230,829 sq miles, about equal to Spain and Portugal with a population of 13,222,122. These figures include the Shan States and Chin Hills. Many immigrants came from Bengal, Madras and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826. Pegu after the second war in 1856, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled, but, owing to remarkable prosperity, the population has increased 9 per cent. in 20 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Karen are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Frome there is upland, hilly country. Rice, the main product

of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadeite, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myittha, form important waterways. The main stream is navigable beyond Bhamo, 300 miles from its mouth and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkyina on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salween basin.

(7) BIHAR AND ORISSA (area of new province, 83,181 sq miles, with pop of 34,002,189). This province, which came into existence on 1 April, 1922, comprises Bihar, Orissa, and Chota Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota Nagpur are ill watered and liable to drought. Orissa has a variety of races and a considerable sea board. The highlands of Chota Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1924. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar,

and tobacco are cultivated. The bulk of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North Western, and Bengal Nagpur.

(8) THE CENTRAL PROVINCES AND BERAR (area, Central Provinces alone, 82,037 sq miles pop 10,837,444). The Central Provinces were formed in 1861 out of territory taken from the North West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal Nagpur Railways possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,766 sq miles, pop 3,075,316), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

CHIEF CITY, Nagpur Population, 145,193.

(9) ASSAM (area, 53,015 sq miles pop 7,606,230) was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Burma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea gardens. Seat of Government, Shillong.

(10) THE NORTH WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu, and Dera Ismail Khan (area, 13,428 sq miles pop 2,531,340, partly estimated). Attached to the Province are the five trans-border political agencies of Malakand, Khyber, Kurram, Tochi, and Wana, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans. The province produces wheat, barley and other grains, opium, cotton, &c. It has a considerable trade with Afghanistan.

Chief Com., The Hon. W. P. Batton, C.S.I., C.I.E. Rs 4,000

(13) BRITISH BALUCHISTAN (area, 54,228 sq ms pop 420,648) was constituted a separate administration in 1888 under the Governor General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal, Chotiali, Nushki, Zhob, Chaghal Nasirabad and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamak (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan Baluch frontier was demarcated in 1866-7. To Chaman, on this frontier, a railway runs via Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit rents, subsidy, &c. British troops occupy Quetta commanding the Bolan Pass, and have the treaty right to occupy any other position.

Chief Commissioner in Baluchistan, Hon. F. W. Johnston, C.S.I., C.I.E. Rs 4,000

Rev and Judl Commr, Lt. Col. A. D. G. Ramsay, C.I.E., O.B.E. Rs 3,250

(14) DEHLY — This province (area, 557 sq miles, pop 488,128) was constituted on October 1, 1922, out of the Punjab division of Delhi, in pursuance of the policy announced by H. M. the King Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi.

Chief Commissioner, Hon. C. A. Barron, C.S.I., C.I.E., C.V.O. Rs 3,000

(15) THE ANDAMANS AND NICOBARS (area, 3,142 sq miles pop 27,086) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The Nicobar Islands, almost due south of the Andamans, were first occupied by the British in 1856. They comprise 19 islands. The principal products are coco-nuts.

Chief Commissioner, Lt. Col. M. L. Kerr, C.I.E., O.B.E. Rs 2,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,600 in 1911.)

Aden and Perim—From old time the peninsula of Aden situated on the southern coast of Arabia and lying on the Red Sea trade route between Europe and the East has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857—form

part of the Bombay Presidency, and have an area of 80 square miles and a population of 55,500. Aden is a free port. The traffic in arms and ammunition is subject to special regulations. The total seaborne trade in 1921-22 was £10,908,000. In 1921-22 1,165 vessels called at Aden, and 380 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both in land and along the coast (Hadramaut), from the Straits of Bab el Mandeb to Muscat territory at Ras Sair.

Aden Political Resident, Maj Gen T. E. Scott C.B., C.I.E., D.S.O. *per mensem* Rs. 3,000.

The *Kuria Muria Islands* to the S. of Oman, have been in British possession since 1854. In 1834 the East India Company occupied *Sokatra* (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India—The annual examination ordinarily commences in London July-August. Candidates at the 1924 examination must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 2 on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 2. Examination fee, £8. Selected candidates are on probation in England for one or two years, and receive an allowance of £300 if of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State conduct themselves well, and comply with all the rules laid down for their guidance. A final examination is held in Indian law, language, &c. A first class passage to India will be engaged for selected candidates. In case of failure to pass the final examination, or failure to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences usually at Rs. 7,500 a year.

The Indian Army—Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 17½ and 25 years of age (in the case of candidates already serving in the Army the upper limit of age will be 25). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India and by the Army Council, the remainder being offered to candidates in the order of their passing the entrance examination. At the end of the period of training at Sandhurst, cadets recommended

for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's minimum initial pay is at the present moment Rs. 425 a month (equals £42 10s at the statutory exchange of 2s per rupee). Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian (Imperial) Police Force—It has been announced that a competitive examination will be held in London and other centres on June 20, 1924, in conjunction with the Army and Air Force Examination. A fee of £4 will be required from candidates examined in London, and a fee of £5 from those examined in other centres. The regulations provide that a candidate must be a European British subject and that if he (being a European British subject) or his father or his mother was not born within His Majesty's dominions and allegiance, then at the time of his birth his father was a British subject and still is or continued to be until his death a British subject. Indian and Burmese candidates will be eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 20 and under 25 years of age on Aug. 1, 1924, must be unmarried, and if they marry before reaching India will be required to forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London, and must be returned not later than April 15, 1924. Successful candidates will be required to undergo a strict medical examination, will be examined as to their ability to ride, and will be required to provide themselves with uniform towards which a contribution of £30 will be made by the India Office. Newly appointed officers may be required to provide themselves, in India, with a horse and saddle, towards the cost of which the Government may contribute up to Rs. 600. Free passage to India will be granted to probationers. The initial pay is Rs. 325 per month, plus an overseas allowance of

Rs. 225 per month in the case of probationers with non Indian domicile. The pay proceeds by increments to Rs. 675, and thence to Rs. 1,350 per month, subject to efficiency bars, with prospects of promotion to higher posts. Officers are subject to certain Leave, Pension, and Provident Fund Rules, details of which may be obtained from the India Office.

The patronage of the *Secretary of State for India* is small, and is now chiefly dependent on the requirements of the Government of India in the Judicial Department. Some appointments to the *Indian Educational Service*, which includes teaching and inspecting posts, are made on the recommendation of a Selection Committee, constituted by the Secretary of State for India, from among candidates who must have received a liberal education and who seem to be most suitable by the Board of Education or the Scottish Education Department. The age is usually from 23 to 30. Appointments are in the first instance for two years, the salary beginning at Rs. 400 a month, rising by annual increments of Rs. 50 a month to Rs. 1,250, with prospects of promotion if service is extended. Officers of non Indian domicile receive additional ("Overseas") pay of Rs. 150 per month during the first few years, but the amount is increased later. Initial salary and date of increments will be ordinarily determined in future by age. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplains Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age and Church of Scotland candidates must be under 34 years of age. On appointment chaplains are on probation for two years and receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,300 per month.

The superior Engineer establishment of the *Indian Public Works Department* is engaged on the construction and maintenance of the various public works undertaken by the State in India. Until further notice the Secretary of State in Council will, during each year, make a number of appointments of Asst. Executive Engineers in the Public Works and State Railway Depts. of the Government of India. In making these appointments he will act with the advice of a Selection Committee. Application forms can be obtained from the Secretary, Public Works Dept., India Office, London, and should reach the India Office not later than the April 1. Every European candidate must have been born on or after Aug. 2, 1900, and on or before Aug. 1, 1903. At present 10 per cent. of the appointments made in England are reserved for Indians. Selected candidates will be required to undergo further training on works in India for a period of at least one year. During this period they will be on probation and their final appointment will be made dependent upon the result of such probation. The pay and allowances of Europeans so appointed commence at Rs. 225 a month. The pay rises by annual increments to Rs. 1,250 per month, with possibilities of promotion to higher posts. There is a prospect of pension, and there is also a Pro-

vident Fund. Appointments are usually made in June in each year. From time to time appointments to the Locomotive, Carriage, Wagon and Traffic Departments of Indian State Railways are made, full information regarding which can be obtained from the Public Works Secretary, India Office, London.

Indian Forest Service—In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee. Applications for appointment must be made on a printed form to be obtained from the Secretary, Commerce and Revenue Department, India Office, Whitehall, London, S.W. 1. Candidates must be not less than 19 but under 22 years of age on January 1. No person will be deemed qualified who shall not satisfy the Secretary of State that, save as provided in the Regulations, he is a British subject. A European candidate must be prepared to give an undertaking, if selected, that he will not marry before he reaches India. If he marries, after giving such an undertaking, he forfeits his appointment. Every candidate must be of good physique, and good character. Candidates must have obtained a degree with *Honours* in some branch of National Science in a University of England, Wales, or Ireland, or have passed the Final Bachelor of Science Examination in Pure Science in one of the Universities of Scotland. A degree in Applied Science will not be considered as fulfilling these conditions. Candidates are required to produce evidence that they have a fair knowledge of either German or French. Weight will be attached to the possession of a diploma or degree in Forestry. Should there in any year be more candidates considered to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend. Selected candidates are required to undergo a strict examination by a Medical Board at the India Office. Before appointment a probationer is required to undergo a special course of instruction and to pass examinations in special subjects. The period of probation is in ordinary cases two years. The probationers are required to defray all expenses of lodging, board, tuition, and excursions to forest centres in the United Kingdom while at the University. The Secretary of State for India in Council makes payments to each probationer at the rate of £300 a year, not exceeding a total of £600. In the case of probationers of Indian domicile the rate will be £350 a year not exceeding a total of £700. The grant of the allowances is subject to certain conditions. On appointment to the Indian Forest Service a probationer's salary commences at Rs. 325 (plus an overseas pay of Rs. 150 in the case of officers in non Indian domicile) per mensem, and rises by increments to Rs. 1,500 with prospects of promotion.

Further information regarding these and other Indian appointments, viz., to the Indian Agricultural, Civil Veterinary, Geological, Finance, Medical, Telegraph Department (Engineers), Queen Alexandra's Military Nursing, Royal Indian Marine and Bengal Pilot Services, can be obtained, on application, from the Under-Secretary of State, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, which can be consulted at the India Office.

† Gross receipts less working expenses.

The Indian Empire—Revenue and Expenditure, Debt, &c 625

NET REVENUE AND EXPENDITURE

The figures of Gross Revenue just given include the net receipts of railways and other commercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments, while the figures of Gross Expenditure include the interest charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compiling the figures causes the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for the three years under review is therefore given in the table below, which shows the net revenue derived from commercial undertakings, after deducting all expenditure including interest charges similar adjustments being made under other heads of revenue and expenditure by deducting (1) the cost of cultivation and manufacture of opium from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

Under the Government of India Act, 1919, provision was made for the definite assignment to each of the Provincial Governments of a part of the revenues of India. The revenues so allocated consist, in the main, of the receipts accruing from provincial loans and from those provincial subjects which are revenue producing the principal heads of which are land and revenue, irrigation, stamp duties and excise. In addition, a local government is given a share in any expansion of income tax due to an increase of the assessed incomes within the Province. This division of the sources of revenue leaves the Central Government, under present conditions, insufficiently provided. It has, therefore, been arranged that an annual contribution shall be made by eight of the nine local governments to the Central Government. The annual contributions fixed at the outset aggregate 982 lakhs of rupees (Madras 245, Bombay 55, Bengal 62, United Provinces 220, Punjab 175, Burma 64, Central Provinces 22, Assam 15, Bihar and Orissa nil), but these contributions will cease at the earliest possible moment. As a special measure the annual contribution made by Bengal has been remitted for three years with effect from 1922-23. The revised financial arrangements came into force from April 1, 1922, as from which date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government.

* A lakh is 100,000 rupees.

BURDEN OF TAXATION—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden in 1921-22 was estimated at Rs. 3 7 per head, or if land revenue (which is akin to rent) be added, Rs. 5 9 per head. The Budget of 1919-20 introduced a duty of 50 per cent. on excess profits, but this tax was discontinued in 1920-21. The Budget for 1920-21 amended the super tax law. The Budget for 1921-22 imposed additional taxation under the heads of postal charges, railway surcharge, import duties and taxes on income. The Budget for 1922-23 increased railway passenger fares, postage rates, the general customs *ad valorem* duty on imported goods, the income tax and the super tax. The Budget for 1923-24 raised the salt tax from Rs. 1½ to Rs. 2½ a maund.

DEBT AND ASSETS—On March 31, 1923, the debt of India (Central and Provincial Governments) amounted to Rs. 66,770 lakhs (sterling) and rupee debt having been combined at the rate of Rs. 10=£1. Miscellaneous obligations (Savings Bank balances, &c.) amounted to about Rs. 8,213 lakhs, besides a charge of Rs. 502 lakhs for various railway annuities. Its advances to Native States, corporations, agriculturists, &c., stood at Rs. 891 lakhs. Other assets were the Gold Standard Reserve of £40,044,000 and the cash balances in England and India £9,590,000 and Rs. 2,593 lakhs respectively.

LAND REVENUE—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one fourth of Madras, and part of Assam the land revenue has been permanently fixed, elsewhere generally the assessments, or settlements are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindars*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam and most of Madras) the *raiyatwari* tenure prevails and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled *zamindari* districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled *raiyatwari* districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1921-22 amounted to 3,472 lakhs (£23,148,000).

THE OPIUM REVENUE—Poppy may now be grown only in parts of the United Provinces (Bengal opium) and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly. In 1921-22, 935 chests of Bengal opium were sold for export, in addition to 6,820 chests sold direct to Governments of Hong Kong, Straits Settlements and Netherlands (Indie), &c. The gross revenue from Bengal opium including the value of opium sold by the Excise Department for consumption in India, was £2,048,000. The

expenses of production, &c, were £1,800,000. Formerly, most of the opium exported from India was consumed in China, but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded in recent years, and amounted to lakhs 1,718 6 (£11,457,666) gross in 1921-22 (Central and Provincial Governments).

CUSTOMS.—The net revenue was 3,441 lakhs (£22,940,000) in 1921-22 (For tariff see page 630). The export duty on rice yielded 80.4 lakhs (£536,000), and the countervailing duty on Indian cotton goods 219 lakhs (£1,461,000) in 1921-22. The export duty on jute produced 272 lakhs (£1,813,000).

INCOME TAX is levied on non-agricultural incomes at the following rates —

Annual Income	Rate of Tax per Rupee*
Rs. 2,000 and over	5 ples
" 5,000 "	6 "
" 10,000 "	9 "
" 20,000 "	12 "
" 30,000 "	15 "
" 40,000 "	18 "

* 12 ples = 1 anna, 16 annas = 1 rupee, 100 rupees = £1 (statutory rate) but at present the rupee has a fluctuating value.

In the case of companies and registered firms, whatever the total income, the rate is 18 ples in the rupee.

Super tax is leviable in addition to ordinary income tax on incomes of individuals and registered firms above Rs 50,000 of Hindu undivided families above Rs 75,000, at 1 to 6 annas in the rupee, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna in the rupee.

STAMPS.—Stamps yielded 1,088 lakhs gross (£7,254,000) in 1921-22. About two thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (84 lb.) in 1903, to Rs. 1½ in 1905, and to Rs. 1 in 1907. It was increased to Rs. 2½ on March 1, 1916, and to Rs. 3½ with effect from March 1, 1923.

FORESTS.—About 99,000 square miles of forests are reserved and scientifically worked by the State, while about 150,000 square miles besides are under State control. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1921-22 conveyed 1,420 millions of letters, postcards, newspapers, &c., and issued 27 millions of money orders. Inland letter rates are the lowest in the world. The length of telegraph wires in India on March 31, 1922, was 422,000 miles, and the number of messages sent in 1921-22 was nearly 20 millions. Their capital cost to the end of 1920-21 was £10,710,000. The Indian Postal and Telegraph services were amalgamated on April 1, 1924. The combined services showed for the year 1921-22 a deficit of 8½ lakhs (£57,000). The Indo-European Telegraph Department yielded a profit of 4 5 per cent. on its capital expenditure of £3,246,000.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage open for traffic on March 31, 1922, was 27,265, while the mileage under construction was 1,823. Of the mileage open about 50 per cent was on the standard gauge (5½ ft.), and about 41 per cent on the metre gauge. On March 31, 1922, the total capital at charge was 65,606 lakhs (£437,375,000). The net earnings of the railways in 1921-22 amounted to 2,208 lakhs (£14,725,000). The number of passengers increased to 577 millions, and the goods traffic amounted to 93½ million tons. Rates are very low, third class passengers travelling on the average over four miles for a penny. The net loss from State railways was 909 lakhs (£5,060,000) in 1921-22. The total capital expenditure on State and other railways in 1921-22 was about 2,578 lakhs (£17,188,000).

IRRIGATION.—The total capital outlay on State irrigation works up to March 31, 1921, was £52,408,200, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £2,661,000. The area irrigated by Government irrigation works was nearly 28 million acres, while the annual value of the crops raised is estimated at nearly 200 per cent on the capital outlay. Two fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1921-22 to £26,514,000. Interest on Railway Debt and Annuities, £10,014,000. Interest on Ordinary Debt and Management of Debt, £1,641,000. Other Debt Services, £1,535,000. Stores, £4,289,000, of which £3,302,000 was for Marine and Military Stores, payments for British forces, troop service, &c., £3,429,000. Army non-effective charges, £2,099,000. Civil annuities, pensions, &c., £2,038,000. Furlough payments, civil and military, £1,464,000. Home administration, £304,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unrefined coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 11 1/2 d. The Act of 1893 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1900. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways, the other half of the profit, and the whole of the interest, being added to the gold standard reserve. In June, 1912, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to

₹50,000,000. From April 1, 1921, the interest on investments in the Gold Standard Reserve, when that Reserve reaches **₹40,000,000**, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on outgoings, interest and discount, and profit by exchange up to March 31, 1923, amounted to **₹43,628,000**. Of this sum **₹1,123,655** has been used for capital expenditure on railways, the remainder has been paid to the Gold Standard Reserve, for the purpose of maintaining the rate of exchange between England and India. On March 31, 1923, the investments of this fund in sterling securities amounted to **₹40,044,000** (estimated value), while **₹2,628** was held in cash in England. India has a paper currency. The 1, 5, 10, 20, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1922 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

ARMY.—In peace time, the Army in India consists, first, of British troops, about 76,000, and, secondly, of Indian troops (largely Muhammadans), about 170,000, excluding foot soldiers. In addition, the Imperial Service Troops furnished by native States contribute 21,000, including cavalry, transport corps, and sappers. Further, there are 28,000 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902-9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about **₹50,000,000** in 1912-13 to about **₹6,92 lakhs (₹69,200,000)** in 1921-22. The estimated net expenditure for 1922-23 is **₹6,000 lakhs (₹60,000,000)**. During the war of 1914-18 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about 1.3 million men. 1,225,000 officers and men were sent on service overseas from India, the total Indian casualties were 101,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed, the pay and pensions of the Indian soldiery were improved. India has an Auxiliary Force on a volunteer basis. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The **ROYAL INDIAN MARINE** consists of ten sea-going vessels, and numerous smaller steamers and launches.

Director R. I. M. Bombay, Capt. E. J. Headlam, C.M.G., D.S.O. (p.t.) Rs. 2,500

EDUCATION.—Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. It has appealed to the natural intellectuality of the people, and has succeeded only partially in stimulating practical application. There are 12 Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hydr-

abad, Mysore, Lucknow, Rangoon and Delhi. In State institutions education is secular. The institutions in 1922-23 numbered 206,000, and the scholars 2,377,000, including 1,412,000 females. Of the institutions, about 84 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1920-21, **₹11,280,000**, **₹2,530,000** came from fees, and **₹8,751,000** from provincial revenues or local and municipal funds. The census of 1921 showed that only 206 males and 20 females per thousand can read and write.

LOCAL SELF-GOVERNMENT. municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1919-20 numbered 739, controlling a total population of nearly 17½ millions, and receiving an income of **₹4,908,000** from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and **₹2,630,000** from other sources (excluding loans). Out of 10,289 members of municipal bodies 9,389 were Indians, and 8,997 were non-official. In almost all districts in British India there are local district boards, partly representative. Nearly 40 per cent. of their total expenditure of about **₹6,600,000** in 1919-20 was devoted to civil works, 26 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are about 12,000 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1919, 2,263,000 civil suits were instituted, 2,135,000 persons were tried, and 1,024,000 convicted, in criminal cases, of whom 284 were sentenced to death, 2,676 to transportation, and 203,256 to imprisonment. The strength of the police in 1919 was 12,924 officers and 190,444 men. There were 773 prisons, with a daily average of 127,000 prisoners. At the convict settlement of Port Blair (Andamans) there were 12,523 prisoners on March 31, 1922.

VITAL STATISTICS.—The reporting of vital occurrences is still defective, and proposals have been formulated with a view to securing more complete and accurate vital statistics. The recorded death rate for British India in the decennium ended 1912 ranged between 28.2 per 1,000 in 1902 and 28.7 in 1913, it was 24.9 per 1,000 in 1919. There were over 7 million deaths from influenza during 1918. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1922 were about 20,540 in India as a whole. Over 80,000 people were killed by snakes in 1919. In 324 hospitals and dispensaries, maintained mostly from public funds, 25,270,000 patients were treated in 1919. The number of persons vaccinated in 1919 was 20,760,000. According to the census of 1921 there were 120,000 lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical, and archaeological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Argentina combined. During the

five years ending 1913-14 both imports and exports were, on the average, twice as great as they were 25 years ago. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure, but in 1900-01 and 1901-02 there was an excess of imports. The table below exhibits the leading figures for the last five years in thousands of pounds sterling (£) Rupees being converted at the rate of 15 to the £.

In 1913-14 both imports and exports of merchandise were of unprecedented magnitude, but the outbreak of war during the course of the year 1914-15 brought the figures for the year down to the level at which they stood five or six years earlier. There was, however a recovery in 1916-17. The rise in prices was a very potent factor in the increase in values. During the year 1902-03 as compared with 1901-02 the value of the imports decreased by Rs. 408 lakhs (£26,700,000), and the exports increased by Rs. 5,104 lakhs (£34,030,000). In imports the principal articles showing increases were—Cotton yarns and manufactures (Rs. 1,319 lakhs = £87,940,800), metals, other than iron and steel and manufactures thereof (Rs. 186 1/2 lakhs = £12,445,000), non metallic mining and quarry products other than coal (Rs. 147 1/2 lakhs = £9,834,000), spices (Rs. 51 1/2 lakhs = £3,440,000).

In the export trade sugar increased by Rs. 98 lakhs (£6,490,000), raw and waste cotton, Rs. 58 lakhs (£3,860,000), hides and skins, Rs. 30 1/2 lakhs (£2,030,000), fruits and vegetables, Rs. 27 1/2 lakhs (£1,830,000), and woollen yarns and manufactures, Rs. 26 1/2 lakhs (£1,760,000). There were decreases in apparel, Rs. 50 1/2 lakhs (£3,380,000), and cotton yarns and manufactures, Rs. 29 1/2 lakhs (£1,950,000), &c.

As will be seen, the bulk of the imports consists of manufactured articles, while two thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1902-03 (converted at Rs. 15 = £1) —

IMPORTS.

(000 omitted.)	(000 omitted.)
Cotton Goods .. £41,737	Copper .. £1,387
Machinery, &c. 15,652	Fruits & Vegetables .. 2,224
Iron and Steel 12,222	Rubber Manuf's .. 1,201
Sugar, &c. 10,326	Salt .. 1,125
Railway plant 7,379	Drugs & Medicines 1,107
Cotton Yarn 6,172	Woolen Goods 1,098
Mineral Oils 4,462	Build'g, &c., Mat'ls 1,097
Hardware, &c. 3,432	Matches .. 1,090
Liquors 2,285	Silk (raw) .. 1,052
Coal and Coke. 2,120	Paints .. 928
Silk Goods 2,110	Soap .. 760
Instruments, &c. 2,090	Apparel .. 728
Brass, &c. 1,881	Haberdashery, &c. 620
Dyes 1,859	Stationery .. 612
Paper, &c. 1,858	Aluminium .. 572
Provisions 1,849	Belt'ing .. 535
Glass 1,731	Arms, ammuni- tions, &c. 4 1/2
Spices 1,630	Tea Chests .. 417
Precious Stones and Pearls 1,505	Government Stores ..
Cigarettes, &c. 1,504	Rly plant, &c. £1,368
Motors, cy'ls, &c. 1,438	Mach'y & millw'k 1,261
Chemicals 1,345	Coal, coke, &c. 746

EXPORTS.

(000 omitted.)	(000 omitted.)
Cotton (raw) £47,126	Oilcake .. £1,128
Grain Pulse & Flour 28,328	Brans, &c. 822
Jute Manuf's 20,999	Manures .. 805
Seeds 18,326	Coffee .. 804
Jute (raw) 15,019	Paraffin Wax 802
Tea 14,587	Dyes .. 798
Cotton Yarn and Manufactures 9,440	Coir 736
Lac 6,244	Spices 732
Hides and Skins 3,804	Wood 644
Leather .. 3,441	Tobacco .. 551
Metals & Ores 3,222	Rubber 484
Wool (raw) 2,943	Fruits & Vegetables 400
Oils 2,122	Hemp 406
Opium 1,632	Re-Exports ..
	Cotton Manuf's 3,195
	Sugar .. 1,754

SEA BORNE TRADE

630 The Indian Empire—Customs Duties, Agriculture, &c

The following table shows the distribution of the Indian private sea borne trade in 1922-23 —

COUNTRIES	PRIVATE MERCHANDISE ONLY	
	Imports £125,060	Exports £199,521
Total Value (000 omitted)	Per cent.	Per cent.
United Kingdom	60.1	21.8
Belgium	2.7	3.8
Ceylon	0.6	4.1
China (excluding Hong Kong)	1.2	4.6
Egypt	0.2	1.7
France	0.9	5.1
Germany	5.1	7.3
Holland	0.9	1.1
Hong Kong	0.6	2.1
Italy	0.9	3.3
Japan	6.3	13.4
Java and Borneo	5.8	1.1
Mauritius	0.4	0.8
Straits Settlements	1.9	2.5
Switzerland	0.4	0.1
United States	5.6	11.5
All other countries	6.4	15.7

(Note — Rupee figures converted at rate of Rs 15 = £1)

CUSTOMS DUTIES—The general import tariff, which stood at 5 per cent *ad valorem* since 1894, was raised to 7½ per cent. in 1916, to 11 per cent. in 1921, and to 15 per cent. in 1922. The principal exceptions to the general rate are as follows — Cotton twist, yarn and thread pay 5 per cent., but the duty on other cotton goods is 11 per cent., an Excise duty of 3½ per cent. being levied on those woven in Indian mills. Arms and ammunition, and certain "luxury" articles, including silver manufactures, pay 30 per cent., sugar 25 per cent., cigars and cigarettes 75 per cent., spirits generally Rs 22 As 14 a gallon, salt Rs 2½ a maund (8½ lb.), gold and silver plate 30 per cent., Kerosene As. 5 P 6 (with an additional As. 6 per gallon on motor spirits, an excise duty of As. 6 per gallon is levied on motor spirit and an excise duty of A. 1 per gallon on kerosene produced in India), coal As. 8 a ton. Machinery, grain, tea-cheats, printing materials, iron, steel, and railway material pay 10 per cent. and a few other articles pay 2½ per cent. The duty on manufactured tobacco is Rs 2 As 4 per lb., matches Rs 1 As 8 per gross, beer As 8 per gallon, perfumed spirits Rs 36 a gallon. Gold, metallic ores, living animals, raw hides, skins raw cotton and wool, certain agricultural requisites, quinine, and a few other articles are free. There are export duties of As 3 a maund on rice, Rs 1½ per 100 lb. on tea, Rs 4½ per bale of 400 lb. on raw jute other than cuttings, in the case of which the rate is Rs 1½ per bale, Rs. 20 per ton on jute sacking, Rs 32 per ton on hessian, and 15 per cent. *ad valorem* on raw hides and skins, with a rebate of two thirds of the duty on hides and skins exported to countries within the British Empire.

SHIPPING—In 1921-22 the number of vessels engaged in the foreign trade which entered and cleared at ports in British India was 2,037, with a tonnage of 15,655,000. Of this tonnage, nearly 80 per cent. was under the British flag.

PORTS—The chief ports are Calcutta, Bombay, Karachi, Rangoon, and Madras. These ports

are administered by port trusts having wide powers, but subject to Government supervision.

FOREIGN LAND TRADE OF INDIA—The most important countries in the land trade are Nepal and the Shan States. The imports of merchantile and treasure in 1921-22 were £10,077,000, and the exports £2,387,000.

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1920-21, 239 million acres were cropped, a decrease of nearly 16 million acres as compared with 1919-20. Of the total area cropped about 9 per cent. was under wheat, 33 per cent. under rice, and 36 per cent. under other food grains and pulses, 5 per cent. under oilseeds, and 7 per cent. under cotton, jute, and other fibres. Jute cultivation has been extraordinarily profitable. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 49 million acres. The agricultural departments (central and provincial) which have been much developed since 1906, supply information as to crop prospects, new staples manures, crop experiments, implements, cattle breeding, &c., and distribute seeds. There is also a civil veterinary department.

BANKS AND CO-OPERATIVE CREDIT SOCIETIES.—Besides the three Presidency Banks, closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. Much success has been achieved in rural districts by co-operative credit societies. In 1920-21 there were in British India and Indian States 1,394 central, 36,726 agricultural and 2,662 non agricultural societies, with a total membership of 1,521,128 and a capital of £14,270,000.

MINERALS—The output of coal in India in 1922 was 19,012,000 tons. The production has much increased in recent years. Nine tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 29 million gallons in 1897 to 223 millions in 1922. The production of salt is about 1,450,000 tons. The production of manganese ore in 1922 was about 474,000 tons, and of saltpetre 11,700 tons. The yield of gold (nearly all from Mysore) was about 438,000 oz. in 1922. There is a considerable output of mica and a fluctuating output of rubies and jade. Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1922 was 12½ tons, and of the latter 943 tons.

MANUFACTURES—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 263 cotton mills at work in British India and Native States in 1920-21, mostly in Bombay and Ahmedabad, contained 6,714,000 spindles and 118,000 looms. Up-country cotton mills have increased. The production in 1919-20 was 636 million lb. of yarn (mostly of low counts) and 324 million lb. of woven goods. There is a tendency to produce finer yarns and to pay more attention to weaving. The 96 jute mills, mostly situated in or near Calcutta, contained 840,000 spindles and 40,000 looms. There were, in 1919, 7 woolen and 9 paper mills, 26 breweries, and various other factories.

TABLE OF THE PRINCIPAL INDIAN RULING PRINCES AND CHIEFS, SHOWING THE SALUTES TO WHICH THEY ARE ENTITLED, AND THE AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES

STATE, SALUTE, AND TITLE OF CHIEF	Date of Succession	Area in sq miles	Population in 1911	Prevailing Religion	Revenue for last year recorded or approx. value.

N B—There are also 13 other chiefs entitled to salutes of 22 guns

† The present chief has a personal salute of two additional guns

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King Emperor, comprise about two-fifths of the area but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States, the military force they maintain is strictly limited, no European is allowed to reside at any of their courts with out special sanction, and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £21,200 (£233,000 from Mysore) were paid to the Government of India in 1921-22. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a

group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial Legislative Councils cannot legislate, and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 709,523 square miles, and a population of 71,022,187. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Imperial Service troops. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and

elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 693, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 631-2 are the names of 73 ruling chiefs who have salutes of eleven guns or more with some particulars of their States. Some well known Indians of title, such as H. H. the Agha Khan, GCSI, GCIE, the Maharaja of Darbhanga, GCSI, and the Maharajah of Burdwan, KCSI, KCIE, are not ruling chiefs. The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, Gwalior, Indore, and Travancore and Cochin.

The Indian States may be thus classified—
1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 404,187—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1721, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore*. This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881: when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kannarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlarded with British districts. The reigning Gackwar was the adopted

heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. *The Himalayan Hill States*, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 141,735) was granted to Gholab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A British force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar, while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border. 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1860, when also the boundaries of Tibet were defined by the Sikkim Tibet Convention. 6. *The Sikh States*, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 7. *Rajputana*, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 9,844,384) extends some 450 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor General's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marojar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. *The States of Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency. *Bhopal*, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. 9. *The Malayalam States of Travancore and Cochin*, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of *Khalapur* (Sind), *Bahawalpur*, and *Rampur*. 11. *Kalat* (including Makran and Kharan) and *Las Bela*, with tribal areas in the possession of the Marri and Bugti tribes. 12. *Gujarat*, including *Kutch* and the numerous petty chiefships of *Kathiawar*. 13. *The Southern Mahratta States*. 14. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Sulaiman range, a distance of 800 miles. The names of some of these tribes, *Waziris*, *Orakzais*, *Afridis*, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal *Gond* and *Kol* tribes, under petty princes of aboriginal or Rajput blood, in *Chota Nagpur*, *Orissa*, the *Central Provinces*, and the *Jaipur* (*Vishnupatnam*) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

NEPAL.

Sovereign. His Majesty Maharaja Dhiraja Tribhuhana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang, *etc* 1911 Salute in British territory, 21 guns.

Prime Min. H. H. Maharaja General Sir Chandra Shamsher Jang, Bahadur Rana, G C B, G C S I, G C M G, G C V O, D C L

Nepal (area, about 54,000 sq miles pop. 5,630,000) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt Everest (29,121 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. In 1901 as its exports to British India were £4,095,000, while its imports amounted to £1,587,000. The chief trade route is that between Kathmandu and the Bengal frontier (76 miles). Nepal exports rice and other grains, hides, oilseeds, *ghis*, cattle, fute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue realised chiefly from land rent, forests, customs &c., is over £2,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister, who paid a most successful visit to England in 1908. The British Envoy does not interfere in internal affairs. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments.

CAPITAL, Kathmandu (pop. 90,000) — *British Envoy at the Court of Nepal*, Lieut. Col W F T O Connor, C I E, C V O Rs 3,000

BHUTAN

Bhutan (area, about 20,000 sq miles, pop. about 350,000, mainly Buddhists) also lies on the S. E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1900 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongpa Penlop, the chief councillor and virtual ruler, Sir Ugyen Wangchuk, K C S I, K C I E, was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India in 1900-1 was £86,000. There is no British Resident.

CAPITAL, Punakha

AFGHANISTAN

Amir of Afghanistan and its Dependencies, H. M. Amir Amanullah Khan, *etc* 1919 Salute in British territory, 21 guns.

Afghan Minister in London, Sardar Abdul Hadi Khan, 23 Knightsbridge, S. W. 1

Afghanistan lies on the N. W. frontier of India. Estimated area, 290,000 sq miles, and pop.

7,000,000. It is bounded on the W by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1862-72), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N. W. Frontier Province (boundary fixed 1893). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N. E. to the Oxus, which forms the boundary from Khambali to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamu agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Panjirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aborigines, who are cultivators or retail traders). All are Sunni Muhammadans except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan, with Qataghan, Kafiristan, and Wakhan, and four minor provinces, the Eastern, Southern, Farah, and Maimana, which are under governors with subordinate nobles and judges, police and revenue officers. Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade &c. He first formed a national army, paid and controlled by himself. It comprises about 90,000 regulars and irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dol*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woolen, and hair cloths and carpets are manu- factured. Salt, silver, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khatir Pass route, from Kabul to Peshawar (200 miles), along which a motor service was established by the late Amir, and the road from Kandahar to Chaman (70 miles). The Hind- Kush railway is now completed to the

Baluchistan Persian frontier The trade of Afghanistan with India in 1921-22 was about £1,240,000. The exports to India are mainly fruits and nuts, raw wool, and *ghis* while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £1,500,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll taxes, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence.

His Majesty the late Amir Habibullah Khan was assassinated on February 20, 1919, his brother, Nasrullah Khan by a *coup d'état* thereupon seized and temporarily held the reins of government at Kabul, but the Amir's third son, Amanullah Khan, soon after declared himself, and was recognised as, Amir of Afghanistan. He crossed the Indian frontier on May 1, on which the Indian Government took immediate steps to expel them. Fighting followed and Dacca was occupied by British troops, but overtures were made by the Amir and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent, both internal and external.

A treaty was signed by representatives of Afghanistan and Great Britain on the Nov. 23, 1921, by which the two Governments agreed to respect one another's internal and external independence, to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber, to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government are allowed to import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted, while separate Postal and Trade Conventions are to be concluded in the future.

CAPITAL, Kabul (about 200,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are Herat (20,000), Nazeri Sherif (20,000), and Khanabad (5,000).

British Envoy Extraordinary and Minister Plenipotentiary, Lieut. Col. F. H. Humphrys, C.I.E. (1922).

British Consul at Kandahar, Khan Sahib Mahmud Khan.

British Consul at Jalalabad, Khan Sahib Salyid Muhammad Shah.

MESOPOTAMIA AND THE PERSIAN GULF—For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun running. England and India still have the lion's share of the trade, the bulk of which is conducted by

Indians, who make Bombay their *entrepôt*. The Arabian shores are low lying deserts, the Persian coasts mountainous, at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The British Government have been entrusted with the mandate for Mesopotamia. Municipal Councils, representative divisional councils, and a Council of State have been set up. Emir Feisal was elected King in 1921. The port of Basra has been greatly developed and a large capital expenditure has been incurred on rail ways during the British occupation. *High Commr., Mesopotamia*, Sir Henry Dobbs, K.C.S.I., K.C.I.E. (See also p. 708).

Bahrain (capital, Manama) governed by Sheikh Sir Hamid Isa bin Ali al Khalifah, K.C.I.E., C.S.I., and under the protectorate of the Indian Government, is the largest of a group of islands half way up the Gulf, near the Arab coast (El Hasa). It is the headquarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export—rice, cotton goods, dates, sugar, and spices the chief imports. In 1919-20 the value of the exports was £245,000, and of the imports £1,414,000. The people (about 120,000) are Muhammadans. The Sheikh has been in treaty relations since 1820 with the Government of India who have a Political Agent at Bahrain. In 1880 he engaged not to make treaties with any other State.

The Sultan of Oman (Muscat) is in treaty relations with and subsidised by the Government of India, who have a Political Agent at his Court.

The independent tribes on the *Pirate* (Arab) Coast from Ras el Kheima to Oued are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the 'Trucial chiefs'. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1820 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India via Lingah and Bahrain.

Important caravan routes converge at *Koweit*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

Political Resident Persian Gulf, Lt. Col. A. P. Trevor, C.S.I., C.I.E. Rs. 4,000
Pol. Agent, Muscat Major M. A. E. Rao Rs. 1,750
Do, Koweit, Major J. C. More, D.S.O. Rs. 1,250
Do, Bahrain, Bt. Major C. K. Daly Rs. 1,200

PERSIA (q.v.) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is continuous with Persia and Afghanistan. The Trans Caspian Railway runs, *via* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kuakh on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways.

Another important strategic line connects Tashkent directly with Orenburg. The Amu Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul general at Kashgar (Lt-Col P. T. Etherton). Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) and Ladakh in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. The total trade in 1921-2 was about £605,000. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890 a trade mart was opened at Yatung, but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital Lhasa after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7) providing for the erection of boundary pillars between Sikkim and Tibet for three trade marts, with British and Tibetan agents, for unrestricted traffic by existing routes, and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of any foreign power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug. 1, 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions, but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec. 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1920. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1920, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1921, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1921, the

British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese, and Tibetan Governments met in conference at Simla in Oct., 1923, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initiated by the three representatives, but the Chinese Government have so far refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. The direct trade was about £1,605,000 in 1921-2. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Tèng yueh and Sumao, near the Burma frontier, are treaty "ports." There are British consuls at Tèng yueh and Yunnan fu.

SIAM (q.v.) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier mainly with Chiangmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. In 1921-2 the value of the total trade was about £544,000. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

PHYSIOGRAPHY.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. The boundaries between the Ungava district of the Labrador peninsula (transferred to Quebec in 1912) and the Labrador coast region of Newfoundland are expected to be settled shortly by a Judicial Commission.

Relief—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 13,068 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,539 feet, and Mount St. Elias, 18,000 feet, both in the Yukon.

Climate—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

GOVERNORS GENERAL OF CANADA SINCE 1867

Name.	Date of Appointment.	Date of Assumption of Office.
Viscount Monck	June 1, 1867	July 1, 1867
Sir John Young (Lord Lisgar)	Dec. 29, 1868	Feb. 2, 1869
Earl of Dufferin (Marquess of Dufferin and Ava)	May 22, 1872	June 25, 1872
Marquess of Lorne (Duke of Argyll)	Oct. 5, 1878	Nov. 25, 1878
Marquess of Lansdowne	Aug. 18, 1883	Oct. 23, 1883
Lord Stanley of Preston (Earl of Derby)	May 1, 1888	June 11, 1888
Earl of Aberdeen	May 22, 1893	Sept. 12, 1893
Earl of Minto	July 22, 1898	Nov. 12, 1898
Earl Grey	Sept. 26, 1904	Dec. 10, 1904
Field Marshal H. R. H. the Duke of Connaught and Strathearn, K.G.	Mar. 21, 1911	Oct. 13, 1911
Duke of Devonshire, P.C., K.G., G.C.M.G., G.C.V.O.	Aug. 8, 1926	Nov. 11, 1926
General Lord Byng of Vimy, G.C.B., K.C.M.G., M.V.O.	June 3, 1921	Aug. 21, 1921

GOVERNMENT

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

Governor-General and Staff

Governor-General and Commander-in-Chief, General Lord Byng of Vimy, GCB, GCMG, MVO (1921)

Secretary, A F Sladen, CMG, CVO \$10,000

Private Secretary, Major P K Hodgeson, OBE

Deputy of the Governor-General's Secretary, James F Crowdy, MVO, BA \$4,200

THE LEGISLATURE

Parliament consists of a Senate and a House of Commons. The Senate consists of 27 members, nominated for life by the Governor General, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 12 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 6 for Manitoba, 6 for Alberta, and 6 for Saskatchewan. Each nominee must be thirty years old, a resident in the province for which he is appointed, a natural born or naturalised subject of the King, and the owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is elected every five years at longest, and the present (Fourteenth) Parliament consists of 235 members, elected as follows: 82 for Ontario, 65 for Quebec, 16 for Nova Scotia, 11 for New Brunswick, 13 for Manitoba, 13 for British Columbia, 4 for Prince Edward Island, 12 for Alberta, 16 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural born or naturalised subjects of the King, no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker and twenty including the Speaker, form a quorum. Members of the Upper and Lower Houses receive \$4,000 per Session, with travelling expenses and deductions for non attendance.

The Houses of Parliament were destroyed by fire on Feb 6, 1916, the new buildings being started the same year, the foundation stone was laid by H R H the Duke of Connaught (Gov Gen), Sept 1, 1917, and the corner stone of the main tower by H R H the Prince of Wales Sept 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

The Senate

Speaker of the Senate, Hon Hewitt Rostock \$5,000

Clerk, W B Northrup M A, K C 6,000
Clerk Assistant, A Beauchesne, B L, K C 4,600
Sergeant-at-Arms, Lt Col W H Bowie 4,000

THE JUDICATURE

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other

Dominion Court, viz, the Exchequer Court of Canada is presided over by separate Judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts General Sessions and Division Courts. The duties of coroners are generally analogous to those in force in England as are also methods of civil and criminal procedure, while trial by jury prevails.

Supreme Court of Canada

Chief Justice of Canada Rt Hon Sir Louis Davies, K C M G \$15,000
Puisne Judges Hon J Idington Rt Hon Lyman Poole Duff Hon F A Anglin Hon Pierre B Mignault (and one vacancy) each 12,000
President of the Court of Exchequer for the Dominion (vacant) 10,000

Registrar of the Supreme Court, E. R Cameron, K C 6,000
Registrar of the Exchequer Court, C Morse, K C, D C L 5,000

DEFENCE

NOTE.—At the last session (1922) of the Canadian Parliament an Act was passed creating 'A Department of National Defence' combining the present Department of Militia and Defence the Department of the Naval Service and the Air Board.

Service in the Militia is universal and compulsory on all male citizens from 18 to 60. Service in the Active Militia is for 3 years with 8-16 days annual training. The Peace Effective consists of a Permanent Force of 2,674 officers and men, and 140,834 Active Militia. The War Effective consists of four classes: the unmarried men 18 to 30, the unmarried men 30 to 40, the married men 18 to 45, and, finally, the remaining male citizens of 18 to 60.

Expeditionary Force.—The number enlisted up to the cessation of hostilities was 595,441 of whom 118,025 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at \$2,000,000,000.

OFFICIALS

Secretary, A B Goldwyer Lewis, B A

Royal Canadian Navy

There are Naval stations on the Atlantic and Pacific, and H M C S. Aurora (cruiser) and Patriot and Patrician (t.b.d) are maintained and used as training ships for the Royal Canadian Navy.

The live stock included 3,648,871 horses, 9,719 896 cattle, 3,263,525 sheep, 3,915,648 swine, and 43 422,991 poultry.
In dairy produce the total Dominion output of butter was 125,501,900 lb, valued at \$23,453,222, and of cheese 125,821,126 lb, valued at \$21,822,760.
Fur Farming—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were 1,266 fur farms in the Dominion in 1922, 277 of which were fox farms, the remainder being divided

between mink, raccoon, marten skunk, fisher, Karakul sheep, beaver, and muskrat. The total number of animals on the farms at the end of 1922 was 30,782, valued at \$5,864,153, born in captivity, 19,199, sold from farms, 4,339, value \$938,918 pelts sold, 6,024, value \$598,607, the total sale for live animals and pelts being \$1,537,525 as compared to \$1,415,231 in 1921. About 42 per cent of the industry is situated in Prince Edward Island.

Fisheries—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch in the calendar year 1921 was \$34,931,935 as against \$49,241,339 in 1920 and \$60,250,544 in 1918, the banner year of the fishery harvest. The capital invested in vessels, &c., engaged in catching operations in 1921 was \$26,353,321 and the number of men employed 55,157. The capital invested in canning and curing establishments is \$19,411,990, and the number employed 14,104.

Lumbering—The total value of production including (a) logging operations and (b) mill operations, was in 1920 \$268,821,482, and in 1921 \$259,569,753, a decrease of approximately 35 per cent. The principal items of production in 1921 were sawn lumber \$82,488,582 shingles \$10,729,096 and laths \$4,188,121. The logs cut were valued at \$46,513,623, the pulpwood production at \$52,900,872, and railroad ties \$14,571,270.

Industrial Statistics—Industrial establishments of all kinds in 1920 had a total capital of \$3,433,276,053, the value of the products being \$4,024,739,453. These industries employed 685,349 hands, the total pay roll for whom was \$816,055,139.

Minerals—The metals produced in 1922 were valued as follows: Gold 1263,364 oz (\$26,115,050) silver, 18,581,439 oz (\$12,576,758) copper, 42,879,818 lb (\$1,111,111), nickel, 17,597,123 lb (\$6,158,993) lead, 93,307,171 lb (\$5,817,702) cobalt, 569,060 lb (\$1,852,370) zinc 56,200,000 lb (\$3,217,536) asbestos, 163,706 tons (\$5,552,723) coal, 15,157,431 tons (\$65,518,497) gypsum 559,265 tons (\$2,160,898) salt 181,794 tons (\$1,628,323) natural gas, 14,682,651 Mcu ft (\$6,846,501). The total value of the mineral output, 1922 was \$184,297,222.

Canals—In 1922 the vessels passing through the canals of the Dominion numbered 29,922 of 14,224 315 tons. There are six systems under control of the Dominion Government with a total waterway of 1 594 miles (of which 117 miles are constructed canals).

Posts and Telegraphs—There were 12,247 post-offices in 1920. The net postal revenue was

* Not including capital expenditure on Intercolonial P.E.I. and National Transcontinental Railways.

\$26,554,528 in 1921-22. In 1922 there were 3,761 rural mail delivery routes on which were carried 198,729 boxes. The length of Government telegraph lines in 1921 was 23,278 miles, and of other lines 18,864 miles. In 1922-23 there were 11,882 wireless and radio stations, 9,966 of which were private receiving stations. There are long distance stations at Vancouver, B.C. with a range of 7,000 nautical miles, at Glace Bay, Cape Breton and at Montreal with a range of 3,000 nautical miles. Messages handled by radio telegraph stations during 1922-23 numbered 311 722. Twenty nine Government steamers are equipped with wireless, having a range of 100 to 1,000 miles, or an average of 172 miles.

On December 31 1921, there were 902,090 telephones and 2 268,271 miles of telephone wire in use. The earnings amounted to \$36,986,913, and the expenses to \$30,080 035.

Shipping—The sea going and lake mercantile marine of Canada on Dec 31 1921, consisted of 4,204 sailing vessels and 4 366 steamers (total net tonnage, 1 016 778). The sea going vessels entered and cleared at Canadian ports in 1920 were (Canadian 14 929 (6 861 202 tons) British 4,239 (to 471 403 tons), Korean 17 170 (to 261 865 tons) total tonnage 27,594 470. The number of vessels employed in the coasting trade of Canada was 63 131, with a registered tonnage of 27,895 879.

Banking—There were 17 chartered banks on Dec 30, 1922 with 4 621 branches, with liabilities of \$2 364 822 657 and assets of \$2,638 776,483. The total of deposits in Canadian chartered banks at the end of 1922 was \$2 220 997 030. The balance of undrawn deposits in the Post Office and Government savings banks on March 31, 1922, was \$34,666 834.

Provinces of the Dominion

ONTARIO

Area and Population—The Province of Ontario contains a total area of 407,862 sq miles with a population (1921) of 2,933,662, an increase since the last census (1911) of 406,370. Of the total population 1,226,379 live in towns, townships, and villages, and 1,707,283 in cities.

Government—The Government is vested in a Lieutenant Governor and a Legislative Assembly of 122 members elected for four years which meets every year at Toronto. Executive Council of eleven members (one without portfolio) act as the Ministry of the Province.

Agriculture and Live Stock—The total area is 234,163,200 acres, and in 1921 the area of cleared land was 14,961,176 acres, of which 10,075,073 acres were under crops. The total value of the agricultural production in 1921 was \$441,418,000. Cheese factories produced 103,423,666 lb of cheese valued at \$28,656,380 and creameries made 42,817,304 lb of butter valued at \$16,421,778. In 1921 there were 694,237 horses, 2,890,113 cattle, 1,081,828 sheep, 1,553,807 pigs, and 12,458,206 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement with free land and financial assistance for returned soldiers both Imperial and Canadian. There is always a demand for farm workers.

The Ordinary Receipts of the Provincial Government for 1920 were \$25,981,517, and the Ordinary Expenditure \$25,880,843.

Lign Products—The total production of log and timber products and wood pulp amounted in 1920 to \$43,147,777 or 25 per cent of the lumber and pulp trade of the whole Dominion.

Manufactures—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1919 was \$1,737,536,546. There were in 1919, 322,300 employees, an invested capital of \$1,583,161,271 as against \$715,531,839 in 1915, and an annual wage bill of \$336,578,269.

Minerals—Ontario is the leading mineral Province in the Dominion the output in 1921 being \$54,505,770. The principal metals are silver, \$6,900,000 nickel, \$6,752,615 and copper, \$1,780,948.

Hydro-Electric Power—One of the greatest Government-owned public utility organisations in the world is the Ontario Hydro Electric Commission, supplying light and power from Niagara and elsewhere. These works are now developing 400,000 horse power and a further development of 300,000 horse power is now under construction.

Principal Cities—CAPITAL, TORONTO, population (1921) 521,893 with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity. Hamilton the "Birmingham of Canada" (141,151), Ottawa, the Federal capital (107,845), with a large lumber trade and woodenware manufactures, London (60,959), Brantford (29,440), Kingston (21,723), Peterborough (20,094), Windsor (38,591), Fort William (20,541), Kitchener (21,763), Guelph (28,128), St. Catharines (19,892), Sault Ste. Marie (21,092).

QUEBEC

Area and Population—The Province of Quebec contains an area estimated at 765,834 square miles, with a population (1921) of 2,261,299, an increase since the last Census of 355,427. In 1921 the Province was enlarged by 321,726 square miles by the addition of the greater part of the Labrador Peninsula, known as Ungava (or New Quebec).

Government—The Government of the Province is vested in a Lieutenant Governor, the Council of Ministers, a Legislative Council consisting of

21 members appointed for life, and a Legislative Assembly of 66 members elected for five years to represent the same number of electoral districts in the Province.

Lieutenant Governor, Rt. Hon Sir Charles Fitzpatrick, G.C.M.G. born 1851 (1916) \$50,000
Aide-de-Camp, Lt. Col. J. D. Papineau hon. Executive.

Prime Minister and President of the Council & Attorney General Hon L. A. Taschereau \$12,000

Quebec—Hons Art. Lachance (Chief Justice), P. A. Choquette

Agent-General for Quebec in England, Lt. Col. J. P. Pelletier, 38 Kingsway, W.C. 2.

Finance—The actual revenue for the year 1922 was \$21,624,641 and the actual expenditure \$20,290,275. The Debt is stated at \$27,126,250.

Production and Industry—The total value of manufactured products in 1920 was \$1,250,262,564 (1921, \$2,277,000,000), the principal manufacturing centres being (1920) Montreal (\$293,061,750),

Quebec (\$245,221,279), Sherbrooke (\$225,518,024), Lachine (\$25,682,251), and Hull (\$26,623,648). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 130,000,000 acres, of which 45,000,000 are under licence to cut timber. The wood pulp industry is assuming great importance. Several large factories (44) have recently been built and the value of the output, which was only \$25,516,683 at the Census of 1921, was, in 1922, \$25,645,067. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from \$4 to \$6 per acre including dwelling house outbuildings and fencing while unimproved lands may be bought from the Government at 60 cents per acre and the purchase money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1922 was 7,978,030 acres. In 1922 the value of dairy industry products was cheese 39,679,901 lb (valued at \$6,307,581), and butter 52,529,344 lb (valued at \$18,210,304).

Education—The Superintendent of Instruction, assisted by a Council of 44 members, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1912, 7,732 schools with 548,253 scholars, including the high and superior schools, and 14 normal schools supported by the State. There are also Schools of Agriculture, Commercial and Classical Schools, and four Universities—two Protestant (McGill College, Montreal, and Bishop's College, Lennoxville) and two Roman Catholic (Laval University, Quebec, and Montreal University).

Principal Cities—(CAPITAL) QUEBEC (population 95,193), historical city visited annually by thousands of tourists and the great seaport town of Canada and Montreal (population, 618,506) the commercial metropolis and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (24,117), Sherbrooke (23,515), Trois Rivières (22,367), Verdun (25,001).

NOVA SCOTIA

Area and Population—NOVA SCOTIA is a peninsula between 43° 25'–47° N lat. and 59° 40'–66° 25' W long. and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 523,877, an increase since the last census of 31,499 persons.

Government—The Government is administered by a Lieutenant Governor, aided by an Executive Council, a Legislative Council of 21 members, and a Legislative Assembly of 43 members.

Lieut. Governor, Hon MacCallum Grant \$9,000

Executive

Premier and Minister of Public Works and Mines, Hon E. E. Armstrong \$7,000

Attorney Gen., Hon W J O Hearn \$6,000

Judge Vice Admiralty Court, Hon H Mellish 1,000

Agent General for Nova Scotia in England
 John Howard, 33 St James Square, S W 1 8,000

Agriculture and Live Stock—About 10,000,000 acres are fit for tillage and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1922 there were 5,265,000 acres of land occupied, of about 2,093,623 acres were under crop, 3,166,822 acres in pasture and partially wooded lands, of which about 70,000 acres were in gardens and orchards. Hay is the most important crop of the Province. Fruit is extensively cultivated, and Nova Scotia apples yielded a crop of 1,600,000 barrels in 1922 the principal fruit belt being the Annapolis Valley. The products of the farms in 1922 was valued at \$34,318,500. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at \$20 per 100 acres, or 20 cents per acre for any additional quantity. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax.

Manufactures—In 1920 the total value of the manufactures was \$123,359,099, as against \$70,866,796 in 1915. The capital invested was \$148,194,530, and 26,342 hands were employed.

Fisheries—The total value of the fish marketed in 1922 was \$12,720,000, and the number of persons employed was 32,000.

Minerals—The mineral product in 1922 was valued at \$27,574,000; the coal deposits are extensive and are estimated to last for 500 years. 4,642,196 gross tons were produced in 1922. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines Cape Breton.

Principal Cuts—CAPITAL, HALIFAX (population 28,372) one of the terminals of the Intercolonial Railway Branch of the Canadian National Railways, with a magnificent harbour, is one of the principal winter ports of Canada, and the entrepôt of a large trade with the West Indies and South America. A shipyard for the building of large ocean going steamers is one of the leading industries. Other towns are Sydney (22,545), Glace Bay (17,007).

CAPE BRETON ISLAND

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles with a population of 131,495, inhabitants. The chief city, Sydney (pop. 22,545) on the eastern coast has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The plate mill recently erected will supply the steel plates required by the various steel shipbuilding plants of Canada. The Canadian Government Railway connects the island with the mainland.

NEW BRUNSWICK

Area and Population—NEW BRUNSWICK is situated between 45°-48° N lat and 63° 47'-69° W long, and comprises an area of 27,085 square miles with a population in 1921 of 287,876, an increase since the last census of 35,027 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government—The Government is administered by a Lieutenant Governor, assisted by an Executive Council and a Legislative Assembly of 48 members elected by the people.

Lieutenant Governor, Hon William F Todd, LL.D. \$9,000

Executive

Premier and Minister of Public Works, Hon Peter J Veniot 3,000

Minister of Lands and Mines, Hon C W Robinson 3,500

Provincial Secretary and Treasurer, Hon. J E Hetherington 3,000

Attorney Gen, Hon James P Byrne 3,500

Agriculture, Hon D W Messersau 3,000

Health, Hon W F Roberts, M D 3,000

Without Portfolio, Hon F Magee, Hon. J E Michaud

Deputy Provincial Secretary and Kings Printer, R W L Tibbits 2,500

Clerk Executive Council, Miles B. Dixon.

Speaker, Legislative Assembly, Hon A. Allison.

Judges, A S White, W C H. Grimmer each 9,000

King's Bench Division

Chief Justice, Harrison A. McKeown 10,000
Judges, J. E. Barry, O. S. Crockett each 9,000
 William B. Chandler

Court of Vice Admiralty

Judge, Hon. Sir J. Douglas Hazen \$1,000
Court of Divorce and Matrimonial Causes
Judge, Hon. O. S. Crockett 500

Finance—The ordinary receipts for 1922 were \$3,117,445, and the ordinary expenditure \$3,045,869.

Agriculture and Live Stock—The total land area is 18,663,000 acres, of which 7,205,817 acres were under field crops in 1922. The total value of the field crops in 1922 was \$32,000,000. The live stock (1922) included 303,115 cattle, 236,031 sheep, 85,260 pigs and 70,958 horses. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon cod, mackerel herring and shad. The capital invested in this industry is upwards of \$5,000,000, giving employment to 22,000 persons. In 1922 the cheese factories in operation produced 918,496 lb., value \$145,866, and the creameries 1,218,966 lb. of butter (\$445,673).

Manufactures—The value of the total output of manufactured goods in 1920 was \$117,755,129 against \$25,422,302 in 1910, the principal manufacturing centre being St. John (\$40,263,494). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found also silver, lead, antimony, copper, iron manganese, and other valuable minerals in considerable quantities.

Principal Cities—CAPITAL, FREDERICTON population (1921), 8,114. St. John (pop. 47,166) is one of the principal winter ports of Canada and is connected by C. P. R. and Intercolonial Railways with Montreal, Moncton (17,488).

MANITOBA.

Area and Population—Manitoba, formerly the Red River Settlement, is situated in about the centre of the continent, between 49°–60° N. lat. and 95°–102° W. long., with a total area of 251,832 square miles and a population (1921 Census) of 610,118, an increase since the last census of 148,724.

Government—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 6 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of \$1,500.

Lieut. Governor, Hon. Sir James A. M. Aikins (1 Aug., 1926) \$9,000

Executive

Prime Minister and Minister of Education, Hon. John Bracken \$6,400
Provincial Treasurer and Minister of Telephones, Hon. F. M. Black 6,600
Provincial Secretary and Municipal Commissioner, Hon. D. L. McLeod 5,400
Attorney General, Hon. R. W. Craig 5,400
Public Works, Hon. W. E. Clubb 5,400
Agriculture, Hon. Neil Cameron 5,400

*The Judiciary**Court of Appeal*—

Chief Justice, Hon. W. E. Perdue \$10,000
Justice Judges, Hon. C. P. Fullerton, J. E. Prendergast, E. M. Dennistoun, C. E. L., W. H. Trueman each 9,000

King's Bench—

Chief Justice, Hon. T. G. Mathers 10,000
Justice Judges, Hon. D. A. Macdonald, A. C. Galt, J. P. Curran, A. K. Dysart, J. E. Adamson each 9,000

Finance—The ordinary receipts of the provincial government for 1922 (9 months only, owing to change in financial year), were \$7,148,141 and the expenditures \$8,494,323, debt \$66,331,121.

Agriculture and Live Stock—The total land area in Manitoba is 148,432,640 acres of which 6,858,240 acres were cultivated in 1922. The soil is fertile and productive (wheat yield, 1922, 60,050,880 bushels from 3,091,330 acres, or 19.42 bushels per acre), immigration is invited and encouraged and liberal grants of land are made to settlers. The value of the crops in 1922 was \$98,401,000. The live stock included 374,632 horses, 740,740 cattle, 122,863 sheep, 235,214 swine, 3,612,208 poultry. The cheese output was 225,000 lb., valued at \$37,687, and 19,736,945 lb. of butter (\$5,714,876).

Manufactures—The total value of the manufactured products in 1920 was \$168,363,914 as against \$12,927,439 in 1900. The capital invested in manufacturing enterprises amounted to \$118,451,724 and the hands employed 28,787. In 1922 the Province had 4,428 miles of railway.

Principal Cities—CAPITAL, WINNIPEG population (1921) 179,087, the third largest city in Canada. Brandon (15,397), St. Boniface (12,821), Portage La Prairie (6,766).

BRITISH COLUMBIA.

Area and Population—British Columbia has a total area estimated at 355,855 square miles with a population (Census of 1921) of 524,582, the Census of 1911 gave 392,480 (251,619 males and 140,861 females), an increase since the former Census of 213,823.

Government—The Government consists of a Lieutenant Governor and an Executive Council, together with a Legislative Assembly of 47 members.

Lieut. Governor, Hon. W. C. Nichol \$9,000
Private Sec., H. J. S. Muskett 2,400

Executive

Premier, President of Council & Minister of Industries, Hon. John Oliver \$9,000
Provincial Sec., Minister of Education and Railways, Hon. J. D. MacLean M.D. 7,300
Minister of Finance, Hon. John Hart 7,500
Minister of Agriculture, Hon. E. D. Barrow 7,500
Minister of Lands, Hon. T. D. Pattullo 7,500
Attorney General & Labour, Hon. A. M. Manson, K.C. 7,500
Minister of Public Works, Hon. W. H. Rutherford, M.D. 7,500
Minister of Mines and Commissioner of Fisheries, Hon. William Sloan 7,500
Speaker, Legislative Assembly, Hon. F. A. Pauline

The Judiciary

<i>Court of Appeal—Chief Justice, Hon J A Macdonald</i>	\$10,000

<i>Supreme Court—Chief Justice, Hon Gordon Hunter</i>	10,000
<i>Puisne Judges, Hons D Murphy F B Gregory, Aulay Morrison D A Macdonald</i>	each 9,000
<i>Local Judge in Admiralty Hon Archer Martin</i>	1,000

Agent General in London Hon F C Wade K C (1918), British Columbia House, 1 Re-ent Street S W 1

Finances—The ordinary receipts of the provincial government in 1920 were \$13,861,603 and the expenditure \$11,568,003.

Agriculture and Live Stock—The field crops of British Columbia were valued in 1921 at \$20,448,000, which was a falling off from previous years. The fruit crop in 1921, however, was the heaviest on record, 4000 growers harvesting \$35,000,000. The live stock included 44,600 horses, 261,400 cattle, 51,500 sheep, 41,500 swine and 1,447,000 poultry. The butter output totalled 2,818,500 lbs. valued at \$1,277,409, and the cheese 422,000 lbs. worth \$80,540.

Production and Industry—The total value of the output of manufactures in 1921 was \$243,500,000 (1917 \$68,500,000) the principal manufacturing centres being Vancouver and Victoria. The yield of the other industries in 1921 was minerals \$38,045,000, lumber \$54,394,000, fisheries (1920), \$22,329,261. There are extensive coal measures and a vast and compact area of merchantable timber. The mines have produced over \$700,000,000, and are still in the early stages of development. Only one tenth of the available agricultural and fruit lands is at present settled, and there are miles of pulpwood as yet unexploited. There are undeveloped deposits of magnetic and hematite iron. The climate is healthful and temperate. Shipbuilding (1918) 145,000 tons valued at \$25,000,000. The principal exports are fish, coal, gold, silver, minerals, and timber.

Principal Cities—CAPITAL, VICTORIA. Population 1921 38,727. Other centres are Vancouver (117,217), New Westminster (14,500), Nanaimo (9,088).

PRINCE EDWARD ISLAND

Area and Population—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 45°-47° N lat and 62°-64° 30' W long. It is about 130 miles in length, and from 4 to 34 miles in breadth. Its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1921) 28,615 (47,069 males and 46,659 females in 1921), a decrease since the last census of 5,113 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1765, but afterwards restored it, they seized it again, however, during the Seven Years War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government—The Government is vested in a Lieutenant Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people 15 as Councillors (with a property qualification) and 15 as Assembly men (on manhood suffrage).

Lieut. Governor, Hon Murdoch MacKinnon (1919) \$7,000

Executive

<i>Premier and Attorney Gen., Hon James D Stewart</i>	\$4,000
<i>Prov. Sec and Treas. and Commr. of Agriculture Hon John H Myers</i>	2,000
<i>Commissioner of Public Works, Hon John A McDonald</i>	2,000
<i>Without Portfolio Hons J A McNeill A P Frowse W J McMillan Leonard Wood Murdoch Kennedy A F Arsenault</i>	

Speaker, Legislative Assembly (vacant)

Departmental Officers

<i>Provincial Auditor John Anderson</i>	\$1,800
<i>Sup. of Education R H Rogers</i>	2,000
<i>Asst. Sec and Treas. and Clerk of Exec Council Arthur Newbery I S O</i>	2,200
<i>Sec. Public Works L B McMillan</i>	1,650
<i>Registrar of Deeds and Commissioner of Public Lands Francis Koughan</i>	1,200

The Judiciary

<i>Chief Justice Hon John A Matheson</i>	\$10,000
<i>Judge of Vice Admiralty Court, William S Stewart</i>	
<i>Assistant Judges Hon Francis L Haszard, Hon Aubin P Arsenault</i>	each 9,000

Agriculture and Live Stock—The value of the field crops in 1922 was estimated at \$20,889,800. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared and improved farms can be bought at from \$20 to \$60 an acre (including buildings) according to condition and locality. The breeding of silver black foxes in captivity is an established and profitable industry. There are about 360 fox ranches conducted by incorporated companies and private partnerships or individuals. The live stock included 29,830 horses, 143,442 cattle, 105,703 sheep, 37,351 pigs and 845,673 poultry.

Manufactures—The total value of the manufactures in 1922 was \$4,234,132, against \$2,326,708 in 1900.

Principal Cities—CAPITAL, CHARLOTTETOWN (Pop. 12,347), on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Summerside (3,230), Souris (1,100), and George town (882).

ALBERTA

Area and Population—The Province of Alberta has an estimated area of 255,285 square miles including about 2,500 square miles of water, with a population (1921) of 522,464, an increase since the 1921 census of 214,159.

Government—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 61 members, elected for five years,

representing as electoral districts into which the Province is divided. The Executive Council consists of eight members

Lieut.-Gov., Hon. R. G. Brett, LL.D. (1915) \$9,000

Executive

Premier, Treasurer and Provincial Secretary, Hon. Herbert Greenfield \$8,500
Attorney General, Hon. J. E. Brownlee 6,000
Public Works, Hon. Alex. Ross 6,000
Municipal Affairs and Public Health, Hon. R. G. Reid 6,000

Clerk of the Executive Council, J. D. Hunt 4,800

Speaker of the Legislative Assembly, Hon. O. L. Macpherson \$2,500

The Judicature

Chief Justice, Hon. Horace Harvey \$10,000
Puisne Judges, Hon. D. L. Scott (C.J., Appellate Div.), \$10,000
 Hon. C. A. Stuart, N. Du B. Beck, W. C. Simons, W. L. Walsh, J. D. Hyndman, W. C. Ives, M. S. McCarthy, I. M. Tweedie, A. H. Clarke each 9,000

Agriculture and Live Stock—There is a succession of wheatfields, homesteads, villages and towns and settlers from the U.S., Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops 1922 was 10,005,609 acres. The Department of Agriculture in the Provincial Government has established nine Demonstration farms at different points, and on three of these are free schools of agriculture. Free homesteads are available for thousands of settlers in desirable localities. The value of the field crops in 1922 was estimated at \$100,542,204, wheat, \$50,597,868, oats, \$15,600,287, hay and clover, \$3,750,400, grain hay, \$21,015,960, potatoes, \$2,360,984, barley, \$2,534,845. The live stock included 862,386 horses, 1,635,042 cattle, 420,366 sheep, and 623,188 swine. The creamery butter made totalled 25,477,070 lb, valued at \$5,126,843, and cheese 931,992 lb, valued at \$183,860.

Manufactures—The total value of the output in 1920 was \$28,608,556, against \$1,313,375 in 1900, the principal manufacturing centres being Calgary (\$37,214,566) and Edmonton (\$31,939,693).

CAPITAL, EDMONTON Population, 58,821, Calgary (63,300). Lethbridge, Medicine Hat, Red Deer, and Westaskiwin are the principal cities of the Province.

SASKATCHEWAN

Area and Population—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west, and has an area of 257,700 square miles, the population at the Census of 1921 being 727,520, an increase of 209,673 persons since the Census of 1911.

Government—The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of seven members. The Province is divided into 16 electoral districts.

Lieutenant-Governor, Hon. H. W. Newlands, K.C. \$3,200

Premier, President of Council, Provincial Treasurer, and Minister of Railways, Hon. C. A. Dunning \$7,500
Minister of Agriculture and Municipal Affairs, Hon. C. M. Hamilton 6,000
Public Works and Telephones, Hon. A. P. McNab 6,000
Provincial Secretary and Public Health, Hon. J. M. Ulrich 6,000
Attorney General and Minister in Charge of Bureau of Child Protection, Hon. J. A. Cross 6,000
Minister of Highways and Minister in Charge of Bureau of Labour and Industries, Hon. J. G. Gardener 6,000
Minister of Education, Bureau of Publications, and King's Printer, Hon. S. J. Latta 6,000
Speaker of the Legislative Assembly, Hon. George A. Scott

The Judicature

Chief Justice, Court of Appeal, Hon. Sir Frederick W. G. Haultain born 1827 \$10,000
Puisne Judges, Hon. J. H. Lamont, W. A. Turgeon, J. McKay and W. M. Martin each 9,000
Ch. Justice, King's Bench, Hon. J. T. Brown 10,000
Puisne Judges, Hon. H. Y. MacDonald, H. V. Bigelow, J. F. L. Embury, C. M. G. E. Taylor, D. MacLean and P. E. McKenzie each 9,000

Agriculture and Live Stock—Saskatchewan is the largest wheat producing province of the Dominion and one of the most productive grain areas in the world. In 1922 wheat yield total 250,000,000 bushels. The approximate value of agricultural products in 1922 was \$505,318,966, grain crops, \$287,270,600, field crops, \$9,606,600, farm products, \$32,850,880, and live stock, \$175,590,966. The live stock included 1,124,409 horses and mules, 1,612,786 cattle, 191,937 sheep, and 563,069 swine.

Industries—The capital invested in manufacturing enterprises in 1920 was \$40,224,939, and the value of the manufactured products \$72,705,003.

CAPITAL, REGINA Population (1921), 34,430. Other large centres are Saskatoon (25,740), Moose Jaw (19,300), and Prince Albert (7,550).

TERRITORIES

THE YUKON TERRITORY was constituted a separate political unit in 1898. It is governed by a Gold Commissioner and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1921 was 4,127 (2,819 males and 1,338 females). Mining is the chief industry. The gold output for the year ending March 31, 1923, was \$1,042,536.

Gold Commissioner, Geo. P. Mackenzie \$6,500
Legal Adviser, etc., John Black
Disbursing Officer, G. A. Jeckell
Judge, Hon. C. D. Macaulay

THE NORTH WEST TERRITORIES, as now constituted, have been divided into 3 Provincial Districts, Mackenzie, Keewatin, and Franklin. They are governed by a Commissioner and 6 Councillors appointed by the Governor in Council. The area of the Territories is 1,242,224 square miles. Population in 1921, 7,982.

Commissioner, N.W.T., W. W. Cory, C.M.G.
Deputy do., R. A. Gibson
Public Administrator (Mackenzie), H. Milton Martin (Edmonton).

Newfoundland.

PHYSIOGRAPHY

The Island of Newfoundland is situated between $46^{\circ} 37' - 51^{\circ} 37' N$ latitude and $52^{\circ} 44' - 59^{\circ} 30' W$ longitude, on the north east side of the Gulf of St Lawrence and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N), Cape Race (S E), and Cape Ray (S W) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tuffs (round hills) interspersed with lakes, rivers, and swamps but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80° .

GOVERNMENT

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497 the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583 the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown aided by an Executive Council, with a Legislature of two houses. The *Legislative Council* is appointed by the Crown and consists of 24 members, the *House of Assembly* consists of 36 members, elected by the people, every male British subject aged 21 being entitled to the franchise.

GOVERNOR.

Governor, His Excellency Sir William Lamont
Allardice, K.C.M.G. (1922) \$15,000
Private Sec., Capt A G B Goodfellow
Aide-de-Camp, Major Wilberforce Bell, M.C.

THE MINISTRY (July 29, 1923)

Premier & Minister of Justice, Hon William B. Warren K.C. \$8,000
Colonial Secretary, Hon William W Halfyard 4,000
Education, Hon Arthur Barnes Ph.D. 4,000
Finance & Customs, Hon William H Cave 4,000
Agriculture & Mines, Hon Joseph Downey 4,000
Posts & Telegraphs, Hon Matthew Hawco 4,000
Without Portfolio, Hon Sir Wm B Coaker, Sir Marmaduke Winter, Samuel J. Foote, Hon George Shea

Not in the Cabinet

Minister of Public Works, Archibald W Piccott 4,000
Minister of Marine & Fisheries, George Grimes 4,000

LEGISLATURE.

The *Legislative Council* consists of not more than 24 members, appointed for life the *House of Assembly* of 36 members, elected by the people for 4 years.

President of the Legislative Council, Hon James D. Ryan \$2,000
Speaker of the House of Assembly, Hon Harry A. Winter 750

JUDICATURE

Chief Justice, Hon Sir W H Horwood \$8,000
 Assist Judges, Hon G M Johnson, Hon
 J M Kent each 7,000
 Registrar, Rt. Hon Sir W F Lloyd, P.C.,
 K.C.M.G., D.C.L., K.C.

DEFENCE

Newfoundland contributed 22,922 men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

EDUCATION

Education is denominational, and is assisted by Government. Primary and Secondary schools were attended in 1922 by 55,152 pupils. The Government grants in 1922 amounted to \$824,495.

RELIGION

At the Census of 1911 and 1921 the following statistics were obtained —

Religion	1911	1921
Roman Catholics	81,177	86,478
Church of England	78,616	84,498
Methodists	68,045	74,334
Presbyterians	1,876	1,875
Salvation Army	10,141	13,051
Various	2,767	2,072

FINANCE

The revenue, expenditure and debt of Newfoundland for the six years ended June 30, 1921 are stated as under (\$1 at par = 4s 6d or \$4 86 = £1 sterling) —

Year	Revenue.	Expenditure	Public Debt
	\$	\$	\$
1913-14	3,920,176	3,920,178	30,450,765
1916-17	5,206,648	4,554,691	34,489,765
1917-18	5,528,540	6,197,676	35,445,785
1918-19	9,535,725	6,766,389	44,032,786
1919-20	10,597,562	9,247,007	43,033,036
1920-21	8,438,040	10,951,489	49,033,067
1921-22	8,269,681	9,127,543	55,030,027

EXTERNAL TRADE

The external trade of the island for the five years ending June 30, 1921, is stated as follows —

Year	Imports	Exports	Total
	\$	\$	\$
1913-14	15,193,726	15,134,543	30,328,269
1918-19	33,277,184	36,784,616	70,061,800
1919-20	40,533,368	34,865,438	75,398,806
1920-21	28,909,727	22,441,267	51,350,994
1921-22	18,209,853	19,478,417	37,688,270

The trade was chiefly distributed in 1921-22 as under —

Country	Imports from.	Exports to
United Kingdom	\$2,026,218	\$4,866,821
United States	6,127,958	1,911,749
Canada	9,077,168	1,260,225
Portugal	54,583	2,077,774
Spain	115,550	2,668,010

The principal imports are flour, textiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, copper, copper ore, iron pyrites, and other minerals; the total value of the fishery products in 1921-22 was upwards of \$14,448,726.

PRODUCTION AND INDUSTRY

The inhabitants are chiefly located on the coast line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer, a large proportion of which is exported to South America—and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the rail ways have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. A valuable discovery of copper has been made at Little Bay, about 200 miles from St John's.

COMMUNICATIONS

Railways—There were 604 miles of railway open in 1919. The trans insular line runs to Port aux Basques, via Exploits River and Bay of Islands, with branch connections to Placentia, Bonaville Bay de Verde, Hearts Content, Trepassy, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay).

Posts and Telegraphs—There were 847 post offices in 1921, dealing with 4,000,000 letters and post cards, 3,600,000 newspapers and books, and 253,655 parcels. There are 4,600 miles of telegraph line and 665 of telephone wire.

Shipping—On Dec. 31, 1919, the Mercantile Marine of Newfoundland consisted of 326 sailing vessels of 149,197 tons, and 126 steam vessels of 22,205 tons. In 1918 the tonnage of vessels entered and cleared at Newfoundland ports was 1,711,668 tons, of which 1,315,704 tons were British.

TOWNS

The CAPITAL, ST JOHN'S (population 38,645), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,825), Bonaville (4,052), Carbonear (3,320), and Twillingate (3,217).

HIGH COMMISSIONER

High Commissioner in London (vacant)
 Secretary and Acting High Commissioner,
 Capt Victor Gordon, 58 Victoria Street, S.W. 1

LABRADOR

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits (or to Cape Wolstenholme), on the north, the boundaries between Quebec and Labrador being a matter of keen controversy which is expected to come up for settlement before the Judicial Committee of the Privy Council. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Great Falls of Labrador, on the Hamilton River. The inhabitants of this 850 miles of coastal America are mainly Eskimos engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killiney. Pulp and paper mills have been founded at Sandwich Bay and Hamilton Inlet to deal with the almost inexhaustible supply of timber.

The Commonwealth of Australia.

PHYSIOGRAPHY

The Australian Commonwealth includes the Continent of Australia and the Island of Tasmania

Australia (mainland) is probably the oldest of all land surfaces in either hemisphere, and may be regarded as the largest island or the smallest of the Continents, being surrounded by the following waters — *North*, the Timor and Arafura Seas and Torres Strait, *East*, Pacific Ocean, *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean, and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between $10^{\circ} 41' - 39^{\circ} 8'$ South latitude and $113^{\circ} 9' - 153^{\circ} 39'$ East longitude, the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area. The former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora, the latter a broken coast-line with estuaries rather than rivers and but little inland water communication. The whole continent is roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast for 1,200 miles at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity, the strike of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N to S, and the tertiary formation to be found in the N, S, and W develops in the S.F. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.I. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.I. part of the island, which fall into the sea on the south coast on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin, on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy, on the north, the Drysdale, Ord, Victoria, and Daly, and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt, the scarcity of the natural water supply has been, however, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

Climate — The seasons commence about March 21 (Autumn), June 21 (Winter), Sept 22 (Spring), and Dec 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Executive Council of nine Ministers of State and such honorary Ministers who may be appointed thereto. The Constitution rests on the fundamental law of March 16, 1898, ratified by the Imperial Parliament on July 9, 1900, and the Commonwealth was inaugurated on Jan 1, 1901. Under the Constitution the Federal Government possesses limited and enumerated powers as surrendered by the federating States, the residuum of legislative power being in the Governments of the various States. Briefly stated, the enumerated powers include authority over commerce and navigation, finance, defence, posts and telegraphs, census and statistics, lighthouses and quarantine, and conciliation and arbitration in extra-State industrial disputes, with authority to assume the control of railways, marriage and divorce, emigration and immigration, currency and banking, and weights and measures.

THE LEGISLATURE

The Federal Parliament consists of a Senate and a House of Representatives. The Senate contains 36 members, six from each of the Original States elected for six years by universal suffrage. The House of Representatives similarly elected for a maximum of three years contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives 1921 is made up of 27 for New South Wales 21 for Victoria, 20 from Queensland 7 from South Australia and 5 each from Tasmania and Western Australia, and consists of members of the Liberal, Labour, and Country Parties. Members of the Upper and Lower Houses receive £1,000 per annum, with travelling expenses.

President of the Senate, Hon Thomas Givens
Speaker, House of Representatives, Rt Hon. Alexander Watt, P C

THE JUDICATURE

There is a Federal High Court with a Chief Justice and 6 Judges having original and appellate jurisdiction, subordinate to the final Appeal Court of the Empire the Judicial Committee of the Privy Council.

<i>Chief Justice</i> , Rt Hon Sir Adrian Knox, P C K C M G	£3,500
<i>Judges</i> , Hon Isaac Alfred Isaacs Hon Henry Bournes Higgins Hon Frank Gavan Duffy, Hon. Charles Powers, Hon George Edward Rich, Hon. Hayden Erskine Starke	each 3,000
<i>Arbitration Court, President</i> , Hon Charles Powers. <i>Deputy Presidents</i> , Hon. Sir John Quick, Noel Augustin Webb	

DEFENCE

On the 31st December, 1922, the training strength of the Military Force was 37,154, considerable reductions having been made as the result of the Washington Conference of November, 1921. The administration of rifle

clubs is now under civil control, members totalled 41,753 at December 31, 1922. The expenditure on Defence (excluding War expenditure) in 1922-23 was £4,854,141. The total expenditure on defence including war expenditure, was estimated at £47,160,475.

Navy

Under the *Australian Defence Scheme*, Australia provides and maintains certain ships of war, which will form an Australian squadron of the Royal Navy, under the command of a Commonwealth officer in time of peace, and an integral part of the Eastern Fleet of the Royal Navy in time of war. Ships of the Royal Australian Navy are known as *H M A S* (His Majesty's Australian Ship), and served with the Royal Naval forces throughout the war. The Australian fleet consists of the *Australia*, *Melbourne* (flag ship), *Sydney*, *Brisbane*, *Ade laide*, 3 sloops, 11 destroyers and several auxiliaries. *H M A S Sydney* destroyed the German cruiser *Emden* at Cocos Island on Nov. 9, 1914. The personnel of the fleet is mainly Australian in character although still supplemented to some extent by Imperial officers and men. The sea-going forces on May 15, 1923, consisted of approximately 370 officers and 3,420 petty officers and men. There is also a *P A N* Brigade composed of members of the Citizen Naval forces, a section of the Commonwealth Compulsory Military Training System. The Washington Conference of 1921 has had a marked effect on Naval Defence schemes, as all warship building and naval base construction has been suspended, and the ships in commission have been reduced from 25 to 13.

Army

By a Federal Law of 1902 military training is compulsory on all male citizens between the ages of 12 and 26—in *Cadet Corps* 12-18 and *Citizen Soldiers* 20-26, with short periods of training in the field. The *Peace Effective* is about 110,000 of all ranks, the *War Establishment* about 127,000 upwards. Australia had, up to the end of the Great War, enlisted no fewer than 416,809 men, fully equipped for service in the New South Wales, 164,030 Victoria, 112,399 Queensland, 57,705 South Australia, 34,959 West Australia, 32,211 Tasmania, 15,485. The Australian forces who are unrivalled as mounted infantry, behaved with the greatest gallantry whenever engaged with the enemy. To December 31, 1919, their record of Honours and Decorations was 116 65, GCMG 3, KCMG 9, CMG 149, KCB 9, CB 42, KBE 3, CBE 33, OBE 125, MBE 99, DSO 619, RVO 2, EEC 147, MC 2,366, DCM 1,753, MM. 9,926, MSM. 1,176, AM 3, DFC 52, AFO 16, APM 2, and 1,032 foreign decorations. The *Total Casualties* in the A.I.F. from the outbreak of the War to July 31, 1920, were killed, 59,342, wounded, 166,819, sick, 87,257, not specified, 212—total, 314,336.

The *total cost of the War* to the Commonwealth Government from August, 1914, to the end of June, 1922, was £473,390,950, of which amount upwards of £107,558,123 was charged against revenue.

Air

In 1912 approval was given for the establishment, as part of the Army organization, of a Central Flying School for the training of aeroplane pilots. In 1920 it was resolved to establish an Australian Air Force. The permanent strength of the Air Force as at June 30, 1923, was 49 officers

and 206 airmen. The sum of £43,997 was provided on the 1922-23 Estimates for Air Force and Civil Aviation purposes.

FEDERAL FINANCE

Years	Revenue	Expenditure	Balance repayable to States
	£	£	£
1917-18	36,839,868	30,499,494	6,340,374
1918-19	44,716,918	38,262,585	6,454,333
1919-20	52,783,102	46,062,610	6,720,492
1920-21	65,517,608	58,677,445	6,840,163
1921-22	64,913,085	65,118,265	7,000,000
1922-23	59,500,000	55,000,000	7,000,000

The Customs and Excise Revenue is collected by the Commonwealth and partly repaid to the States at the rate of 25s per head of the population.

DEBT

The Commonwealth has now undertaken responsibility for the Northern Territory Debt and the Port Augusta Coodanadatta Railway Debt whose combined amounts were £3,951,746 at June 30, 1922. The other State Debts remain at the charge of the State Governments. The total of the Commonwealth Public Debt on June 30, 1922, was £426,070,509, including a War Loan from the British Government of £51,453,288. Adding the indebtedness of the States to that of the Federal Government the total public debts of Australia amounted (June 30, 1922) to about £593,000,000, or about £160 per head of the population.

Banking—On June 30, 1922, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £295,713,833, and the Australian assets to £302,660,301. At the close of the financial year 1921-22 there were 3,413,280 depositors in the Savings Banks, the amount of deposits being £162,273,233.

PRODUCTION AND INDUSTRY

The estimated values of the products of Australia in 1920-21 and 1921-22 were—

	1920-21	1921-22
Agricultural	£112,801,000	£81,800,000
Pastoral	86,882,000	69,254,000
Dairying, &c	52,613,000	44,417,000
Forests and Fisheries	10,490,000	10,373,000
Mining	21,613,000	19,977,000
Manufacturing	109,435,000	180,751,000
	£393,824,000	£346,668,000

Agriculture and Live Stock—The total land area of Australia is estimated at 1,902,722,840 acres, of which 15,357,024 were under cultivation in 1921-22.

Crop	Acreage	Produce Bushels
Wheat	9,719,042	129,082,806
Oats	733,406	12,147,433
Barley	298,910	6,086,585
Maize	305,186	7,840,438
Hay	2,694,519	3,902,189
Sugar Cane	197,293	1,432,890
		Tons
Live Stock	1920	1921
Sheep	77,897,555	82,206,470
Cattle	13,499,737	14,441,209
Horses	2,415,510	2,430,126
Pigs	704,466	982,985

In addition the following amounts were spent from 1920-21 to 1922-23: 1921-22, £25,098,595; 1922-23, £24,608,700; 1923-24, £27,357,321; and 1924-25, £27,222,222.

In 1922 Australia produced 631,514,435 lb of wool (as in the grease), against 547,502,715 lb in 1921, 567,071,340 lb of butter in 1921, 32,633,003 lb of cheese in 1921, and 58,614,459 lb of bacon and hams in 1921.

Minerals and Minerals—In 1922 the value of gold produced was £3,539,860 (in 1921, £4,018,685), silver and lead, £1,539,992 (1921), copper, £803,957 (1921), tin £418,418 (1921), coal, £11,014,831 (1921), the value of all minerals produced in 1921 being £19,977,384.

Manufactures—In 1921-22 there were in Australia 18,023 industrial establishments, employing 395,425 hands, wages paid amounted to £68,050,861 the value of plant and machinery, lands and buildings, £145,408,138 of materials used, £190,410,265, value added by manufacture, £129,921,500, and total value of final output, £320,331,765.

Labour Statistics—In 1922 there were 387 Trade Unions with 102,938 members of whom 86,052 were women. The estimated total number of employed persons over 20 years of age in 1922 was 1,041,915 males and 449,388 females.

The number of unemployed members of trade unions has averaged 9.3 per cent. The average cost of food, groceries and housing combined, in the six capital towns was 5.7 per cent less in 1922 than in 1921, and 60 per cent more than in 1921. Wholesale prices declined during 1922 by 7.6 per cent, but were 75.8 per cent higher than in 1921. Average nominal weekly rates of wages fell from 6s 6d in 1921 to 5s 6d in 1922 but owing to the lower cost of living effective wages were in 1922 12.6 per cent higher than in 1921. During 1922, 445 industrial disputes occurred, involving 652 workers and entailing an estimated loss of £751,509 in wages.

EXTERNAL TRADE

The Imports and Exports of Australia for the years 1915-16-1921-22 are as follows the value of gold and silver coin and bullion being included in the totals—

Year	Imports	Exports	Total
1916-17	£76,228,679	£97,955,482	£174,184,161
1917-18	62,334,449	81,429,221	143,763,670
1918-19	102,335,159	113,963,976	216,299,135
1919-20	98,974,292	149,823,509	248,797,801
1920-21	163,801,826	132,158,912	295,960,738
1921-22	103,066,436	127,846,535	230,912,971

Total trade of 1915-16 £30 13s 9d per head, 1916-17 £35 8s 3d per head, 1917-18 £28 17s 0d per head, 1918-19 £42 11s 4d per head, 1919-20 £46 18s 1d per head, 1920-21 £54 14s 14d per head and 1921-22 £41 18s 2d.

Exchange of trade, 1921-22—

Country	Imports	Exports
United Kingdom	£53,000,000	£57,743,000
Germany	86,000	4,004,000
United States	12,853,000	8,314,000
Belgium	951,000	5,016,000
France	2,732,000	8,701,000

Tin (Ingots)	705	1,730
	497	284

The share of the various States in the external trade of Australia in 1921-22 was as under—

State	Imports	Exports*
New South Wales	£43,321,478	£48,012,511
Victoria	36,352,056	34,644,122
Queensland*	6,639,249	17,573,103
South Australia	9,047,222	14,747,260
Western Australia	4,308,122	10,797,000
Tasmania*	1,385,958	2,067,443
Northern Territory	12,115	5,036

COMMUNICATIONS

Railways—The total length of Government (and private) railways open at June 30, 1922, is stated as follows, the private lines being included in the totals and shown in parentheses—

State	Miles open
New South Wales	5,475 (359)
Victoria	4,375 (58)
Queensland	7,064 (1,265)
South Australia	3,487 (53)
Western Australia	4,867 (675)
Tasmania	873 (236)
Federal Capital Territory	5 —
Northern Territory	199 —

Total 26,345 (2,848)

The gross earnings of all Government lines in 1921-22 were £38,194,630, working expenses £29,817,970, and net earnings £8,376,660, being at the rate of 2s 10d. per train mile, and representing a return on the total cost (£244,353,232) of 3.43 per cent., as against 2.53 per cent. in 1919-20.

A scheme for the conversion of the Melbourne suburban system to electric traction has been

* Goods transferred from one State to another for transshipment to an overseas country are counted as an export from the State whence they were finally despatched from Australia, thus, much of the produce of Queensland is credited to New South Wales and of Tasmania to Victoria.

completed About 143 route miles was involved in this scheme

The great trans-continental railway from West to East, linking up Kalgoorlie in Western Australia with Port Augusta in Spencer's Gulf, a distance of 1,021 miles, was completed in 1917, and the first mail train made a successful run through on 22 October of that year. A scheme is under consideration to connect north and south by a line from Katherine River (Northern Territory) to Oodnadatta (S. Aust.), a distance of 1,021 miles.

Tramways—There are 628 miles of tramways in Australia, 456 miles of which are of electric, 98 of steam, 46 of cable and 28 of horse traction. The several Governments control 424 miles municipal authorities, 110 miles, and the remaining 94 miles are operated by private companies and individuals. The principal gauge in use is 4 ft 8½ inch (496 miles) 101 miles are at 3 ft 6 inch and the remainder, 5 ft 3 inch and 2 ft 0 inch gauge.

Shipping—The entrances and clearances of vessels engaged in overseas trade at the various Australian ports in the 6 years 1917-1922 was as follows (tonnage in brackets) —

Year	Entered	Cleared
1916-17	1 486 (3 851 292)	1 500 (3 843 150)
1917-18	1 079 (2 456 757)	1 118 (2 574 993)
1918-19	1 350 (3 239 060)	1 264 (2 941 426)
1919-20	1 476 (4 041 544)	1 505 (4 044 963)
1920-21	1 830 (4 758 916)	1 844 (4 744 102)
1921-22	1 567 (4 560 381)	1 544 (4 520 897)

Of the vessels entered (1921-22), 1,224 were under the British flag (Australia 346 of 589,175 tons U.K., 729 of 2,802,487 tons N.Z., 80 of 103,471 tons other British, 60 of 124,900 tons) and 343 under foreign flags (Dutch 42, of 134,662 tons French, 40, of 69,033 tons Japanese, 72, of 218,564 tons, Norwegian, 54, of 123,218 tons, United States, 52, of 139,686 tons other foreign, 82 of 237,095 tons).

Shipping entering the ports of the capital cities during 1921-22 was: Sydney 8,482 vessels of 7,541,361 tons, Melbourne 4,530 (2,608,013), Brisbane 972 (2,215,273) Adelaide (exclusive of coastwise) 898 (3,040,222) Fremantle 697 (2,528,464) and Hobart 331 (522,746).

Posts and Telegraphs—In year ended June 30, 1922, there were 8,381 post and receiving offices, dealing with 778,057,333 letters &c., there were 6,642 telegraph stations, with 247,636 miles of wire transmitting and receiving 21,077,443 cable and telegrams in 1921-22. At the end of year, 1921-22, 258,477 Telephones were connected with 2,793 telephone exchanges. 220 636,629 "local" and 13,968 169 "trunk line" calls were recorded for the year.

CAPITAL.

CAPITAL—CANBERRA, in the Federal District, transferred to the Commonwealth by the State of New South Wales on Jan 1, 1921, is to be laid out as the capital of the Commonwealth, £250,000 being provided for that purpose in the Budget of 1922-23. Meanwhile the seat of Government is MELBOURNE.

Territories

NORTHERN TERRITORY

The Northern Territory occupies the centre of the Australian continent between 120°-136° East longitude as far as 26° South latitude, and its administration was taken over by the Commonwealth on Jan 1, 1911.

The area is estimated at 523,620 sq. miles. The population on March 31, 1923, was 3,590 (exclusive of full blood aboriginals).

Part of the country is desert, but large portions of land are suitable for tropical and semi-tropical agriculture, and the Federal Government grants suitable areas rent free for the original settler's lifetime or for 21 years (whichever shall be longer). The staple industry is pastoral, cattle and horses do well south of the 15th parallel. The chief grasses are Mitchell and Flinders. Also pigs thrive well, but sheep raising has not proved the success it once promised to be. Many grants have been taken up, and a considerable area has been settled and improved. Extensive meat freezing works have been erected near Darwin, which, under normal conditions will greatly enhance the value of locally bred cattle, which hitherto have been driven to other States for disposal. Owing to adverse circumstances, the meat works have been closed since 1921. For the months of April to September the climate is delightful. From October to December it is hot and humid. From January to March is the wet season, when travelling becomes extremely difficult. There are thousands of square miles of first class pasturage which will one day carry millions of cattle. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable from 40 to 100 miles from their entrance for boats drawing 4 feet. Pearl fishing is carried on round the coast the shell being of good quality. There are considerable mineral resources, gold, silver, lead and tin being indicated, and when communications are opened up, the industry will become important.

The only railway is from Darwin to Emungall (200 miles). A further extension to the head of the Roper River (80 miles) will be proceeded with in the near future, the permanent survey having been completed. The policy of the present Government is to link up the Territory with the other States by means of a trans-continental railway.

Darwin, the seat of Government, occupies an elevated site 80 feet above high water mark, overlooking Port Darwin, one of the finest harbours in Australia, and contains the offices of the Administrator and officials of the Territory. The cable owned by the Eastern Extension Company lands at Darwin from Singapore. The town is healthy and free from malaria. The Darwin Botanical Gardens are about 1½ miles from the town.

Administrator of Northern Territory
Frederic Charles Urquhart £1,750

Government Secretary, Charles Barnett Story 700

Director of Lands and Mines Dept., E. C. Playford 650

Judge Supreme Court, D. A. Roberts 1,000

Special Magistrate, E. Copley Playford

PAPUA

The Territory of Papua was placed under the authority of the Commonwealth of Australia in 1906. The Territory of Papua comprises a part of the New Guinea mainland situated between the meridians of 141° and 150°50' E. longitude, and between the 5th and 12th parallels of South latitude, also the Iriobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Lousiades the Conflict Group, and the Laughlin Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of seven members who, with three non-official members, form the Legislative Council. The White population in 1922 was 1,104. It is not possible to make a reliable estimate of the number of natives owing to the fact that much of the country is unexplored. The official estimate is 250,000. In 1922, 60,314 acres were under crops (46 515 coconuts, 7,465 rubber and 5,822 sisal hemp).

Generally speaking Papua is a mountainous country towards the Netherlands border the mountains subside and give place to large areas of low country, which becomes swampy along the coast. The N.E. shores are mostly bold, but the great ranges are not so conspicuous. The islands are mostly mountainous. Owing to heavy rainfall Papua is well watered and possesses a large number of streams. The best known rivers are Fly (650 miles long and navigable by steam launch for 500 miles) and Purari. The climate is favourable to the cultivation of all tropical products.

CAPITAL, Port Moresby

TERRITORY OF NEW GUINEA

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 80° S, and in longitude between 140° E and 150° E. It consists of Kaiser Wilhelm Land, Bismarck Archipelago, and the two northernmost Solomon Islands (Bougainville, and Buka), covering in all a total area of 92,000 square miles. Kaiser Wilhelm Land, which was the German share of the New Guinea Mainland, is 70,000 square miles in area. The principal river is the Sepik which is navigable for 250 miles. The Bismarck Archipelago has an area of 18,000 square miles, the best known islands being New Britain, New Ireland, New Hanover, Duke of York Islands and the Admiralty Group. The Solomon Islands are 4,300 miles in area.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1921-22 there were 273,272 acres under crops (coconuts 168,060 rubber, 3,000). The White population in 1921 was 1,288, the Native population in 1921 was 187,517 (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made).

Australia has full power of administration and legislation over the Territory as an integral part of the Commonwealth, and may apply to it her own laws. The mandatory must promote to the utmost the material and moral well being and the social progress of the inhabitants. The natives must not be militarily trained, and no naval and military bases are to be established. The mandate was received in April 1921, and civil administration was proclaimed to commence from 9th May, 1921.

NORFOLK ISLAND

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length, by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 5,328 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in April, 1921, was 717.

Administrator, Lieut.-Gen. J. W. Parnell, C.M.G., O.B.E.

President Exec. Council, A. Randall

States of the Commonwealth

I. NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S lat and 141st and 154th meridians of E long, and comprises an area of 310,372 square miles—i.e., more than five times the area of England and Wales and nearly three times the size of the United Kingdom

POPULATION

Census.	Males	Females	Total
1881	411,149	340,319	751,468
1891	612,562	515,672	1,128,234
1901	712,456	646,677	1,359,133
1911	858,850	789,896	1,648,746
1921	1,071,943	1,029,349	2,101,292

Births, Deaths, and Marriages

Year	Births	Deaths	Marriages
1914	53,615	18,777	17,353
1919	48,528	26,385	15,818
1920	53,974	20,961	20,183
1921	54,634	20,034	18,518
1922	55,214	19,178	17,583

Vital Statistics—Annual rate per 1,000 of population in 1922: Births 25.67, Deaths 8.91, Marriages 8.17. Deaths under 1 year per 1,000 births, 54.01.

Religions

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,301. Roman Catholic 482,575. Presbyterian 219,932. Methodist 182,977. Congregational (Independent) 22,235. Baptist 24,722. Salvation Army 9,490, and Hebrew 10,150.

PHYSIOGRAPHY

Relief—The Eastern or coastal district is traversed by a mountain range known as the Great Dividing Range the names distinguishing the various portions of the Range in N S W being (from N to S) Macpherson, New England, Liverpool, Main or Blue Mountain, Cullarin, Gourcock, Monaro and Munlong Ranges—the highest points being Mount Kosciusko, 7,328 feet, and Townsend 7,266 feet.

Rivers—The eastern or coastal district is watered by the Tweed, Brunswick, Richmond, Clarence, Bellinger, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Murrumbidgee, Bega, Towamba and Snowy Rivers. The western portion of the country is not so well watered but immense reservoirs are being constructed for irrigation purposes and many artesian bores have been laid down. The Darling and the Murrumbidgee are both tributaries of the Murray, which has a total length of 1,600 miles, 1,200 miles forming part of the boundary between the States of New South Wales and Victoria.

Climate—The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63° F., the mean temperature in the shade for the north coast is 66° to 69°, south coast 54° to 63°, northern tableland 50° to 59°, southern tableland 45° to 57°. Western slopes, the mean annual temperature ranges from

67° in the north to 60° in the south. Western Division from 63° to 69°.

GOVERNMENT

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

Signal Engineer, Cyril B Byles	900	Members of the Legislative Council (84 in August 1923), are appointed by the Crown for life. Members are not entitled to remuneration but travel free on the State railways and tramways. The Legislative Assembly consists of 90 members representing 24 electoral districts. Each member of the Legislative Assembly receives £500 per annum and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Several women have since contested seats, but none has been elected. With few exceptions all natural born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district are entitled to the franchise, which was conferred upon women in 1902 and was first exercised by them in 1904. The Proportional Voting System is in force. The ballot papers contain the names of candidates in alphabetical order and voters are required to mark each candidate in the order of preference. At the last State General Election in March, 1922, of 636,666 male electors enrolled and qualified to vote in contested electorates 456,949, or 73.3, voted, and similarly of 614,362 female electors 408,555 or 66.5, voted.

(The several District Court Judges are also Chairmen of the Courts of Quarter Sessions and Judges of the Court of Review within their respective districts, and Judges of the Court of Marine Inquiry.)

Children's Courts and Fair Rent Courts have also been established

Crown Solicitor, J. V. Tillett **£1,800**

EDUCATION

Education—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at State primary schools. The total enrolment in 1922 in 3,213 State schools was 326,320 and the average daily attendance 254,382. The State expenditure on Education (exclusive of Technical Education) was £3,733,831. The University of Sydney, with which 5 colleges are affiliated, including the Women's College, was incorporated in 1851, and had 3,005 students (2,293 male and 712 female) in 1922. The total number of students at State Technical classes numbered 21,328, and 1,094 attended at the State Agricultural College and Farms. In addition to the State schools there were in 1922, 682 private colleges and schools, with 80,125 scholars, exclusive of many business and shorthand schools and schools at Charitable Institutions, etc.

FINANCE

The Revenue and Expenditure and Public Debt of New South Wales for the five years ended June 30 1923, are stated as under—

Year	Revenue including Advances repaid	Expenditure including Transfers and Advances	Public Debt
1919	23,448,166	23,833,308	147,174,526
1920	26,429,496	30,110,073	154,776,028
1921	34,671,796	34,476,892	164,136,492
1922	32,427,820	34,666,521	176,674,367
1923	34,426,994	28,971,106	283,871,126

To the total revenue during 1922-23, Railways and Tramways contributed £19,145,082, and other Business Undertakings, £3,527,246. A sum of £2,632,036—equal to £142 6d per head of the population—was returned to the State by the Commonwealth Government, in lieu of Customs and Excise revenue collected by the latter. Revenue from Taxation amounted to £7,429,017. Included in the total Expenditure were the following—Interest upon Public Debt and Special Deposits, £1,604,687 (exclusive of £6,122,519 charged to Business Undertakings), Public Instruction, £4,085,177, Business Undertakings, £15,530,763. Similar details for 1922-23 are not yet available.

Banking, &c.—There were (March 31, 1923) 15 banks within N.S.W. with total assets, £137,146,842, including advances, £109,402,561, coin, bullion, and Australian Government Notes, £21,374,758, and liabilities, £113,547,716, including deposits, £111,234,853. The savings bank deposits on March 31, 1923, amounted to £61,847,306, representing 1,233,051 depositors. The amount assured in Life Assurance Societies in New South Wales in 1922 was £72,065,605 Ordinary, and £11,711,732 Industrial, being £30 12 3d and £5 20s per head of population. The membership of Friendly Societies was 209,132 and the funds at June 30, 1922 were £2,578,937. Members of Trade Unions numbered 263,487, the funds of 213 Unions at Dec 31, 1922 being £199,715.

Shipping—Excluding coastal trade, 3,062 vessels entered ports of N.S.W. during 1922-23, the net tonnage being 8,408,127, the clearances were 3,028 vessels of 8,222,384 net tonnage. Sydney is the chief port. In 1922-23 the shipping entries, including coastal, were 8,377 vessels of 8,813,432 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and six patent ships.

Railways—The railways and tramways of New South Wales, with the exception of a few short lines representing about 158 miles are controlled by the State. At June 30, 1923, the mileage of the State railways open for traffic was 5,318, the capital cost amounted to £89,276,871, and the net earnings for the year 1922-23 to £4,571,359, or 4s 2½d per train mile. There were also 225 miles of State tramways, the capital cost being £9,975,031, and the net earnings £305,808, or 4d per train mile.

The population to each mile of railway line open was 405, and the area 58 square miles.

Posts, Telegraphs and Telephones—The postal, telegraphic, and telephonic services are administered by the Federal Government. In 1922-23 there were 2,568 post offices in New South Wales. The postal matter carried included 240,000,479 letters and postcards, 66,381,106 newspapers, 24,951,225 books, packets and parcels, and 8,112,522 telegrams, including 522,003 cablegrams, were received and despatched. The telephone line connections numbered 80,422.

TRADE

The overseas imports into New South Wales during 1922-23 were valued at £55,020,160, and the overseas exports at £42,591,224.

PRODUCTION AND INDUSTRY

Agriculture is one of the principal industries of the State, 4,442,848 acres, excluding areas double-cropped, were under cultivation during

this year ended June 30, 1922, producing 42,567,000 bushels of wheat, 3,976,300 bushels of maize, 1,169,900 bushels of oats, besides other kinds of grain, with 57,835 tons of potatoes and 8,386 cwt. of dried leaf tobacco. Sugar cane to the extent of 149,474 tons was crushed and 667,105 gallons of wine, and 1,135,693 bushels of citrus fruit and 433,533 cases of bananas, almost every kind of fruit and vegetable is grown. The area sown for wheat for the year 1922-23 was 3,907,360 acres, including 336,958 acres which were fed off. The wheat yield was 28,594,000 bushels of grain and 655,500 tons of hay.

Land Alienation—The total extent of land alienated and in process of alienation on June 30, 1922 was 64,365,346 acres, while the area of land leased for pastoral occupation and home and mining, and other purposes at the same date was 112,037,120 acres.

Live Stock—The great plains are admirably adapted for sheep farming and several breeds of sheep including the celebrated merino which was introduced in 1797. On June 30, 1922 there were 669,800 horses, 974,087 dairy cows, 2,572,443 all other cattle, 37,177,402 sheep, 383,669 swine, 36,190 goats, and 1,384 camels. In 1921-22 285,418,000 lb (stated as in the grease) of wool were produced in addition to 630,380 cwt of tallow, 100,672,581 lb butter, 7,367,057 lb cheese, and 20,422,876 lb bacon and lard. During 1921-22 there were 137,700 persons permanently employed in rural occupations, 120,900 being males, and 16,800 females.

Value of Rural Industries—The agricultural industry was valued in 1921-22 at £20,261,000 dairying, and farm yard produce at £12,914,000 and pastoral industry at £23,657,000, a total of £56,832.

Forests, Fisheries and Trapping—The value of these industries in 1921-22 was £3,628,000 and 6,900 persons were employed.

Mining Industry—The goldfields were discovered in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, aluminite, wolfram, scheelite, molybdenite, cobalt, marble and kerosene shale diamonds, rubies, opals and other precious stones are also found. The total value of minerals won during 1922 was £12,958,008, coal accounting for £8,507,946, silver, silver lead and ore £2,379,396, and gold £107,139. The value of machinery at all mines was £8,143,540 and tools used, £214,559. The value of land, buildings, etc., was £3,704,782. The mining industry gave employment to 26,209 miners during the year.

Manufacturing Industry—In 1921-22 there were 6,356 manufacturing works and the employees numbered 148,876, of whom 122,362 were males and 26,514 females. The amount of £26,783,242 being paid in salaries and wages. Male workers received on an average £218 or 6d and females £91 12s 4d. The capital value of land, buildings and fixtures amounted to £32,052,303, and of machinery, tools and plant £33,222,530. The machinery in use represented 559,106 h.p., including steam, 358,799 h.p., gas 18,830 h.p., electricity, 178,419 h.p., water, 104 h.p., oil, 2,945 h.p. The value of goods manufactured or work done was £132,820,065, materials used, £28,090,366, and fuel consumed, £2,983,730, the production, i.e., value added to raw materials, was £45,745,939.

The principal products of the factories during 1921-22 were—

	Quantity	Value at Works
Saw milling native logs	243,593,242 sup. ft.	£1,900,612
Bacon and ham	18,544,007 lb	650,828
Butter	38,694,451 lb	1,648,112
Biscuits	39,463,841 lb	1,268,200
Jams and preserves	27,666,990 lb	792,604
Pickles and sauces	8,348,207 pints	272,961
Flour	336,572 tons	5,159,752
Brass and Pollard	127,952 tons	925,257
Milk condensed &c	7,395,696 lb	247,172
Raw sugar (cane)	356,126 cwt.	536,197
Beer and stout (on which excise was paid)	24,756,286 gal.	2,478,946
Acetated waters &c	5,301,151 doz.	863,810
Tobacco cigars and cigarettes	12,446,499 lb	4,366,314
Boots shoes and slippers	4,425,249 pairs	2,663,189
Bricks	200,667,385 no.	962,504
Cement	163,059 tons	736,841
Gas	8,330,822 ind. cub. ft.	1,774,757
Electric light and power	374,398,576 units	2,022,866
Wool scoured (Greasy Wool) (skins)	18,650,56 lb	272,767
Twine and Twills	13,767,027 lb	1,366,738
Twine and Cloth	5,514,267 yards	606,196
Meat tinned	6,748,321 lb	170,751
Soap	356,082 cwt.	898,012
Tallow	361,749 cwt.	530,397
Leather	17,821,000 lb	1,447,004
Iron	336,619 tons	2,962,221
Lig. Iron	66,241 tons	

The production of steel during the year 1922 was steel, 31,183 tons, rails, 90,545 tons, bars and sections, 73,494 tons, plates, 80 tons, billets, 16,888 tons.

The control of the fisheries of the State is in the hands of the Board to supervise the industry, and a Commission administers the Forestry Act. The value of production of fisheries, forests and trapping in 1921-22, was £3,628,000. The total value of all primary industries in 1921-22 was £71,705,000, manufacturing £46,745,000, making a total for all industries £118,451,000 which is equal to £55 13s 4d per head of population.

INDUSTRIAL ARBITRATION

Matters relating to the conditions of industrial employment in New South Wales are determined by a Court of Industrial Arbitration, which is empowered to make awards fixing the lowest rates of wages, the hours and times of work, rates of payment for overtime, &c., and the proportionate number of apprentices and improvers in any industry, and granting preference of employment to members of any trade or industrial union of employees. Industrial agreements between employers and employees may be enforced as an award. Awards were formerly made by subsidiary tribunals known as Wages or Industrial Boards, constituted for each industry, but their functions are now absorbed by Judges of the Industrial Arbitration Court. At June 30, 1922, there were 326 awards and 107 industrial agreements in force. The industrial laws provide for the registration of industrial unions of employers and employees, and for mediation in industrial disputes. Under certain conditions strikes may be recognised as lawful, except strikes by Government employees, or by persons engaged in military or naval contracts, or by employees in an industry of which the conditions are regulated by award or industrial agreement, but when an award has been in operation for twelve months, the employees may decide by secret ballot to withdraw from its conditions.

When a strike occurs or is contemplated, the Minister for Labour may order a secret ballot to

ascertain if the majority of the employees favour a strike

A "Board of Trade of New South Wales" was constituted in 1918 with extensive powers regarding industrial matters, one of its functions being to declare the rate of living wage for adult employees of each sex, to be used as a standard in determining rates of wages

A Declaration made April 10 1923 fixed the Living Wage for adult employees as £3 19s per week for males and £2 10s per week for females

Industrial matters which extend beyond the limits of one State are determined by the Commonwealth Court of Arbitration and Conciliation

LOCAL GOVERNMENT

For purposes of Local Government with the exception of an area of 125 447 square miles in the sparsely populated western division, the State is divided into 125 municipalities and 136 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land to float loans, to acquire land and works to construct and maintain streets, jetties, wharfs, &c to make regulations regarding cattle slaughtering maintenance of public places, traffic street and road lighting, public health and safety management of parks, &c

The basis of rating is almost wholly on the unimproved capital value of land, which in 1921 was £117,621 6s for municipalities including the city of Sydney, and £130,834,456, for shires

Gross Income

	Municipalities	Shires
1915	£2,902 56s	£1 066,121
1919	3 766,839	1 289 761
1920	4,282 06s	1 355,416
1921	5,063 677	1,547 601

Gross Expenditure

	Municipalities	Shires
1915	£2,738 836	£1,018,870
1919	3,670 715	1,307,998
1920	4,187 301	1,325,748
1921	5,079,601	1,557,388

TOWNS

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 128 miles, the depth of water at the Heads is not less than 20 feet and at the wharves from 30 to 50 feet. There are extensive plants for loading and coaling ships, and for storing and loading grain in bulk. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The total area of water in the port is 14,824 acres, of which 3,000 acres have a depth of from 25 feet to 160 feet the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains 135½ miles of streets, and a population of 209,970 (Dec. 1922) or, including suburbs, 2,037 miles of streets, and a population of 925,900. In addition to the Government buildings, there are the branch Royal Mint, the University, National Art Gallery, museums, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, and numerous churches. The parks within the metropolitan area are 4,774 acres in extent, in addition to which the National Park measures 33,747 acres and Kuring-gai Chase 35,322 acres

Kunnell, 248 acres and Parramatta Park, 222 acres. Other large towns are Newcastle (with suburbs), 87,470, Broken Hill, 22,700, Bathurst, 9,350, Bankstown, 12,460, Armidale, 5,380, Fairfield, 5,760, Dubbs, 5,700, Goulburn, 11,730, Granville, 14,370, Parramatta 15,050, Lismore 9,220, Maitland 12,360, Grafton and South Grafton 6,060, Albury, 7,970, Tamworth, 7,310, Lithgow 12,940, Wagga Wagga, 8,200, Orange, 7,570, Auburn, 14,770, Wollongong 6,980, Katoomba, 9,670, Lidscombe, 12,040, Liverpool, 6,370

Approximate time in transmission of mails from London to Sydney, 32 days

DEPENDENCY

PORT HOWE ISLAND (436 miles north east of Sydney) Lat 31° 33' 4" S, Long 159° 4' 16" E Pop. Dec. 1921, 111. The island is of volcanic origin and Mount Gower reaches an altitude of 280 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control Office, Chief Secretary's Department, Sydney

II—VICTORIA

The State of Victoria comprises the south east corner of Australia at that part where its territory projects farthest into the southern latitudes it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 400 miles, its greatest breadth is about 250 miles and its extent of coast line nearly 600 miles, the entire area being 87,884 square miles

POPULATION

Year	Males	Females	Total
1917	671,008	746,231	1,417,239
1918	684,167	753,266	1,437,433
1919	739,872	783,369	1,523,241
1920	753,710	774,441	1,528,151
1921	784,995	785,798	1,570,793
1922	788,686	801,637	1,590,323

Increase of the People

Year	Births	Deaths	Marriages
1917	33 035	14,555	9,506
1918	31 601	15,177	9,156
1919	31,621	19,370	11 706
1920	36,214	16 822	14,898
1921	35 594	16 166	13,676
1922	36 288	15 155	12,996

Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1921 numbered 601,809, "Protestants" 18,636, Presbyterians 657,072, Methodists 183,829, Baptists 32,305, Church of Christ 22,250, Independents 15,893, and Roman Catholics 322,565.

PHYSIOGRAPHY

Relief—The *Australian Alps* and the *Great Dividing Range* pass through the centre of the state, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well wooded valleys.

Rivers—The Murray River forms the northern boundary of the State, and has many Victorian

tributaries The capital stands upon the Yarra Yarra, which rises in the southern slopes of the Dividing Range

Climate—The mean temperature over a period of 67 years was 58.4° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 136, and the average yearly rainfall was 25.65 inches

GOVERNMENT

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor appointed by the Crown, aided by an Executive Council of 12 members

GOVERNOR.

Governor of the State of Victoria Rt Hon
The Earl of Strathmore KCMG, CB
CVO, CBE, VD (born 1862) (1920) £5,000
Aide-de-Camp, Capt. Keppel Palmer
Lieut. Governor, Hon. Sir William Hill
Irvine KCMG (1918)

THE MINISTRY (September, 1923)

Premier and Minister of Water Supply
and Minister in charge of the Wheat
Scheme Hon. H. S. W. Lawson M.L.A. £1,600
President of the Board of Land and Works,
Commissioner of Crown Lands and Sur-
vey, and Minister of Immigration Hon.
John Allan M.L.A. 1,200
Treasurer, Hon. Sir W. M. McPherson,
KBE M.L.A. 1,200
Attorney General and Solicitor General
Hon. Sir Arthur Robinson, KCMG,
M.L.C. 1,200
Minister of Public Instruction, Minister of
Forests and Minister of Labour, Hon.
Sir Alexander Peacock KCMG, M.L.A. 1,200
Chief Sec. and Minister of Public Health,
Hon. S. S. Argyle, M.R.C.S., M.L.A. 1,200
Minister of Railways and of Agriculture,
Hon. F. E. Old M.L.A. 1,200
Commissioner of Public Works and Minister
of Mines, Hon. G. I. Goudie, M.L.C. 1,200
Without Portfolio Hon. H. Isaac Cohen,
K.C., M.L.C. Hon. J. Gordon M.L.A.,
Hon. M. E. Wettehull, M.L.A., Hon.
W. P. Crockett M.L.C. uny

HEADS OF DEPARTMENTS

Public Serv. Commissioner C. S. McPherson
£1,250
Auditor General, J. A. Norris
1,250
Secretary to the Premier G. S. McLean
528
Clerk Executive Council, F. W. Mahbott
480
Chief Secretary's Department, Under Sec-
retary, W. Dickson 1,000
Under Treasurer, H. A. Pitt 1,000
Director of Education, F. Tate, I.S.O. 1,250
Law Department, A. I. Lewis 900
Registrar of the Supreme Court and Regis-
trar of Titles, N. R. Currey 700
Secretary Lands, W. McIver 1,750
Secretary Mines, A. H. Merrin 800
Chairman State Rivers and Water Supply
Commission, W. Cattinach 2,000
Director Agriculture, S. S. Cameron 1,000

Secretary Public Works, G. Clowser £ 900
Pub. Health, Chairman Dr. E. Robertson 1,000
Secretary Labour, H. M. Murphy 950
Hospitals for Insane—Inspector General,
Dr. W. E. Jones 1,500
Victorian Railway Commrs. Harold Clapp
(Chairman), £5,000 W. M. Shannon
C. Miscamble each 1,750
Chief Engineer for Railway Construc-
tion, C. H. Perrin 1,000
Secretary, E. C. Evers 900
Forests Commissioner, Owen Jones (Chair-
man) £1,000 H. R. Mackay, W. J.
Code each £800
Govt. Statist, A. M. Laughton 750
Penal and Gaols Deputy Inspector Gen.,
C. S. McPherson
Industrial Schools Secretary & Inspector,
L. Thomas 700
Chief Comm. of Police A. Nicholson 900

Astronomer, T. M. Baldwin 700
Botanist W. Laidlaw 650
Custodian of Estates of Deceased Persons,
W. B. House 850
Parliamentary Draftsman, J. F. Collins,
M.A. 1,250
State Insurance, Commissioner, W. H.
Holmes 750
State Electricity Commission Lieut. Gen.
Sir J. Monash GCMG, KCB 3,000

AGENT GENERAL IN LONDON

Agent General in London Hon. John
McWhae, Melbourne Place, Strand,
W.C.2
Secretary H. G. W. Neale £604
Melbourne, distant 22,267 miles transit, 32 to
37 days

THE LEGISLATURE

Parliament consists of two Houses—the Legis-
lative Council of 34 members, elected for the
17 Provinces for 6 years, one half retiring every
3 years and the Legislative Assembly of 65
members elected for a maximum duration of
3 years, for the 65 electoral districts, by universal
adult suffrage. The electors for the Council
number 353,440, and those for the Assembly
872,456
President of the Legislative Council, Hon.
Francis Grenville Clarke £750
Speaker of the Legislative Assembly, Hon.
Sir John Emanuel Mackey, LL.B. 1,000

IHF JUDICATURE

There are magistrates courts and general
sessions and county courts and a Supreme
Court with a Chief Justice and five Puisne
Judges
Chief Justice Hon. Sir William Hill Irvine,
KCMG £3,000
Puisne Judges, Their Honours Sir Leo
E. B. Cussen, F. W. Mann, W. J. Schutt,
W. G. A. McArthur, J. R. MacFarlan
each 2,500
County Court Judges, W. H. Moule, J. S.
Wasley, H. C. Winneke, C. J. Z. Woin-
arski, W. H. Williams, G. J. Dethridge
each 1,500
Income Tax Commissioner, R. M. Weldon 950
Deputy Commissioner of Land Tax, M.
Murphy 800
Crown Prosecutors H. C. G. Macindoe,
£1,000, J. A. Gurner, 8 Leeson 750
Crown Solicitor E. J. D. Guinness, 1,000

EDUCATION

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 247,204 children on the registers in 1921, the average attendance being about 68 per cent. **Secondary Education** is principally under private control, 59,922 pupils being in attendance at the 486 schools in 1921. There is a State-aided **University** at Melbourne, with four affiliated colleges (Trinity Ormond, Queen's, and Newman) and a School of Mines at Ballarat.

FINANCE

The revenue and expenditure and State Debt for five years are given as follows—

Year	Revenue	Expenditure	Debt
	£	£	£
1918	12,672,787	12,631,169	78,192,361
1919	13,044,088	13,979,407	80,678,644
1920	15,866,184	15,752,459	87,647,739
1921	19,084,475	18,941,658	97,317,831
1922	20,357,733	20,297,279	109,099,199

Banking &c.—There were (Dec 31 1922) 15 banks, with total assets £85,914,172 within the State and liabilities £91,368,158. The savings bank deposits at June 30, 1923, amounted to over £50,000,000.

PRODUCTION AND INDUSTRY

Agriculture—Agriculture has of late years much improved, wheat and oats chiefly being cultivated, the dairy industry has also made marked progress. Of the 7,054,874 acres under cultivation in 1922-23, 2,644,314 were wheat crops and 492,356 oats, and 1,261,408 acres were cut for hay. In 1921-22, 1,335,066 gallons of wine were produced. The estimated value of production in 1921-22 was (including manufacturing values) £93,086,325.

Live Stock—There were in 1923, 794,898 milch cows, producing 82,981,570 lb of butter and 5,675,909 lb of cheese, and 990,762 other cattle, 11,765,520 sheep, 294,962 pigs, and 494,947 horses.

Minerals—The gold production in Victoria has declined very considerably, the amount produced in 1922 being 106,872 oz (£453,962). Other minerals raised consisted principally of tin, copper, coal, and antimony.

Trade and Industry—Wool, gold (including specie), wheat flour, biscuit, and butter are the staple productions of the State and the manufactures (6,753 factories, &c., employing 144,876 hands in 1921-22) are mainly for home consumption. The chief exports overseas are wool, lead, butter, wheat flour and biscuit, leather, skins and hides, tallow, live stock, jams and jellies, milk and cream and preserved and frozen meats. The principal overseas imports of the State are iron and steel machines and machinery, metals and metal manufactures, silks, velvets, &c., apparel and athletic bags and socks, tea, cottons and linens, woollens and timber.

TOWNS

MELBOURNE, the chief city and seat of federal government, is an episcopal see, and is distinguished for its university, museum, mint, public

gardens, observatory, public library, hospital, its churches and other institutions. With its suburbs it contained (31st December, 1922), a population of 826,800 inhabitants. Other towns are Ballarat, 39,417, Bendigo (Sandhurst), 33,419, Geelong, 36,415, Castlemaine, 7,169, Warrnambool, 7,900, Mildura, 5,500, Ararat, 5,400, Wonthaggi, 5,430 and Hamilton, 5,100. Transmission of mails, approximate, 30 days.

III—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S lat and 129° and 141° E long, the total area being 380,070 sq miles.

POPULATION

Year	Males	Females	Total
1917	213,691	233,139	446,830
1918	219,723	237,965	457,688
1919	240,226	241,389	481,615
1920	245,325	245,852	491,177
1921	252,170	250,433	502,603
1922	257,501	255,909	513,410

NOTE.—About 30,000 were on Active Service during War.

Increase of the People

Year	Births	Deaths	Marriages
1917	11,326	4,365	3,252
1918	11,357	4,390	3,190
1919	11,060	5,475	3,055
1920	12,028	5,083	4,081
1921	12,974	5,982	4,383
1922	12,001	4,608	4,143

Birth rate 23.71 death rate 9.1 marriage rate 8.18 per 1,000 of population. Infantile mortality 47.33 per 1,000 births, being one of the lowest rates in the world.

Religions

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows—Church of England, 165,968, Methodists, 122,634, Congregationalists, 15,289, Baptists, 23,033, Lutherans, 24,606, Roman Catholics, 64,054, Presbyterians, 22,659, and Churches of Christ, 15,039.

PHYSIOGRAPHY

Relief—The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St Vincent to the Lakes Torrens and Eyre. The western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude (the northern boundary since the transfer to the Commonwealth of the Northern Territory), is also unpromising in comparison with the fertile land that surrounds the hill country of the east.

Rivers—Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate—The mean annual temperature at Adelaide is 53°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 71°. During the summer months the maximum temperature at times exceeds 100°.

but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight

The average annual rainfall at Adelaide, derived from 84 years record, is 21.08 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland

In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches

GOVERNMENT

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856 the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant Governor

GOVERNOR

Governor of South Australia, His Excellency
Lieut Gen. Sir George John Molesworth Bridges, K.C.M.G., C.B., D.S.O.,
born 1871 (1892) £5,000
Private Sec., Leigh Winsler, M.V.O.
A.D.C., Capt. H. H. Hambleton, C.B.E.
Lieut. Governor, Hon. Sir George John Robert Murray, K.C.M.G., LL.M., born 1853 (1916)

MINISTRY

(£7,750 is allotted as salaries to Ministers).
Premier and Attorney General, Hon. Sir Henry Newman Darwell, K.C.M.G., LL.B.
Chief Secretary and Minister of Marine (vacant)
Treasurer and Minister of Railways and of Industry, Hon. W. Hague
Commr. of Crown Lands, Immigration, Irrigation and Repatriation, Hon. G. R. Laffer
Commr. of Public Works, Minister of Mines and of Education, Hon. I. Pascoe
Minister of Agriculture, and Assmt. Minister of Repatriation, Hon. G. F. Jenkins.

HEADS OF CHIEF DEPARTMENTS

Under Secretary and Clerk to the Executive Council, H. Blinman, M.V.O. £700
Sec. to Attorney Gen. G. G. Martin I.S.O. 700
Under Treasurer, R. R. Stuckey A.I.A. 800
Secretary of Lands, P. S. Messent 800
Secy. Public Works and Member Supply and Tender Board, C. H. Dewhurst 675
Secretary, Ministry of Agriculture, W. L. Summers 675

THE LEGISLATURE

Parliament consists of a Legislative Council of 20 members elected for 6 years, one-half retiring every 3 years, and a House of Assembly of 46 members, elected for a maximum duration of 3 years. Election is by ballot with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 86,513 (21,402 women) in 1922, those for the Assembly numbering 277,760.
President of the Legislative Council, Hon. Sir J. L. Stirling, K.C.M.G. £200
Speaker of the House of Assembly, Hon. Sir Richard Butler 800

THE JUDICATURE

Law and Justice—The Supreme Court is presided over by the Chief Justice and three Puisne Judges, there are Courts of Vice Admiralty and Insolvency, as well as Local Civil Courts with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 50 annually which is at the rate of 1 in every 10,000 of the population.

Chief Justice and Judge of the Admiralty,

Hon Sir G J R Murray, KCMG, BA,

LLB

Second Judge, Hon Sir J Hannah Gordon

£2,500

Third Judge, Hon I S Poole, LLB

2,000

Fourth Judge, Hon H A Parsons, LLB

2,000

EDUCATION

Public Education (Primary Secondary and Technical) is provided by the State, and controlled by a responsible Minister. It is secular, compulsory and free there are 992 State schools with 2,102 teachers and 81,079 scholars the expenditure in 1921-22 was £492,000. The Government grants Exhibitions and Scholarships carrying the holders to higher schools and the University. Private schools number 171, with 816 teachers and 13,951 scholars. There is an endowed University at Adelaide founded in 1874, with 781 undergraduates and 1,166 other students all classes are open to women. A State School of Mines and Industries has also been established with branches at 7 county centres and technical education is also provided. The public library, museum art gallery and local institutes are supported or assisted by the State.

FINANCE

The Revenue and Expenditure and Public Debt for the five years ended June 30 1919-1923, are stated as follows—

Year	Revenue	Expenditure	Debt
	£	£	£
1919	5,798,313	5,876,811	42,650,206
1920	6,582,788	6,457,029	43,753,146
1921	7,151,366	7,543,640	48,556,552
1922	7,771,752	7,826,241	54,388,688
1923	8,429,322	8,418,000	

Most of the revenue is derived from inland revenue railways and territorial receipts while most of the expenditure is on account of public works and railways and interest on public debt.

Banking—There are 10 banking institutions in Adelaide, in addition to the Commonwealth Government Bank, with 225 branches and agencies and £36,591,527 authorised capital having a total liability of £23,233,221 and assets £19,525,751 in June, 1922. The Savings Banks on June 30, 1922 had 424,570 depositors with £18,921,678 to their credit. Over 80 per cent of the population have Savings Bank accounts. The total banking deposits, £37,373,764, averages nearly £75 per head of population.

PRODUCTION AND INDUSTRY

Agriculture (1921-22)—Of the total area about one-half is farmed or grazed, and 5,300,000 acres cultivated—under wheat 2,500,000 acres, hay 600,000, oats 200,000, barley 200,000, orchards and vineyards 75,000, and potatoes 6,000 acres,

with 1,700,000 acres lying fallow. Wheat produced 29,000,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits, and olives are successfully grown, and fruit drying is profitable. There were 41,500 acres of vines, with a production of 6,370,000 gallons of wine, 76,000 cwt of currants, and 66,000 cwt of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to overseas countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Livestock (June 30 1922)—There were 6,257,052 sheep, cattle 419,197 horses 267,639, pigs 87,667.

Minerals—Copper and gold silver lead, manganese bismuth, iron, gypsum salt phosphate rock, coal &c., are found, the total mineral output being valued at £330,000 (1922). Nearly £23,000,000 of copper have been produced since the foundation of the State.

Manufactures—In 1922 there were 1,432 factories employing 31,177 hands the gross value of the output being £23,854,857, and the wages paid £5,323,227. Plant machinery, land, and buildings were valued at £9,607,286.

Value of Production, 1921-22—Crops, total value £11,610,273, average per head, £23 (cereals hay, &c.), £2,482,093, orchards, vineyards and gardens, £1,228,280, manufactures, £9,621,280, pastoral, £4,148,057, minerals, £2,202,549, dairying, £1,529,178, poultry, &c., £2,027,634, fisheries and game, forestry, &c., £282,270. Total value of production, £29,974,341, average £60 per head.

Trade and Commerce 1921-22—The total value of the Imports was £9,047,242 (U.K. £5,732,234, or 63 per cent) other British countries £1,176,429, or 13 per cent, foreign countries £2,137,579, or 24 per cent. The total value of the Exports was £14,747,260 (U.K. £6,277,650, or 45 per cent, other British £3,022,889, or 20 per cent, foreign countries £5,446,721, or 34 per cent). The main items are wheat, flour, wool, meats, skins and hides butter tallow leather, minerals wines, fruits (fresh and dried), and minerals from Broken Hill.

Communication—There are 3,500 miles of railway in South Australia, 118 miles of electric tramways, 44,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. There are 805 post offices in the State, which transmit annually 50,000,000 letters, 9,000,000 newspapers, 6,000,000 packets and parcels and also 2,100,000 telegrams.

Shipping (1921-22)—Ships entered numbered 1,087 tonnage 3,524,380 British 1,002 (3,236,140 tons), foreign 85 (288,240 tons).

TOWNS

ADELAIDE, the chief city and capital, population (1922) 270,329 inclusive of suburbs within 10 miles radius. Other towns are Mount (4,000), Kadina (3,500), Wallaroo (5,500), Port Pirie (10,500), on the east and Port Augusta (3,000) on the west of Spencer Gulf, and Kapunda (2,000), Gawler (4,500), and Peterborough (2,500) on the line from Adelaide to the north, Victor Harbor (1,800) in the south, and Mt Gambier (6,000) in the south east.

Transmission of mails, approximate, 29 days.

IV—QUEENSLAND

This State, situated in lat $10^{\circ} 40' - 29^{\circ} 8'$ and long $138^{\circ} - 153^{\circ} 30' E$, comprises the whole north eastern portion of the Australian continent

Queensland possesses an area of 670,500 square miles (i.e. equal to more than $5\frac{1}{2}$ times the area of the United Kingdom).

POPULATION

Census	Males	Females	Total
1861	125,325	88,200	213,525
1891	223,779	169,939	393,718
1901	277,003	221,126	498,129
1921	398,969	359,003	757,972

Increase of the People

Year	Births	Deaths	Marriages
1916	18,916	7,514	5,208
1917	19,764	6,550	4,862
1918	19,560	7,158	4,821
1919	18,699	8,860	5,431
1920	20,257	7,946	6,670
1921	20,333	7,143	5,965
1922	19,988	7,153	5,876

Religion

Since 1861 no State aid has been afforded to religion. At the census of 1921 there were 309,786 Church of England, 172,662 Roman Catholics, 91,610 Presbyterians, 77,566 Methodists, 17,891 Lutherans, 14,735 Baptists, and 44,132 other Christians with 4,267 Muhammadans and Pagans besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY

Relief—The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kirby's Range* divides the land into a northern and southern watershed.

Rivers—The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Balcoo and Warrego rise in the central ranges and flow southwards.

Climate—At Brisbane the average temperature for 1922 was $69^{\circ} 4'$, the maximum and minimum shade temperatures being $99^{\circ} 3'$ and $38^{\circ} 5'$, mean barometer, 29.960. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1922 was 35.740 inches, and there were 109 wet days.

GOVERNMENT

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

EDUCATION

Primary Education is compulsory secular and free. In 1922 there were 1,691 State schools including 11 High Schools in operation with 3,082 teachers and an average daily attendance of 128,805 children and 167 private and 10 grammar schools, with 1,006 teachers and an average attendance of 21,772. A State aided University was established during 1920.

FINANCE

The revenue, expenditure, and debt of Queensland for the five years ended June 30, 1923, are stated as follows:—

Year	Revenue	Expenditure	Debt
	£	£	£
1919	9,415,000	9,587,000	65,581,122
1920	11,593,743	11,566,910	69,680,764
1921	12,602,031	12,591,201	80,382,052
1922	12,311,378	12,499,970	85,691,228
1923	12,599,403	12,764,322	88,005,001

Banking—The banking assets (1922) £28,181,372, liabilities £29,390,301. The deposits on Dec 31, 1922, were £28,098,929. The Commonwealth Bank of Australia also has a branch in Queensland. The assets on 31 December, 1922, amounted to £21,405,552, and the liabilities to £26,195,617. These liabilities include the depositors' balances in the hands of the Commonwealth Savings Bank Branch amounting to £29,962,094 (equal to an average of £57 13s 9½d to each depositor).

PRODUCTION AND INDUSTRY

Agriculture and Live Stock—Of the total area of 499,120,000 acres the Government have parted with the fee simple of 17,244,544 acres, under a

* Including net amount received from Commonwealth on a per capita basis.

system of deferred payment, 7,933,127 acres more are in process of alienation, and an additional area of 125,348,400 acres leased out for sheep and cattle runs, 76,983,282 acres for grazing farms and homesteads, 34,610,680 acres are held under occupation licence, 511,137 acres under gold mining and mineral lease, 258,706 for special purposes, and 3,166,134 acres perpetual lease, and scrub selections 77,283 acres, leaving 101,076,458 practically unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while a still larger area is devoted to maize, which yields an average crop of about 21 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pine apples, grapes, bananas, coco-nuts, mangoes, plums, and various English fruits. India rubber and sisal hemp plantations have also been recently started. In the year 1922, 287,765 tons of sugar were produced. The live stock in 1922 included 6,955,463 cattle, 17,641,071 sheep, 714,055 horses, and 160,617 pigs. Wool, meat, and butter are the principal products.

Forestry—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 4,336,601 acres. There are three types of forest—the cabinet wood jungles, which yield the spangled silky oak wood, the valuable so called 'Maple', really Silkwood, the rich red Rose mahogany and many other softwoods and mid-rum hardwoods suitable for ornamental joinery, the widespread Eucalyptus type, which produces the extraordinarily strong and durable constructional hardwoods suitable for girders, sleepers, piles, flooring &c. and most important, the art at the present state of development, the pine forests, the products of which are in high request for ordinary building joinery and ply wood purposes. The Queensland pines are of supreme quality, consisting largely of Kauri equivalents such as Hoop and Bunya Pine, and in small supply Kauri itself. The western cypress pines yield an aromatic, fire-resistant hardwood which is white and resistant and is used for common house building purposes. In 1922 the wealth produced by the timber industry of Queensland was between three and four million pounds and there were 4,324 hands employed in the sawmills alone. At the end of 1922 some 7,000 acres of cut-out State forests had been subjected to reforestation treatment by the Queensland Forest Service which employs 280 men, and is engaged actively in timber farming and wood trading operations.

Minerals—The total mineral output in 1922 was £1,825,280. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone and wolfram, while coal is found in several districts. The gold output in 1922 was valued at £342,300, silver, £42,959, copper, £21,535, tin, £99,728, coal, £280,472, wolfram, £98, molybdenite, £236, lead, £66,391, opals and gems, £35,862, arsenic, £21,320, cobalt, £20,332.

Commerce—The chief articles of export overseas, the produce of the State, in 1922, were Wool, £10,861,403, meat, including extant, and bacon, hams, and pork, £2,047,527, hides and skins, £249,194, tallow, £339,643, butter, cheese, and milk, £3,170,474.

TOWNS.

CAPITAL, Brisbane. Population Census, Dec. 31, 1921, 217,714. Estimated Dec 31 1922, 230,000. The contour of the Queensland coast-line and

the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide and numerous ports of considerable size extend along the coast—Brisbane, Rockhampton (24,182), Maryborough (10,635), Townsville (21,348), Port Douglas, Mackay, Thursday Island, Cooktown, Cairns, Bowen, and Bundaberg (9,276). Other places of importance are Ipswich (20,526), Toowoomba (20,702), Charters Towers (9,499), Gympie (6,519), Mt Morgan (7,214), Warwick, Roma, and Cloncurry.

V—TASMANIA

Tasmania is an island in the South Pacific Ocean off the southern extremity of Australia from which it is separated by Bass Straits about 140 miles wide in which are situated the Burneaux Group and King Island included within the State. It lies between $40^{\circ} 33' - 43^{\circ} 39' S$ lat. and $144^{\circ} 39' - 148^{\circ} 23' E$ long. and contains an area of 26,215 square miles.

POPULATION

Census Year	Males	Females	Total
1891	77,560	69,107	146,667
1901	89,624	82,851	172,475
1911	97,591	93,620	191,211
1921	107,767	106,110	213,877

Period	Birth Rate	Death Rate	Infant Mortality	Marriage Rate
1900-09	28.9	10.8	84	7.6
1910-14	30.0	10.6	80	7.9
1915-19	28.0	10.0	70	6.9
1921	26.97	10.32	78	7.83
1922	27	9.29	56	7.8

Religion

All religions are free. In 1921 there were 88,158 members of the Church of England, 28,581 Roman Catholics, 24,975 Methodists, 15,735 Presbyterians, 4,880 Congregationalists and Independents, and 4,757 Baptists.

PHYSIOGRAPHY

The surface of the country is generally undulating forest land with mountains from 1,500 to 5,000 feet in height and expanses of level open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious and well suited to European constitutions; the hot winds of Australia do not reach the Island. At Hobart in 1921 the mean annual temperature was 55.5, the mean temperature for Dec. Jan., and Feb. being 62.5°, and that of June, July, and Aug. 48.6°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England, the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council or responsible Ministers.

GOVERNOR.

Governor of Tasmania (vacant) £2,750

Private Sec.,

Administrator of the Government, Hon Sir Herbert Nicholls Chief Justice (b. 1868)

EXECUTIVE COUNCIL (Oct. 26, 1923)

Premier, Treasurer, and Minister of Railways Hon J. A. Lyons £1,200

Chief Secretary and Minister of Mines Hon J. A. Guy 1,000

Lands, Public Works, Agriculture and Forestry Hon J. Belton 1,000

Attorney General and Education, Hon A. E. Ollivie 1,000

Without Portfolio Hon A. Lawson

UNDER-SECRETARIES, &C

Under Secretary D. Arey Addison I.S.O., M.V.O. £650

Under Treasurer, P. J. Strutt 650

Auditor General, E. Pretyman 850

Registrar General, J. P. Loughton 540

Govt. Statistician, L. F. Giblin 575

Public Service Commissioner, R. J. Meagher 750

Commissioner of Police, Lt. Col. J. E. C. Lord C.M.G., D.S.O. 675

Sec. for Public Works, E. O. Rowland 625

Conservator of Forests, J. G. Irby 600

Chief Engineer and General Manager, Hydro Electric Dept., J. H. Butters, C.M.G., M.B.E. 1,450

Commissioner of Taxes, H. E. Downie 750

Do. Railways, G. W. Smith 1,700

Director of Education, G. V. Brooks 850

Surveyor General and Secretary for Lands, E. A. Counsel I.S.O. 625

Director of Pub. Health, E. C. Morris, M.B. 1,000

Government Printer, J. Vail 600

Director of Agriculture, L. A. Evans (acty) 544

Engineer of Works, W. R. Reynolds 675

Secretary for Mines, W. A. Pretyman 550

State Shipping Dept., W. Robinson 800

State Insurance Dept., F. A. Reid 800

Government Geologist, T. J. Hills B.Sc. 600

Commissioner of Stores, G. V. Dawson 600

AGENT-GENERAL IN LONDON

Agent General in London, A. H. Ashbolt, Australia House Strand W.C.2

Secretary, H. W. Elv £500

THE LEGISLATURE.

Parliament consists of two Houses, a Legislative Council of 18 members elected for six years and a House of Assembly of 30 members elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon Tetley Gant, C.M.G. £500

Speaker of House of Assembly, Hon J. W. Evans, C.M.G. 500

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon Sir H. Nicholls £1,800

Puisne Judges, Hons N. K. Ewing H. Crisp each 1,500

Solicitor General, L. E. Chambers 750

Registrar Supreme Court, W. O. Wise 625

Recorder of Titles, A. A. Richardson 675

EDUCATION

Primary education is compulsory, secular, and free, there being 500 State schools in 1922, with 39,000 children on the registers. Secondary education is also provided by the State (6 high schools with 800 scholars), and by private endowment. There is a University at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

FINANCE

Year	Revenue	Expenditure	Debt
1901	£826 163	£923 731	£8 511 005
1913-14	1,238 086	1,235 013	12,265 012
1920-21	2,105,449	2,189,157	18,776 306
1921-22	2,181 395	2,302,077	21 945 411
1922-23	2,174,061	2,472 523	22 439,176

Banking.—Dec 31 1922 the banks of issue had total deposits £5 260 767, the savings bank deposits were £4,224,662

PRODUCTION AND INDUSTRY

Agriculture and Live Stock—Of the total area of 16,778,000 acres there were in 1921-22 293,708 acres under crops. The live stock included 216,704 cattle, 1,551,273 sheep, 49,743 pigs, and 38,439 horses. The wool production was 9,634,624 lb. The butter produced amounted to 5,270,243 lb.

Electrical Energy—The Hydro Electric Department of Tasmania has completed an important water power development at the Great Lake, in the centre of the State. The capacity of the present installation is 63,000 h.p., and is shortly to be increased to 75,000 h.p. The present plant is supplying the industrial needs of Hobart and district in the south, and Launceston and district in the north of Tasmania as well as the Derwent Valley district.

Forestry Department—Total area of timber land estimated at 9,000,000 acres. "The Forestry Act provides for the dedication by the year 1928 of 5,500,000 acres as State forests. Timber resources of the State are now being placed on a sound basis, and under the control of a Conservator of Forests, managed on forestry principles. 14,040 acres have so far been dedicated as State forests. Timber reserves total 1,698,150 acres. Area held under lease or forest permits for sawmilling, logging, &c., 271,870 acres. The amount of timber milled for 1922 was 48,224,222 super feet, valued at £411,650. This is exclusive of timber used for piles, poles, fencing, and for practically all sleepers. Undressed overseas exports for 1922-3 (excluding exports to States within the Commonwealth) approximated 4,770,565 super feet. Exports beyond the Commonwealth are chiefly for harbour works and sleepers.

Minerals—The chief minerals produced are copper, tin, silver, lead, coal and osmiridium, the value of all minerals produced in 1922 being £877,906.

Manufactures—The chief factories for export are metallurgical, fruit preserving, woollen mills and confectionery, the value of the gross output in 1921 was £5,796,622, the capital invested in the 686 establishments being £4,056,959.

TOWNS

CAPITAL, Hobart. Population (1921), 51,825. Other towns are Launceston (pop. 27,356), Devonport, Ulverstone, Burnie, and Queenstown. Transmission of mails, approximate, 31 days.

VI—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 120° E. long., the most westerly point being in 112° 52' E. long. and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north west division or the Stirling Range (3,640 ft.) in the south west. The greater portion of the far interior may be described as a great tableland with an altitude of from 1,000 to 2,000 ft. above sea level, the surface of which consists in parts of sand dunes, varied by wide stretches of clayey soils. Long, straggling rivers broken during the summer into a series of pools cross the country as far inland as the hills extend, widening in many cases nearer the coast into large sea estuaries. Of the area of Western Australia, which is equal to more than half that of European Russia probably about two thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so. Some 60,000 square miles are as yet neither alienated nor in process of alienation in the S.W. Division, the portion more immediately fitted for agricultural purposes especially for the production of wheat, wine, and fruit, and considerable areas are already under cultivation. Gold, coal, and other minerals in abundance are found in many parts, and wide stretches of land are covered with forests of great commercial value.

POPULATION

Year	Males	Females	Total
1917 (Estimated)	157 355	149 137	306 492
1918 "	159 668	150 120	309 788
1919 "	174 750	152 655	327 405
1920 "	176 638	154 121	330 759
1921 "	178 222	156 951	335 173

At the census of April 4, 1921, the population was ascertained to be 177,013 males 155,200 females, total 332,213. The total number of men who enlisted in the State during the course of the war was 34,353 and of these 23,670 returned. The settlement of the soldiers in suitable occupations has been vigorously pushed on since the end of the war. The tide of immigration from the United Kingdom and elsewhere has again set in, and in view of the unlimited scope Western Australia offers for further settlement, the Government is doing its utmost to encourage it. It is confidently expected that a better knowledge of the great resources of this as yet very meagrely peopled part of the Empire will more and more attract large numbers of suitable settlers from Great Britain and other populous countries, particularly as the Western Australian Government is again offering every inducement to the *bona fide* immigrant.

Natural Increase of the People.

Year	Births	Deaths	Marriages
1917	7,822	2,769	1,621
1918	7 126	2,833	1,612
1919	6,937	3,590	1,194
1920	8,149	3,324	1,231
1921	7 807	3 480	1,256

Religions

There is no State aid to religions. At the Census of 1911 there were 109,435 persons belonging to the Church of England, 56,616 Roman Catholics, 34,348 Methodists and 26,687 Presbyterians.

PHYSIOGRAPHY

The coastal regions of the west and of the north are undulating with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean into which flow many streams notably the Swan Murchison, Gascoyne, Ashburton, Fortescue and De Grey. In the north the Kitzroy flows from the Leopold range into the Indian Ocean and the Drysdale and Ord into the Timor Sea.

Climate—The average temperature of Perth (lat 32° S) for the past 25 years was 65°, while the mean for the barometer for 37 years was 30.02 inches. There are wet and dry seasons the former lasting from May to October. The total rainfall at Perth during 1910 was 37.02 during 1911 23.38, during 1912 27.85, during 1913 38.28, during 1914 20.21, during 1915 43.61, during 1916 35.16, during 1917 45.64, during 1918 39.58, during 1919 30.66, during 1920 40.35, and during 1921 41.09, the average for the past 46 years being 33.91.

The climate is one of the most temperate in the world especially in the south western portion, where excessive cold is never and excessive heat very rarely known. The summer heat, which is mostly dry with hardly any rainfall is during the greater part of the hot season relieved by cool sea breezes in the afternoon. The winters are rainy, but with occasional dry spells of perfect weather.

GOVERNMENT

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899 further amended by the Constitution Acts Amendment Act, 1911. The Executive is vested in a Governor appointed by the Crown and aided by a Council of Ministers.

GOVERNOR

Governor of Western Australia His Excellency Sir Francis Alexander Newdegate, K.C.M.G., born 1862 (1920) £4,000

Private Sec., Maj. B. Keri Pearce, M.V.O.

Aide de Camp, (Vacant)

Asst. Private Secretary, Ernest Chase

Hon. Aide de Camp, Col. H. B. Collett, C.M.G., D.S.O., V.D.

Lieutenant Governor, Hon. Sir Robert Furse McMillan, born 1858 (1921)

EXECUTIVE COUNCIL (June, 1919)

Premier, Colonial Treasurer, Lands and Repatriation, Hon. Sir James Mitchell, K.C.M.G., M.L.A. £1,500

Minister for Education, North Western Territory and Justice, Hon. J. Ewing Public Works and Trading Concerns, Hon. W. J. George, C.M.G., M.L.A. 1,300

Dir. of Education, C. R. P. Andrews, M.A. 960

State Mining Engineer, and Chief Inspector of Mines, A. Montgomery, M.A., F.G.S. 852

Govt. Geologist, A. C. Maitland, F.G.S. 852

Chief Harbour Master, Capt. F. Winzar 672

Commr. of Police, R. Connell 850

Comr. for North West, G. Drake Brockman 804

Sec. for North West and Chief Protector of Aborigines, A. O. Neville 528

Govt. Astronomer, H. B. Curlewiss, B.A., F.R.A.S. 672

Conservator of Forests, S. L. Kessell, B.Sc. 636

ROYAL MINT

Deputy Master, Capt. J. Campbell £1,100

RAILWAY AND TRAMWAY DEPARTMENT

Commissioner, Col. H. Pope, C.B. £2,000

Secretary for Railways, J. F. Tomlinson 600

Chief Traffic Manager, C. S. Gallagher 876

Chief Mechanical Engineer, E. A. Evans 1,000

Chief Engr. Way and Works, H. A. Cresswell 1,000

Chief Accountant, L. H. Gwynne 800

Comptroller of Stores, H. Bromfield 725

General Manager, Tramways and Electricity Supply, Wm. H. Taylor 1,000

AGENT GENERAL IN LONDON

Agent General in London, Hon. H. P. Colebatch, C.M.G., Offices, Savoy House

115-116 Strand, W.C.2. £1,500

Secretary, C. B. Rushton (and allowance, £1282) 636

THE LEGISLATURE

Parliament consists of a Legislative Council of 30 members elected for 6 years, and a Legislative Assembly of 50 members elected for 3 years by universal adult suffrage. The electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

President of the Legislative Council, Hon. Sir E. H. Wittenoom, K.C.M.G. £700

Speaker of the Legislative Assembly, Hon. George Taylor 700

THE JUDICATURE

There are magistrates courts and general and quarter sessions, and a Supreme Court with a Chief Justice and three Puisne Judges.

Chief Justice, Hon. Sir R. F. Macmillan £2,000
 Puisne Judges, Hon. R. B. Burnside,
 J. A. Northmore, and 1 P. Draper each £1,700

EDUCATION

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie, a modern school and a University. The total amount expended on education during the year ended June 30, 1922, was £571,925 (including the University £15,900).

It has been consistently the object of successive Governments to place within the reach of each child in the State every advantage of education, from the kindergarten to the university.

FINANCE

The revenue and expenditure and gross public debt of the State for the 5 years ended June 30, 1918-1922 are stated as under—

Year	Revenue	Expenditure	Debt
	£	£	£
1918	4,662,536	5,328,279	42,304,001
1919	4,944,850	5,506,865	43,637,076
1920	5,863,501	6,531,785	46,822,003
1921	6,769,565	7,476,201	49,039,668
1922	6,907,106	6,639,241	54,959,778

Banking.—There were, including the Commonwealth Bank of Australia, 4 cheque paying banks, formerly banks of issue in the State on June 30, 1922, with total assets £15,835,268 and liabilities £12,823,460. The amount due to depositors in the State Savings Bank at June 30, 1922, was £5,736,318 in the School Savings Bank, £61,133, and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1922, was £1,073,557.

War Funds.—The public contributions in Western Australia to a variety of War Funds up to Dec 31, 1920, totalled approximately £1,188,650, or between £3 10s and £4 per head of the mean population during the war period.

PRODUCTION AND INDUSTRY

Agriculture and Live Stock.—Of the total area (624,588,800 acres) about 1,901,500 acres were under crops in 1921-22, wheat for grain accounting for 1,336,228 acres, large areas of good wheat growing soil exist in the southern districts. The live stock included 893,108 cattle, 6506,177 sheep, 63,001 pigs, 30,352 goats and 180,334 horses. There were about 3,000 acres of vineyards.

Land Settlement and Agriculture.—It is only a few years since the immense capabilities of the State as one of the world's potential great wheat producers were more generally realised. In those few years the area under wheat for grain has increased annually by leaps and bounds, the acreage in 1908 being only 279,609, whilst in 1926 it was 1,734,117. From 1918, owing to the War, a temporary retrogression set in, the acreage in 1922 being 1,336,228. Fruit-growing, prior to the war, was rapidly creating a considerable export trade to foreign markets. Large numbers of English and other immigrants were then annually settled on the still unoccupied agricultural areas of the State. With the energetic policy of development now once more initiated

by the Government, assisted therein by the British Emigration Scheme, land settlement is again progressing rapidly, and Western Australia is absorbing a constantly increasing stream of immigrants. A very large portion of the south western division of the State, containing many millions of acres, is especially suitable for wheat growing whilst the hills of the Darling Range and many other portions of the State produce grapes and other excellent fruit in the greatest variety.

Manufacturing Industries.—There were on December 31, 1920, a total of 998 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed by them was 17,977, as against 18,799 in 1914, the highest number previously reached. The combined output of these establishments was computed at £13,141,327.

Forestry.—The forests are among the most extensive within the Commonwealth and contain some of the very finest hardwoods in the world. Two of these, Jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported.

Minerals.—The groups of the Coolgardie gold fields (covering a vast portion of the interior and extending to the 125th meridian) as well as other fields, are being constantly worked, the production of gold being 553,731 oz in 1921, and 351,391 oz. in the first eight months of 1922. The total amount produced in the State from 1886 to August 31, 1922, is 34,553,513 fine oz. Magnetic iron, lead, copper, and tin ores exist in large quantities as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans Australian Railway in Oct 1917 has afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, barks for tanning, pearls and pearl shells, hides and skins, wheat, flour, fruit, &c. The principal exports for the year ended June 30, 1922, were—Wool, £3,202,145; timber, £1,141,047; sandalwood, pearl shell, pearls, hides and skins, £701,028; wheat, £3,037,976; and flour, £1,022,937.

During 1921-22 the total imports into Western Australia were valued at £12,037,779, including £2,484,521 from the United Kingdom, and £7,729,638 from other States of Australia. The exports totalled £13,181,555, including £4,866,326 to the United Kingdom and £2,079,757 to other States of Australia.

TOWNS.

CAPITAL. Perth. Population (1921) of Metropolitan area, including Fremantle, 125,522.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 2000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 25,526), Albany (3,980), Kalgoorlie and Boulder (over 16,000), Bunbury (4,478), Claremont (5,508), Geraldton (4,176), Midland Junction (4,923), and Northam (3,922).

Transmission of mails, approximate, 32 days.

PHYSIOGRAPHY

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22' and 47° 18' South latitude and 162° East longitude - 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft). The North Island mountains include several active and dormant volcanoes Mt Ruapehu (9,175 ft) and Mt Ngauruhoe (7,515 ft) are the most important. Of the numerous glaciers, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Waikaremu (140) and Clutha (210). Lakes (Taupo, 238 sq miles in area, Wakatipu, 112, and Te Anau 132) are abundant, many of them of great beauty.

Meteorological—Owing chiefly to its great length New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages—North Island, mean temperature 56° F, rainfall 48 in (days with rain 159), South Island, mean temperature 52° F, rainfall 43 in (days with rain 150).

GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H M S *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept 26, 1907 the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by a Council of Ministers, with a Legislature of two houses.

GOVERNOR-GENERAL

Governor General and Commander in Chief of New Zealand His Excellency Admiral of the Fleet Viscount Jellicoe, G C B, O M, G C V O, born 1859 (1923) £7,500

HIGH COMMISSIONER IN LONDON

High Commissioner in London, Col. Hon. Sir James Allen K.C.B. New Zealand Government Offices 415 Strand W.C. = £2,000
Secretary, Alexander Crabb 874

THE LEGISLATURE

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life, since that date for 7 years only) at present consisting of 42 members and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act 1919). Members of the Upper House receive £315 per annum and of the Lower House £450 per annum in each case with travelling expenses and deductions for non attendance.
Speaker of the Legislative Council, Hon. Sir W. C. B. Cairncross £700
Speaker of the House of Representatives, Hon. C. E. Statham 990

THE JUDICATURE

The judicial system is similar to that of England, with magistrates courts and quarter sessions, and a supreme court with a Chief Justice and 8 puisne judges.
Chief Justice, Rt. Hon. Sir Robert Stout, P.C., K.C.M.G., LL.D. £2,250
Puisne Judges, Hon. W. A. Sim, T. W. Stringer, J. H. Hosking, A. L. Herdman, Sir J. W. Salmond, J. R. Reed, C.B.E., K.C., A. S. Adams, F. V. Frazer (President of Arbitration Court), W. C. MacGregor, K.C. each 2,000

In 1922, 44,296 civil cases were tried in Magistrates Courts, while summary convictions in criminal cases were 34,513. In 1922 convictions (or sentences) in Supreme Courts were 1,417 (civil cases to number of 523 were tried judgment being entered for a total amount of £316,533).

POLICE

On March 31, 1923, the strength of the Police Force was 1,003 of all ranks equivalent to 1 for every 1,321 of the population. Average cost of police protection per inhabitant was, in 1922-23, 5s 8½d.

LOCAL GOVERNMENT

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road and harbour boards. Electors are adult ratepayers of both sexes.

Revenue of local bodies, 1921-22 £9,854,677
Net indebtedness, March 31, 1922 £ 343,639

PASSPORTS

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority

DEFENCE.

Army

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets

Units of the N Z Permanent Forces are the New Zealand Staff Corps, the Royal New Zealand Artillery the New Zealand Permanent Staff, the New Zealand Army Ordnance Corps and the New Zealand Army Pay Corps. These are responsible for the training of all branches of the New Zealand Forces and for all administrative matters connected therewith. The Territorial Force consists of 9 regiments of Mounted Rifles, 20 batteries of Artillery, 3 Depôts of Engineers (Field), 3 Depôts Corps of Signals, 3 Brigades of Infantry, 3 Depôts Army Service Corps, and 3 Depôts Medical Corps. The Dominion for purposes of defence is divided into 3 Commands each of which produces one third of the above Units. The Force is capable of producing on mobilization 1 Division and 3 Brigades of Mounted Rifles and also produces the machinery for the duplication of this Force and the provision of the necessary requirements to maintain it in the field. The Senior Cadets are reorganised in Battalions and receive physical and elementary military training. There are a large number of Rifle Clubs in the Dominion established for the encouragement of rifle shooting. Military training is compulsory on all male citizens between the ages of 14 and 25 in the Senior Cadets from the age of 14 to 18 and in the Territorial Force from the age of 18 to 25, and in the Reserve from the age of 25 to 30.

During the South African War New Zealand despatched 10 Contingents totalling 6,500 men, to the assistance of the Imperial Forces in South Africa. On the outbreak of the Great War, the Dominion contributed a Force which captured and garrisoned German Samoa and an Expeditionary Force for service in Europe. The latter force was engaged in Egypt and Gallipoli and being subsequently expanded to a Division and a Brigade of Mounted Rifles, continued to operate on the Western Front and in Palestine until the termination of hostilities. During this period of service the Expeditionary Force absorbed 100,000 men and 10,000 more were ready for embarkation or under training when the Armistice was signed. Seventeen thousand of the Dominion's soldiers lost their lives on service. The New Zealand Troops established a very high reputation for their gallantry and general behaviour under all circumstances. The tremendous amount of transport work involved in the conveyance of the Forces to Egypt, France, Britain, Gallipoli and Samoa was carried out with extraordinary success, not one New Zealand Transport having been lost while conveying troops.

Navy

In 1909 New Zealand presented the battle cruiser *New Zealand* to the Imperial Government.

The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period of not less than two years, members on discharge

to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A commencement was made with the formation of a New Zealand Division immediately prior to the war when H M S *Phylomel* was commissioned with ranks and ratings lent from the Royal Navy to serve as a training ship for the formation of a small Naval Force. The *Phylomel* was employed under the orders of the British Admiralty throughout the war and no opportunity was afforded for the commencement of a scheme of training. This vessel has been placed in commission again, and also carries out the duty of depot ship at Auckland. In 1919 Admiral of the Fleet Viscount Jellicoe of Scapa, GCB, O.M., G.C.V.O., visited New Zealand in H M S *New Zealand* and presented his report, making recommendations and suggestions for the Naval Defence of the Dominion. In 1920 H M S *Chatham* was presented to New Zealand by the Imperial Government and was commissioned on 1st October with officers and men of the Royal Navy. A commencement was made in May, 1921 with the recruiting of New Zealand boys and youths for training as seamen and stokers. A Naval Board was constituted, charged with the control of all matters relating to the Naval Forces, upon the policy directed by the Minister, and vested with the executive command of the Naval Forces. The Board to be composed of the Minister of Defence (President) and the following members: the Commodore Commanding New Zealand Station (1st Naval Member), the Chief Staff Officer to the Commodore (temporarily, as and Naval Member), the Secretary to the Commodore Commanding (Secretary to the Board). By Order in Council of the 20th June 1921 it was provided that the ships and personnel comprising the New Zealand Naval Forces shall be described respectively as forming and belonging to the New Zealand Division of the Royal Navy, which shall be the official designation of the Force. H M S *Veronica* (sloop) which had been on the New Zealand station since 1920 was recommissioned in March, 1922 for further service on the station. H M S *Taborum* arrived in New Zealand waters from England during the same month.

FINANCE

Revenue and expenditure (Consolidated Fund) and debt of New Zealand for the 5 years ended March 31, 1923 —

Year	Revenue	Expenditure	Gross Debt
1919	£22,352,372	£18,673,599	£176,076,260
1920	26,081,340	23,781,924	201,170,755
1921	34,260,061	28,068,799	206,324,319
1922	28,127,007	28,466,837	219,054,385
1923	27,579,443	26,263,760	218,953,324

Taxation by General Government — The total taxation for the year ended March 31, 1923, was £15,594,288 representing £12 7s 11d. per head of population.

Customs and Excise Duties	£6,644,480
Land tax	1,541,500
Income tax	3,831,932
Death Duties	1,869,822
Other taxes	1,768,586

Land Valuation.—

Unimproved value of North Island land	£209,214,887	South Island	£129,959,450
Value of improvements	145,389,294		69,939,745

Capital value £354,604,181 £189,899,195

Banking—At the end of 1922 there were six banks of issue doing business two of which were New Zealand banks. Total assets (average of four quarters of year), £61,779,569, liabilities, £53,863,834 value of notes in circulation, £7,019,220.

Post office and private savings banks had at the close of the year 1922—23 800,867 depositors having £49,024,094 to their credit.

EDUCATION

The State system of education is free, secular, and compulsory. There were (December 1922) 2,550 public primary schools with 6,819 teachers and 213,097 scholars there are also 263 registered private primary schools with 44,862 scholars, and, in addition, 127 village schools for the Maoris with 6,161 scholars. The higher education of boys and girls in the cities and large towns is carried on in 36 endowed colleges and grammar schools, and in 13 technical high schools. The University of New Zealand (to which are affiliated Auckland University College, Victoria University College, Canterbury College, and the University of Otago) the four colleges having 3,683 students in 1922) has power to confer degrees.

PRODUCTION AND INDUSTRY

Agriculture and Forestry—The total area of the Dominion (excluding annexed and outlying islands) is 66,101,760 acres and 43,653,163 acres of this were in occupation in 1923, this acreage representing 85,536 holdings. New Zealand is a pastoral rather than an agricultural country but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1922—23 was 275,775 acres giving a yield of 8,395,000 bushels. An area of 143,090 acres of oats was threshed, the yield totalling 5,688,000 bushels while 302,216 acres were converted to chaff, hay, or ensilage. Other acreages were barley, 17,473 rye grass, 34,850 and potatoes, 20,197. An area of 492,974 acres was sown in turnips. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock—The cattle in 1923 numbered 3,480,694, sheep, 23,081,439 pigs 400,889 and horses, 330,818. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Minerals—Coal mining is one of the largest industries, the output in 1922 being 1,857,819 tons, the approximate total output to the end of 1922 being 55,551,397 tons. Gold mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, has been found in Taranaki, and in the form of brown hematite at Farpapa, near Nelson.

EXTERNAL TRADE

The total imports and exports of the Dominion are valued as follows, for the 5 years 1918—22

Year	Imports	Exports	Total
1918	£24,234,007	£28,516,188	£52,750,195
1919	30,671,698	53,970,075	84,641,773
1920	61,595,828	46,441,946	108,037,774
1921	42,942,443	44,828,827	87,771,270
1922	35,022,561	42,726,249	77,738,810

The principal articles of import and export in 1922 were—

	Imports	Exports
Apparel	£1,982,915	
Books and Music	454,264	
Roots and Shoes	729,622	
Coal	681,080	
Drugs and Chemicals	1,098,024	
Hosiery	641,529	
Hardware and Ironmongery	428,799	
Iron and Steel	1,683,981	
Machinery and Machines	2,769,225	
Manures	248,570	
Motor Vehicles	1,527,226	
Oils	2,234,666	
Paper and Stationery	208,982	
Spirits	623,033	
Sugar	1,434,186	
Tea	547,121	
Textile Piece Goods	4,425,230	
Tobacco, Cigars &c	1,228,746	
Wool		£11,822,463
Frozen Meat		8,387,461
Butter and Cheese		12,728,404
Skins, Hides and Pelts		1,361,668
Gold		540,122
Phosphorus Fibre and Iow		205,530
Tallow		759,574
Timber		479,427
Preserved Milk		529,650
Sausage Skins		467,981
Kauri Gum		563,270
The external trade of 1922 was shared by the principal countries as under—		
Country	Imports from	Exports to
United Kingdom	£19,416,476	£36,154,174
Australia	4,213,085	2,208,280
United States	4,943,778	2,672,775
Fiji	1,459,345	95,044
Canada	1,545,037	446,457
Japan	485,327	211,159
France	100,654	6,593
India and Ceylon	937,556	206,798

COMMUNICATIONS

Railways—In March 1923 there were 3,037 miles of Government railway lines in working order and more under construction, and 137 miles of private lines together with an excellent coaching system. The number of passengers carried in 1922—23 was 26,222,362, while goods carried amounted to 6,618,588 tons. Revenue and expenditure were £6,727,802 and £5,502,497 respectively.

Shipping—During 1922 the vessels entered inwards numbered 571 (tonnage, 1,782,987), and those entered outwards 569 (tonnage, 1,769,980), exclusive of coasting vessels.

Posts and Telegraphs—The annual postal circulation was (1922) 246,274,509 letters and postcards, 35,635,219 newspapers, 67,478,433 books and packets, and 6,700,121 parcels, and the work is

effected by 2,143 post-offices. There are 11,922 miles of telegraph line, with 48,616 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 13,513,208.

TOWNS

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the Urban Areas, at March 31 1923 was as follows—Wellington, 112,070. Auckland, 167,760. Dunedin, 75,050. Christchurch, 113,400. Invercargill, 20,180. Napier, 17,870. Gisborne, 15,120. Palmerston North, 17,810. Nelson, 11,240. Timaru, 16,450. Wanganui, 24,450. New Plymouth, 13,930. Hamilton, 15,350. and Hastings, 13,730.

THE ISLANDS OF NEW ZEALAND

The following islands form part of the Dominion proper—North Island and adjacent islets. South Island and adjacent islets. Stewart Island and adjacent islets, and Chatham Islands, between 43° 30' S lat and 175° 40'–177° 15' W long. Chatham Islands have a population of 209 Europeans and 245 Maoris and half castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847—*The Three Kings* (discovered by Tasman on the coast of the Epiphany) in 34° 9' S lat and 172° 8' 8' E long (uninhabited). *Auckland Islands*, about 200 miles south of Bluff Harbour in 50° 32' S lat, and 166° 13' E long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41' 15" S lat and 176° 43' E long) uninhabited, and *Lovely Islands* (47° 43' S lat, 179° 0' 30' E long) uninhabited.

The following islands have been annexed to New Zealand.

The Kermadec Group, between 26° 20' to 32° 30' S lat, and 177° 45' to 179° W long. Includes Sunday, Macaulay, Curtis Islands and L'Esperance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro. The Herveyes (Manuae and Aoutu), Takutea, Palmerston, Penrhyn (or Tongareva), Mana Niki, Rakahanga, Pukapuka (or Danger), Niue (or Savage), Suvarrow and Nassau. The population at the census of 1921 numbered 13,209, all except 360 being Natives. The chief products are bananas, oranges and other tropical fruits, copra, coffee, pearl shell and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1922) were valued at £150,024, and the imports at £134,144. Rarotonga is the chief island, with a native population of 3,287, and a population other than native of 216. The government is administered locally under the direction of New Zealand. The Island Council of the Cook

Islands is under the direction of the Resident Commissioner at Rarotonga. The five Ariks of Rarotonga are of equal rank and are all members of the Council. Rarotonga is a place of call for the mail steamers between Sydney, N S W, and Wellington, N Z, and San Francisco, U S A.

Resident Commissioner, Rarotonga, H F

Ayson (and allowance £100) £200

Resident Comm, Niue, G N Morris 600

Ross Dependency—By Imperial Order in Council of July 30, 1923, the coasts of the Ross Sea with adjacent island and territories were proclaimed a British Settlement under the control of the Governor General of New Zealand.

The Mandated Territories are—

Western Samoa, consisting of the islands of Savaii, Manono, Apolima, Upolu, Faunatapu, Namua, Nuutele and Nuiulua (the remaining islands of the Samoan group belonging to the U S) have a total area of 1,050 square miles and a population at the Census of 1921 of 35,402. The largest islands are *Savau* (660 square miles) and *Upolu* (340 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital. In 1899 a disastrous tidal wave wrecked three U S A. warships and the "Eber" and "Adler" of the German Navy. *H M S Calliope*, of the British Navy effecting its escape. The disaster is recorded in "A Note to History," by R. L. Stevenson, whose home was at Vailima (near Apia) where also he is buried. The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco nuts (copra) and cocoa are the chief products of the islands.

Administrator, Brig Gen G S Richardson O B, C M G, C B E

Nauru Island, just South of the Equator, was captured by an Australian Expedition in 1914, and is administered by the United Kingdom, the Commonwealth of Australia and the Dominion of New Zealand. The island has a population of about 7,000. There are valuable deposits of phosphates on the island.

THE EMPIRES LONGEST TUNNEL

The official opening of the Otira Tunnel took place on August 4, 1923, the Prime Minister declaring the tunnel open. The Otira (or Arthur's Pass) Tunnel is the longest in the British Empire and the seventh longest in the world. It will give direct rail communication between the East and West Coasts of the South Island, the respective terminals being Christchurch and (on the other side of the Southern Alps) Greymouth. Fine table trains have made the through trip as from August 6th. The tunnel, which is 5½ miles in length, cost £1,515,576, including the electrification of eight miles of track, electric locomotives being used in the tunnel.

NOTE.—"Facts concerning New Zealand," an article contributed by the Rt Hon. W F Massey, P.C. Prime Minister, will be found on pp 476 and 477.

The Union of South Africa.

* Increase due to influenza epidemic.

PHYSIOGRAPHY

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50'—22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwart Berg* and *Tonge Berg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karoo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Compasberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet), between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensbergen* and flowing into the Atlantic between the Protectorate of South-West Africa and the Cape of Good Hope. The *Limpopo*, or *Crocodile River*, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under Tshaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their warlike overland from the Cape Colony and settled in the northern districts, where to this day the Boers predominate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trickled" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France during the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Fdw VII, cap 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Union Government is seized of all State property, and the Railways, Ports, Harbours, and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H R H the Duke of Connaught, K G, in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria, the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

THE LEGISLATURE

The Senate consists of 40 members. For ten years after the establishment of Union eight are nominated by the Governor General in Council and 32 are elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy will be filled by the choice of the Provincial Council in respect of whose Province a vacancy occurs.

The House of Assembly consists of 135 elected members, 51 of whom represent the Cape of Good Hope, 27 Natal, 50 Transvaal, and 17 the Orange Free State. Members of both Houses must be British subjects of European descent.

President of the Senate, Hon. H C van Heerden	£1,300
Speaker of the House of Assembly, Hon Christman Joel Krige	2,000

LOCAL GOVERNMENT

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act and on certain other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly unless that number is less than 25 (as in the cases of Natal and the Orange Free State) when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

DEFENCE
 The South Africa Defence Act 1912, became
 law on June 14, 1912. This Act, as amended
 by the South Africa Defence Act Amendment
 Act of 1922, provides for the establishment of
 Defence Forces comprising —

- 1 The South Africa Permanent Force, which
 consists of —
 - (i) The South African Staff Corps
 - (ii) The South African Instructional Corps
 - (iii) The South African Naval Service
 - (iv) The South African Field Artillery
 - (v) The 1st Regiment, South African Mounted
 Riflemen

(vi) The South African Permanent Garrison
 Artillery

- (vii) The South African Engineer Corps
- (viii) The South African Air Force
- (ix) The South African Service Corps
- (x) The South African Medical Corps
- (xi) The South African Ordnance Corps
- (xii) The South African Veterinary Corps
- (xiii) The South African Administrative, Pay,
 and Clerical Corps

The South African Naval Service includes the
 officers and men of the South African Division of
 the Royal Naval Volunteer Reserve engaged for
 whole time service

- 2 The Coast Garrison Force
- 3 The Citizen Force
- 4 The Royal Naval Volunteer Reserve
- 5 Special Reserves

Every citizen between the ages of 17 and 60 is
 liable to render personal service in time of war,
 and those between 17 and 25 are liable to under-
 go a prescribed peace training with the Active
 Citizen Force spread over a period of four
 consecutive years. The Act states, however,
 that only 50 per cent of the total number liable
 to peace training shall actually undergo that
 training, unless Parliament makes financial
 provision for the training of a greater number.

The establishment of Rifle Associations is a
 marked feature of the Act: citizens between
 the ages of 21 and 25 who are not entered for
 peace training with the Active Citizen Force are
 to be compelled to undergo training during
 these four years in a Rifle Association, thus
 ensuring that, in course of time all citizens will
 at least know how to handle and use a rifle.
 Provision is also made in the Act for the cadet
 training of boys between 13 and 17 in urban and
 other populous areas, where facilities can con-
 veniently be arranged.

The Union is divided into 15 military districts.
 To each military district has been allotted
 various units of different arms, to which the
 citizens entered for peace training in their 20th
 and 21st years are posted.

The object of the amending Act is to provide
 for a small standing army with an efficient Air
 Force and the nucleus of a Naval Service for
 coastal defence. Under the Act the Permanent
 Force is relieved of all Police duties in peace
 time for which they were liable under the Act
 of 1912 and becomes a purely military force.
 The provision of a Police Reserve to take the
 place of the South African Mounted Riflemen,
 when on active service, is no longer necessary,
 and has been expunged from the Act of 1912
 accordingly.

EDUCATION

In the South Africa Act, Section 85 (iii), it is
 provided that "Education, other than higher
 education, for a period of five years and there-
 after, until Parliament otherwise provides, shall
 be and remain under the jurisdiction of the
 respective Provincial Councils. For practical
 purposes it has been provisionally determined
 that all post matriculation instruction shall be
 deemed to constitute higher education. The
 Department of Education, under the Minister,
 is therefore concerned with —

- (a) The University of South Africa, estab-
 lished April, 1918, as successor to the University
 of the Cape of Good Hope, with the following
 constituent Colleges—(a) Rhodes University

College, Grahamstown (1904) (b) Huguenot University College, Wellington (1907). (c) Grey University College, Bloemfontein (1910). (d) Fransvaal University College, Pretoria (1910). (f) Natal University College, Pietermaritzburg (1909). (g) Potchefstroom University College (1921). (h) The University of Cape Town (1918)—in succession to the South African College—1829. (i) The University of Stellenbosch (1918)—in succession to the Victoria College. (4) The University of the Witwatersrand (1921)—in succession to University College, Johannesburg—1910. The Department is further charged with the Teachers First Class Certificate examinations.

The total number of students at these Colleges in 1922 was 3,804. The State expenditure on higher education in 1922 was £386,720.

Provision is made on the Vote of the Department of a grant in aid to the Potchefstroom University College (65 matriculated students in 1922) and to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in February, 1926, and has present accommodation for 55 students.

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape Province practically all the schools are State aided. In Natal they are partly State schools, and partly State aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education is free.

Number of Schools in the Union in 1921.—For white scholars, 5,038, for coloured scholars, 3,205, total, 8,243.

Number of Scholars and Teachers in 1921.—White scholars, 329,407, coloured scholars, 245,946, total, 575,353. Teachers, 20,628.

Expenditure from State Funds in 1921.—Cape, £2,450,620, Natal, £562,572, Transvaal, £2,677,316, Orange Free State, £922,327, total, £6,612,835.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

Superintendent General of Education, Cape,

W. J. Viljoen M.A., Ph.D.

Supt. of Education Natal, H. Bryan, M.A.

Director of Education, Transvaal, J. E. Adamson, C.M.G., M.A.

Director of Education, Orange Free State, C. F. Schmidt, B.A.

UNION FINANCE

The ordinary Revenue and Expenditure of the Union (exclusive of Railways and Harbour Administration) for the five years ended March 31, 1923, are stated as under—

Year	Revenue	Expenditure
1918-1919	£21,921,029	£28,293,728
1919-1920	26,885,957	20,771,850
1920-1921	29,676,186	25,597,728
1921-1922	28,884,870	25,409,025
1922-1923	27,224,515	24,270,824

DEBT

The Public Debt of the Union at March 31, 1923 was £199,685,868, composed as follows—

Rate	Funded Debt	Floating Debt
	£	£
Non Interest Bearing		500,000
2½%		4,000,000
3½%	54,098,740	801,700
3½%	28,530,744	309,325
4½%	3,000,000	
4½%	35,045,650	13,116,186
5%	13,114,465	1,941,250
5%	21,491,983	3,735,825
6%	20,000,000	
	£175,281,582	£24,404,286

At 31st March, 1922 the Funded Debt was £175,455,220 and the Floating Debt, £16,329,716.

PROVINCIAL FINANCE

Prior to the passing of the Provincial Relations Act the four Provincial Administrations (Cape of Good Hope, Natal, Transvaal, and Orange Free State) received no revenues beyond the amount voted by Parliament by way of subsidies for the performance of the services and duties assigned to them. On the passing of the Act (April 1, 1913) certain revenues were transferred and assigned to the various provinces and, in addition, subsidies were voted by Parliament equal to half the normal or recurrent expenditure. The Cape Province receives an additional amount equal to one half the expenditure by local bodies. Natal and Orange Free State Provinces receive additional grants of £100,000 each, and Natal receives a special grant in lieu of trading and liquor licences payable to local authorities.

The ordinary Revenue and Expenditure for the six years ended March 31, 1923, were as follows—

Financial Year	Revenue transferred or assigned	Subsidies	Total Ordinary Revenue	Total Ordinary Expenditure
	£	£	£	£
1915-16	1,134,566	2,069,628	3,204,194	3,365,705
1916-17	1,423,666	2,345,517	3,769,183	3,708,684

Total value of materials used	—	2,313,244

Mines and Minerals—Gold mining still continues the chief source of the country's wealth. At the outbreak of war the diamond mines closed down. The value of the mineral output of the Union in 1922 was—

	£		£
Gold	29,775,984	Lime	209,720
Diamonds	2,266,631	Silver	171,427
Coal	3,395,176	Salt	148,445
Copper	38,622	Asbestos	81,230
Tin	59,986	Soda	1,588

The mineral production for the Union of South Africa was as follows—

	Gold	
1918	8,418,379 fine oz.	£35,759,003
1919	8,331,651 "	35,390,609
1920	8,158,455 "	34,654,922
1921	8,128,710 "	34,528,564
1922	7,009,859 "	29,775,984

The labour employed in the gold industry in December, 1922 Transvaal was 17,920 whites and 188,220 coloured, 21,574 whites and 187,932 coloured were working in the Transvaal in December, 1921.

	Diamonds	
1912	£10,061,489	
1913	11,389,807	
1914	5,487,194	
1915	399,810	
1916	2,346,330 carats	5,728,391
1917	2,902,416 "	7,713,810
1918	2,537,360 "	7,114,867
1919	2,588,017 "	11,734,495
1920	2,545,017 "	14,762,899
1921	806,643 "	3,103,448
1922	669,559 "	2,266,631

The labour employed in diamond mining including individual diamond digging was in December, 1922 Transvaal, 4,261 whites, 10,094 coloured, Cape, 2,874 whites, 10,346 coloured, O F S, 345 whites, 1,942 coloured, a total of 7,480 whites and 22,382 coloured. The value of diamonds owned throughout the world was stated to be £600,000,000 in 1918, one half being owned by residents in U S A.

	Coal (Tons of 2,000 lb)
	1922
Transvaal	5,380,294 tons £1,509,701
Cape	6,813 " 5,191
O F S	729,113 " 209,980
Natal	3,618,093 " 1,670,304
Totals	9,734,313 " £3,395,176

The labour employed in coal mining in December, 1922 was Natal, 791 whites, 16,844 coloured, Transvaal, 684 whites, 14,615 coloured, Cape, 10 whites, 132 coloured, O F S, 105 whites, 2,082 coloured, a total of 1,590 whites and 33,673 coloured.

Silver
There are no silver mines in the Union. The output valued at £171,427 represents silver contained in gold bullion and base metal ores.

Copper
(Tons of 2,000 lb)

In 1922, 3,017 tons of concentrates were produced in the Transvaal but treatment was not completed at the end of the year. 706 tons of matte and ore, valued at £38,662, were shipped from the Cape during 1922.

Tin
(Tons of 2,000 lb)

In 1921 1,416 tons of tin concentrates valued at £138,670, were shipped from the Transvaal, and 9 tons valued at £1,018, from the Cape. The Union figures for 1922 are 612 tons, valued at £59,986, produced in the Transvaal.

Other Minerals
The value of the total mineral production of the Union for 1922 was £40,577,401. The value of miscellaneous products (bricks, cement, &c.) £1,555,226, quarry products, £56,032, lime, £209,720, load £94,720, magnesite, £2,372, graphite, £1,250.

EXTERNAL TRADE
The total value of the Imports and Exports in the seven years 1915-1922 (exclusive of specie) was as follows—

Year	Imports	Exports	Total Trade
	£	£	£
1915	31,810,717	34,817,983	66,628,700
1916	40,399,945	65,683,381	106,083,326
1917	36,476,238	91,574,835	128,051,073
1918	49,487,168	70,632,924	120,120,092
1919	50,791,205	106,402,687	157,193,892
1920	101,827,104	98,696,483	200,723,587
1921	57,800,316	74,354,154	132,154,470

COMMUNICATIONS

Railways—The first railway in South Africa was commenced in April 1859, the first act being turned by the then Governor of the Cape of Good Hope Sir George Grey. This was very shortly followed by Natal, who started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynburg was opened to traffic in 1864. Little progress was however made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan 1 1873 and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Government owned lines at the end of March, 1923, was 10,987 miles (comprising, Cape 4,254, Orange Free State 3,342, Transvaal 2,644, Natal 1,416, and South West Africa 1,331) of which 10,063 miles are 3 ft. 6 in. gauge and 924 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31 1922, amounted to £103,355,073. The gross earnings for the year ending March 31, 1922, were £20,807,359 and the net loss, after payment of interest, £1,392,731. Working expenditure (excluding depreciation) amounted to £15,546,602 or 74.7 per cent. of the gross revenue, as compared with £17,039,091, or 72.1 per cent. of the gross revenue for the previous year. The Cape to Carro Railway projected by Cecil Rhodes had advanced to Bulwerby 1902, 1,362 miles from Cape Town, and 3,600 miles from Carro. In 1922 there were certain small links to be completed along the Congo River, where steamers filled the gaps and a big link between Stanleyville and El Obaid. The Trans Zambezi Railway, from Dondo (on the Beira Mashonaland line) to the Zambezi, was opened July 1 1922 thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs—On March 31, 1923, there were in the Union 2,805 post and telegraph offices open, 139,350,000 letters and cards, 88,817,000 newspapers, books and circulars, 4,719,000 parcels, 2,877,000 registered articles, 14,764,000 official letters and other articles, and 5,520,000 telegrams were received and despatched during the year ended March 31, 1923. The number of money orders issued during the year ending March 31, 1923, was 420,420, while 359,582 were paid. 3,015,402 postal orders were issued, and 2,603,644 paid. The revenue of the Department of Posts, 1922-23, was £1,662,124, expenditure, £1,889,525. The revenue of the telegraph service was £495,936, that of the telephone service, £738,667, and the expenditure £1,313,060. 9,335 miles of telegraph line, carrying 41,932 miles of wire, and 4,160 miles of telephone route carrying 168,610 miles of wire, were open in 1922-23. There are 4 wireless stations in the Union. During 1922-23, 14,288 messages, valued at £4,498, were sent, as compared with 11,420 messages in 1921-22, valued at £4,286. The number of depairments in the

Government Savings Bank on March 31, 1923, was £80,335, the amount to their credit being £6,335,320.

Shipping—In 1922, 3,927 vessels (11,528,551 net tons) entered and 3,917 vessels (11,510,755 net tons) cleared at the ports of the Union of South Africa.

RAILWAYS AND HARBOURS BOARD

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame after consultation with the Board. The constitution of the Board at date is as follows—

Chairman Hon J W Jagger, Minister of Railways and Harbours

Members Hon F Oll, C M G, The Hon J B B Russell

Secretary, C M Hoffe (acting)

Chief Officers

Gen. Manager Johannesburg, Col Sir William Wilson, B. C. B.

Asst. do. Johannesburg, R B Gettridge

Asst. do. Bloemfontein, P E Potter

Asst. do. Cape Town, I W Carr, D. S. O.

Asst. do. Durban, J R More, M. I. C. F.

Chief Civil Engineer, Johannesburg, R C Wallace, M. I. C. E.

Chief Mechanical Engineer, Pretoria, F R Collins, D. S. O.

Chief Accountant, Johannesburg, G A Reid

Chief Railway Storekeeper, Johannesburg

H J Lyndon

Catering Manager, Johannesburg, A H Simmons

South West Africa

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Gilsbert Reitz Hofmeyr, C M G

Secretary, H P Smit

SOUTH WEST AFRICA lies between S lat 17° 23' and the Orange River. There is in addition a narrow strip lying between 18°-18° 30' S lat extending from 21° to 25° E long. This is known as the Caprivi Zipfel and gives access to the Zambezi river. The estimated area of the country is 322,440 square miles, and the population amounts to approximately 227,739, of whom 19,432 are Europeans. These figures include the estimated population of certain areas, which it was found impracticable to enumerate in connection with the recent census, viz., Ovambo land, 90,030; Kuring Kuru, 20,010; Kaokoveld, 20,970; Franzfontein, 300. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib. Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The Northern and Southern boundaries are the Okavango and Cunene, and the Orange River, all perennial streams of considerable volume and on the Orange are the

Great Falls, twice the height of Niagara. All the other rivers in the country are dry except occasionally in the rainy season, but in most of them water can always be obtained at suitable places by sinking a shallow well. Of these the most important are the Kuiseb, Swakop, Omaruru, Ugab and Hoarusib in the West, Great and Little Fish Rivers in the South, the Elephant Black and White Nosob in the South East, and in the North are broad sandy beds named by the natives Omurambas. The town ships are dependent almost entirely for their water on wells or springs. At such places as Windhoek and Grootfontein in the latter give a strong supply. Along the Anob River, in the Gibeon District, artesian water has been discovered in such quantity as to have converted what was formerly a dry river bed into a stream running for 70 miles before it disappears into the sand. Sink hole lakes occur in the 'Karat' region extending from Grootfontein to Outjo. The Etoscha Pan, which lies across Lat 19 and its intersection with Long 15 and is about 70 by 40 miles in extent is a geographical feature of great interest. In the summer during the rainy season it sometimes becomes filled with water partly from the Cunene River, 100 miles away, which then overflows its banks. In the winter it is dry and is frequented by game of all kinds in large numbers. Except by means of pumping the waters of the Orange River are not available for agricultural purposes so far as South West Africa is concerned, as the stream flows in a deep valley with precipitous sides and can only be crossed at one or two places. In 1919, Professor F H L Schwartz, F. G. S. (Professor of Geology at Rhodes University College, Grahamstown) propounded a scheme for making permanent use of the waters of the Cunene by building across it a small dam which would ensure that the Etoscha Pan was continuously filled. His scheme also embraced the Okavango, most of the waters of which at present drain away into the Zambesi, but which in former times ran into Lake Ngami and the Makalaskari Lake both situate in the Bechuanaland Protectorate. He advanced the theory that if these waters are turned to their original purpose the whole of South Africa will benefit by increased rainfall. Among the mountain features of the country which is geologically of great interest, are the Chaikab (3,520 ft.) near Luderitz the Khomas Highlands (6,000) near Windhoek, the Onyati (7,108), 40 miles N E of Windhoek, the Ausas (6,500) just south of Windhoek, the highest peak of which is the Molteblik (8,125 ft.), the Omatako in the North (8,790 ft.), the Gansberg (7,662) in Great Namaqualand, the Erongo, the Waterberg, the Brandberg and many others, including the large extinct volcano near Berseba named Geitsi Gubib. The climate is dry. Rain falls only in the shape of thunderstorms and in the later summer months. The actual rainfall varies from ½ inch at the coast to 4 inches in the southern portion of the interior and 20 in the northern. Very little agriculture is undertaken, and except at one or two places such as on the Anob river and in the Grootfontein neighbourhood, few cereals are grown. Several irrigation schemes are now being considered, and settlers are being encouraged to undertake water conservation. The soil is of a high fertility in the greater part of the territory, and an extensive dam making programme is expected to give an appreciable impetus to agricul

tural production. Apart from mining the staple industry of the country is stock raising, and it is remarkably well suited for this, in the South for small stock and in the centre and North for cattle. Horse breeding is also undertaken successfully. Except in the desert the veld is for the most part of the thorn bush type so prevalent in many parts of North, East and South Africa. After the annual rains grass of good food value grows plentifully, and when ripe retains its nutritive qualities as hay for some three years, even though remaining in the soil. In the far North palms and some useful trees are to be found. Though somewhat hot in summer, in winter the climate is magnificent. At Swakopmund, owing to the influence of the Benguela current, the temperature varies but little throughout the year, and this town compares not unfavourably with any other watering place in South Africa. The principal source of revenue lies in the diamond fields of Luderitz. The existence of diamonds in this area was discovered on April 11th, 1908 by a Cape coloured boy who had formerly worked in the Kimberley mines, and they are now worked in considerable quantities. In 1922 the output was 144,120 carats. About half of the value goes to the Administration as revenue. Recently all the important German companies were bought out by the Consolidated Diamond Mines, Limited, a company with its headquarters in Capetown, and in which various Johannesburg, British and American financiers are interested. The deposits lie on or near the surface, and working is easy, save for the absence of water and fuel. Electricity is furnished from a central station at Luderitz. An electric railway has been built to serve the fields and runs as far as Bogenfels, 70 miles to the South. Copper mining is also carried on to a considerable extent, the principal mine being at Tsameb in the North, and producing about 5,000 long tons a month. This is by far the most productive metalliferous mine in the territory, and one of the most successful base mineral ventures in South Africa. Game abounds throughout the whole country. Guinea fowl are to be found practically everywhere, and there are many other game birds, and every variety of small buck and also kudu and gemsbok exist throughout the land, while in certain places hartbeest, wildebeest and eland run in considerable numbers. The species of lesser bustard known as *Ruppella korhaan* is believed only to be found in this territory. In the less frequented parts of the northern portion of the country elephant, rhinoceros and giraffes exist, and on the Cunene and Okavango many varieties of game are met with. Lions abound in the Kaokoveld and the north western portion of the country.

The native races are — In the South, Hottentots. In the centre Hereros and Bergdamares, with the exception of the Rehoboth district which is occupied by a mixed race known as the *Eastards*, and in the North, Ovambos. To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North Western area) is very scantily inhabited by Hottentots and Ovattimbos, and contains no white inhabitants with the exception of a few trek Boers from the Boer Settlement in Angola. It is very mountainous, and in many places well supplied with water.

The Administration of the country is vested

in the Government of the Union of South Africa by mandate, and is actually exercised by the Governor General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The seat of the Administration is Windhoek, which lies practically in the centre of the country and is 5,500 ft. above sea level. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa and its magnificent harbour will undoubtedly in the future prove of great benefit. The only other harbour which can be made use of is at Luderitz. A regular service of steamers from Capetown to these two ports has now been in existence for some time, as also a monthly service direct from Rotterdam of passenger and cargo boats. The power of Legislation is vested in the Administrator under the authority delegated to him by the Governor General of the Union. There is no Parliamentary representation in the country, but an Advisory Council has been appointed to assist the Administrator in his task of governing the country. It consists of nine members, representatives of all classes and interests in the country, and one is specially appointed on behalf of the natives. Among other industries than those already referred to are the export of fish, sealskins, guano, horns, hides, wool, ostrich feathers, marble lead and other ores. A brisk trade with the Union has sprung up in slaughter cattle, and a scheme for the establishment of Cold Storage with a view to creating an export trade with Europe in meat is under consideration. The country is sparsely inhabited by Europeans, and large tracts of Crown land are available on easy terms for settlement by persons of moderate capital as farmers. Enquiries in this connection should be addressed to the Senior Officer, Lands Branch, Windhoek, S W A.

The railway system in South West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 344 miles), comprises —

Union Lines—	Miles
Broad Gauge	
Walvis Bay to Swakopmund Border	20
De Aar to Nakop Border	344
South West Territory Lines—	
Broad Gauge (3 feet 6 inches)	
Nakop (border) to Swakopmund	77½
Seeheim Junction to Luderitz	128
Narrow Gauge	
Usakos to Isuneh	250
Otavi to Grootfontein	57
Otiwarongo to Outjo	46
*Kalkfeld to Iron Mine	7
In addition, the Administration works	99
miles of privately owned lines	

The Capital of the Protectorate is Windhoek (white population, 1921, 3,460), other inland towns being Keetmanshoop (white population, 1921, 1,005), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otiwarongo, Outjo, Rehoboth, Warmbad and Maltahöhe. The ports are Swakopmund (white population, 1921, 2,078) and Luderitz Bay (white population, 1921, 2,003).

* Private siding.

Provinces of the Union of South Africa

CAPE OF GOOD HOPE

The Province of the Cape of Good Hope reaches in S lat from 26° to 34° 50', and in E long. from 16° 25' to 30°. The extent of the country is, N E to S W 750 miles and from N W to S E 800 miles, with a coast line of nearly 1,300 miles

Area and Population.

1921	53,801	41,538	13,165
1922	58,029	35,922	13 005

Religion.—In 1922 there were 1,684,006 Christians—546 065 Dutch Churches, 358 827 Anglican Churches, 105,666 Presbyterians, 115 941 Congregationalists 394,085 Methodists, 76 421 Lutherans 47 293 Roman Catholics, 16,102 Baptists, and 24,476 other Christian sects. Moham medans 24,513, Jews 21,244, Heathen 1,002,450, other 49,606

Education.—The Province is divided into 122 school districts, each under the control of a School Board, two thirds of the members being locally elected, and one third nominated partly by Government and partly by Municipal or Divisional Councils Education is compulsory for children of European extraction The necessary grants are provided from Provincial Council revenues, primary education being free

Aided Schools, Dec 31, 1922, 4,687 enrolment 291,425, attendance 260,693. There are 135,708 European pupils and 157 887 non European pupils There are 20,216 teachers Government expenditure on education, exclusive of Higher Education (for which see Union of S A.), for 1923-24, £223,448, 1924-25, £219,428, 1925-26, £217,835, 1926-27, £276,294, 1927-28, £21,166,039

1918-19, £1,435,385 1919-20 £1,676,208, 1920-21, £1,003,567, 1921-22, £1,450,629

Charitable Institutions, Hospitals, Pauperism.—In the hospitals 24,084 in patients were treated during 1922, and there were 111,760 out patient attendances at Government Aided Hospitals.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth East London and Mossel Bay There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley

Administration.—The Province is administered by an Administrator appointed for five years by the Governor General, aided by a Provincial Council of 51 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee

Local Government.—There are 129 municipal palities each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers There are 76 Village Management Boards

Administrator, Hon Sir N Frederic de Waal, K C M G £2,500
Executive Committee, Daniel Retief S A Eddy, C H Geldenhuys, L J Steytler
Prov Sec., A Weisbecker

CAPITAL, CAPE TOWN Total population (1922), white and coloured (with suburbs), 207 404. Capetown is 5 979 miles from Southampton, transit 16 days

NATAL

The Province of Natal comprises an area of 35,284 square miles (including Zululand, 10,427 square miles), with a seaboard of 360 miles

Population	Census 1922	
	Males	Females
Europeans	136,838	70,477
Indians and Asiatics	141,649	80,314
Natives and other coloured	1,150 911	556 809
Total	1 429,398	707,600

In 1922 the European births registered numbered 3,299, deaths 1,301, and marriages 1,121 The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour

Education.—A University College has been founded at Pietermaritzburg, and there are 4 Government high schools, a preparatory schools, 345 primary schools for white children, 1 art school, 1 agricultural and trades school, There are also 2 Technical Institutes, 51 Asiatic schools, 507 native schools, and 21 other coloured schools, which receive Government aid, and a large number of private schools.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. Sir G T Ploymann, K C M G
Executive Committee, F C Hollander, J Dyson, J McAuliffe, J P Whyte.

Provincial Secretary, John M. Herschensohn.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (white and coloured), 36,023 in 1901.

In Durban (population, 1901, 146,310), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time, the average low water depth at the entrance, the bar being no longer existent, for 1908 being 33 ft 7 in.

Natal, 6 800 miles, transit, 20 days

ZULULAND

Zululand, annexed in 1897, comprises about two thirds of the country formerly under Zulu kings, and is bounded on the south and south west by the Tugela River on the south east by the Indian Ocean on the north by the Portuguese possessions and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amatputaland Protectorate*, created by proclamation of Nov 22, 1897, was annexed to Zululand on Dec 27 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paul pietersburg and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

TRANSVAAL 1901

Race	Males	Females
European	284 388	259 097
Native	847 446	648 423
Other Coloured	27 596	20 686

The Province of the Transvaal has a total area of 120 450 square miles, about 20,000 square miles lying within the tropics. The Census of 1901 showed a population of 2 087 636, of whom 1,159,430 were males and 928 206 females. The population comprised 543 485 Europeans or whites, 1,495,869 natives, and 48,282 other coloured races. In 1902 there were 21 458 births (16 385 European) 14,004 deaths (5 463 European), and 6,228 marriages (4,341 European).

Religion	Whites	Others
Dutch Churches	287,630	49 578
Anglican	98 849	94 543
Presbyterian	31,715	12 407
Methodists	37,921	143 441
Roman Catholics	23,419	14 490
Lutherans	4,583	136 335
Other Christians	19,542	64 437
Jews	33,515	4
Hindus, &c	1,804	15,499
No Religion	4,597	1,033,417

Education—There were 1 133 schools for white children in 1901 with an average enrolment of 123,769 and an average attendance of 104,006, 5 normal colleges and 4 normal college preparatory classes. There were also 385 native schools 3 Asiatic schools, and 22 coloured schools, with 23,541 pupils.

Administration—The government is administered by an Administrator, aided by a Provincial Council of 50 members (elected for 3 years). There is an Executive Committee of 4 members

Administrator, Hon A G Robertson
Executive Committee, B D G Piensaar, G H. Kretzschmar, Dr H Reitz, T C Stoffberg
Provincial Secretary, D E van Velden.

The Capital is PRETORIA, pop 1901, 74,052 (white 45,361, coloured 28,691). Pretoria, which is also the seat of the Union Government, is pleasantly situated on the River Apies and has wide shady streets and magnificent buildings. The principal town is JOHANNESBURG 5 500 feet above sea level, about 25 miles S W of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries. The population in 1901 was 288,131 (white 151,836, coloured 136,295).

Pretoria is distant from London 7,200 miles, transit, via Capetown, 19 days

ORANGE FREE STATE

The Province of the Orange Free State has a total area of 50,389 square miles and is divided into 24 districts. The population at the last five censuses was—

Year	White	Coloured	Total
1890	77 726	129 787	207,503
1904	142,679	244 636	387 315
1911	175 189	352,985	528,174
1918	181 678		
1921	188,556	440,271	628,827

In 1921, of the whites 97 776 were males and 90 780 females and of the coloured races, 223,597 were males and 216,674 females.

The number of births registered in 1922 were 4 959 deaths 1 560, marriages 1 288 (white persons). The registration laws affecting births and deaths apply to white persons only.

Religion—The Census of 1901 showed the following results—Dutch Churches 207 536 Anglican Churches 50 807 Presbyterians 13,562 Congregationalists, 2 763 Methodists 133 778 Lutherans 7,931, Roman Catholics, 9,879, Jews, 4 761, Heathen, 174,697, Others 607 714.

Education—Higher education is under the control of the Union Ministry. In 1901 there were 877 public and aided private schools, with an enrolment of 45 470 pupils and except when the parents object, both official languages are taught.

Administration—The government is administered by an Administrator, aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members Administrator, Hon. Sir Cornelis Hermanus Vessels.

Executive Committee, D J de Villiers E A van der Walt, F D du Toit D J Malan
Provincial Secretary, A M N de Villiers

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of 39,034 (19,367 whites, 19,667 coloured) in 1901. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan, 1904.

Bloemfontein is distant from London 6,700 miles, transit, via Capetown, 19 days.

Imperial Crown Colonies and Protectorates.

NOTE—The Indian Empire, The Dominion of Canada, Newfoundland, The Commonwealth of Australia, The Dominion of New Zealand, and The Union of South Africa are shown separately.

ASCENSION,
(See ST HELENA)

BAHAMAS

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between $21^{\circ} 42' - 27^{\circ} 34' N$ lat and $72^{\circ} 40' - 79^{\circ} 5' W$ long, and extending from the coast of Florida on the north west to Haiti on the south east. The group consists of about twenty inhabited islands and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1917 of 59,928, the most part being descendants of liberated Africans. The principal islands are New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Pleuthera, Fxuma Harbour Island, Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay, Ragged Island and Bimini. Originally settled by Englishmen the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge gathering, the exports of sponge in 1918 being valued at £107,622. The fruit trade is principally with the United States, bananas, coco nuts, fruit and vegetables being exported. Tonatoes are being cultivated in large quantities for shipment to the United States. Mahogany, lignum vitae, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established, the land under the fibre plant being about 20,000 acres, and the value of Bahamas hemp fibre exported in 1920 £148,488. The imports are chiefly food stuffs, wines, spirits, cotton, silk and worsted fabrics and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members, and an elective Representative Assembly of 29 members.

BARBADOS

the most windward of the West India Islands, is situated in $13^{\circ} 4' N$ and longitude $59^{\circ} 37' W$. It is nearly 21 English miles long by 14 broad at the widest part and comprises an area of 106,470 acres (about 166 square miles) about 100,000 acres being cultivated. The population (Census of 1921) was 156,312. The principal exports are sugar, molasses, rum and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour and Indian corn meal. Liberal provision is made for elementary education and Harrison's College provides for higher education. Unlike most of the neighbouring islands Barbados has always remained in the possession of Great Britain by which it was settled in 1625. In 1885 it was constituted a distinct government with a Governor aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop. 1921 13,486) on the shores of an open roadstead (Carlisle Bay).

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited the rest being mere rocks) situated in the west of the Atlantic Ocean, in $32^{\circ} 15' N$ lat and $64^{\circ} 51' W$ long, comprising an area of about 19 square miles and containing a population (1922) of 20,410 (7,001 white and 13,409 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527 but they were first colonised by Admiral Sir George Somers who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also commander in chief of the military forces. He is advised by an Executive Council of 6 members appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown, and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper) for merely of great importance for shipbuilding. The islands produce large quantities of onions, potatoes and green vegetables which are largely exported, together with cut flowers and lily bulbs to New York. Arrowroot and bananas are also grown but meat flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO

Borneo is a large island in the Eastern Archipelago, extending from lat. $7^{\circ} 4' N$ to $4^{\circ} 30' S$, and from long. $106^{\circ} 50' E$ to $119^{\circ} 30' E$. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,246,000, consisting chiefly of Dyaks, Malays, Kyanas, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celebes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two thirds of the island is included within "Netherlands India." The remainder of the island is under British protection.

BRITISH NORTH BORNEO

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast line of about 600 miles. The population is 257,804, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council which consists of 7 official and 5 unofficial members who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 5 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

	1920	1921	1922
*Revenue	\$3,611,803	\$3,156,381	\$3,078,436
Expenditure	1,844,774	2,021,249	1,928,244
Exports	12,049,471	7,908,136	8,205,709
Imports	11,009,471	7,720,013	6,865,144

The chief products are timber, tobacco, rubber, sago, rice, gums, gutta percha, coco nuts, rattans and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 7,000 tons per month at Kubattik, in the south-eastern corner of the territory.

	1921	1922
Exports of Leaf Tobacco	\$1,227,183	\$221,692
" Rubber	2,482,468	2,660,276
" Timber	1,459,324	1,460,670

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior, there is a branch from Beaufort to Weston (20 miles). There are wireless stations at Sandakan, Jesselton, Kudat, and Tawau. There is a State bank at Sandakan with a branch at Jesselton.

There is a native military force of 800 men under European officers, with six machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

* Exclusive of land sales.

BRUNEI

Sultan, H.H. Sir Mohamed Jemal ul alam,
K.C.M.G., suc. May 11, 1906.

A native State on the north west coast of the island of Borneo. The total area is about 4,000 square miles, the population being 25,454 (April 1921), of whom 23,938 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 10,000. Native industries include fishing, cloth weaving, brass foundries, and silversmiths work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries, the exports are chiefly coal, cutch (mangrove extract), rubber, and sago. The revenue for 1922 was £23,800, and the expenditure £22,000, the debt (Dec. 31, 1922) is £51,860. Total imports 1922, £45,690, exports, £67,350.

High Commissioner, The Governor of the Straits Settlements
British Resident, Brunei, E.E.F. Pretty

Brunei is 5 hours by steamer from Labuan, and communication is now regularly maintained, there is a central wireless station at Brunei, with substations at Labuan and Temburong.

* Exclusive of Duty allowance.

BRITISH GUIANA.

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1922, was estimated at 207,817, of whom 124,336 were East Indian immigrants. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 172,000 acres (of which 63,420 acres are in sugar cane and 55,911 in rice), is confined to the sea coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat topped mountain 8,740 feet above sea level, and on the Potaro River (a tributary of the Essequibo) are the *Kavatu Falls*, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April and from the middle of August to the end of November. The meteorological records taken on the coast lands during a period of 76 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80° F., its recorded extremes during this long period ranging between 68° and 92°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 75° and 85°. In the interior the mean temperature is higher—82° F., its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 94.4 inches distributed over 125 days of the year, and its range from 44.9 to 122.2 inches per year. In the interior the average recorded rainfall is 50.8 inches per year ranging from 45.3 to 57.9 inches per year. The birth rate in 1922 was 27.8, and the death rate 20.1 per 1,000. The chief product is sugar, which forms 76 per cent of the export trade. The leading exports are sugar (£2,104,144 in 1921), rum, diamonds, timber, balata, and rice. There are about 13,000 aboriginal Indians, they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected, and a Combined Court including the members of the Court of Policy together with six elected Financial Representatives with an Executive Council, consisting of the Governor, 5 official and 5 unofficial members nominated by the Crown. There are 2,750 miles of post-office telephone wire and 556 of telegraph lines, with 75 post-offices. There are 95 miles of railway.

Georgetown, 3,963 miles

BRITISH HONDURAS

British Honduras, in Central America, lies within 18° 29' to 15° 53' 55" N latitude and 89° 9' 22" to 86° 10' W longitude. Its extreme length and breadth are approximately 174 m and 68 m. respectively, it is bounded on the north and north west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1922) of 45,377—22,563 males and 22,754 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea breezes. The country consists chiefly of primeval forest, with savannahs and so called "pine ridges, which are open sandy plains covered with a wiry grass and dotted with pine trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coconuts, pineapples, oranges, and mangoes also grow well, while in land there are extensive regions of good pasture. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 59 primary schools in the colony, and 9 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1922 was 515,850 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 3 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

CAMEROON

(Joint Franco-British Administration)

The German Protectorate of Kamerun on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area) was obtained by conquest by Franco-British forces during the War of 1914-18 and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between 2°-12° N lat and 8° 45'-10° E long, and the area is about 295,000 square miles containing a population estimated at 3,500,000. The coast line extends from the Rio del Rey to the Muni River. The south eastern boundary (as re-arranged in 1912) is the confluence of the Sangha with the Congo River the extreme northern limit is the southern shore of Lake Chad, and the extreme eastern limit (1922) is the Ubangi River. The territory occupies the north west corner of the Central African Plateau, with Cameroon Peak (13,370 feet) near the capital, on the coast, and the Cheboki and Mandara Mountains on the north west frontier. Access was obtained to the Congo and Ubangi Rivers by the Agadir compensation treaty with France (1922), under which the area of the

colony was increased by 100,300 square miles. The *Sangha* is a considerable river flowing into the Atlantic opposite Fernando Po, the *Sanga* and *Desha* (or *Ngoko*) are tributaries of the Congo, and the *Logone-Shari* flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Hausas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is rich in forest produce. The exports (valued at £3,396,000 marks in 1912) are rubber, palm oil, palm kernels, cocoa and ivory. The imports (£4,442,000 marks in 1912) are chiefly clothing and textile goods, meat, fish and provisions. There were 170 miles of railway open in 1912.

In 1900 the whole area was divided into a British Sphere and a French Sphere.

The *British Sphere* is a wedge shaped strip, running with the Nigerian border and containing an area of about 28,000 sq miles. It is administered by the Nigerian Government, the capital being BURA, on the slopes of the Cameroon Mountain. The principal port is Victoria (in Ambas Bay), which is connected by railway with the capital.

CAYMAN ISLANDS

The Cayman Islands, forming a dependency of Jamaica, are situated between the meridians 79° 44' and 81° 26' W, parallels of 19° 15' and 19° 46' N and consist of three islands: Grand Cayman, Cayman Brac, and Little Cayman with a total area of 225 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti and called "Las Tortugas." Population (1901) 5,253.

The principal town is Georgetown, in Grand Cayman. Population (1901) 1,070. *Commissioner & Judge of the Grand Court*, H. H. Hutchings (house and fees) £600.

CEYLON

an island in the Indian Ocean, to the south east of the peninsula of Hindustan is situated between 5° 55'—9° 50' N lat and 79° 42'—81° 53' E long. Its area is (with outlying islands) 25,332 square miles, or more than three fourths of that of Ireland. Its greatest length is from north to south, 270 miles, and its greatest width 140 miles.

The climate varies with the altitude of the district, but on the whole, though tropical, it is healthy, except in the low lying jungle. The coolest months are December and January, the hottest are April and May.

The population (Census of 1901) was 4,504,549 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast, but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras, but six years after, in 1802, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and

husked grain. The principal exports are tea, products of the coconut palm, rubber, plumbago, cacao, cinnamon, cardamoms, ebony, and a little vanilla.

About the fifth of the island is under cultivation, and the leading areas in 1902, in acres, were:—Rice, 850,000, other grain 120,000 tea, 418,000, coconuts, 500,000, rubber, 350,000, cinnamon, 25,000, cacao, 33,000 and tobacco, 13,000. The live stock in 1902 included 1,499,800 horned cattle, 56,200 sheep, 152,000 goats, 49,800 pigs, and 2,000 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c and for the pearl fishery in the Gulf of Mannar, off the N.V. of the island. The manufacture of salt is a Government monopoly.

There are 732 miles of railway open, 615 being 5 ft 6 in gauge and 117 miles 2 ft 6 in and the post and telegraph offices numbered 590, there being 6,244 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 7 members and a Legislative Council of 27 members. The Legislative Council contains representatives of the various territorial divisions of the island, and special safeguards provide for the representation of minorities and unrepresented interests. Of the 23 unofficial members 16 are elected and 7 nominated by the Governor.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards, and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

THE MALDIVÉ ARCHIPELAGO lies to the S W of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muhamadan. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco nut oil, and tortoiseshell.

Colombo, distant from London 6 300 miles, transit, 16 days.

CYPRUS

is an island in the Mediterranean Sea, between N lat. 34° 33' and 35° 41', and E long 32° 17' and 34° 35'. It is about 40 miles distant from the nearest point of Asia Minor and 60 miles from Latakia on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1921 was 310,709, of whom about 20 per cent were Muhamadan, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra, gypsum, salt and pyrites. The fertility of the soil has for centuries been proverbial. In 1922 the wine export was 996,698 gals, and that of spirits 20,697 gals., the bulk of the wine and spirits going to Egypt and Syria. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills, and, owing to the

enforcement of various sanitary measures, the death rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of 28 members, 6 being official and 22 elected. The island is divided into three electoral districts, each returning one Muhamadan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner, and each has a Court of Law presided over by an English judge who is assisted by two native judges, one being a Christian and the other a Muhamadan. There is also a Supreme Court for the whole island, consisting of two English judges.

The capital is Nicosia (Lefkosia) near the centre of the island with a population of 192 98 in 1921. The other principal towns are Larnaca (population 9,768), Limassol (13 291), Famagusta (7 276), Kyrenia (1,913), Paphos (4 119), and Morphou (3,500).

Important works at Famagusta have rendered the inner harbour accessible to steamers and a narrow gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou 55 miles, in 1907, and to Evrykhou 15 miles, in 1915. There is a regular service of steamers from Egypt, and from Italy (via Trieste).

FALKLAND ISLANDS

These the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'—53° S lat. and 57° 40'—62° W long. They consist of East Falkland (area 3,000 sq. miles) West Falkland (2,300 sq. miles) and upwards of 100 small islands (islets, rocks and sandbanks) comprising in the aggregate 6,500 sq. miles, and a population in 1921 of 2,094. Mount Adam the loftiest peak in the colony rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764, this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the English for the protection of the whale fishery and colonised being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. The climate though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65°. The islands are chiefly bog land and have proved suitable for sheep 670,000 being carried the output of wool is about five million lb. annually. The population is mainly British and is principally engaged in sheep farming and seafaring industries. The chief exports are whale oil and guano, wool, tallow, hides and sheepskins. The only important settlement is Port Stanley at the head of Port William on the coast of East Falkland.

Dependencies.—The total area of the dependencies of the Falklands is over 3,000,000 square miles. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined. Thirteen companies (a British 11 Norwegian) caught 5,247 whales in the 1920-1 season, the landed value of the oil being £1,250,000. *South Georgia*, an island 800 miles east south-east of the Falkland Group with an area of 1,000 square miles, is one of the dependencies. Among other things the *South Shetlands*, the *South Orkneys* (on which the Argentine Government have, with the permission of H. M. Government established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later) the *Sandwich Group*, and a part of the mainland of the *Antarctic*, known as *Graham's Land*.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 4 members, and a Legislative Council, the members of both being appointed by the Crown.

Fiji

This is a group of 200 to 250 islands (of which some are however more uninhabited islets and rocks) in the South Pacific Ocean about 100 miles north of New Zealand which extend 300 miles from east to west and 300 north to south, between 15° 45'—21° S lat. and 176° E—178° W long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans, the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 90°. Vegetation is remarkably luxuriant, the chief productions being the bread fruit tree, banana, plantain, pea nuts, jams, and dalo (taro), coco nut, sugar-cane, rice, maize and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, rubber, maize, hides and pelts and the-de mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 6 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 12 nominated members (one specially representing Indian interests), 7 elected members, and 2 native members, appointed by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (1921 census) was 157,266 (84,475 native Fijians, 60,634 Indians, 3,878 Europeans, and some Polynesians and others).

GAMBIA.

The West African river Gambia which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447 and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal gave a charter to a British Company to trade with the Gambia and as early as 1618 an effort to do so was made but it was not successful. In 1686 a fort was built upon a rocky island and, in honour of the new King, was named Fort James, but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo Albreda the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 24, 1921, was 9,227, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season viz. from June to October, but during the rest of the year it is less unhealthy. The chief export is ground nuts which form seventy per cent of the total exports. They were sent chiefly to Marseilles where the oil is extracted and used for the same purpose as olive oil, but, since the outbreak of war, the export trade has been mainly with the U.K. Beeswax, palm kernels, hides and calabashes are also exported, and rice, cotton, maize, and a kind of millet called *koua* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 22 men), which performs both civil and military duties. There are Government wireless stations at Georgetown

(MacCarthy Island) and at Bathurst. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

GIBRALTAR,

a rocky promontory, $\frac{2}{3}$ miles in length and $\frac{1}{2}$ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliott, afterwards Lord Heathfield, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade. During the year 1922 4,876 vessels entered, with a total tonnage of 6,010,314. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, and beer. There is an enclosed harbour with an area of about 400 acres, three graving docks, and docking accommodation for the largest battleships in the British Navy. The estimated civilian population (1922) was 17,327.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members, there is no Legislative Council.

GOLD COAST

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 2° 7' W to 2° 14' E. of Greenwich. It is divided into three parts—Gold Coast Colony, 23,490 sq. miles; Ashanti, 24,560 sq. miles; and the Northern Territories, 30,600 sq. miles—a total area of 78,650 sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 12° of N. latitude. It is bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by Togoland. The population (Census of 1921) was Gold Coast Colony, 1,171,913, Ashanti, 405,193, Northern Territories, 530,358, total, 2,108,463, excluding 2,422 Europeans. The natives are almost all Pagans, but there are 60,000 Muhammadans, and the number of Christians is steadily increasing.

The trade is principally with the United Kingdom. Gold is found in considerable quantities, and diamonds were discovered in 1909, there are also large deposits of high-grade manganese. The principal product is cocoa,

more than half the world's supply being produced in the Colony. rice plantations have been started and steps have been taken to improve the coco nut industry, and to develop the kola and sisal hemp plantations. The principal exports in 1922 were cocoa, £5,840,743, gold and gold dust, £889,204, kola nuts, £311,026, lumber, £254,384 and manganese, £106,031. The chief imports are textiles building materials, cotton goods, provisions, kerosene, and hardware. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters and has established schools of its own. Great efforts are being made to improve the sanitary condition of the coast towns. The principal towns are lighted and policed. The total tonnage of shipping entered and cleared in 1922 was 775,628 (British 1,797,877), 600 miles of telegraph have been established in the colony of which 200 miles are in Ashanti and 203 miles in the Northern Territories. There is a wireless telegraph station at Accra. A Government railway runs from Sekondi through Takoradi the centre of the gold mining industry to Kumasi (168 miles). Another line runs from Accra to Lome (122 miles).

The seat of government is Accra (population 38,049). The other principal towns are Cape Coast (14,921), Adzida (1,620), Elmina (5,262), Sekondi (9,500), Takoradi (6,721), Quana (9,839), Axim (7,781), Lome (20,268), Saltpond (6,342) and Winneba (6,980). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 12 official and 9 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

ASHANTI

Ashanti was placed under British protection on Aug 7, 1896, and a English Resident was appointed to Coomassie. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast being appointed Governor of Ashanti, though the laws and Ordinances of the Gold Coast do not apply to the annexed territory. It is divided into two provinces under Provincial Commissioners—the Eastern Province, headquarters Coomassie, and the Western Province, headquarters Sunyani. The population (census 1921) was 406,193. Coomassie, the chief town, has about 20,000 inhabitants. There are Government schools at Coomassie, Sunyani and Juaso, and a number of mission schools. Agriculture is extending, cocoa and rubber plantations are being formed. Gold output (1918) £421,731. In the Western parts of the Gold Coast Colony and especially of Ashanti are rich forests with excellent timber trees (mahogany, cedar, &c.), trees yielding fruits, rich in oil rubber bearing plants and species yielding gum copal. The country is well watered, and with proper restraints on wasteful native farming and on over-exploitation, would contain inexhaustible supplies of valuable forest products. On the Eastern side the forests are sparser, though timber and oil trees are common and game plentiful. The products there are chiefly maize, kokoyams, bananas, ground nuts, and cocoa, the plantations of which are rapidly extending.

NORTHERN TERRITORIES.

In 1901 the Northern Territories lying to the north of the parallel of 8° N lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered,

under the Governor, by a Chief Commissioner with his headquarters at Tamale. The country is divided into two provinces under Commissioners the Southern Province, with head quarters at Tamale, and the Northern Province, with headquarters at Navarrou. By the census taken in 1921 the population was about 530,360. The Mohammedans have substantial mosques there is a Roman Catholic mission. Government schools have been established at Tamale, Gambaga, Lorha, and Wa. Good permanent roads are being made. The Northern Territories are capable of producing various agricultural crops (cereals, Shea butter, ground nuts, indigo, tobacco), and are said to contain wide auriferous areas.

Accra is distant from Liverpool, 3,920 miles, transit 12 to 13 days.

HONG KONG

The Crown Colony of Hong Kong consists of a number of islands situated off the south eastern coast of China, at the mouth of the Canton River, in 22° 10'—22° 34' N lat. and 112° 52'—114° 30' E long, and of a portion of the mainland.

Hong Kong is an island about 10 miles long and from 2 to 6½ miles broad with a total area of 32 square miles. It lies close to the mainland, being separated at one point by a narrow strait (Lycée moon) not more than a quarter mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842. *British Kowloon* was subsequently acquired by the Peking Convention of 1860 and the *New Territories*, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population (1921) of 662,200. The non-Chinese residents, excluding naval and military, numbered about 15,000.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 20 square miles. With the exception of liquor and tobacco the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1921) 21,710,425 tons, (1922) 23,253,326 tons. A railway, of which 23 miles belong to the Government, runs from Kowloon to Canton, the length north of the Sham Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. A light railway runs through the fertile valleys of the north-east portion of the New Territories from Fanling to Sha-Tau kok, a distance of 7 miles. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,820 feet high. The Peak District is a

favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 84 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather, matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1922 there were 755 schools subject to Government supervision, attended by 39,214 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony and its Government is administered by a Governor aided by an Executive Council of 9 members together with a Legislative Council of 14 members including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

JAMAICA.*

aboriginally Xaymaca or Land of Wood and Water—an island situated in the Caribbean Sea about 90 miles to the south of Cuba within 17° 43'—18° 32' North lat. and 76° 11'—78° 21' W. long. It is the largest and most valuable of the British West Indian Islands being 144 miles in length and 49 in extreme breadth containing an area of 4,450 square miles and a population in April 1921 of 858,118 (males, 401,973 females 456,145) whites, 14,476, coloured, 157,223 blacks, 660,420 East Indians 18,610, Chinese 3,696 not specified, 3,693.

Jamaica was discovered on May 3 1494 by Columbus who called it St. Iago. It was taken possession of by the Spaniards in 1509 but in 1655 a British expedition sent out by Oliver Cromwell under Penn and Venables attacked the island which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

From the sea level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges dividing the large rivers and attaining in the culminating Peak of the Blue Mountains in the eastern part of the island an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores but none are navigable except the Black River and that only for small craft. There are several excellent harbours and the island is intersected by good roads. There are 200 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages the number of accounts open in the Govt. savings banks was 60,084 (1922). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported the latter is still counted the best in the world, and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinean grass from four to six feet in height grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye stuffs, drugs and spices and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members. The Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney General, the Director of Public Works and the Collector General (all *ex officio*) and of such other persons, not exceeding 12 as the King, or the Governor may appoint, called Nominated Members and 12 elected by the people being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre and Cornwall in the west. The principal city is Kingston, the seat of government, and the largest port and town pop. (census, 1921) 62,707, the next in importance are Spanish Town pop. 8,694, Montego Bay, 6,580 and Port Antonio, 6,572. Chief exports (1922) sugar, £911,822 fruit, £2,131,555, coffee, £203,883 cocoa, £138,325.

* The Government publishes annually a *Handbook of Jamaica*, full of information respecting the history and personnel of the island.

KENYA

*Kenya Colony and the East Africa Protec-
torate* include the whole of the coast from
the Umba to the Juba River, as also the vast
territories in the interior bounded in part by
international conventional lines. The eastern
boundary was defined along the Juba and north
east by an agreement with Italy (1891), and on
the north by an agreement with Abyssinia in
1908. On the west the Colony adjoins Uganda,
and on the south the mandated Tanganyika
Territory. The population of the Colony at the
census of 1922 was 2,529,133. Its area is approxi-
mately 200,000 square miles.

A great portion of this vast region consists
of pasture lands or barren wastes, but there are

not lacking extensive districts of great natural
fertility on the coast as well as in the interior.
The Colony is divided for administrative pur-
poses into eight provinces which are sub-
divided into districts and sub-districts.

The districts most suitable for settlement by
Europeans are those of Kyambu Nyeri, Nakuru,
Naivasha, Lumbwa, and Uasin Gishu. There is
also a considerable region still undeveloped, and
not yet included in any administrative district.

Kenya also includes the *Witu Protectorate*, a
small tract of country at the mouth of the
river Tana. Witu is regarded for administrative
purposes as part of *Tanaland*.

Mombasa, which is connected with Europe by
telegraph possesses perhaps the finest harbour on
the east coast of Africa (population, about 32,330,
of whom 653 are Europeans). There is also
telegraphic communication along the coast
between Mombasa and Lamu, and between

Mombasa and Entebbe the capital of the
Uganda Protectorate. There are also extensions
radiating from the main Uganda Railway tele-
graph system to Laveta, Fort Hall, West Kenia,
Archers Post Southern Masai Reserve, Eldama
Ravine, Kericho Uasin Gishu, Machakos Kisil
and Mumias also telegraph connexion between

Mombasa and Tanga. Radio telegraph stations
exist at Mombasa and Kisumu. The Uganda
Railway has its terminus at Mombasa, which
is connected with the mainland by a railway
bridge 1,732 feet in length. There are also
about 40 miles (under Uganda Railway manage-
ment) from Nairobi to the Kort Hall District,
and about 90 miles from the main line at

Uganda junction to the Magada Soda Lake.
Nairobi, the capital of the Colony and central
station of the Uganda Railway, has a popu-
lation of 24,378, of whom 2,929 are Europeans.
There are also some 600 European farmers in
the immediate neighbourhood of Nairobi.

The principal exports are coffee, fibre, carbon
ate of soda grain, and hides and skins, the
principal imports are piece goods, rice, grain and
flour building materials, European provisions
petroleum &c

The importation of arms and ammunition is
prohibited, except under the most stringent
regulations, and the introduction and local manu-
facture of spirits is also heavily checked.

The problem of admitting or excluding immi-
grants from British India has exercised the
attention of the Government, and discussions
have taken place at the Colonial Office in London
on the subject. Delegates from Kenya and from
British India have stated their views, which are
in direct conflict one with the other.

LEEWARD ISLANDS

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda (2) St Christopher and Nevis, with Anguilla (3) Dominica (4) Montserrat and (5) the Virgin Islands with Sombrio under Commissioners all, except the latter, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The population of the federal colony at the Census of 1921 was 122,242. The General Legislative Council consists of 8 *ex officio* and 8 elective members, with the Governor as President.

(2) ANTIGUA (AND BARBUDA)

Antigua is the seat of government and residence of the Governor in Chief. It lies in 17° 6' N lat and 61° 45' W long and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1921 was 29,767, including 12,542 males and 17,225 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II, the island has always been more distinctively English. It is much less hilly and wooded than the other Leeward Islands and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is being planted and the island also exports molasses, tamarinds and arrowroot. In March, 1898 the Crown Colony system of government was instituted.

Revenue	1919-20. £70,158	1920-21. £106,711	1921-22. £89,149
Expenditure	70,829	92,911	105,931

Total exports	375,116	723,174	298,496

CAPITAL, St. John's, population (1921), 7,910.
President & Island Sec (the Colonial Secretary of the Leeward Islands).

Treasurer, Hon F W Griffith (see Leeward Islands).

<i>Magistrate</i> , R. H. K. Dyett	£600
<i>Supt of Public Works</i> Capt R. G. Wright	
Nooth, M.C.	450-500

Barbuda is situated 30 miles N of Antigua, of which it is a dependency, in lat. 17° 35' N, long. 61° 42' W. Area, 62 square miles. Population, 1,000. The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco and vegetables and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing.

Magistrate, Capt G. Downing.

Redonda, is a small island with a phosphate industry.

(2) ST. KITTS, NEVIS

(WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population at the Census of 1921 of 32,242 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 75° to 85°.

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18' N and long. 62° 48' W, and

comprises an area of 68 square miles its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies a continuous line of green estates sweeping up all round the coast from the sea towards the central cone which rises to a height of 3,711 feet (Mount Misery). The capital Basseterre pop. (1922) 7,837 is a port of registry and had 57 vessels of 957 tons in 1922.

Nevs (separated from St Kitts by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1922 of 11,569. Sugar cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town Charlestown. Pop. (1922) 1,308.

Antigua is about 60 miles N W of St Kitts, 16 miles in length and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1922), 4,275. Cotton is the principal product and small stock are raised.

	1920-21	1921-22	1922-23
Public revenue	£91,488	£84,056	£88,129

(3) DOMINICA

the largest island of the colony and the loftiest of the Lesser Antilles is situated between 15° 30'–15° 45' N lat. and 61° 13'–61° 30' W long, 95 miles S of Antigua, and is about 29 miles long and 15 broad comprising an area of 218 sq miles or 126,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies according to the altitude from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco nuts and fruit. The population was estimated at 38,000, on June 12 1922 included in this total are 400 Caribs, of whom 100 are of pure blood. The climate is healthy and during the winter months very pleasant. Yellow fever is unknown and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau on the south west coast, population about 7,000, and Ports mouth, population about 1,000.

	1920-21	1921-22	1922-23

(4) MONTserrat

is situated in 16° 41' N lat. and 62° W long, 26 miles S W of Antigua. It is about 11 miles in length and 7 in breadth comprising an area of 3½ square miles, with a population (Census 1921) of 12,120. Discovered by Columbus in 1493 it was settled by Englishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles. It contains three active soufrières and several hot springs while the scenery is charmingly diversified. About two thirds of the island are mountainous the rest well cultivated. The chief exports during the year 1920 were cotton, cotton seed, limes and its products, sugar, papaya and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709.

	1920-21	1921-22	1922-23

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A. form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666 the principal are—Tortola (the largest), situated in 18° 27' N lat. and 64° 40' W long, Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,028. There is good pasturage for cows, sheep and goats. Sugar, cotton and coconuts are grown in increasing quantity, fishing and poultry rearing are also carried on. A valuable mine of copper has been worked at Virgin Gorda. The capital of the group is Road Town on the south east of Tortola, population (1921), 463.

	1920-21	1921-22	1922-23
Revenue	£11,715	£12,554	£9,441

Exports	24,108	20,376	12,832
Commissioner and Treasurer, R. Hargrove	£375		
Medical Officer, J Y McFadyen	212		

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements* (Singapore, Penang, Malacca, Labuan, Cocos Islands, and Christmas Island) the *Federated Malay States* (Perak, Selangor, Negri Sembilan, and Pahang), the *Non-Federated Malay States* (Kelantan, Iengganu, Kedah, Perlis or Palit, and Brunel) and the *Protected State of Johore*. The total estimated population of BRITISH MALAYA (1922) was 2,437,841 (as compared with 2,672,754 in 1911). Of the 1922 total, 2,110,606 were males and 1,327,235 females the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1921 was 14,954 (Straits Settlements 8,149 Federated Malay States 5,686, Non Federated Malay States 1,119).

(1) THE STRAITS SETTLEMENTS

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies), Penang (including Province Wellesley and the Dindings) Malacca the Cocos or Keeling Islands Christmas Island, and Labuan. These Settlements have an entire area of about 1,600 square miles, with an estimated population (1922) of 908,809.

The Government consists of a Governor, assisted by an Executive Council of 10 members, and a Legislative Council of 12 official and 13 unofficial members, appointed by the Crown. Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826 qualified by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz. to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction and the usual police magistrates and coroners courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1921 amounted in Singapore to 85.84 inches, in Penang to 89.54 inches, and in Malacca to 84.17 inches.

The railway from Singapore to Bangkok was opened for passenger traffic in July, 1928.

The principal exports are Para rubber, tin, preserved pineapples, tapioca, gambier copra, pepper, sago, coco nut oil, tanned hides, raw hides, rattans, coffee, spices, gums and dye stuffs (cutch, mangrove, bark, &c.). The rubber exports amounted to 145,960 tons in 1920, 128,155 tons in 1921, 146,781 tons in 1922 and 206,889 tons in 1923. The chief imports are dried fish, rice, milk, sugar, cigarettes and tobacco, coal, cotton piece goods, machinery, ironware, opium, petroleum, sarongs, slendangs and kalus.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three quarters of a mile in width. Its length is about 27 miles, and its breadth 12 miles. It comprises, with the adjoining islets, an area of 277 square miles, and an estimated population (1922) of 437,068. It was first occupied, in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E. with 250,725 inhabitants in 1922. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. The railway from Singapore to Bangkok was open for passenger traffic on July 1, 1928.

The number of merchant vessels entered and cleared in 1922, exclusive of native craft was

11,728, with a tonnage of 18,280,279. The total for the whole colony was 17,424, with a tonnage of 26,913,256. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 51,882 (tonnage 2,014,983). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of \$29,000,000. The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was \$3,500,000.

Singapore is a free port, no duties are levied upon anything except opium, tobacco, spirits, wines, beer and petroleum consumed in the colony. The trade returns aggregate for 1922 (including inter settlement trade), amounted to \$37,203,464 (including the value of bullion and specie), the value of exported tin being \$44,721,065.

Labuan is an island of the Malayan Archipelago situated about 6 miles off the north west coast of Borneo in 5° 16' N lat. and 115° 15' E long and forms part of the Settlement of Singapore. Its area is about 28 square miles and its estimated population is 5,851. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine harbour. The exports consist of coal, cloth, rice, sago, earthenware, brassware &c. Victoria Harbour, in the south east is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1922), \$1,634,016, exports, \$1,651,137.

Resident, H. S. Eley (acting)

The Cocos Keeling Islands are a group of about 30 small islands about 700 miles south west of Sumatra, and form part of the Settlement of Singapore. The estimated population is 876, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

CHRISTMAS ISLAND in the Indian Ocean, about 200 miles south west of Java and 700 miles east of the Cocos Keeling Islands has an area of about 56 square miles and an estimated population of 750. A District Officer is stationed on the island which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1922 was 99,352 tons.

PENANG is the northernmost of the Settlements. It includes Penang or Prince of Wales Island (est. pop. 1922 163,879) on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (est. pop. 1922, 120,478) and the Dindings Peninsula, about 13 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18' N, long 100° 21' E, and was ceded to the Government of India in 1796 by the Raja of the neighbouring territory, Kedah. Area, 108 square miles. At the time it was founded Penang was the only British settlement in further India, now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1922 (including inter settle-

ment trade) amounted to \$274,137,881; the export of tin from the port being \$45,579,709 in 1922.

Province Wellesley is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1798, with some land of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing, rice, spices, tapioca, and rubber plantations.

The Dindings Territory (area 183 square miles est. pop. 1922 12,546) is at present little developed but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lunut where a District Officer is stationed and steamers call regularly at Pangkor and Lunut. The territory comprises a group of islands (of which Pangkor is the largest) and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 120 miles to the N. W. of Singapore, comprises an area of about 720 square miles. It is one of the oldest European settlements in the East having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1824, when it was restored to the Dutch. It finally became a British possession in pursuance of the treaty with Holland, March 17, 1824 being exchanged for the British settlements in Sumatra. The estimated population in 1922 was 157,161.

Aggregate trade 1922 \$40,504,508 (including para rubber, \$23,004,869, exported in 1922).

Singapore, distant 8700 miles transit, 22 days
Penang, 20 days and Malacca, 23 days.

(a) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula and are closely connected with the Straits Settlements, they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1922 of 1,324,800. The principal towns are Kuala Lumpur (Sel.) pop. 80,422, Ipoh (Pk.) 36,860, Taiping (Pk.) 21,111, Kampar (Pk.) 12,325, Seremban (N.S.) 17,772, Klang (Sel.) 11,655, and Teluk Anson (Pk.) 10,859.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above mentioned control.

There are 1,000 miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (120½ miles), which is leased from the Johore Government. The line is of metre gauge through

out, and extends from Singapore (in the South) to Padang Bear (on the Siamese frontier), where it is connected with the Siamese State Railways, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 24 hours, and that between Penang (Penang) and Bangkok 34 hours (compared with a sea journey of 6 days). At Gemas there is a branch from the main Singapore Penang line running northwards through Negri Sembilan and Pahang as far as Padang Tungku. This line will eventually connect with another running South through Kelantan, now under construction. Through communication between F M S and Kelantan via the Siamese State Railways is in operation. There are 2,456 miles of metalled road, and 1,935 miles of unmetalled roads and bridle paths while the principal rivers are navigable for small boats.

One of the regions contributing largely to the raw products of the British Empire is the Malay Peninsula, and the most productive portion of the peninsula is that embraced by the four Federated Malay States. The territory is greatly endowed by having tin and plantation rubber as its two richest products but the figures given below show that it has other exports of great value.

With the growth of the rubber industry, there has been a tendency to neglect some of the other products of the country such as indigo, coffee, sugar, and pepper, gold has always been found in small quantities, chiefly in Pahang, and the export in 1921 amounted to 14,681 oz.

The following table shows the relative importance of the exports from the Federated Malay States over a period of three years —

	1920. tons	1921 tons	1922 tons
Rubber	201,330	94,570	128,462
Tin and tin ore	47,081	45,238	35,286
Copra	24,999	36,211	55,275
Rice and padi	12,062	8,425	6,387
Tapioca	429	787	821
Areca nuts	640	770	1,027
Gambier	343	289	309
Wolfram and scheelite	282	110	95

The climate is very uniform and may be described as hot and moist. There is no well marked dry season and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 91°, and the minimum 68°.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

	1921	1922
Public revenue	\$54,449,568	\$52,494,110
Public expenditure	114,386,546	49,811,007
Public debt	40,799,203	95,285,714

Commissioner of Lands, C. W. Harrison (acting) \$12,600

Secretary for Chinese Affairs, W. I. Chapman 14,400

Kuala Lumpur is distant 850 miles from London. Transit, 21 days (via Penang).

(3) THE NON FEDERATED MALAY STATES

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Tieng-anu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon the advice of a British official called the General Adviser. In respect of the other four States the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909.

In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadism.

JOHORE, with an area of 7,678 square miles and a population (Census, 1921) of 282,234 occupies the southern extremity of the Malay Peninsula. Capital, Johore Bahru. Population, 15,312. The rubber estates and tin mines are important.

	1921	1922
Revenue	\$7,689,054	\$8,625,223
Expenditure	11,159,449	8,785,873
Public Debt	800,000	800,000
Imports	24,730,135	24,407,531
Exports	34,051,796	37,861,597

Sultan, H. H. Ibrahim, C.M.G. K.B.E., born 1873, succeeded his father 1895.

General Adviser, H. Marriott.

Chief Men, Dato Abdullah bin Jaafar.

Deputy State Secretary, Dato Ismail bin Bachok. Judge, A. V. Brown.

KEDAH, between $4^{\circ} 5' - 6^{\circ} 35' N$, lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1921 was 338,544, and the approximate area 3,800 sq miles. Rice is the principal crop in North Kedah while coco and betel nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River with a population of about 12,000. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 40 British officials, employed in the Public Works Survey, Police, and Medical departments.

	1921	1922
Revenue	\$5,235,450	\$4,966,004
Expenditure	5,348,756	5,290,239
Public Debt	2,720,953	1,500,000

Sultan, H. H. Tunku Abdulhamid, K. C. M. G.

Regent, H. H. Tunku Ibrahim, C. M. G.

British Adviser, W. P. C. I.

PERAK, the most northerly State is on the west coast of the Malay Peninsula. The area is about 300 sq miles and the population is 40,000. The capital is Ipoh, a few miles up the Perlis River. Rice is the principal crop.

	1921	1922
Revenue	\$322,508	\$372,483
Expenditure	336,728	333,058
Public Debt	495,394	400,000

Raja, H. H. Syed Alwi, C. B. E.

British Adviser, J. W. W. Hughes (acting).

KUALA LUMPUR lies between $4^{\circ} 38' - 6^{\circ} 15' N$ and $101^{\circ} 26' - 102^{\circ} 45' E$, on the east coast of the peninsula with a total length of about 120 miles and a breadth of 50 miles. The northern portion is flat and fertile producing rice, coco nut and betel nut and affording pasturage for large quantities of live stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is mountainous and barren. The capital, Kota Bharu, 8 miles from the mouth of the Kelantan River, has a population of 10,833.

	1921	1922
Revenue	\$1,260,262	\$1,310,020
Expenditure	1,678,432	1,536,328
Public Debt	3,342,615	3,567,895

Sultan, H. H. Ismail, K. C. M. G.

British Adviser, A. F. Worthington.

TRENGGANU between $4^{\circ} 30' - 5^{\circ} 45' N$ and $102^{\circ} 15' - 103^{\circ} 30' E$ lies south of Kelantan on the east coast of the peninsula. Area, about 5,000 square miles. Population (1921) 253,092. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports in 1922 were dried fish (\$887,050), tin ore and copra. The capital, Trengganu on the river of that name, contains 12,000 inhabitants.

	1921	1922
Revenue	\$547,619	\$669,763
Expenditure	759,054	858,303
Public Debt	Nil	414

Sultan, H. H. Suleiman, K. C. M. G.

British Adviser, J. L. Humphreys.

MALTA

an island in the Mediterranean Sea, 58 miles from Sicily and about 120 from the African coast, about 17 miles in length and 9 in breadth and having an area of 31½ square miles. The colony includes also the adjoining island of Gozo with an area of 24½ square miles. COMING—the site of the *Sultan's* disaster in 1889 and now a sanitary

station—and several islets. The civil population of the whole group, on Dec 31, 1922, was 218,520. In religion the Maltese are Roman Catholics. The lower orders are mainly Punjabi race. The Maltese dialect which is generally spoken is of Semitic origin and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St John during the Middle Ages from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The climate although not tropical is very hot in summer. The mean temperature for the summer months in 1921 (June, July, August and September) was $76^{\circ} F$. In winter the mean temperature was $55^{\circ} F$.

The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage (mumin seed, onions and potatoes), figs and honey are plentiful. The principal occupation of the people is in connexion with shipping, about 8,000 females being occupied in making lace.

The principal harbour is one of the finest in the world. It is very deep and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal being, about half way between Gibraltar and Port Said. There is an extensive asexual and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral and the Seminary. Its population has now dwindled to about 500, but its suburb Rabat, had about 10,000 inhabitants in 1921-22. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta which was founded in 1566.

Malta possesses a University and Lyceum, 102 elementary and infant schools, a secondary school, and 40 night schools, maintained at a total cost to the Government of £56,405 in 1921-22. In addition there are garrison schools, a Dockyard school, and 59 private schools which receive no grants in aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St Paul in 58 A.D. In the Dark Ages it was taken by the Moors its commerce was destroyed and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom but was in 1530 handed over to the Knights of St John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Valette. The Knights expended large sums in fortifying the island and carrying out many magnificent works until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly.

The Senate is composed of 17 members 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the other 7 being elected by a special electorate. The Legislative Assembly consists of 32 returned by 8 electoral districts each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant Governor, the Legal Adviser and three officers chosen from the Navy Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which in the Governor's opinion affects a reserved matter he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry. In 1922 the Port of Valletta was entered by 1,626 vessels (tonnage, 2,746,220).

Malta is 220 miles by sea, and via Naples about 1,995 transit 3 days.

MAURITIUS

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar between 57° 17' 57" 46' E long and 3° 12' 58" 20' 33", and comprising an area of 720 square miles. The permanent population at the Census of 1921 was 376,474, of whom 265,455 were Indians, the majority born in the Colony and the remainder mainly of French or mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598 and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius was restored.

Of the total cultivated area of 206,419 acres, 173,519 are under sugar 20,000 under fibre, and 12,900 under other crops. The necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate, but except in Port Louis and some of the low lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

There is an excellent harbour on the N.W. coast on which the capital, Port Louis, stands, and the annual trade of the island passes almost

entirely through Port Louis. The shipping entered and cleared, in 1922, amounted to 908,977 tons, of which 67 per cent. was British. In 1922 there were 143½ miles of railway (119½ of 4 ft 8½ in gauge and 24 of a ft. 6 in.), 61 post offices and 54 telegraph offices in the island, with 673 miles of telegraph, including block telegraph for the railway and 126 miles tele phone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor through instructions of the Secretary of State, may from time to time appoint and a Legislative Council of 27 members, eight being *ex officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools. (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1921-22 amounted to Rs 1,095,734. Of the pupils in the Government and aided schools 59 per cent. are Roman Catholics, 2 per cent. Church of England, 1 per cent. other Christian denominations, 11 per cent. Muhammadans, and 27 per cent. Hindus and others.

CAPITAL, Port Louis	Population (1921), 50,308	1921-22

DEPENDENCIES OF MAURITIUS.

(1) **RODRIGUES**, 250 miles almost due east of Mauritius. Population (Census 1921), 5,524. Area, 40 square miles. Cattle, beans, salt fish, and

goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, W. J. Hanning (Acting)

Rs. 9,000 to 12,000

(2) **OTHER DEPENDENCIES**. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco nut oil. The most important is Diego Garcia (pop. 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius 28 to 30 days

MESOPOTAMIA (IRAQ)

King of Iraq, Faisal, elected King of Iraq Aug. 10, 1921, acceded Aug. 23, 1921

President Council of State, the Naqib of Baghdad, G.B.E.

Iraq, or *Mesopotamia* "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N and N.E. to the Persian Gulf on the S and S.E., and from Persia on E to Syria and the Arabian Desert on W. The approximate position being between 37½° to 48½° E. long, and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Peace with the Allies (1920) Turkey renounced the sovereignty over Mesopotamia and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set-up by the High Commissioner in Nov. 1920, and in Aug. 1921 the Emir Faisal (son of the King of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations and as soon as that admission has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated.

The total area of the districts comprised within the British Mandatory Sphere is about 150,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of *Mosul*, *Baghdad* and *Basra*. At the Census of 1920 the population was ascertained to be 2,849,222, as under—

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378

Total 2,849,222

The *Baghdad* vilayet include the *Baghdad*, *Samarra*, *Diyalah*, *Kut*, *Diwanlyah*, *Shamlyah*, *Hillah* and *Dulaim* Divisions, *Basra* vilayet include *Basra*, *Amara* and *Mutafik*, and *Mosul* include *Mosul*, *Arbil*, *Kirkuk* and *Suleimani*. (*Mosul* covers a great part of the ancient kingdom of *Assyria*, the ruins of the Assyrian capital

being visible on the banks of the Tigris, opposite Mosul)

Of the total population there were in 1900 1,146,685 Sunni Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks and since the British occupation notable improvements have been effected. The Irrigation Department is at present confining itself to small and immediately remunerative schemes. The wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans and rice, peas and Indian corn. Wheat averages 464lb per acre, barley 621lb and rice over 1000lb. In 1918-19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates and piece goods.

The following table shows the approximate annual net revenue obtained by the Iraq Customs Administration during the years of British occupation—

Financial Year	Rupees	£ sterling converted at 2s 4d
1915-1916	17,22,599	114,839
1916-1917	53,78,600	358,573
1917-1918	61,57,650	410,510
1918-1919	58,35,000	388,333
1919-1920	2,08,23,494	1,388,333
1920-1921	2,13,94,320	1,426,288
1921-1922	2,43,33,483	1,622,232

The Euphrates (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Fizerun, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north west of Erzerum in the Dumlul Dagli. The Tigris has a total length of 1,150 miles from its source to its junction with the Euphrates at Garnat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, via Baghdad, a total length of 1,550 miles, with a single track of 4 ft 8½ in gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the

Tigris to Baghdad and the Persian Gulf. The section Konieh Ereğli Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates on a wooden bridge at Jerablus. At Aleppo there is a connexion with the Pilgrims line from Medina (through Damascus and Hama to Aleppo) and, if it is completed the railway will be served by the port of Alexandretta (Iskanderun) in Cilicia. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 170,000, other towns being Basra, 85,000 and Mosul (opposite the site of Nineveh), 90,000.

High Commissioner and Commander in Chief, Sir Henry Robert Conway Dobbs, K.C.S.I., K.C.I.E.

General Officer Commanding, Maj. Gen. Sir J. deodote Fraser, K.C.B., C.S.I., C.M.G.
CAPITAL, Baghdad

Baghdad is 840 miles by air from Cairo, Egypt. Official Mails between London and Baghdad are sent by fortnightly Air Mail Service via Cairo—Helipolis—Ramleh—Amman—Kasr Asrak—Rimadle with a saving of about 14 days in transit over the normal service.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Right of Benue between Dahomey on the west and the Kameruns on the east. The Protectorate is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria and the southern group with the former Protectorate of Southern Nigeria. The headquarters of Government is at Lagos. The area of the whole territory is 336,000 sq. miles, and the population roughly 28,500,000.

By Order in Council of Nov. 1922 there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 26 official members, 3 elected members representing the municipal area of Lagos (J. Egerton Shyngle, Eric C. Moore and Dr. C. C. Adeniji Jones), 1 elected member representing Calabar (Atu Amonn) and 12 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The natural products exported are palm oil and kernels, gum copal, rubber, mahogany, shea nuts, hides and skins, and the export of ground nuts is steadily increasing. A considerable industry has arisen in connexion with tin mining in the Northern Provinces. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation between Lagos and Kano a distance of 705 miles. Branch lines run from Minna to Baro (on the Niger), and from Zaria to Bukuru. Another railway line runs from Port Harcourt, at the head of the Bonny estuary, to the coal fields at Udi (150 miles) and further railway extensions are in progress. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Ilorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports are cotton goods, provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, and haberdashery.

NYASALAND PROTECTORATE

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi.

The population of the Protectorate is 1,300,000, including about 1,500 Europeans and 600 Asiatics, and it has a total area of 40,000 square miles.

The principal exports are cotton, tobacco, chillies, coffee, ground nuts, fibre, and tea. The cultivation and export of cotton and tobacco are considerable. Ivory and rubber are also exported in small quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. A railway from Port Herald (the "inland port of the Protectorate) to Blantyre (123 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans Zambesia Railway from Beira to Muraça (on the southern bank of the Zambesi River) was opened in April, 1922. The terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Fort Johnston, on Lake Nyasa, is projected. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,500.

Mails to and from England are despatched every week via Cape Town and Beira. Between Beira and Europe the means of communication are the Union Castle Mail S.S. Co. Messrs Rennie's Line via Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape via Salisbury, and, with the Portuguese wires, to Chinde and Quilmane. The African Trans Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

The chief towns are Blantyre (population about 300 Europeans and 7,000 natives) and Zomba, the headquarters of the Government.

(In addition to £1,000 as C J of Fiji)	

(1) *The British Solomon Islands*, protected since 1893 consist of Guadalcanar, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea with a total area of about 11,000 square miles and a population 1919, of 675 Europeans, 75 Asiatics and about 150,000 natives. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899 and in 1900 (hosenel and Ysabel with the islands in Bougainville Straits and Lord Howe's group were transferred by treaty from Germany). The revenue in 1900-21 was £52,315, and the expenditure £41,662 exports 1919-20 £212,542 imports £181,162. The seat of government is Tulagi.

Resident Commissioner, R. R. Kane M C
(and £150 allowances) £800 to 1,000

(2) *The Gilbert and Ellice Islands* formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N and 3° S latitude and 175° and 177° W longitude, consists of 16 islands with several small islands or islets depending upon them and the Ellice Group, between 5° 9' and 10° 5' S latitude and 176° E and 179° 58' W longitude, consists of nine islands. Ocean Island (or Paanapa), in lat 0° 55' S and long 169° 35' E, which is the seat of government, was proclaimed British in 1900. Total area, 120 square miles. Population (1919) 200 Europeans, 300 Asiatics, and 33,500 natives. Revenue (1900-21), £54,079; expenditure, £45,379; imports (1919-20), £120,788 exports £213,042. The Union or Tokelau Group, Fakarua, Nukunono and Atafu, were included in the Protectorate in 1900, and annexed to H M Dominions in Feb 1916 as part of the Gilbert and Ellice Islands colony, including Christmas Island.

Fanning Island, in lat. 3° 30' N, long 159° 13' W, and Washington Island, 66 miles N W by W of Fanning Island. Pop. 21 Europeans in connexion with Pacific cable station and about 400 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan 27, 1916.

Resident Commissioner, H. R. McClure
(and £100 allowance) £700 to 800

(3) *The Tonga or Friendly Islands*.—A protectorate over the Tonga Islands Kingdom was proclaimed May 19, 1900. These islands are situ-

ated in the Southern Pacific to the E S E of Fiji and 390 miles therefrom with an area of 385 square miles and a population (1919) of 376 Europeans, 250 half-castes, 22,689 Tongans and 247 others—total 23,562. The limits of the group are between 15° and 23° 30' S and 173° and 177° W. Nukunono, on the island of Tongatabu, is the seat of government. The present queen (Salote) succeeded the late King George I. Lubou II in 1918. Soil generally is fertile, the principal export is copra. Two of the smaller islands disappeared owing to a tidal wave, in June, 1919. Revenue 1920-21, £90,764; expenditure £66,511; imports (1918) £177,151; exports £169,757. The total shipping entered and cleared in 1917 was 47,180 tons all of which was British.

Agent and Consul, Islay McOwan £800
(and entertainment allowance £100)

(4) *The Phoenix Islands* (McKean, Gardner, Birnie Hull, Enderbury, Phoenix, Canton, and Sydney) between 2° 30' and 4° 30' S and 171° and 174° W.

(5) *Pitcairn Island* situate in lat 25° 33' S, long 130° 8' 30' W. Pop (April 1907), 444, descendants of the mutineers of H M S *Bounty*. Arrowroot is manufactured and exported.

Deputy Commissioner, Dr W I Williams (H M acting Consul for the Society Islands)
Chief Magistrate, Ried Christian

(6) *The New Hebrides Group* lies roughly 500 miles west of Fiji and 250 miles north-east of New Caledonia. In 1906 a Convention was signed under which the administration of the group was assumed by Great Britain and France. British and French Resident Commissioners were appointed in 1902. Nat pop about 58,700. European 946. Principal exports, maize, copra, cotton, and coffee. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia.

French High Commissioner, J Repiquet (Governor of New Caledonia)

British Resident Commissioner, M King, £940
C M G

Ass to do, R I I Browne 400
French Resident Commissioner, M d Arboissier
President of Joint Court, Count de Buena Esperanza £1,200

British Judge, R G de Vere
French Judge, M Sachon

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE

Palestine, extending from the Mediterranean on W to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias and from the Egyptian frontier on S to the French Mandatory Sphere of the Great Lebanon on N, includes, in addition, a large area E of the Jordan and S of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept 29, 1922. The country consists of a W maritime lowland, the mountain region of Judah (which forms the backbone of the district) and, on the E, the depression through which the

Jordan wends its way from the Sea of Galilee (Tiberias) to the Dead Sea. The Dead Sea, 1,292 feet below the level of the Mediterranean is 65 miles long and has an average width of $8\frac{1}{2}$ miles. It receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one sixth greater than water, with 24 per cent of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet above mean sea level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (Oct. 3, 1922), of 757,182, of whom 590,890 are Muhammadans, 73,624 Christians, 83,794 Jews, and 9,474 members of other faiths. Since 1919 about 30,000 immigrants (mostly Jews) have settled in the country. In 1922 the Jewish immigrants came principally from Poland (41 per cent) Ukraine (24 per cent), Rumania (12 per cent) and Russia (9 per cent).

Palestine is divided into 7 administrative districts, under District Governors. English, Arabic and Hebrew are the official languages of the country. The chief town, Jerusalem, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it was surrendered to General Allenby on Dec. 9, 1917. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct. 1922 of 62,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. *Bethlehem*, the scene of Christ's Nativity is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Gaza (17,480), Acre (6,420), and Haifa (24,634).

The railway system of Palestine consists of five sections. *Haifa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara. *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandatory territory of Syria. *Jaffa-Ludd-Jerusalem*. *Haifa-Beersheba* and *Nablus-Afula-Tulkerram*. The main junction of the Government Railways is at Ludd, the general offices being at Haifa.

The chief ports are Jaffa, Haifa and Acre. There are branches of the Anglo-Egyptian, Anglo-Palestine, Banco di Roma, Crédit Lyonnais, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. The imports in the year ending March 31, 1923, were valued at £2,428,146 and the exports at £2,376,849. In 1922 there were 309 government

schools and 2 training colleges, with a total of 623 teachers and 19,609 pupils.

ST HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton in 15° 55' S. lat. and 5° 42' W. long. It is 10½ miles long, 6½ broad and encloses an area of 47 square miles, with a population (Census 1911) of 3,500. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet. Interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trade" keeps the temperature mild and equable. The thermometer goes up to 84° in the town at the sea level, but in the country, 1,800 feet above the sea, the maximum is about 74°, and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day, the lowest temperature in winter is 52°, and the total rainfall (1922) 42.8 inches. St. Helena was discovered by the Portuguese navigator Juan de Nova Castilla, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1582. It remained uninhabited until the Dutch colonised it c. 1645. The English East India Company seized it in 1651, but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from

Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5 1821) when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry have been established. St James's Bay on the north west of the island, possesses a good anchorage. *Ascension*, an isolated island in the South Atlantic (3,417 miles from Plymouth 760 from St Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,850 feet situated 7° 55' 55" N lat and 14° 25' 5" W long. It is said to have been discovered by a Portuguese named João de Nova Gallego on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque who gave the island its present name. Its extreme length is 7½ miles and extreme breadth 6 miles, with an area of about 38 square miles, and being situated in the heart of the S F trade winds its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815 when the English took possession of it. The island was administered by the Board of Admiralty until Oct 27 1822 when by Royal Letters Patent it became a Dependency of St Helena, it was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N W coast. Ascension is visited by the sea turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide awake," use the island as a nesting place about every eighth month. *Resident Magistrate*, W Haining.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 4 members the Governor alone making all ordinances.

Sarawak is a state on the north west coast of the island of Borneo, with a seaboard of 400 miles, an area of about 42,000 square miles, and a population of about 600,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges the Serang, Kelingang, and Batang Lupar mountains the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet the principal rivers are the Rejang (navigable for about 160 miles) the Baram (navigable for about 100 miles) the Batang Lupar, and the Limbang Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (20 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 50 appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1904. The country produces sago, gutta percha, india rubber, bees wax, birds nests, oil, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. A large petroleum field has been discovered at Miri and Bakong, in the Baram district, and is now a valuable asset. Oil exports (1922) 223,195 tons.

	1920	1921	1922

CHIEF TOWN, Kuching. Population (1911), 30,000. Distance from London, 8,700 miles, transit, 25 to 30 days. Kuching Sadong, Sibü, and Miri are in wireless communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday in normal times, a temporary service being now maintained 3 times a month. There is also direct communication with Sibü and Miri.

SEYCHELLES

The Seychelles Islands, in the Indian Ocean, which number altogether 90 were occupied by the French about 1745 captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 196 square miles of which Mahé occupies nearly 65 square miles. The population was estimated (Dec. 31 1922) at 25,776 an increase of 653 since the Census of 1921, when the total was 24,523 (Mahé 19,426, Praslin 1,999, La Digue 1,303, other islands 1,795). Victoria the capital, on the N.E. side of Mahé, has an excellent harbour. It is an Admiralty coaling station. Although only 4° S. of the Equator, the islands are very healthy, the death rate in 1922 being 23 per 1,000. There are 19 Roman Catholic and Church of England primary schools, there are also a secondary schools.

The principal exports are copra, vanilla, coco nuts, coconut oil, tortoise shell, cinnamon, essential oils, soap, and guano. Aldabra one of the dependencies of the Seychelles and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (2 *ex officio* and 1 nominated) and by a Legislative Council of 3 official and 3 unofficial members.

SIERRA LEONE

The peninsula of Sierra Leone situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast line of 220 miles with an estimated area of 4,000 square miles. In 1921 its population was 25,163 of whom 1,261 were resident Europeans. Of the rest more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 220 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40' and 13° 21' W. long. Its estimated area is 27,000 sq. miles and its population about 1,455,148. For administrative purposes it is divided into 3 Provinces, under Provincial Commissioners assisted by 14 District (and 20 Assistant District) Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, and palm oil, but ginger, piassava, hides, and rice are also exported. The value of the palm kernels exported in 1922 reached £722,402. The chief imports are cotton goods, coal, apparel, hardware, provisions and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles and a branch line 204 miles in length extends in a north easterly direction from Boia to Kamabala. By the extension of the railway and the development of a system of roads in the Protectorate, it is estimated that the output of Sierra Leone products into the European market is capable of being more than doubled. There are 827 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council nominated by the Crown, and having full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND

(The Somaliland Protectorate)

In 1884 a Protectorate was declared over part of Somaliland, a region where the coast is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia, and forming the north eastern horn of the African continent. The British Protectorate contains about 68,000 sq miles. The population mainly consisting of Somalis, a Muhammadan people, is estimated at 300,000. The boundaries are defined by treaties with Abyssinia, France and Italy the northern coast as far as 49° E and the 8th parallel of N latitude are the limits on the north and south. The Protectorate garrison is now confined to a Camel Corps 400 strong, the Dervish power having been finally broken in 1920. The chief products of Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION

High Commissioner for South Africa, The Earl of Athlone, G C B, G C M G, G C V O, D S O, A D C (also receives £20,000 as Governor General of the Union of South Africa) *£3,000
 Imperial Secretary and Accountant, H J Stanley, C M G 1,700
 Asst Imperial Secretary, C L O B Dutton 900
 Chief Clerk, Shirley Eales 830
 Resident Commissioner, Southern and Northern Rhodesia, C D Douglas Jones, C M G 1,800
 Private Secretary, † J Rossella.

The High Commission—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner by a similar Commission issued in 1905 in Lord Selborne, since 1920 it has been vested by a separate commission in the successive holders of the office of Governor General of the Union of South Africa. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern and Northern Rhodesia. The Southern Rhodesia Order in Council, 1898, and the Northern Rhodesia Order in Council, 1911 provide respectively for a control by the High Commissioner over legislation important appointments and Native Affairs in Southern and Northern Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government.

BASUTOLAND

(The Territory of Basutoland)

Basutoland is an inland Native Territory of South Africa bounded North and West by Orange Free State East by Natal, and South by Cape Colony with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites 1,066 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates courts, where all cases between Europeans and natives are brought. The revenue is derived from Customs, native tax, income tax on Europeans, Post-office, and Licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mofale's Hoek, Quthing and Qacha's Nek. There are 452 native schools, with over 31,521 native scholars on the roll, a large proportion being in the schools of the French Protestant Mission, there are also

6 white schools, with 121 pupils. The amount spent on education in 1921-22 was £35,201. The chief articles of export are grain, wool, cattle and horses, the imports being chiefly blankets hardware, and groceries.

Maseru is distant from London 7,668 miles, transit, through the Cape, about 20 days.

BECHUANALAND

(The Bechuanaland Protectorate)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north east by Rhodesia, Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles. The Caprivi Zipsel was attached to the Protectorate for administrative purposes by Proclamation (1922). The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,285 Natives.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kafir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is

almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Tlokweng (Bakgatla), of Sebele II (Bakwena), of Tlokweng (Bangwaketse), of Sebelo Mkgosi (Bamaletse), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, via Gaborones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatse, Gaborones, Francistown, and Serowe, whither the Chief (Khama) and all his people moved in 1921 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

Southern Rhodesia (see p. 723) Sq. m. Pop.

Northern Rhodesia (Livingstone) 291,000 890,187

291,000 963,539

The total area of Rhodesia is about 440,000 square miles and the total population is 1,882,726 (1921). The territory is named after Cecil Rhodes, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north, to the Limpopo River in the south. Southern Rhodesia has been granted "Responsible Government" (see p. 723 & 4). The British South Africa Company will be relieved of the Administration of Northern Rhodesia as from April 1, 1924.

NORTHERN RHODESIA.

Northern Rhodesia lies to the N of the Zambezi, its political neighbours being Tanganyika and the Belgian Congo on the N, Portuguese E. Africa, Southern Rhodesia and South West Africa on the S, Nyasaland on the E, and Portuguese West Africa on the W. A large portion of this territory was first opened to British influence by David Livingstone, and it is partly occupied by the native tribes living under their own chiefs, but large tracts are being opened up for European settlement. Over 1,000,000 acres of land are under settlement by white farmers, whose operations are chiefly stock raising: over 65,000 head of cattle are being grazed by them. Extensive mineral deposits, copper in particular, have been discovered. Indigenous rubber is found in large areas. The country is well timbered, and well watered by the Zambesi and Kafue rivers and their affluents. The Rhodesian railway crosses the Zambesi at the Victoria Falls, traverses Northern Rhodesia, and, crossing the border, extends a further 450 miles to Kambove to Bukama, in the Belgian Congo State. There are large herds of native cattle (357,000 in 1921). Game is also abundant.

The total area is about 291,000 sq. miles and the population in 1921 was 983,539, of whom 3,634 were Europeans.

Administrative revenue 1922-23	£258,154
Administrative expenditure, 1922-23	345,388

SWAZILAND

(The Swaziland Protectorate)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and the Portuguese province of Mozambique (Delagoa Bay). The total area is 6,678 square miles, and the population (1921) 122,951, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld about 2,000 feet lower and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. Except in the Low Veld the country is well watered and healthy.

A Special Court having the full jurisdiction of a Supreme Court, and Courts of Assistant Commissioners having a restricted jurisdiction, have been established. Native chiefs continue to exercise jurisdiction according to native law and custom in civil disputes between natives, subject to a final appeal to the Resident Commissioner. The Paramount Chief is Sobhuza, son of the late Paramount Chief Bunu.

The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle ranching on a large scale has been commenced by several companies. There were about 230,000 head of cattle in the Territory at the end of March, 1922.

In the winter season between 250,000 and 300,000 sheep are brought to Swaziland for grazing from the high table lands of the Eastern

Transvaal. The agricultural products are tobacco, maize (the staple product), millet, pumpkins, ground nuts, beans, and sweet potatoes, grown in insufficient quantities to meet local requirements. Most of the sub-tropical fruits can be grown with success. Large areas of land are suitable for growing cotton, coffee, and tea. The country possesses considerable mineral wealth, including gold, tin, coal, and copper. During the year ended Dec. 31, 1921, 391 tons of cassiterite tin valued at £29,767, were exported. A few gold mines were being worked on a small scale.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. At each of the district headquarters—Hlatikulu, Stegi and Pigg's Peak—there is a small number of Europeans in the vicinity of the station, likewise at Bremersdorp, the old headquarters of the Territory. There are eleven schools for Europeans at various centres and the Government has established a school for natives at Zombode, at which, until recently, the young Paramount Chief (Sobhuza) attended. There is also a school for coloured children. Grants are also made to the various native missions for educational purposes.

There is a tri-weekly communication by motor car between Mbabane and Carolina (82 miles) and between Mbabane and Bremersdorp (23 miles). Elsewhere the communication is by cart or runner. There are 14 post offices, and a telegraph office at Mbabane, Pigg's Peak, Bremersdorp, and Ezulweni.

SOUTHERN RHODESIA

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N, the Transvaal and Bechuanaland on the S and W, and Portuguese East Africa on the E. The total area is 149,000 square miles and the population (1921) 899,187, of whom 33,600 are Europeans. The native population is 865,319, with 3,228 Asiatics and other coloured persons, including those of mixed race.

Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor, appointed by the Crown, with an Executive responsible to the Legislature, which consists of two Houses.

The laws in force in the Cape Colony up to June 30, 1891, were adopted for Southern Rhodesia, so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways. The former is a continuation of the line from Cape Town to Vryburg, and Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,356 miles.

A line connecting Bulawayo with Salisbury (302 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese) a total distance of 374 miles. The section from Bulawayo to the Wankie coal fields to the Victoria Falls (282 miles) was completed in June 1904. A branch line of standard gauge (3 ft. 6 in.) runs from Salisbury to the Eldorado mine (78 miles) and has been extended to Sinoia (4 miles). A standard gauge line leaves the Eldorado branch at Mt. Hampden Junction (13 miles from Salisbury) for the Shamva mines (73 miles). A line connects Gwelo with Selukwe (24 miles) another runs from Bulawayo to Gwanda to West Nicholson (104 miles), opening up the mining district to the south-east. Another connects Bulawayo with the Matopo Hills, where the founder of Rhodesia and Sir Starr Jameson are buried, and a branch line from Gwelo to Umvuma has been extended to Fort Victoria (123 miles). *The African Transcontinental Telegraph Line* ("Cape to Cairo") has been constructed as far as Tiji in East Africa about 3,250 miles from the Cape.

Southern Rhodesia is rich in mineral deposits and it abounds in traces of the ancient gold workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1922, was of the value of £54,613.083. The output for the year ended December 31, 1922 was valued at £3,121,468. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical the average altitude makes it well suited for European occupation, and for the cultivation of European fruit-trees, cereals, and vegetables in addition to tobacco, cotton, and the indigenous products of the country. The local breeds of cattle are constantly being improved by importation of pedigree stock.

On Dec. 31, 1922, there were 81 public schools and 45 other schools, with 5,928 pupils, in addition to 1,002 native schools with 60,335 native pupils. The expenditure on education in 1922 was £197,471.

Administrative revenue 1922-23	£1,326,469

SALISBURY, the seat of government, is situated on the Mashonaland plateau, 4,860 ft. above sea

level (white population census, 1921, 5,134). BULAWAYO, the largest town in Mashonaland, 4,460 ft. above the sea level, had a white population of 7,464 (1921). Other centres are Victoria, Umtali, Gwelo, Enkeldoorn, Melsetter, Hartley, Selukwe, Gwanda and Gatooma.

THE SUDAN

The Sudan extends from the southern boundary of Egypt, 22° N lat., to the northern shore of the Albert Nyanza, 2° 19' N lat. and reaches from the French Sahara about 18° 15' E (at 22° N) to the north-west boundary of Eritrea (Italian) in 38° 30' E, (at 18° N). The greatest length from north to south is approximately 1,400 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude. On the east lie the Red Sea, Eritrea and Abyssinia. On the south lie the British Protectorate of Uganda and the Belgian Congo and on the west the French Congo. The total area is about 1,014,600 sq. miles, with a population of about 4,000,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. Before 1894 the population was believed to be between 8,000,000 and 10,000,000, but by 1896 they had been reduced to about 1,500,000 by war, repression, and disease.

Northern Region—The greater portion of the region between 16° N and 22° N consists of the Nubian Desert on the east and the Libyan Desert on the west divided by the fertile valley of the Nile which is nowhere of great width. The Nubian Desert is bounded on the south by the rivers Atbara and Gash, the latter of which loses its annual flood in a fertile delta north of the town of Kassala. It is traversed from south to north by the continuation of the Abyssinian highlands, which constitutes the Nile Red Sea water parting and forms a series of parallel rocky ranges rising to a height of 5,000 feet, the lower slopes and valleys of which are clothed in vegetation and comparatively well watered. The maritime plain lying between these mountains and the Red Sea is covered with low bush and at Tokar the Baraka (a mountain torrent) waters sufficient of it to produce excellent cotton.

The Central Region between 16° N and 10° N contains on the east the so-called 'Island of Mejeo', the ancient seat of civilisation in the Sudan, situated between the Atbara and the Blue Nile Rivers. It is now almost uninhabited save for the natives who visit it with their herds, and to raise a precarious crop after the annual rains. The districts bordering on the upper reaches of the Blue Nile are covered with forests of large trees.

Southern Region—From 10° N to the southern boundaries are extensive tracts of cultivable lands enclosed by a semi-circle of forests and swamps, through which a multitude of streams flow into the main river.

Darfur is mainly an elevated plateau about 3,000 feet above sea level, with occasional summits on the Jebel Marra and Jebel Medob of 6,000 feet, one peak (Jebel Marra) rising to a height of approximately 10,000 feet, with summer torrents in the *khors*, which flood much of the southern districts and vanish in the winter. The *Lado*

enclave, which had been leased to Leopold II., King of the Belgians, reverted at his death to the Sudan administration, and now forms part of Mongalla. The total area of the *enclave* is estimated at 25,000 sq. miles, with a Negro population of about 250,000. The *Gambela enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post.

Hydrography—The Nile basin covers a total area of nearly 1,000,000 sq. miles, and while part of the basin lies in Abyssinia and Eritrea, its course from the Central African Lakes to the Mediterranean is within the British Protectorates of Uganda and Central Africa, and the Egyptian and Sudanese dominions. The main stream issues from the Victoria Nyanza at the Ripon Falls and flows through Lake Choga, whence it diverges to the Albert Nyanza and enters the plains of Lado, in the Mongalla Province of the Sudan, as the *Bahr el Jebel*. At Lake No the stream effects a confluence with the *Bahr el Ghazal*, from the South west, and further east with the *Sobat*, from the south western highlands of Abyssinia. From the Junction with the *Bahr el Ghazal* the stream is known as the *Bahr el Abiad* or *White Nile*. At Khartoum, 535 miles above the Sobat confluence, the river is reinforced by the *Bahr el Azrak*, or *Blue Nile*, from the south east and near El Dameri, 200 miles further north, by a confluence with the *Atbara* from Abyssinia. Thence the river flows north west to Abu Hamed, and makes a great south westerly bend, across the Nubian Desert, before resuming its northward course through the Dongolas to the northern frontier at Wadi Halfa. From the *Atbara* confluence to the Mediterranean the Nile has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. From the Ripon Falls (on the northern shore of Victoria Nyanza) to Rosetta (on the Mediterranean) the length of the waterway is stated to be 3,475 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts* the remaining (first) cataract being in Egypt at Assuan. The sixth occurs at the Shablika Gorge, below Khartoum the fifth below Berber, at El Sollmanieh the fourth in the Nubian bend, between Monastir and Meirout the third between New Dongola and the 20° N. lat., the second ends just above Wadi Halfa the first (in Upper Egypt) has been greatly diminished in vehemence by the construction of the dam and locks at Assuan.

Government—After the reconquest of the Sudan an Agreement, signed on Jan. 19, 1899, between Egypt and Great Britain, defined the boundary between Egypt and the Sudan, and provided for its administration. The Sudan is administered by a Governor-General, aided, since 1900, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. The Civil and Criminal Codes are based on those of India and Egypt. No duties may be levied on imports from Egypt and duties on imports *via* the Red Sea ports may not exceed those levied in Egypt. The import and export of slaves is prohibited.

Local Administrative and Judicial System—The Sudan is divided into 15 provinces (*mudiriya*) under governors (*mudirs*), under whom are British District Commissioners in charge of two or more districts (*manamurias*), a Sudanese or Egyptian official in charge of each *manamuria*.

Many native chiefs have considerable powers, but no general rule can be laid down in such cases. The legal system outside Khartoum comprises Governors and Province Judges the former often combining both functions. District Commissioners and District Judges, who are magistrates of the first and second class Native Officials and Chiefs, who are magistrates of the third class. Certain nomad chiefs have also independent power in their own tribes, subject to a revision of sentences.

Defence—A small garrison of British troops is quartered at Khartoum, under the command of the Governor-General, and there are also some units of the Egyptian Army stationed in the Sudan. The police and the locally recruited irregulars (*jehadia*) are under provincial administration.

Education—In addition to *kuttabs* (vernacular schools) there are 6 primary schools at Khartoum, Omdurman, Wad Medani, El Obeid, Suakin and Atbara, where instruction is given in English as well as Arabic, attended by about 1,000 pupils. A secondary school at Khartoum (Gordon College), and a training college (also at Gordon College) and technical or trade schools at Khartoum and Omdurman. The central authority is the Education Department.

Production—The Sudan is the chief source of the world's supply of gum arabic and ivory. The Gedra Irrigation Project (by means of a dam on the Blue Nile at Makwar, about 170 miles south of Khartoum) will enable 100,000 acres to be put under cotton in a few years time with unlimited scope for extension. Cotton area 1920, 59,000 Feddans. Crop 1920-1921 estimated at 23,000 Kantars. Other products include sesame, senna leaves and pods, ground nuts, dates, hides and skins and gold. The principal grain crops are dura a kind of millet used for making bread, and dukhn. Estimated yield of dura 1920 472,000 tons. The Cattle Trade in the Sudan shows remarkable growth in recent years and the number exported is increasing yearly. For some years Egypt has depended very largely on the Sudan for its meat supply. The forests which line the river bank rich in fibres and tanning material, extend to the frontiers of Abyssinia. On the White Nile the forests contain valuable trees—the ebony tree, the gum acacia, the bamboo, and the rubber creeper. The finest gum forests are in Kordofan, and the best rubber in the *Bahr el Ghazal*. Gold is the only mineral at present being successfully exploited in the Sudan, a mine being worked at Gabait.

Railways, &c.—In 1925 about 1,500 miles of rail ways were open for traffic. A bridge has been constructed over the Blue Nile at Khartoum, and the railway now runs to El Obeid, the chief town of Kordofan Province, crossing the White Nile by another bridge near Hilet Abbas. Since the opening of the eastern railway the Red Sea ports of Port Sudan and Suakin receive much of the trade which formerly passed northwards. South of Khartoum communication is established by steamers and boats on the Blue and White Niles, Sobat and *Bahr el Ghazal* and inland chiefly by camels and donkeys. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 4,333 miles in 1920. There are 65 stationary and 12 travelling Post and Telegraph offices, and 22 wireless telegraphy offices.

Finance—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town has been rebuilt and now contains a large mosque for Muhammadans, a cathedral, and the Gordon College, with extensive government buildings. Population about 22,000. Opposite Khartoum, on the Blue Nile is Khartoum North (26,000), and on the White Nile is Omdurman (60,000), the former Mahdist capital. Other towns are Berber, El Damer, Athara, Abu Hamed, Merowé, Dongola,

Wadi Halfa, Port Sudan, Suakin, Sinkat, Kassala, Kamlin, Senuar, Singa, Makwar, Wad Medani, Roseires, Gallabat, Gedaref, El Obeid, El Dumein, El Fasher (Darfur), Kodok, Mongalla, Kosti and Rejaf

TANGANYIKA TERRITORY

TANGANYIKA TERRITORY, formerly "German East Africa," was attacked by British and South African forces and conquered in 1918 the German forces surrendering near Abercorn in North east Rhodesia on Nov 23, 1918. Civil Administration was established *pari passu* with the conquest of the territory, and the whole Colony passed under the effective control of the present Administration at the beginning of 1919.

Tanganyika Territory has a coast line of about 500 miles and an estimated area of 365,000 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (Jan 1, 1913) at 7,659,898, the coloured population (other than native) being 14,898. The thickly populated provinces of Ruanda and Urundi are now under Belgian administration, so that the native population of Tanganyika Territory is about 4,107,000. The total white population is 2,447. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Education is not compulsory. In 1921 there were 58 Government schools with 71 native teachers and 4,200 pupils. Protestant and Roman Catholic missionary societies are working in the Territory.

The total area under forests is about 2,700,000 acres of which about 2,170,000 are included in the Government Forest Reserves. There are a number of plantations of coco-palms, coffee (on the higher lands), caoutchouc, sugar, cotton, cardamom and cinchona, while fibre plants (especially sisal) are successfully cultivated. In 1921 there were 3,147,442 cattle, and 3,405,103 sheep and goats in the Territory. Minerals known to exist within the Protectorate are coal, iron, lead, copper, mica, and salt. Agates, topaz, moon stones, tourmalin, and quartz crystals are found, and garnets in large quantities.

The chief exports in 1921 were Sisal, cotton, hides, skins, copra, coffee, ground nuts, ghee and grain. The chief imports in 1921 were cotton piece goods, foodstuffs, kerosene, cigarettes, tobacco, spirits, wines and beer.

Estimated Revenue, 1922-23	£1,209,474
Estimated Expenditure, 1922-23	2,009,474

Imports	£1,426,125	£1,386,222
Exports	1,025,443	1,441,584

The chief seaports are Dar es-Salaam, Tanga, Bagamoyo, Pangani, Kilwa, Lindi and Mikindani, but few of these are accessible to ocean-going vessels, though gradual improvements are being introduced. There are two railway lines in the Protectorate—the Usambara railway from Tanga to New Moshi (200 miles), commenced in 1905 and completed in Feb. 1922, and the Central railway (780 miles), from Dar-es-Salaam to

Kigoma, completed in Feb. 1924. Dar es-Salaam is in telegraphic communication with the coast towns, Zanzibar, Mombasa, and many inland centres. There are 75 post offices and telegraph stations. Three Battalions of the King's African Rifles are stationed in Tanganyika Territory.

In 1922, 518 steamers (exclusive of coastal boats) of 750,777 tons and 3,578 vessels (dhows) of 74,116 tons entered the various ports from places beyond the territory.

TOGOLAND

(Joint Franco-British Administration)

The former German colony of Togoland was conquered by Franco-British forces during the war of 1914-18, and its administration has been entrusted to France and Great Britain jointly by the Supreme Council of the Allied Powers.

Togoland is situated on the Gulf of Guinea between the Gold Coast (British) and Dahomey (French), and is bounded on the south by the Atlantic and on the north by (French) Upper Senegal Niger, and lies between $0^{\circ} 15' W$ — $1^{\circ} E$ long. and $6^{\circ} 15' N$ lat. at its extreme limits, the coast line being only 28 miles in extent ($1^{\circ} 14' N$ — $1^{\circ} 30' E$ long.). The coast is fringed with lagoons, but for some 50 miles inland are undulating plains, which end in a plateau, about 1,000 feet in mean level, with Mount Agou (3,125 feet) and Mount Avaklu (3,250 feet) in the south-west. The country is watered by the Oti, which effects a confluence with the Volta at the western boundary of Togoland. The area is 33,659 English square miles, with a population of about 1,000,000. The Christian element is small. Coffee, cocoa, cotton, maize, kola and other tropical products are abundantly cultivated. Palm oil, palm kernels, rubber, cotton, maize, ground nuts, vegetable butter, fibre, indigo, kola nuts, ebony, and other forest products are exported (exports, 1919, £850,744). The imports

(valued at £665,222 in 1919) are textiles, metals, hardware and spirits. The revenue exceeds the expenditure and the colony is in a very flourishing condition. About 220 miles of railway are open, lines running from the capital to Aneho and to Misahöhe and Atakpame.

In 1900 the whole territory was divided into a British Sphere and a French Sphere.

The British Sphere consists of an area of about 13,040 sq. miles with an estimated population of 187,840. No portion of the coast is included in the British area. The sphere is administered by the Government of the Gold Coast.

TRINIDAD and TOBAGO

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of America the nearest point of Venezuela being 7 miles distant. It lies between $10^{\circ} 3' N$ — $10^{\circ} 50' N$ lat. and $60^{\circ} 55' W$ — $61^{\circ} 56' W$ long., and is about 69 miles in length by 54 in breadth, with an area of 1,862 square miles (531,145 acres cultivated), and a population at the Census of 1921 of 365,913 (including Tobago). The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards and capitulated to the British under Abercromby in 1797. The chief town and port of entry Port of Spain (pop. 61,580) is one of the finest towns in the West Indies with sewerage, electric lighting tram and telephone services. Other towns of importance are San Fernando (pop. 10,610) about 30 miles south of the capital, Princetown (pop. 4,983) and Arima (pop. 4,210). A remarkable phenomenon is the asphalt lake near the village of La Brea 110 acres in extent containing an apparently inexhaustible supply, in 1922, 139,433 tons (£339,824) were exported. The soil is rich and productive, the most important products being sugar, cocoa, mineral oil, molasses rum, copra, limes and cocoanuts, and various kinds of timber and fruits. The chief exports (1922) were cocoa £1,342,331; sugar £1,145,278; petroleum £764,847; and cocoanuts £77,420. Coal is found in Manzanilla and is indicated in other parts of the island. The petroleum industry has made considerable advance boring operations being carried on by 16 different companies. There are 124 miles of rail way open, electric lighting and tramway service and waterworks and sewage operations have been established. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara, Curaçao, Martinique, St. Thomas, &c. The Government is vested in a Governor an Executive Council and a Legislative Council, all of whom are nominated by the Crown.

	1920.	1921	1922
Revenue	£1,917,743	£1,867,944	£1,661,607
Expenditure	1,652,597	2,074,927	1,939,215
Public debt	3,207,763	3,205,901	3,432,424
Imports	9,498,166	7,413,682	4,604,680
Exports	9,416,545	5,193,976	4,229,403

Tobago was annexed in 1889 to the Government of Trinidad, and on Jan. 1, 1890, it was constituted a ward of that island. It is between $12^{\circ} 9' N$ lat. and $60^{\circ} 43' W$ long., about 75 miles south-east of Grenada, 28 miles north-east of Trinidad, and 220 miles S.E. W. of Barbadoes, is

26 miles long, and from 6 to 7½ broad, and has an area of 124 square miles, with a population (Census 1921) of 22,390. It is one of the most healthy of the West Indies the temperature varies from 82° to 88°. There are two towns in the island, viz., Scarborough (pop 1,453) and Plymouth (pop 430).

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6' S and long. 12° 31' W, discovered in 1506 by a Portuguese admiral (Tristão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long lived. The principal settlement (Edinburgh) is in the north west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land.

Resident Chaplain, Rev H M Rogers M.A.

INACCESSIBLE ISLAND is a lofty mass of rock with sides a miles in length, the island is the resort of penguins and sea-fowl.

THE INHABITABLE ISLANDS are three in number, of which the largest is 1 mile long and ½ m. wide, and rises in two peaks, 950 and

1,205 ft above the sea-level respectively. The smaller islands, Stollenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20' S and 9° 44' W lies about 250 miles S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

TURKS AND CAICOS ISLANDS

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north east of which they are distant about 450 miles. They have an area of about 170 square miles. The population in 1921 was 5,612, of which the principal island, Grand Turk, contains 1,568. Salt is the principal industry of the islands and Sisal hemp and sponges are exported.

A Commissioner administers the government of the Dependency assisted by a Legislative Board. This Board has control of local finance and passes local ordinances subject to the assent of the Governor of Jamaica who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

UGANDA.

(The Uganda Protectorate)

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows.—On the north, the Uganda Sudan boundary, on the east, a line drawn down the middle of Lake Rudolf, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria, on the south, by Tanganyika Territory (late German East Africa), and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, part of Lake Rudolf, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Egyptian Sudan commences. Total area, 122,300 square miles, including 16,377 square miles of water.

For administrative purposes, the Protectorate is divided into 5 Provinces.—

(1) *Eastern Province*, comprising the districts of Busoga, Bugweri, Bugisha, Budama, Teso, Lango, and Karamoja.

(2) *Rudolf Province*, comprising the districts of Turkwel, Luikana, and Dabessa (the last named being, at present, under military occupation)

(3) *Northern Province*, comprising the districts of Bunyoro, Gulu, Oluo, and West Nile

(4) *Western Province* comprising the districts of Toro, Ankole, and Kigezi

(5) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubendi and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in five districts but the work of repopulating these islands has been taken in hand as a result of experiments, and natives and their cattle are being repatriated

With the exception of the Rudolf Province the whole Protectorate is now under direct administration but the native kings or chiefs whose rights are in some cases regulated by treaties are encouraged to conduct the government of their own subjects. The province of Buganda is recognised as a native kingdom under a *Kabaka* (H H Daudi Chwa grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native assembly. In Buganda (and in *Bunyoro, Ankole and Toro*, also ruled over by native "Kings") purely native matters are dealt with by the various *Lukikos* but in serious cases there is an appeal to higher courts. For Europeans and non natives justice is administered by His Majesty's Courts. The principal British representative is the Governor who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local and special courts of justice and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland and Zanzibar. In 1922 there were 3,066 criminal cases tried. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a volunteer reserve of Europeans.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan 1921. The former consists of 4 appointed members and the latter includes the former, with 2 unofficial members, and is presided over by the Governor.

The total population of Uganda (December 1922) is given as 3,132,312 composed as follows: Natives, 3,125,522; Asiatics, 5,520; Europeans, 1,269 (including 402 females). Among the natives approximately 640,000 belong to the intelligent, civilised Baganda, a race converted to Christianity by British and French missionaries. Educational work is undertaken by the various Missionary Societies, who receive grants amounting to £9,575 towards scholarships &c. for students and teachers. About 1,700,000 natives speak Bantu languages, there are a few Congo pygmies living near the Semliki river, the rest of the natives belong to the Masai, Nilotic, and Sudanese groups.

In 1922 total exports, £1,275,793 the import figures are now merged in those of Kenya. The

export trade is mainly in cotton (£877,625), coffee, chillies oil seeds, rubber, ivory, and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

	1921.	1922
Revenue	£801,347	£820,365
Expenditure (excl loans)	786,375	920,228

In 1922 the poll tax amounted to £346,481 and Customs to £100,056.

The headquarters of the British administration is at ENTUBEE, the native capital of Buganda is at MENGO (Kampila). Nile steamers ply to Rejaf which is about eight days' march from Nimule the Sudan port of the Lake Albert Marine Service. A regular steamer service is maintained by the *Uganda Railway Administration* between Kisumu the railway terminus, and Entebbe, Port Bell, and Jinja, the principal Uganda ports on Lake Victoria. The *Busoga Railway Marine* which, with the Busoga Railway is controlled by the Uganda Railway deals with the traffic on Lake Kioga. There are two steamers and a large number of lighters on that waterway. An additional steamer and subsidiary craft ply on Lake Albert and the Nile between Pataba, Nimule and Belgian port of Kasenya at the south of Lake Albert. The *Busoga Inland*, of the same gauge as the Uganda Railway 62 miles in length, runs from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, and deals with the cotton output in the regions round Lake Kioga connecting that lake with Lake Victoria. There is a railway from Port Bell to Kampala 7½ miles in length. There is a fleet of Government motor vans. The length of telegraph line in the Protectorate is (1922) 1,187 miles, with 26 telegraph offices.

CAPITAL (Administrative Headquarters), Entebbe

WEIHAIWEI

The territory of Weihaiwei was leased to Great Britain by China by a convention made on July 1 1898, and lies in latitude 37° 30' N, longitude 122° 10' E. It is situated in the

* Members of Executive Council.

Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land to English miles wide along the entire coast line, with a total area of about 285 square miles, and a population in 1911 of 149,177, in which are included 3,000 resident on the island of Liu Kung. In addition to the leased territory there is a zone which comprises that portion of the province of Shantung lying east of the meridian 121° 40'—an area of 1,500 square miles—within which Great Britain has the right to erect fortifications, station troops, or take any other measures necessary for defensive purposes. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule small.

The government is administered by a Commissioner. Weihaiwei is a port of call for steamers running to and from the North of China, and there is regular steam communication with the ports of Shanghai, Hong Kong, Chefoo, and Tientsin.

Administrator, A. P. Blunt, C.M.G.
Judge of the High Court, Hiram Parkes Wilkinson
Crown Advocate, Allan G. Mossop
Senior District Officer and Magistrate, H. Jowett
Junior District Officer and Magistrate, S. L. Burdett
Senior Medical Officer, W. M. Muat, C.B.E., M.B.
Financial Assistant & Chief Clerk (vacant)
Inspectors of Police, A. Whittaker, F. Korcey,
 G. H. Jennings, A. G. Gunn

WINDWARD ISLANDS

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent and St. Lucia with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 126,254. There is one Governor for the three islands but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions and in the Governor's absence is governed by an Administrator subordinate to him.

Governor and Commander in Chief, Sir
 G. B. Haddon Smith, K.C.M.G. £3,000
Private Secretary & A.D.C. (vacant) 300
Auditor M. J. Flanagan £440 to 550
Staff Officer (vacant)
 Transit, about 14 days.

GRENADEA

(AND THE GRENADINES)

Grenada is situated between the parallels of 12° 30'–11° 50' N lat. and 61° 20'–61° 35' W long., and is about 21 miles in length and 12 miles in breadth. It is about 95 miles north of Trinidad, 68 miles S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres, population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1495, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices,

rubber, cotton, coffee, and fruit are grown. The forests are rich in timber. The imports chiefly comprise dry goods, bread stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south west coast, is the chief town, and possesses a good harbour.

 (and quarters) £385 to 440

The GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N lat. and 60° 58' W long. at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles with a population (Dec. 31 1922) of 53,221. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1922) are sugar, cocoa, coco nuts, copra, hives, lime juice, molasses and syrup. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufriere (pop. 2,480).

Port Castries one of the finest in the W.I., is a coaling depot. In 1922 197 steamers (tonnage 415,611) entered Port Castries.

81. VINCENT,

an island about 55 miles west of Barbados, situate in 13° 30' N lat and 60° 57' W long, is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 250 sq miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 3,400, entered the island, and proved a valuable acquisition. St Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, sugar, molasses, rum, cassava, cocoa, coffee and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAPITAL, Kingstown. Population (1921), 3,836.

Administrator and Colonial Sec., Robert Walter C.M.G.

Chief Justice and Vice-Chancellor and Police Magistrate of 1st District, J. Stanley Rae, £650 to £700.
Attorney General, L. C. Levy, 500.

WRANGEL ISLAND

Wrangel Island (or Long's Island), in the Arctic Ocean off the N.E. coast of Siberia, was discovered by James Long in 1849, and was occupied by shipwrecked members of Stefansson's Arctic expedition in 1914. On Sept. 21, 1921, the British flag was hoisted on the island by an expedition despatched to the island by Stefansson, the annexation being notified to the Government of the Dominion of Canada on March 17, 1922. A relief expedition was dispatched to the island in 1923, but the party left on the island is assumed to have perished. The island is the resort of polar bears and its highest point is Berry Peak (3,300 ft.), in the centre of an arctic plain.

ZANZIBAR

(The Zanzibar Protectorate)

Sultan, H. H. Seyyid Khalifa bin Harub, K.C.M.G., K.B.E., succeeded his brother in law Dec. 9, 1911.

The Zanzibar dominions became independent in 1896 under the rule of Seyyid Majid, a son of Seyyid Said Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghu Bay and north as War sheikh, but since the cession of the coast line from Ruwuma to Wanga, including the island of Mafia, to Germany in 1890 and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta and Siwa together with the port of Kismayu with a radius of 10 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander in Chief in the Kenya Colony and Protectorate (q.v.). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1912, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at £288,000 in 1922) and produce quantities of copra (exports in 1922 £273,000). In addition Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed.

Of late years the importance of Zanzibar as a port of transhipment and distributing centre has largely decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadu coast. Recent figures, however, tend to indicate that the island in spite of losing the main transhipment trade, will continue, from the very fact of its geographical position to retain control of the local traffic of that portion of the trade which goes to small towns up and down the adjacent mainland coast.

The principal imports are rice, grain, groceries, sugar, tobacco, copra, hardware, petroleum and piece goods, the exports are cloves and copra in addition to re-exports of previously imported rice, grain, copra and piece goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1910) was 198,914, the area of the former 640 square miles, and of the latter 380 square miles.

The number of ocean-going steamers which entered the port in 1922 was—British 12, Italian 31, Portuguese 4, French 37, Netherlands 14, Norwegian 7, others 13, the total tonnage being 777,357, and 4,772 dhows (93,040 tons) entered the port in 1922.

BIRTHS AND DEATHS

The annual compilation of mortality statistics for that part of the United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40.5 per cent of the total population and in 1921 82.2 per cent. The birth registration area was established in 1915. It included at that time 31.2 per cent of the total population, and in 1921, 65.3 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1915 to 1921—

CALENDAR YEAR	BIRTHS *		DEATHS *	
	Number	Rate per 1,000.	Number	Rate per 1,000.
1915	776,304	25.1	909,155	13.6

* Exclusive of still-births.

IMMIGRATION

From 1820 to 1920, 33,630,104 alien immigrants landed in the United States, the arrivals in 1921 being 1,197,892, and those from 1918 onward being (1918) 116,618, (1919) 141,132, (1920) 430,001.

MARRIAGE AND DIVORCE

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In addition to adultery and cruelty of the husband or adultery of the wife, abandonment (desertion), habitual drunkenness, and imprisonment for felony are qualifying offences.

YEAR.	MARRIAGES	DIVORCES GRANTED

PHYSIOGRAPHY

The Republic occupies the southern portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25° - 49° North and longitude 67° - 124° $30'$ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line on both oceans has an estimated length of about 15,610 miles, besides 3,620 miles on the great lakes and 5,744 on the Gulf of Mexico. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small, among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah, of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows—Rivers flowing to the Pacific, 644,040 square miles, to the Atlantic, 488,877, and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads, west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut, and in the south, live oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance iron, copper, lead, zinc, and aluminium, the non-metallic minerals including immense quantities of coal, anthracite, petroleum, stone, cement, phosphite rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver), while precious stones are worked in great variety, including the turquoise, sapphire, tourmaline, and garnet.

HISTORY

Early Colonisation—A natural factor, the great expanse of ocean which divides the American continent from Asia, has saved America from Asiatic domination, and it required many centuries of progress before the European adventurer dared to attempt the passage of the narrower Atlantic. The aboriginal inhabitants were comparatively few in number, and being generally backward in development, except in Mexico, have left few permanent traces of their presence.

Although Columbus discovered America in the 15th century (Oct 12, 1492), American history may be said to commence with the colonising expeditions from Europe in the 16th and 17th centuries. No definite European settlement was attempted until the last quarter of the 16th century, when England, Holland, Sweden, France, and Spain made determined efforts to bring into account the potential wealth of the newly discovered continent. Of these nationalities the English secured a paramount

influence, through their natural aptitude for colonisation, which continues to distinguish that race (and in a greater degree the Scots) amongst the nations of Europe. In the 17th century a chartered company founded *Jamestown* (1607), and many Royalist settlements were established in the district which had been named *Virginia*, after Queen Elizabeth, in the previous century. But step by step with the Church and Royalist foundations in the South a similar series of Puritan and Separatist centres was established in the North. The small band of "Pilgrim Fathers" in their 180-ton *Mayflower*, from Southampton, England, to Plymouth, Massachusetts (1620), was soon followed by a stream of well-to-do merchants from Boston, Lincolnshire and other east coast English towns, and *New England* became rapidly prosperous. Between these two settlements the Dutch had established themselves in *New Netherlands* (1621), and the Swedes in *New Sweden* (1638). Other English foundations were *Maryland* (1632), *Carolina* (1663), *New York* (1664), *New Jersey* (1665), and *Pennsylvania* (1681). From that date Continental enterprise may be said to have ceased for half a century, and *Georgia* (1732) was the last of the English settlements.

Anglo-French Wars—A continuous struggle was waged between the English and French settlements in America, but until the War of 1754-1763 little part was taken by Great Britain in the actual campaigns. The issue of this war decided the fate of America. It secured the possession of the Pacific coast for the inhabitants of the Atlantic slope, and roused the interests of the British Government in the possibilities of its American colonies. The Home Government endeavoured to recover from the colonies part of the cost of the war by which their existence had been secured, but "taxation without representation" was bitterly resented. In December, 1773, some English ships laden with tea arrived in the harbour of Boston, where a non-importation agreement was strictly enforced. A band of colonists, disguised as Indians, boarded the vessels and threw their contents into the sea. This *Boston Tea Party* of December 16, 1773, remains as an outstanding incident in the quarrel between America and Great Britain.

The War of Independence—In spite of the counsels of Chatham, the King persisted in repressive measures. The colonists resisted in arms, and bloodshed ensued at the first engagement at *Lexington*, April 19, 1775, and continued until the *Capitulation of Yorktown*, October 19, 1781, when *Lord Cornwallis* surrendered with the whole of his forces to *General Washington*. When peace was concluded between America and Great Britain (Sept. 3, 1783), no vestige of territory over which the dispute had raged remained under British rule.

The Declaration of Independence—On July 4, 1776, the delegates of the various American colonies adopted the Declaration of Independence. "We, the representatives of the United States of America, in Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, solemnly publish and declare that these United Colonies are, and of right ought to be, Free and Independent States." This Declaration was at length acknowledged by Great Britain, and the United States of America from this beginning has become one of the greatest Powers of the world. The Declaration of Independence was followed by the framing of a *Constitution*, which was ratified in 1787 to 1790 by the 13 *Original States* (Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina, New Hampshire, Virginia, New York, North Carolina, and Rhode Island). This Constitution established a legislature of two houses, and vested the executive power in an elective President, and on April 30, 1789, *George Washington* entered office as the first of a line of Presidents of the United States of America.

War of 1812—The maritime war of Britain and France led to the outbreak of hostilities between the former and the United States, owing mainly to the rival interpretation of the law of allegiance in connexion with impressment of British subjects from American ships to serve in the British Navy. On June 18, 1812, the United States declared war against Britain, in which the latter was generally successful on land and the United States almost invariably victorious on the sea. A land engagement at *Chateaugay* on October 26, 1813, gained lasting glory for the troops of Canada, and earlier in the same year—June 1, 1813—a duel at sea between the *Chesapeake* and the *Shannon* did much to restore the prestige of the British Navy. Peace was concluded by the *Treaty of Ghent* on December 24, 1814, after a purposeless war, which Canada alone has reason to remember with satisfaction.

* On April 30, 1820, the *Raleigh* (N.C.) Register published the following document, said to have been adopted by the Committee of Mecklenburg County, North Carolina, on May 20, 1775, the day after the receipt of the news of the battle of Lexington. "In the third session of the Second Continental Congress, Richard Henry Lee proposed, and John Adams, of Massachusetts, seconded, a resolution declaring the United Colonies free and independent States, and Thomas Jefferson, John Adams, Roger Sherman, and Robert Livingston were appointed a committee to draw up a Declaration of Independence. This famous document, composed almost entirely by Jefferson, was adopted unanimously on July 4, 1776."

The Gold Rush—In 1846 a dispute arose between the United States and Mexico in connexion with the boundaries of *Texas*, recently (1845) admitted as a State of the Union, and after hostilities of several months the war ended in the *Treaty of Guadalupe Hidalgo* (1847). Under this treaty, Mexico surrendered the disputed portions of *Texas* and New Mexico, part of *Arizona*, and *California*. In 1848 a great rush of goldseekers entered the newly acquired territory, which remains the principal gold-producing State of the Union.

The Civil War—Among the industrial classes of America in 1860 nearly 4,000,000 were negro slaves, descendants of those planted in the Colonies by Britain. The question of their emancipation led to a bitter dispute between the Northern and Southern States of America, the latter seceding from the Union in 1861. Two years earlier *John Brown*, an advocate of emancipation, had embittered the relations between the North and South by a raid upon the Government arsenal of *Harpers Ferry*, which he captured and held until forced to surrender, and although he was hanged by the State of Virginia his object was eventually achieved by President Lincoln's *Emancipation Proclamation* of January 1, 1863. The *Secession of the Southern States* was followed by hostilities, which included many pitched battles, fought with astounding tenacity and prolific slaughter on both sides. Hostilities ceased soon after the surrender of *General Lee* at *Appomattox* on April 9, 1865, and the bitterness engendered by the war was buried in a lasting peace. By a careless observance of the Foreign Enlistment Act, Britain permitted the departure from Liverpool of the *Alabama*, which committed depredations upon United States shipping, and was also guilty of other acts of negligence, for which, under the *Treaty of Washington*, May 8, 1871, Britain was called upon to pay £3,250,000 damages to the United States. In the four years' war the Confederate (Southern) States lost over 200,000 men by death and disease, while the victorious Federal (Northern) States lost close on 350,000 from the same causes.

War with Spain—The continuous misgovernment of the neighbouring island of *Cuba* brought America into conflict with Spain in 1898. A succession of revolts, which the Spanish forces were unable to suppress, left *Cuba* the prey to anarchy, and induced the United States to despatch to *Havana* the warship *Maine*. By accident or design that vessel was destroyed by an explosion (Feb. 15), and the United States declared war against Spain on April 25, 1898. The outcome of the hostilities was the freedom of *Cuba* and the acquisition by the United States of the Spanish possessions in the *Philippine Islands*, in addition to *Guam* (Pacific) and *Porto Rico* in the West Indies.

The Panama Canal—On June 28, 1902, Congress appropriated the sum of \$40,000,000 for the purchase of all outstanding rights in the work inaugurated on the *Panama Canal*, and on April 28, 1904, a further sum was granted for the purchase of a strip of territory on each side of the proposed waterway from the Republic of *Panama*. Operations were immediately undertaken, and the Canal was completed in 1913, and was opened to traffic with no inaugural ceremony on August 1, 1914.

Anglo-American Arbitration—A Treaty of Arbitration between the United Kingdom and the United States was signed at Washington, August 3, 1911. The Treaty contained seven Articles (see 1912 Edition of *WHITAKER'S ALMANACK*). An Anglo-American Peace Commission Treaty was signed by Mr. Bryan and the British Ambassador on Sept. 15, 1914.

The World War—On April 6, 1917, the United States, after fruitless endeavours to obtain guarantees from Germany that the rights of neutrals on land and sea would be observed, entered the World War on the side of France, Great Britain and the Allied and Associated Powers. The first shot by U.S. troops (Oct. 27, 1917) was followed by a full participation in the campaigns of the Allies, and the Armies of the United States contributed very largely to the defeat of the Central Powers. At the date of the *Armistice* (Nov. 11, 1918) 3,670,888 troops had been placed under arms, and 77,459 were numbered amongst the killed or died of disease, accident or other causes. U.S. troops also figured amongst the armies sent to the assistance of Russia against the Bolshevik régime, but these were withdrawn in accordance with the plans of the Allies, in 1919.

GOVERNMENT

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows — Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress, but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties —

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and, with the approval of the Senate, negotiates Treaties with Foreign Powers. The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT

President of the United States, Calvin Coolidge of Massachusetts, born at Plymouth, Vermont, July 4, 1872, graduated from Amherst College in 1895, practiced law at Northampton, Mass., counsellor, city solicitor, clerk of courts, chairman Republican City Committee, member General Court of Massachusetts, Mayor of Northampton, member Massachusetts Senate, Lieutenant-Governor of Massachusetts 1916-18, Governor of Massachusetts 1919-20, elected Vice-President Nov. 2, 1920, became President (on the death of Warren G. Harding) Aug. 3, 1923. *Republican*.

THE CABINET

(In order of succession to the Presidency)

2. *Secretary of State*, Charles Evans Hughes, of New York (born 1862), appointed March 4, 1921.
3. *Secretary of the Treasury*, Andrew W. Mellon, of Pennsylvania (born 1855), appointed March 4, 1921.
4. *Secretary of War*, John Wingate Weeks, of Massachusetts (born 1860), appointed March 5, 1921.
5. *Attorney General*, Harry M. Daugherty, of Ohio (born 1860), appointed March 5, 1921.
6. *Postmaster-General*, Harry S. New, of Indiana (born 1858), appointed Feb. 27, 1923.
7. *Secretary of the Navy*, Edwin Denby, of Michigan (born 1870), appointed March 5, 1921.
8. *Secretary of the Interior*, Hubert Work, of Colorado (born 1860), appointed Feb. 27, 1923.

Secretary of Agriculture, Henry C. Wallace, of Iowa (born 1866), appointed March 5, 1921.

Secretary of Commerce, Herbert Clark Hoover, of California (born 1874), appointed March 5, 1921.

Secretary of Labour, James J. Davis, of Pennsylvania (born 1873), appointed March 5, 1921.

DEPARTMENT OF STATE

(New York and Pennsylvania Aves., Washington, D C)

The *Department of State* has cognisance of all matters appertaining to Foreign Affairs, including correspondence with Representatives of the U S., both diplomatic and consular, and with accredited Representatives of Foreign States in the U S. The *Secretary of State* is the custodian of the Seal of the U S., which is affixed by him to all proclamations, to various commissions and to warrants of extradition. He is also the Custodian of the Laws of the U S. and of Treaties made with Foreign Powers. He grants and issues Passports, and communicates to Congress reports made by Diplomatic and Consular officers of the U S. He is the medium of correspondence between the President and the chief executives of the States of the Union.

Director, Industrial Housing and Transportation, Robert Watson, Mass 5,000

BOARD OF INDIAN COMMISSIONERS, Washington, D C

The Board of Indian Commissioners is appointed by the President, and its members serve without salary. The Board inspects all branches of the Indian Service and makes recommendations to the Secretary of the Interior as to policies and needs of administration of Indian Affairs. In 1922 the Indian population of the U S., exclusive of Alaska, was 214,930 by blood (Oklahoma containing 93,177, Arizona 43,327, New Mexico 21,569, S Dakota 23,448, California 17,725, Montana 12,648, North Carolina 11,853, Washington 10,920, and Wisconsin 10,498, and the 38 remaining States less than 10,000 each). Total disbursements authorized for the fiscal year ended 30 June, 1924, for Indian Service were \$11,377,655. In addition to this the sum of \$22,700,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U S. Indians under the nominal control of the Indian Bureau on June 30, 1922, amounted to \$727,745,327, of which \$198,065,171 was tribal, and \$529,680,156 individual.

NATIONAL COMMISSION OF FINE ARTS,

Interior Dept. Building, Washington, D C

The Commission of Fine Arts was created by Congress 17 May, 1900, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of art with which the Federal Government is concerned, including designs of public buildings, public parks within the D C. An expenditure not exceeding \$30,000 in any one year is authorised by Congress for travelling and other expenses. The members serve with out remuneration

UNITED STATES GEOGRAPHIC BOARD

Washington, D C

By Executive order of August 10, 1906, the official title of the United States Board on Geographic Names was changed to United States Geographic Board and its duties enlarged. The Board passes on all unsettled questions concerning geographic names which arise in the departments, as well as determines, changes, and fixes place names within the United States and its insular possessions and all names suggested by any officer of the Government shall be referred to the board before publication. The decisions of the board are to be accepted by all the departments of the Government as standard authority

Chairman, Dr. C. Hart Merriam.

Secretary, Charles S. Sloane

BUREAU OF RECLAMATION

Commissioner, David W. Davis, Interior Dept.

Building, 16th and F, N W., Washington, D C

Employees Washington Office, 77, Field 3,000 to

5,000. Expenditure per year about \$10,000,000.

The Bureau of Reclamation was organized as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in the 17 arid and semi-arid States of the far West. Twenty five primary projects, comprising about 3,000,000 acres, and three Indian projects (324,000 acres) are under construction or operation, and the major works aid in serving an additional 1,100,000 acres under

private canals that generally get stored water from the government reservoirs. The funds for this work have come chiefly from the sale of public lands, from repayments by the water users, and more recently from royalties from oil and gas-leasing and other mineral operations and Federal power permits, and the money expended is returned to the fund by easy payments of settlers, usually in twenty annual instalments without interest, in accordance with the Reclamation Extension Act of August 13, 1914.

The Service has built about 14,400 miles of canals, ditches and drains (including 125,500 canal structures), involving the excavation of 216,000,000 cubic yards of materials. In connection with this work there have been constructed 100 storage and diversion dams with an aggregate volume of 15,500,000 cubic yards, including the *Arrowrock Dam* (340 feet high) Idaho, on the Boise River, and the *Elephant Butte Dam* (366 feet high), New Mexico on the Rio Grande. The Bureau has built 103 tunnels 1,000 miles of road, 83 miles of railroad 3280 miles of telephone line 30 power plants and 1,150 miles of transmission lines. It is mining coal, and has manufactured over 1½ million barrels of cement and sand cement. The net construction cost to June 30, 1923, was \$135,000,000.

Over 450,000 persons are living on the 33,000 farms irrigated by the Bureau and in the project towns and cities. Of the 3,000,000 acres above referred to water was furnished in 1922 to 1,227,900 acres and of this area 1,169,100 acres were harvested in 1922, producing crops worth over \$50,000,000 or an average of about \$43 per acre. The additional lands using stored water yielded crops worth \$33,000,000 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law soldiers of the World War have a preference right to enter these farms and at recent openings such soldiers have taken practically all units.

Information in regard to farms available for settlement may be obtained by addressing Commissioner, Bureau of Reclamation Dept of the Interior, Washington, D C.

The Bureau issues the 'Reclamation Record' an illustrated monthly publication containing articles of interest to irrigation farmers and engineers. An annual report is also issued.

An engineering library of about 5,000 manuscript and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects with numerous photographs and maps, plans specifications cost data and results of original experimental investigations and is available for consultation by those interested.

GOVERNMENT PRINTING OFFICE, North Capitol Street, Washington D C

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The present buildings, having a floor space of 15 acres, together with the machinery and equipment which they contain, represent an expenditure of approximately \$8,000,000. The annual cost of operation and maintenance is about \$10,000,000. There are about 4,000 persons annually employed in the various divisions of the office at a total yearly compensation of

\$7,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U S Government. The office has the largest battery of type setting machines in the world, including 100 linotype machines, 100 monotype key boards and 126 monotype casting machines, which produced about 2,000,000,000 ems of type in fiscal year 1923. The 165 presses of the office are credited with 121,000,000 chargeable impressions, not including 180,000,000 on money order forms and 1,181,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,353,000 square inches of electrotypes and stereotypes and manufactured its own printing and writing, inks, rollers, glue, type and type metal. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

LIBRARY OF CONGRESS (National Library),

Capitol Hill, Washington, D C

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1855,

purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire 1891, and replenished in 1891-2. Since that date increased (1) by regular annual appropriations by Congress (now \$100,000) (2) by deposits under the copyright law, (3) by gifts and exchanges, (4) by the exchanges of the Smithsonian Institution, the library of which (40,000 volumes) was, in 1866, deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is now the largest in the Western Hemisphere and third in the world. It comprises 3,089,841 volumes (gain in 1922-23, 88,932). The floor space of the building (erected at the cost of \$6,347,000 and first occupied in 1897) is 430,255 square feet, or nearly 10 acres. The book stacks, including the new stack built over the south-east interior court, contain about 103 miles of shelving, affording space for 3,400,000 octavo volumes and 84,000 volumes of newspapers. The library is maintained by Congress the appropriation in 1923 being \$928,790.

Librarian of Congress, Herbert Putnam, LL.D. \$7,500
Chief Assistant Librarian, Appleton P. C. Griffin 4,500
Chief Clerk, Allen B. Boyd 2,500
Secretary, Jessica L. Farnum 1,800

U S MILITARY ACADEMY, West Point, N.Y.

The United States Military Academy for training cadets for commissions in the U.S. Army was founded at West Point, on the west bank of the Hudson River, in 1802.
Superintendent, Brig Gen. Fred W. Sladen, U.S. Army

U S NAVAL ACADEMY, Annapolis, Maryland

The United States Naval Academy was founded in 1845 for the education of officers for the Navy. Students are called midshipmen, and must be citizens of the U.S. The course of instruction comprises four years at the Academy.
Superintendent, Rear Adm. Henry B. Wilson, U.S. Navy

THE LEGISLATURE

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years and each Senator has one vote and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 2 for 22,877. The Senate consists of 96 members. The salary of a Senator is \$7,500 per annum, with mileage at 20 cents per mile, coming and returning, for each regular session. The House of Representatives consists of 435 representatives and territorial delegates. The salary of a Representative is \$7,500 per annum, with mileage as for Senators.

THE SIXTY SEVENTH CONGRESS.
President (pro tempore), Albert B. Cummins, Senator from Iowa
Speaker of the House of Representatives, Frederick H. Gillett, Mass.

\$22,000

THE JUDICATURE.

The Federal Judiciary consists of three sets of Federal Courts: (1) The *Supreme Court*, at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts. (2) The *Circuit Courts of Appeal*, dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The *District Courts*, eighty seven in number, each served by a District Court Judge.

THE SUPREME COURT

DEFENCE

The President is Commander in Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

Under the provisions of the Act of Congress, approved June 4, 1920, the enlisted strength of the Regular Army, including the Philippine Scouts must not exceed 280,000 except in time of war or similar emergency, when the public safety demands it, the commissioned strength being placed at 17,726, however, recent legislation (Act of Congress of June 30, 1922) has limited the authorised enlisted strength, exclusive of the Philippine Scouts to 125,000, and requires that the number of commissioned officers on the active list of the Regular Army and the emergency officers of the late war who are still in service undergoing treatment for physical reconstruction shall be restricted after Jan. 1, 1923, to 22,000. The actual strength of the Army of the United States on September 30, 1923, included 11,520 commissioned officers, 1,024 warrant officers and approximately 116,000 enlisted men, including the Philippine Scouts. The Army is made up entirely of volunteers.

PRINCIPAL WARS OF THE U.S.

Name of War	Troops Engaged
War of Independence, 1775-1784	300,000
North Western Indian, 1790-1795	8,000
War with France, 1798-1800	4,500
War with Tripoli, 1801-1805	2,300
War with Britain, 1812-1815	528,774
Creek Indian, 1813-1814	13,722

Name of War	Troops Engaged
Seminole Indian, 1817-1818	6,911
Black Hawk Indian, 1832	6,465
Cherokee Indian, 1832-1839	9,494
Seminole Indian, 1835-1842	41,122
Creek Indian, 1836-1837	13,418
War with Mexico, 1846-1848	107,631
Texas & New Mex. Indian, 1849-1855	6,465

World War, 1917-1918	4,060,000

U S WAR PENSIONS

Year	Number of Pensioners on Roll			Total Payments.
	Invalids	Widows &c	Total	
1900	754,510	241,019	995,529	\$ 138,462,130
1908	340,318	306,582	646,905	179,835,329
1919	313,140	311,287	624,427	222,159,292
1920	285,110	307,080	592,190	213,295,314
1921	267,629	298,424	566,053	258,725,843
1922	256,918	290,098	547,016	253,807,583
1923	253,686	286,070	539,756	263,012,500

The total disbursement in pensions since the War of Independence is \$6,606,356,622, of which \$6,224,106,631 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year 1923 including the cost of medical examinations and special field examinations, amounted to \$2,663,626.

World War Pensions

Disbursements in claims arising out of service in the World War subsequent to Oct. 6, 1917 are not included in the above totals, as such claims are adjudicated in the U S Veterans Bureau, which has jurisdiction over such matters (See "Ordinary Expenditures under Finance," 1921).

THE NAVY OF THE U S

No new construction has been authorized for the U S Navy since 1918. The three year building programme initiated in the Act of August 29, 1916, provided for the following construction —

	1916	1917	1918	Totals
Battleships	4	3	3	10
Battle Cruisers	4	1	1	6
Scout Cruisers	4	3	3	10
Destroyers	20	15	15	50
Fleet Submarines	—	—	9	9
Coast Submarines	30	18	10	58
Fuel Ships	1	—	2	3
Repair ship	—	—	1	1
Transport	—	—	1	1
Hospital ship	1	—	—	1
Destroyer Tenders	—	1	1	2
Submarine Tender	1	—	—	1
Ammunition ships	1	—	1	2
Gunboats	1	—	1	2

Of the "all big gun" battleships the *Colorado* was completed during 1923. These ships carry eight 16-in guns (with secondary batteries of 5.1 in. and eight 3-in anti aircraft guns), and are 624 ft long, 97 ft wide, and displace 32,000 tons; they are driven by four electric-drive turbines of

28,900 h p. This leaves the *West Virginia* as the only remaining battleship under construction, as the other seven battleships will be disposed of in accordance with the terms of the *Washington Treaty* limiting naval armaments.

Of the vessels which were authorized in the 3 year programme, the following remain not ordered — 12 destroyers, fleet submarines and 1 auxiliary. Under the terms of the Naval Act of July 1, 1922, no part of the funds available may now be used toward the construction of these vessels. On July 1, 1922, the following vessels were under construction — 9 battleships, 6 battle cruisers, 10 light cruisers, 3 fleet submarines, 34 submarines, 1 gunboat, and 4 auxiliaries. Under the terms of the *Washington Treaty* limiting naval armaments work has been suspended on 7 of the battleships and 4 of the battle cruisers; the remaining 2 battle cruisers are being converted into aircraft carriers. The following were completed during the fiscal year ended July 1, 1923 — 3 light cruisers, 13 submarines. Since July 1, 1923, 1 battleship, 1 light cruiser and 4 submarines have been completed. The following vessels therefore now remain under construction — 1 battleship, 1 aircraft carrier, 6 light cruisers, 3 fleet submarines, 17 submarines, 1 gunboat, and 4 auxiliaries. Information as to characteristics, costs &c., available for publication concerning naval vessels, may be found in the *Ships Data Book*.

EDUCATION

State School Systems, 1919-1920

In 1919-20 the total number of children in the United States 5 to 18 years of age was 27,728,788, of whom 21,578,316 (10,774,511 boys and 10,803,805 girls) were enrolled in public elementary and secondary schools and 2,034,642 were estimated to be enrolled in private elementary and secondary schools and in private commercial and business schools. The average daily attendance in the public schools was 16,150,035; the average length of school term was 161.9 days and the average number of days attended by each pupil enrolled was 121.2 days. In 1919-20, 679,533 teachers (356,666 men and 322,867 women) were employed. The average annual salary of all teachers was \$371. The total number of buildings used as school houses was 272,319, and the estimated value of all public school property was \$2,409,719,120.

The total money received for school purposes, excluding balances on hand was \$1,155,506,640. Of this amount, \$26,036,098 was received from permanent school funds and from the rent of school lands, \$134,278,753 from State taxes or State appropriation, \$758,896,521 from local tax or appropriation, \$2,474,717 from the Federal Government, and \$233,820,222 from all other sources State and local. The total payments, excluding payments of bonds, were \$1,036,125,229. This amount includes expenditures for general professional and business control aggregating \$36,752,316, salaries of teachers, supervisors and principals, \$590,119,316 text-books and other instruction supplies, \$42,425,820 instruction in evening schools, \$3,276,593 miscellaneous current expenses, \$220,024,112 (composed of operation of school plant, \$125,709,229, maintenance of school plant \$30,432,039, auxiliary agencies, \$26,387,302, fixed charges, \$9,283,712, and interest on indebtedness \$22,221,821), and outlays—sites, new buildings and equipment, \$123,542,822.

Compulsory Attendance Laws, 1922

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1919-20

Of the 670 universities, colleges and professional schools, 153 were for men, 117 for women, and 400 were co-educational. There were 109 public institutions and 561 under private control or management. The total number of instructors in both private and public institutions was 42,882 (34,111 men and 8,771 women). The public institutions enrolled 156,626 undergraduate and graduate students (102,711 men and 53,915 women). The private institutions enrolled 300,068 undergraduate and graduate students (119,531 men and 80,537 women). In general engineering, 10,231 students were enrolled in chemical engineering 5,743 in civil engineering, 8,859 in electrical engineering 9,469 in mechanical engineering 11,789 and in mining engineering 3,048.

The total number of baccalaureate degrees conferred in 1919-20 was 38,552 (23,272 men and 15,280 women), altogether 4,853 graduate degrees were conferred (3,457 men and 1,396 women). 989 honorary degrees were conferred.

The schools of theology enrolled 7,216 students and reported 588 graduates. Law schools, 20,992 students and 2,273 graduates. Schools of medicine, 14,242 students and 806 graduates. Schools of dentistry 8,809 students and 865 graduates. Schools of pharmacy, 5,026 students and 1,023 graduates and schools of veterinary medicine 908 students and 219 graduates.

Teachers' Colleges and Normal Schools, 1919-20

In 1919-20, 371 teachers colleges and normal schools reported to the United States Bureau of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 138 are State institutions, 45 are teachers colleges (schools granting a degree after four years work beyond high school), 33 are city normal schools, 95 are county normal schools, and 60 are private normal schools. The 45 teachers colleges were separated from the State normal schools, which accounts for the number of State normal schools in 1920, smaller than in 1918 when they were included. The total number of instructors in all teachers colleges and normal schools was 9,587. The total number of students enrolled was 162,796 (89,149 men and 73,647 women). Of this total enrollment, 135,418 students are in normal training courses. The number of graduates from the normal training courses was 2,151 men and 18,861 women, making a total of 21,012. Practice or model schools are usually operated in connection with these normal schools, or the public schools are used for this purpose. The total enrollment in these model schools, so far as reported, was 90,446. The total receipts for normal schools were \$31,395,389. The total number of volumes in the libraries was 2,385,238.

Nurse Training Schools, 1919-20

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1920 the number of such schools reporting was 1,775. The number of pupils enrolled in these schools in 1920 was 54,953, and the number graduated 14,980. Of the schools reporting, 88 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located is 321,619 beds and the average daily number of patients is 252,822. In 1920 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 539 schools required 8 hours of duty daily, 474 schools required 9 hours of duty, and 439 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Twenty-two schools required 12 hours of duty, and 9 required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than \$400. In the first year 54 per cent of the schools pay under \$100 and 41 per cent pay from \$100 to \$199. In the second year 35 per cent of the schools pay under \$100, and 56 per cent pay from \$100 to \$199. In the third year of the course 29 per cent pay under \$100 and 60 per cent pay from \$100 to \$199. In the schools in hospitals for the insane the remuneration usually exceeds \$400. In the first year of the course 76 per cent of the schools pay \$400 or more, in the second year of the course 79 per cent of the schools pay \$400 or over, in the third year of the course 81 per cent of the schools pay \$400 or more.

More than 85 per cent of all the nurse training schools in general hospitals offer a three-year course. About 10 per cent offer a two-year or two and one-half year course. In hospitals for the insane more than 70 per cent of the schools offer a three-year course, and the remaining schools offer a two-year course. Almost 43 per cent of the general nurse training schools require one year of high school work for admission, 21 per cent require two years of high school work for admission, 26 per cent require a full high school course and 10 per cent require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1919-20

In 1919-20 14,326 public high schools reported to the Bureau. The total number of teachers in these secondary schools was 97,654 (34,396 men and 63,258 women). The total number of pupils enrolled in these schools was 1,999,106 (891,469 boys and 1,107,637 girls). The total number of coloured pupils included in the preceding figures is 30,223. In the first year of the course 742,300 pupils were enrolled in the second year 498,796 in the third year 346,684, and in the fourth year 269,355 pupils including post graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools 241,951 pupils were enrolled. The number of graduates reported

by 12,326 schools was 230,902 (90,516 boys and 140,386 girls).

There were 10,822 high schools that reported a four year curriculum. In these four year high schools there are 80,804 teachers, and 1,678,823 pupils are enrolled (745,477 boys and 933,346 girls). In addition in 402 three year senior high schools, there are 3,621 teachers and 63,630 pupils (27,802 boys and 35,828 girls).

Private High Schools and Academies, 1919-20

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. The increase has been about proportional to the increase in population. In 1900 the number of students enrolled in these schools was 110,797. In 1919-20 the number enrolled was 184,153. The number of schools reporting in 1900 was 1,978 and the number reporting in 1920 was 2,093. The total number of instructors in these private high schools in 1920 was 14,946 (5,668 men and 9,278 women). In this group of schools more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co educational. Of the 2,093 schools reporting in 1920, 385 were for boys only, 728 were for girls only, and 980 were co educational. Altogether, about one tenth of the schools had military drill in 1920 enrolling 24,056 students. Of this number 3,823 were girls. In 1926 the number of boys taking this work was 10,324. Within the past four years the enrolment in military drill in these schools has been doubled. The number of coloured students enrolled in these schools in 1920 was 9,526. The total number of graduates from private high schools and academies was 24,166. The average size of the faculty was 7.1. The average number of students to a school was 88.0. The average number of students to a teacher was 12.3.

The number of students enrolled in the first year of these private high schools was 36.1 per cent. of the total number in the second year 26.8 per cent., in the third year 20.5 per cent. and in the fourth year, 16.6 per cent.

566 of these private schools were non-sectarian, and 1,527 were denominational (976 Roman Catholic).

Of the total number of students enrolled, 45.7 per cent. were boys and 54.3 per cent. were girls.

The number of Negro girls enrolled in these schools was about twice as large as the number of Negro boys. 6,341 coloured girls were enrolled, and 3,185 coloured boys.

Private Commercial Schools 1919-1920

In 1920 reports were received from 902 private commercial and business schools. These schools are of two types (a) those which are non denominational, and which are run on a commercial basis (b) those which are maintained by certain denominations and by Young Men's Christian Associations. The private non denominational schools reporting were 841, the denominational and Young Men's Christian Association schools reporting were 61. The total number of instructors in these 902 schools was 6,166 (2,976 men and 3,189 women). The number of students enrolled was 135,022 (139,551 men and 95,471 women). The average daily attendance in these schools was 164,662. Altogether 902 schools reported 244,662 students enrolled in day courses. In night courses 221,426 students were enrolled in the 675 schools which reported such courses. In the commercial or bookkeeping

course 106,822 students were enrolled, steno graphic, 126,055, combined courses, 53,430, tele graphic (wire), 2,804, (wireless), 2,384, accountancy, 11,889, secretarial, 23,073, and in the salesmanship course, 15,167.

In 755 schools in which shorthand was taught 130,927 students or 56 per cent. of the shorthand students reported studied the Gregg system of shorthand, 35 per cent. of the shorthand students or 81,618 students, studied some Pitmanic system of shorthand.

Schools for Feeble-minded and Sub Normal Children, 1917-18

Nearly all States provide schools for feeble minded children. 43 schools of this type reported in 1918, 32 private schools also submitted a report. Altogether 121 cities have organised classes for the teaching of sub-normal and backward children. The children in these schools are not usually feeble minded, but are retarded in their school work. The number of instructors in State institutions was 425 in private institutions 121, and in public day school classes of city schools 1,124. The total number of inmates in State institutions was 35,968 (18,253 boys and 17,615 girls) in private institutions, 982 (467 boys and 515 girls), in public day school classes of city schools, 18,123 (11,927 boys and 6,196 girls).

In State institutions 11 per cent. of the pupils take music, 26 per cent. home economics, 19 per cent. manual training, 11 per cent. agriculture, and 13 per cent. trade training courses. In city day school classes, 90 per cent. of the pupils take music, 27 per cent. home economics, 86 per cent. manual training, 10 per cent. agriculture and 12 per cent. trade training courses. In private schools 43 per cent. take music, 24 per cent. home economics, 34 per cent. manual training, 14 per cent. agricultural courses, and 4 per cent. trade training courses.

* During the fiscal year 1923 to date, allotments for veterans relief have been made to the Treasury Department in the amount of \$3,204 222 to the War Department in the amount of \$2,889 222 and to the Navy Department in the amount of \$2 622 302. Similar allotments in the fiscal year 1922 to the Treasury Department were \$26 350 668 66 to the War Department \$4 866 393 40 and to the Navy Department \$2 227 724. Expenditures under these allotments however appear as expenditures of the respective departments and not of the Veterans Bureau. In the fiscal year 1922, payments on account of veterans relief made prior to August 21 1922 by the War Risk Insurance Bureau are included under Treasury Department while similar payments made prior to that date by the Federal Board for Vocational Education are included under other independent offices and commissions.

6 Add excess of credits.
Note—The analysis of expenditures for the fiscal year 1923 is on the same basis as the Budget with necessary adjustments to cover receipts credited to appropriations, including particularly proceeds of railroad securities. The analysis for the fiscal year 1922 is on the Budget basis without adjustment. The figures given for operations in special accounts are net figures and make allowance for receipts and deposits credited to the account concerned.

Notes — Agreements have been concluded for the funding of the obligations of Great Britain and Finland into long time Bonds in the amounts of \$4 600 000 000 and \$9 000 000 respectively. The funded Bonds of Great Britain have been delivered to the Treasury. The remaining \$30 500 000 due from Great Britain represents balance due on obligations regarded as having been given for Pittman Silver advances which is to be paid in the spring of 1924.

Cuba has paid its indebtedness in full.
No interest due on Nicaraguan notes until maturity as is also the case with certain Belgian obligations aggregating \$2 287,252.

Payment of principal and interest on obligation of Austria extended for 20 years from June 1, 1923.

UNITED STATES MONEY

On Sept 1, 1923, the Stock of Money amounted to \$8,707,407,229 made up as follows —

Gold Coin and Bullion	\$4,109 052,543
Gold Certificates	*826 369,469
Standard Silver Dollars	495 464,404
Silver Certificates	*408 876,947
Treasury Notes of 1890	*1,455 623
Subsidiary Silver	269 510 124
United States Notes	346 681,016
Federal Reserve Notes	2,698 808 330
Federal Reserve Bank Notes	18 046 000
National Bank Notes	768,944,812

Total (Sept 1, 1923)	\$8,707 407,229
Total (Sept 1, 1922)	\$8,393,549,241
Total (April 1, 1917)	\$5,312 109 272
Total (July 1, 1914)	\$3,732,228,871
Total (Jan 1, 1879)	\$1,007,084,483

Of the total Gold Coin and Bullion on Sept 1, 1923, the United States Treasury held \$2,424,847,762, the Federal Banks and Agents held \$286,862,849, and \$397,341 912 (or \$3 50 per capita) was in circulation. Of the total money \$3,885,544,249 was held in the Treasury,

* Not included in the total as the money held in trust against them is included under Gold Coin and Bullion

\$1 220,678,208 by the Federal Reserve Banks and Agents, and \$4,777,906,811 (or \$42 85 per capita) was in circulation. Gold certificates are secured dollar for dollar by gold held in the Treasury for their redemption. Silver certificates are secured dollar for dollar by standard silver dollars held in the Treasury for their redemption. United States notes are secured by a gold reserve of \$52,979 025 63 held in the Treasury. This reserve fund may also be used for the redemption of Treasury notes of 1890 which are also secured, dollar for dollar by standard silver dollars, held in the Treasury. Federal reserve notes are obligations of the United States and a first lien on all the assets of the issuing Federal reserve bank. Federal reserve notes are secured by deposit with Federal reserve agents of a like amount of gold or of gold and such discounted or purchased paper as is eligible under the terms of the Federal Reserve Act. Federal reserve banks must maintain a gold reserve of at least 40 per cent. Including the gold redemption fund which must be deposited with the United States Treasury, against Federal reserve notes in actual circulation. Federal reserve bank notes and National bank notes are secured by United Government obligations, and a 5 per cent fund for their redemption is required to be maintained with the Treasurer of the United States in gold or lawful money.

Agriculture—The total land surface, excluding inland possessions and Alaska, is 1,993,255,366 acres, of which in 1920 955,837,715 were farms (502,073,007 acres improved). The total number of farms in 1920 was 6,448,343, of which 1,445,107 are between 100 and 500 acres, 1,474,745 between 50 and 100 acres, and 1,503,732 between 20 and 50 acres. The gross value of farm products of the United States in 1919 was \$1,425,623,614, as compared with \$8,944,230,307 in 1909. Crops in 1919 were valued at \$1,755,364,894, live stock products (including animals sold or slaughtered) at \$6,178,122,273, and miscellaneous products at \$402,135,447.

minerals, \$3,234,340 (gold, \$1,793,380; silver, \$1,440,960). The total value of metallic minerals produced in 1922 was estimated at \$68,500,000 (pig iron, \$60,144,858; copper, \$1,774,443; gold, \$449,006; and silver, \$55,318,850), and of non-metallic minerals the total value was \$3,662,500 000 (bituminous coal, \$1,294,000; Pennsylvania anthracite, \$773,700.125; petroleum, \$900,200 000). In 1922 the production of oil was 552,197,000 barrels, as against 474,183,000 barrels in 1921, clay products (1922), \$730,397,754 stone, \$118,500,000 natural gas, \$196,000,000 cement, \$208,464,028 and mineral paints (lead and zinc pigments), \$22,205,400. The exports of bituminous coal sent to Europe in 1922 amounted to 4,024,472 tons (of 2,240 lb.) while 11,961,405 tons went to Canada.

* Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connexion with irrigation projects in Montana.

ments enumerated at the biennial Census of 1921 numbered 126,567, the value of their products being \$42,623,288,832, as compared with a value in 1919 of \$35,428,078,773. The figures for 1921 do not include data for 3,000 establishments with products valued at \$136,226,075, each establishment reporting products under \$5,000 in value, but such data were included in 1919. The leading manufacturing States are New York, Pennsylvania, Illinois, Ohio and Massachusetts. The principal industrial centres are New York (clothing, printing and publishing, bread and other bakery products, millinery and lace goods, tobacco slaughtering and meat packing, sugar refining) Chicago (slaughtering and meat packing, printing and publishing clothing), Philadelphia (textiles, printing and publishing, clothing, sugar refining, petroleum refining) Boston (printing and publishing sugar refining, clothing, confectionery and ice cream, foundry and machine shop products, boots and shoes), Pitts burg (iron and steel, slaughtering and meat packing), Detroit (automobiles, automobile supplies) and Detroit (printing and publishing) St. Louis (slaughtering and meat packing boots and shoes, tobacco) Cleveland (automobiles, iron and steel, electrical machinery, apparatus and supplies), Baltimore (clothing, steel and refining copper, slaughtering and meat packing, printing and publishing, fertilizers) Cincinnati (slaughtering and meat packing, clothing printing and publishing), Buffalo (flour mill and grist mill products, automobiles, slaughtering and meat packing) Minneapolis (flour mill and grist mill products automobiles printing and publishing) San Francisco (printing and publishing, automobiles, coffee and spice).

Automobile Industry—The value of the cars and lorries manufactured in 1921 was \$1,671,386 076, of parts and accessories, \$408 016,532, and of tyres and tubes \$446,075 960. The number of cars produced was 1,406 257, of lorries, 206 688 while 27,884 034 tyres were also manufactured in 1921. The automobile factories gave employment to 248 027 persons who received \$406 421,414 in 1921. The number of automobile vehicles registered in 1921 in the U S A was 10 465 995. The petrol produced in 1920 amounted to 4,882 546 699 gallons and that consumed to 4,256 428 005 gallons. The taxes levied on the motor industry amounted to \$316 720 000. The number of motor vehicles exported in 1921 was 30 776.

FEDERAL EMPLOYMENT BUREAUS

The following figures show the work done by the Federal Employment Bureaus during the past six fiscal years ending June 30

Statistics for the year ended June 30	Number of applications for help	Number of persons applied for	Number of applicants for places	Number referred to employment	Number actually employed

	205	26,410

PUBLIC ROADS—On Dec 31, 1922, the total length of public roads was 2,930,000 miles, approximately 415,000 miles of which were surfaced roads. In 1922 the total expenditures for construction and maintenance were approximately \$900,000,000.

SHIPPING—On June 30, 1923, the mercantile marine of the U S consisted of 816 sailing vessels of 1,029,049 gross tons, 2,826 steam vessels of 12,322,247 gross tons a total of 3,644 vessels of 13,351,296 gross tons. In the year ended June 30, 1923, sailing and steam vessels of 66,888,096 tons entered at the various ports of the U S. of this total 30,702,396 tons were American and 36,185,700 tons foreign. The tonnage cleared from the various seaports was 66,601,435, of which 30,591,002 tons were American and 36,010,433 tons foreign.

POSTS AND TELEGRAPHS—On July 1, 1923, there were 51,612 post-offices in the U S dealing (in 1922) with 22,578,894,140 "pieces of mail matter of all kinds (letters, postcards, newspapers, packets, etc.). The telegraphs and telephones are not operated by the U S Government.

WEIGHTS MEASURES, AND CURRENCY

The *Weights and Measures* in common use are shown on page 429. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 cents. The rate of exchange on certain dates in 1922 will be found on p 426

Dependencies of the U S A

THE PHILIPPINE ISLANDS

are situated between 4° 40'—21° 10' N lat and 126° 40'—126° 34' E long, and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 125,026 square miles, of which total 94,946 square miles are contained in the eight largest islands, the 3730 other islands having a combined area of 24,572 square miles. At the Census of 1928 the population was ascertained to be 20,324,320, almost all of Malayan stock, of whom 7,790,937 are Roman Catholic, 1,417,448 are Aglipayan, 124,575 are Protestant, 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign born residents about

three quarters are Chinese, and of the white population over one half are from the United States (6,921 in 1921)

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1542 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored

to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

Sept. 1, 1902, the Philippine Scouts, which form a part of the United States regular Army consisted of 204 officers (28 being citizens of the Philippine Islands), and 7,020 enlisted men. On the same date the regular Army in the Philippines (other than the scouts), consisted of 500 officers and 4,071 enlisted men, many of these officers being on duty with the scouts. The Philippine Constabulary, which is under the Philippine Government, in Sept. 1902, consisted of 376 officers and 5,642 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1902 the income of the Philippine Government was \$34,001,101 and the bonded indebtedness \$34,750,000. The expenditure on education in 1901 amounted to \$7,058,502.64. The University had an enrolment of 4,718 students and there were 943,364 pupils enrolled in the public schools. The principal exports are hemp, coconut oil, sugar and tobacco. The imports being cotton manufactures, and iron and steel manufactures. During 1902 the trade was valued at \$95,582,298 for exports, and at \$80,197,645 for imports. 56 per cent of the imports being from U.S. and 67 per cent of the exports being taken by the U.S. Sugar was the principal article of export in 1902 being valued at \$25,013,310. Manila hemp \$19,540,915, coconut oil \$15,734,186 and leaf tobacco \$2,273,127.

Towns — (Capital, Manila, in the island of Luzon population (Dec. 31, 1902) 283,612. The next largest towns are Cebu (63,500), Albay (53,105), and Iloilo (49,808) there are several others with populations from 25,000 to 40,000.

GUAM

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26' N lat and 144° 39' E long, at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population on July 1, 1903, of 16,224, of whom 14,911 are classed as native, 811 of the naval station, and 502 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island. CAPITAL, Agaña. Port of entry, Apra.

Governor, Capt. H. B. Price, U.S.N.

PUERTO RICO

Puerto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 30'–25° 30' N lat and 65° 30'–70° 15' W long., with a total area of 3,435 square miles and a population of 1,299,809

at the census of 1900. Almost all the inhabitants are Roman Catholics. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 2,400 miles distant from New York, and 98 miles from Key West. Sugar is grown in the low lying districts, and tobacco and coffee on the slopes of the hills, fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 460 miles of railroad were in operation in June, 1902, and there are good harbours at San Juan and Ponce. The capital, San Juan, had 71,443 inhabitants in 1900. Other towns being Ponce (42,922), Mayaguez (19,124), Arecibo (10,039), Bayamon (10,411), and Caguas (12,149). The legislative functions are vested in a legislature which consists of 2 elective houses. The Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large) and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years.

Governor Horace M. Towner

TUVALU AMERICAN SAMOA

Under an agreement between Great Britain, the United States and Germany* (proclaimed Feb. 19, 1900) the first named Power abandoned all claims to the islands of the Samoan Archipelago, which were then divided between the United States and Germany, the islands east of 172° W long being taken over by the U.S. The territory thus acquired consists of the island of Tutuila, Annuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of 8,058 in 1900.

Tutuila, the largest of the group, has an area of about 40 square miles and a population of 6,185, and contains a magnificent harbour at Pafo. Pafo, the capital and seat of government. The remaining islands have an area of about 16 square miles and a population of about 2,000. Rose Island being uninhabited. Copra is the only export of importance.

Governor Captain E. S. Kellogg, U.S.N.

WAKE AND JOHNSTON ISLANDS

The flag of the U.S. was hoisted on Wake Island in 1899, and three other islands in the Pacific have been annexed (Johnston, Palmyra, and Midway).

ALEUTIAN ISLANDS

The *Aleutian Islands* or Catherine Archipelago (also known as the Santa Barbara group), lie westward of the district of Alaska, and consist of four groups of islands (Fox, Andreanof, Rat, and Near Islands) between 52°–53° N lat and 172° E.–165° W long. They have a population estimated at 2,000. The principal settlement is at Iliuluk, on Unalaska Island. The group forms a part of the district of Alaska, and was transferred to the U.S. by Russia in 1867.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1907 of 25,052. *St. Thomas* (28 sq. miles) has a population of 10,121. *St. Croix* (84 sq. miles) has a

* Under the *Treaty of Versailles*, 1919, the German Samoan Islands were allocated to New Zealand.

population of 14,000, the capital being Christian (old or Basini), St. John (so sq miles) has a population of 600, the capital being Cruz Bay. St. Croix exports sugar and cotton.

The revenue is derived from customs, income tax, ground and building tax, trade tax, &c. The estimated revenue for year ending June 30, 1904, France 1,370,000. There is a regular weekly service from New York to St. Thomas, and from Porto Rico to St. Thomas and St. Croix. The islands of St. Thomas and St. Croix possess wire less installations.

CAPITAL, St. Thomas contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refueling station.

Governor of the Virgin Islands, Capt Philip Williams, U.S.N.

THE PANAMA CANAL.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea level, and in 1881 the work was undertaken by the Universal Inter-oceanic Panama Canal Company, of which de Lesseps was nominal head. After two years of preparatory work, the first excavation was made on January 30, 1881. The amount of work to be accomplished proved to be greater than was estimated, and the conditions under which it was carried on more embarrassing. Sickness, interference of local officials, and mismanagement by the administration in Paris, resulted in the failure of the company, and a receiver was appointed in 1889. Under direction of the French courts a new company was formed to carry on the work, and, after a period of surveys, excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

The interest of the United States in a canal across the Isthmus dates from 1823, and surveys under the auspices of that Government, or of companies organised in the United States, have been made at every available point between the Isthmus of Tehuantepec and the Atrato River. Actual construction, by an American company, of a canal across Nicaragua was begun in 1890, and abandoned in 1893 when the company failed for lack of funds. The failure of this company influenced the United States Government to take an active interest, and a commission was appointed in 1895 to make further studies and investigations. As a result of these investigations, the Congress of the United States authorised the President in 1902 to purchase the effects of the French company in Panama for \$50,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the cession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on

February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1903 a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Two years were spent by the United States Government in sanitation, the assembling of plant, and organisation and housing of a labour force after which operations on a large scale were begun on all parts of the canal.

Including the purchase of rights payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1923, were \$458,992,097. Tolls and other revenues, from its opening until June 30, 1923, amounted to \$75,063,503. During the past two years they have averaged approximately \$14,353,015 a year, or about \$1,196,084 a month.

The canal is fifty statute miles long (43.84 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 25 feet above sea level varies from 25 feet in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

There are three essential parts: a lake formed by damming the Chagres River and two channels leading from the Atlantic and Pacific Oceans to this lake. The surface of the lake is normally at 25 feet above sea level and the channels connecting it with the sea are at sea level. Ships are lifted from the sea level channels to the lake, or lowered from the lake to sea level in locks. These locks have a usable length of 1,000 feet, width of 120 feet, least depth of water over the sills when lake is at normal level, 41½ feet. These dimensions limit the size of ships using the canal. The dam which forms the lake is situated at Gatun about seven miles inland from the Atlantic. It is built of earth, with an impermeable core of fine sand and clay, and is 1½ miles long, half a mile wide at bottom, and 100 feet at the top, which is 105 feet above sea level. The lake is known as Gatun Lake, and is 164 square miles in area. At its southern end is Culebra Cut, the channel through the continental divide. This is the most extensive excavation ever made. The French canal builders dug about 18,600,000 cubic yards out of this section of the canal, and the Americans have completed an excavation that amounts to over 130,000,000 yards. The total excavation from the canal prism is about 165,000,000 cubic yards, about 130,000,000 yards of which have been excavated in the dry and the balance by dredges. The amount of concrete used in the locks is 4,500,000 cubic yards.

The administrative organisation for the canal is known as "The Panama Canal, with the Governor of the Panama Canal (Col. Jay J. Morrow, U.S.A., retired) at its head. The Governor reports to the President, who has delegated the Secretary of War to have supervision over the canal for him. The Governor

of the Panama Canal is President of the Panama Railroad.

In connexion with the construction and operation of the canal, extensive terminal and supply facilities have been constructed at both the Atlantic and Pacific entrances. These include marine and general repair shops, foundries, dry docks, five 1,000-foot steel and concrete piers, and a number of wharves slaughter houses, cold storage plants, ice plants, laundries, hospitals, coaling plants, fuel oil tanks and delivery plants, waterworks, commissary stores, storehouses of spare materials and ships chandlery stores, and other accessories of great modern ports. An extensive transfer of cargo goes on at the Atlantic terminus of the canal between ships plying the Atlantic and the Caribbean and ships which pass through the canal to or from Pacific ports. The 1,000-foot dry dock, with adjacent repair shops, at Balboa is an important assistance to shipping throughout the American tropics as well as a base for repairs for vessels of the Navy.

Health conditions are excellent, while the scenery is varied and attractive with ruins of old Spanish towns and fortifications. Gatun Lake is studded with islands and surrounded by mountains. Shooting and tarpon fishing are excellent. The U S Government operates hotels at Colon and Ancon.

The number of commercial vessels passing through the canal in both directions in the fiscal year ending June 30, 1923, was 3,967, with a cargo tonnage of 19,597,875 tons, of 2,240 pounds. The total of commercial ships passing through the canal in the first seven years of its operation, from August 15, 1914, to June 30,

1923, was 19,808, of 74,671,519 net tons, Panama Canal measurement, carrying 80,916,282 tons of cargo.

SHAKESPEARE AND STRATFORD ON AVON

OVER 200,000 visitors from all climes and countries, yearly visit Stratford-on-Avon. High street still appears mediæval, and many oak timbered houses attest the town's great age and dignity.

Shakespeare's Birthplace (April 23, 1564) at Stratford-on-Avon, has been for over 200 years the goal of pilgrims. It was bought for £3,100 in 1847 and given to the nation (Restored in 1857). Managed by 26 Trustees (16 ex-officio). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clifton Bridge built of stone, on 19 arches, about 1490 by Sir Hugh Clifton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall—Built A.D. 1266. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash 1804, mural allegorical paintings, done by mediæval priests.

Hall's Craft—Unaltered old timbered residence of Susanna, poet's daughter, wife of Dr John Hall, churchwarden and poet's executor.

Harvard House—Built 1566 by Alderman Thomas Rogers whose descendant (John Harvard) founded Harvard University, U.S.A.

Hathaway Cottage—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife who bore him three children, Susanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI School—Founded by Thomas Jollyfe priest in Henry VI reign incorporated by Edward VI. Here Shakespeare acquired his "little Latin, less Greek and matchless English."

The Shakespeare Memorial—Mainly due to munificence of C. E. Flower (1830-92) and his wife. Group comprises library, with 10,000 volumes of Shakespeare editions and annotations including rare Wm. Jaggard collection. Gallery of pictures (including unique Droeshout portrait). Museum of antiques and relics (including Irving collection). Lecture rooms. Lower affording views of 20 miles. Gardens, and Varney (Lord Ronald Gower's gift). Theatre (800 seats) holding recurring festivals of the poet's dramas with varying programme daily. Recently nine different plays were given in six days. Special celebrations and performances, with floral procession to tomb mark the birthday, April 23, each year.

New Place—Site of the poet's retirement. Shakespeare bought this estate in 1597, retired to it about 1620, died there April 23, 1616. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759.

The Cage—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall—Erected 1633, rebuilt 1768. Contains details of the unbroken sequence of Bailiffs and Mayors since A.D. 1292 (including the poet's father, John Shakespeare). Exhibits Gainsborough portrait of Garrick, four Corporation Maces, gilt silver of 15-16th Century, and ancient Corporate Sword.

Trinity Church—Dates from A.D. 692. Of cathedral like proportions. Shelters remains of poet and family.

Foreign Countries.

ABYSSINIA or ETHIOPIA

Empress, Walzeru Zaudittu (daughter of late Emperor Menelek), born 1876 elected Sept. 27th, 1896.

Heir, H. H. Ras Tafari Makonnen, GCMG (Cousin of the Empress), born 1891.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 11 millions, of whom about one half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Massowah (Eritrea), the French colony of Djibuti, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth, iron and coal are not uncommon, and gold is washed in various streams, while salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot, the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar cane, cotton, coffee, rubber, &c., flourish, in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake, the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people. Domestic slavery is general and has legal recognition.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The form of govern-

ment is a feudal despotism. There is no popular literature, and little education. The potential army numbers at least 300,000, armed with rifles. The principal pursuits are agriculture and cattle breeding. The chief exports are coffee, civet, wax, hides, rubber, ivory, and gold. The total trade is valued at about £2,000,000 for imports and exports, but it continues to suffer severely from the prevalent depression. The import duty on all goods at Gambela is 10 per cent. *ad valorem*, and at Dire Dawa and Harar 8 per cent. *ad valorem*. In the interior the duty is variable, and 3 per cent addition is imposed on goods brought to the capital. A railway (495 miles) has been built under French auspices from Jibuti to the capital *via* Dire Dawa. The posts and telegraphs are under French management. The principal towns besides Addis Ababa, are Adwa (the capital of Tigre), Gondar, Debra Markos, Salyu, Aksum, Antalo, Ankober, Gore, Dembecha, Ijube, Jimma, and Harar. There are ancient architectural remains at Aksum, Gondar, and Ankober. modern architecture is very poor.

CAPITAL, Addis Ababa (population fluctuates but is ordinarily about 50,000). Harar, in Eastern Abyssinia, has a population of about 45,000.

Addis Ababa is 500 miles from Zaila, *via* Harar, letters from London are from 20 to 24 days in transit if the mail connects with steamer service from Aden, train from Djibouti takes 3 days, caravans take from 35 to 45 days.

AFGHANISTAN (see p 634)

ALBANIA

(Shkiperia.)

Regents, Refik Toptani, Sotir Peci, Djafer Ypi, G Tchoba.

President of the Council of Ministers (Dec. 4, 1922), Ahmed Zogu.

Minister of Foreign Affairs, Pandell Evanghelli

Minister in London, H E Mehmed Konitza, 8 Onslow Gardens, S W 7

Consul General, Capt. H. Lyon Thomson, 34, St. James's Street, S.W. 1.

Albania (the former Turkish Province of Scutari and parts of Kosovo and Yanina,) lies on the west of the Balkan peninsula of south-eastern Europe, the western boundary being the Adriatic, total area about 20,000 sq. miles, total population estimated (1922) at 1,000,000. The political neighbours are, on the north and east Yugo-Slavia, and on the south-east and south Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, and during the Great War the country was invaded by troops of the Central Powers and of the Allies. After the Armistice (Nov. 11, 1918) a National Council at Durazzo established a provisional government. The independence of the country was guaranteed by the Supreme Council of the Allies. The government is exercised by Regents representative of the various religious bodies the executive being entrusted to a Council of Ministers responsible to the elected diet. Cattle rearing and agriculture (grain and tobacco) are the principal industries and there is some mineral wealth.

CAPITAL, Tirana (pop. 12,000) other centres are Scutari (pop. 32,000), Elbasan (pop. 13,000), Berat (pop. 8,500), Korytza (pop. 18,000), Durazzo (pop. 5,000), and Valona (pop. 7,000). *British Envoy Extraordinary, Minister Plenipotentiary and Consul General Harry Charles Augustus Eyres (1922), Durazzo (And. local allowance, £600), £1,200.*
Durazzo—1st Consul, Robert Parr (acting).

ANDORRA

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500, it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a Judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,500,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000.

The organisation of the Native States of Arabia is to be developed under British auspices, the principal rulers (the King of the Hejaz and the Imam of Yemen) being subsidised under certain conditions (control of foreign relations by British advisers and maintenance of internal peace by native rulers). The various Arab States are shown below—

THE KINGDOM OF THE HEJAZ.

King of the Hejaz, El Husseln Ibn Ali.

On June 5, 1916, the Grand Sheriff of Mecca (hereditary keeper of the Holy Places) threw off the Turkish allegiance and declared the independence of the former vilayet of Hejaz. In concert with the British Imperial forces under General Allenby the armies of the King of the Hejaz (under the leadership of the Emir Feisal) penetrated northward through the districts E. of the Jordan to Damascus, and the territories of the new kingdom extend from Asir (see below) in S. to Palestine and Syria in N. and from the Red Sea, the Gulf of Akaba, and Palestine in the W. to the ill-defined boundaries of Central Arabia.

Parallel with the Red Sea coast runs the Tehama range (Jebel Shar or Mount Seir, 7,000 feet, and Jebel Radlwa, 6,000 feet). On the coast are the small ports of Muwela, Damgha el Wijn, Yambo Rabigu and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind" and inland are many settlements through which runs the Hejaz Railway. The *Oasis of Khawar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a Jewish centre at Kasr el Yahudi. The importance of the Kingdom of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina (Al Medina, "The City")* 200 miles by rail from Damascus, and the present terminus of the Hejaz Railway has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabi'a, A.H. 12). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 25 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the Kaaba or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham", placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. Jeddah, the principal port, has a considerable trade in hides, mother of pearl, coffee and carpets.

The *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo. The total area under the rule of the King of the Hejaz is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes.

CAPITAL, Mecca (pop. 60,000).

THE EMIRATE OF NEJD AND HASA.

Emir, Abd-el Aziz es Saud, K.C.I.E.

This former vilayet was in the 18th century an independent Empire of the Wahabites, and has reasserted its autonomy under a representative

of the former dynasty. It is known as "the true home of the Arab," and extends across the oases of Central Arabia, from the eastern boundary of Hejaz to the Persian Gulf. During military operations in 1913, the Emir of Nejd captured Hufuf (the capital of El Hasa), and extended his rule over the former Turkish province of El Hasa. The capital, Riyadh, is a station on the Pilgrims trans Arabian caravan route from El Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabi Moslems. The principal trading centre is Anaisa in the central province of Qasim (Nedj). The principal port on the Persian Gulf is El Katif, on Bahrain Bay (El Hasa).

THE PRINCIPALITY OF KUWAIT

Ruler, Sheikh Ahmad al Jabr as Subah, *U.K.E.*
Kuwait (or Koweit) has been semi independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Nejd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop 50,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903.
Political Agent, Major J. C. More D.S.O.

THE SULTANATE OF OMÂN

Sultan, Seyyid Taimur bin Faisal, born 1886, *etc.* 1913.

Oman (area 82,000 sq miles estimated pop 550,000) is a Muhammadan State in S.E. Arabia with a coast line of about 1,500 miles along the Persian Gulf, the Gulf of Oman and the Arabian Sea from El Katar to Ras Sa'ir. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with and subsidised by the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Oman proper. The efforts of the Sultan to establish his control having been up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1916-17 to £408,045, and in 1917-18 to £323,915, a decrease owing to interior disturbances due to the war. Dates are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat, has an estimated population of 24,000.

Muscat—British Consul and Political Agent
R. E. L. Wingate *per mensem* Rs 2,250

THE EMIRATE OF JEBEL SHAMMAR

Emir, Abdullah ibn Mitab or Rashid.
Jebel Shammar is a Bedouin community of Central Arabia, extending across the oases from Hejaz on the west to Kuwait on the east, with Nejd as a southern neighbour. Its boundaries are indeterminate, and the total population in allegiance to the Emir is believed to be about 200,000. The capital is Hall between the two Shammar ranges (Jebel Aja and Jebel Bahma) with a population of about 12,000.

THE IMAMATE OF ASIR

Imam, Ali ben Muhammad, succeeded March 22, 1923.

The territory of the Idrisi (who claims the Imamate of Asir and part of Yemen), extends along the Red Sea littoral, approximately from Hall Point to Loheia. It includes part of Asir, part of Yemen and the Farsan Islands, and extends inland to the Dahna Desert. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

THE IMAMATE OF YEMEN

Imam of Sana'a, Yahya Muhammad Hamid ed Din

Yemen occupies the S.W. corner of the Arabian peninsula, between the Imamate of Asir and the British dependency of Aden, with an estimated area of 74,000 sq miles and a population of 600,000 to 700,000. It was formerly divided into the vilayets of Sana'a, Tais, Amr and Hodeida, and it extends inland to the Dahna Desert and to the tribal territories of Hadramut. Part of Yemen is now included in the territories of the Idrisi (Imam of Asir), and of the remainder the greater part is under the rule of the Imam of Sana'a. On the plateau between the coast and the Dahna Desert (a district known as *El Jebel*) are the most fertile parts of Arabia, where wheat, barley, millet and coffee are extensively grown. The sea port of Mocha has become associated with the coffee export trade, but in this trade (and in all others) it is of secondary importance to *Hodeida*. The trade of Yemen probably exceeds that of the remainder of Arabia. The capital is the walled city of Sana'a (pop 20,000), and about 70 miles to the S. of the capital is Dharmar, an ancient seat of learning and the headquarters of the Zaidi sect of the Muhammadans.

THE HADRAMUT TRIBES

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadrami, an ancient people of Arabian stock (Hadram was the son of Joktan, *Genesis* x. 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Kabr Hud) and Shibam (Kabr Salih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the Sultan of Shahr and Mokalla, K.C.M.G., who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Sey yem and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long standing feud between the Kathiri and the Kati (by whom the former were expelled from the coast) was settled by treaty in 1920 on the initiative of the Aden Government. Under this Treaty the Emir of Mokalla permits access to the

port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

ARGENTINE REPUBLIC

(República Argentina)

President (1922-28), Dr Marcelo T de Alvear, assumed office, Oct 12 1922 \$96,000
Vice Pres (1922-28) Dr Elpidio Gonzalez 36,000

Asst. Consul, Don Horacio Fernández Beschteldt.

There is a Consulate General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Manchester, Newcastle upon Tyne, Newport, and Glasgow, and Vice Consulates at Aberdeen, Belfast, Bristol, Hull, and Swansea.

Argentina is a wedge shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 3,000 miles. Its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north east by Paraguay, Brazil, and Uruguay, on the south east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the impenetrable Cordillera, with their plateaus, extend from the northern to the southern boundaries, on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, and in the north western states by the eastern spurs of the Andes. The Paraná River formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic and is navigable throughout its course, the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the

Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 8,668,526 in 1921. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1920 the immigrants numbered 155,322 and the emigrants 104,711, a net influx of 50,611. The climate is moderate and healthy. Spanish is the language of the country.

Government—The estuary of La Plata was discovered in 1515 by Juan Díaz de Solís, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1820 Spanish rule was overthrown, and in 1828 the independence of Argentina was complete although not acknowledged by Spain until 1842. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 22 members and of a House of Deputies of 150 members. Members of Congress receive \$9,000 per annum.

Production—Of the total area about one third is suitable for agriculture and cattle raising, and vast tracts are held by the Federal Government for sale or lease to colonists. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool hides, cattle, sheep, and horses. The yield of the harvest of 1921-22 was 4,600,000 tons of wheat, 920,000 tons of linseed, and 478,600 tons of oats, there were in 1920 27,322,126 cattle, 45,323,419 sheep, 9,566,455 horses, 600,000 mules, 4,670,130 goats, and 3,227,346 pigs. The export of frozen beef and mutton is an important industry. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1920, there were 4,500 registered wine presses, handling about 600,000 tons of grapes, the output in 1921 being over 4,000,000 hectolitres (82,122,000 gallons). The export of wine to neighbouring South American States is increasing annually, and the importation of wine has almost ceased.

Communications—There were (1922) 21,925 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 43,153 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are several aeroplane services between Argentine centres, and an air mail service between Buenos Aires and Monte Video, Uruguay. The principal ports are Buenos Aires, Rosario, La Plata, and Bahía Blanca. The number of steam and sailing merchant vessels from overseas ports which entered Argentine ports in 1922 was 1,308 of a total tonnage of 4,381,000.

Defence—The Navy consists of a super Dreadnought battleship, a river monitor, 4 armoured cruisers, 3 cruisers (old), 4 torpedo

* A total of about £400,000,000 British capital is invested in the Argentine.

gunboats, 7 destroyers, and a first class and 6 second class torpedo boats. Strength about 5,000 men. There is a naval post at Bahía Blanca. The National Militia has a peace footing of about 30,000, with reserves of 250,000 on a war footing the Army would comprise 5 divisions of 20,000 each.

Education.—Primary Education is secular, free and nominally compulsory from the ages of 6 to 14, but only some 45 per cent. of attendances are secured. Secondary Education is controlled by the Federal Government in lycæums and normal schools, with an average attendance of 6,000. There are also Special Government Schools—1 naval, 2 military, 2 mining, and 2 agricultural. There are National Universities at Córdoba and Buenos Aires and Provincial Universities at La Plata, Santa Fé, and Paraná.

for Debt Clearing, Dr. Felix Weiser

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary by the identity of sovereigns, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30'–26° E. long. It embraced an area of 240,456 sq. miles, and a population (1914) of nearly 53,000,000, and included Upper and Lower Austria, Bohemia, Bukovina, Carinthia, Carniola, Dalmatia, Görz and Gradiska, Istria, Moravia, Salzburg, Silesia, Styria, Trieste, Tyrol and Vorarlberg, with Bosnia and Herzegovina as administered territories. At the conclusion of the War, the territories of the Austrian Republic comprised an area of 31,756 square miles, with a population (1920) of 6,067,000.

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914–18. Before the armistice of Nov. 11, 1918, Hungary had seceded from the 'Dual Monarchy,' and a Republic was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918).

Under the Treaty of St. Germain (Sept. 10, 1919) the political neighbours of the Austrian Republic are the Republics of Germany and Czechoslovakia on the N., the Kingdom of Italy, and the Yugo-Slav Kingdom on the S., Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov. 1, 1920), Austria became a Republican Federation of eight Provinces—Lower Austria and Vienna, Upper Austria, Carinthia, Styria, Salzburg, Tyrol, Vorarlberg and Burgenland (West Hungary). The Bundesrat and Nationalrat were constituted, a government formed, and a President elected. The elections resulted in a majority for the Christian Socialists over the Social Democrats, the Pan-Germans coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922), to a Christian Socialist Pan-German

Coalition Government under Doctor Seipel (a priest). There is a considerable body of opinion in favour of the inclusion of Austria in the German Reich and, on the other side, for a close alliance with Hungary.

Complete religious liberty is one of the fundamental laws of the new Republic. In 1915 the prevailing religion of the German speaking people was Roman Catholic.

Finance—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct., 1922, the exchange value of the crown had sunk to about one fifteen thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24 sh.). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League.

The Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four fifths of a loan of 500,000,000 gold crowns (about £55,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated nearly one half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £6,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The remainder of the big loan will, it is expected, be sufficient to cover the diminishing deficit until the end of 1924. The High Commissioner, Dr. Zimmermann, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec., 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus nearly 50,000 superfluous officials were dismissed or pensioned off by the end of June 1923. The issue of uncovered bank notes was stopped on Nov. 18, 1922, and the Austrian crown has been stabilised at about Crs 300,000 = £1. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic.

The following apportionment of the pre War Debts of the Austro-Hungarian Monarchy has been suggested—

To	Austrian Debt	Hungarian Debt
Austria	36 5	15
Czecho-Slovakia	41 5	16 6
France		0 7
Hungary		45 6
Italy	4 7	
Poland	13 5	
Rumania	1 5	21 5
Serbia ..	2 3	14 1
Total	100 0	100 0

Industries—The principal industry is agriculture, the chief products being wheat, barley,

oats, rye, maize and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt. There are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woolens, cottons, steel, wood work, brewing, and machinery.

Communications—In Sept., 1919, there were about 3,800 miles of railway (exclusive of narrow gauge lines). The mercantile marine was considerable in 1914 but the new Republic is landlocked.

Defence—During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

Total Imports	£66,344,000
Total Exports	£43,950,000
Imports from U K	£1,450,000
Exports to U K	£1,582,000

Air attaché, Lieut Chevalier Willy Coppen, D.S.O. M.C.

Chancellor M. F. G. Lockem
Consul Gen. M. E. Pollet 37, Bedford Sq., W.C. 1
Consul Glasgow, P. S. Dunn, C.B.F.

A Kingdom of Central Europe, with a total area (1900) of 12,322 square miles and a population (Census of 1919) of 7,577,027. Belgium is bounded on the N. by the Kingdom of the Netherlands on the S. by France, on the E. by Germany and Luxemburg and on the W. by the North Sea. The kingdom formed part of the "Low Countries (Netherlands)" from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities burning Louvain (with its library), Iermonde, and other places and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms and private persons. On Friday Nov. 15, 1918, at the great turn of the tide Antwerp was re-occupied by the victorious Belgian army and Brussels and the remainder of Belgian soil a few days later. About 20,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes Flemish is spoken by the majority, preponderating in Flanders Limburg and Brabant including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Meuse (Meuse). Brussels has a mean temperature of 50° F. (summer 66°, winter 37°).

GOVERNMENT—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 120

senators (with the exception of 27 elected by the provincial councils) and 186 representatives are elected by the people, the former for eight the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April 1919 the Belgian Parliament decided as an emergency measure to hold 1920 elections on a "one man one vote basis for Senate and Chamber (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers, widows or mothers of civilians shot by enemy women imprisoned by enemy for patriotic acts, also voted).

This Parliament anomalous and unconstitutional elected was required to make constitutional the machinery by which it was elected. This has not yet been done (Oct. 1920), but it is unlikely that the outworn method of plural voting will ever again be resorted to.

Deputies receive 4,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils elected on a somewhat more liberal franchise.

PRODUCTION—Agriculture and forestry are important industries the chief crops being oats, rye, wheat, potatoes, barley and sugar beet. Under Annex IV of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live stock to replace the animals seized or destroyed during the War of 1914-1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgy (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant) glass, textiles (Verviers) lace (Brussels Mechlin Bruges, &c.) flour and starch mills, sugar, distilleries, breweries &c.

DEFENCE—In 1914 the Army on a peace footing consisted of about 50,000, all ranks. In the War of 1914-1918 over 500,000 passed into the armies which were reorganised on French territory during the defensive period of the campaign. An organised force of 200,000 co-operated with the Allies during the decisive offensive of the autumn of 1918. Those returned as dead or missing, during the War, numbered 102,382. Belgium has no Navy.

EDUCATION—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control, Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State, those of Brussels and Louvain are free institutions. Louvain University is to be rebuilt. A Flemish University was opened at Ghent in 1923, after considerable opposition.

	1922
Revenue	France 2,573,178,913
Expenditure	3,468,143,961
Debt (Dec. 31, 1922)	37,790,665,862
Imports (1921)	402,057,000
Exports (1921)	485,993,000
Imports from U.K. (1922)	£24,831,350
Exports to U.K. (1922)	£3,657,000

The imports in 1921 were manufactured articles (£725,367,000 francs), raw materials (4,003,102,000), foodstuffs and beverages (3,182,293,000), and live animals (137,673,000), the exports were raw materials (3,153,803,000 francs), manufactured articles (3,008,709,000), and foodstuffs and beverages (932,825,000).

COMMUNICATIONS.—In 1919 there were 4,649 kilometres of railway, almost the whole length destroyed during the War having been repaired or relaid. In 1919 there were 15,160 miles of telegraph wire and 2,295 offices. The navigable rivers and canals have a length of 2,221 miles (1919), and there are 6,277 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1920) of 293 vessels (335,201 tons), in addition to which there were 453 fishing boats. In 1920, 7,698 foreign vessels entered at Belgian ports (tonnage 20,822,341). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since re-opened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries from the mouth to Antwerp and the Netherlands war vessels are to be removed from the river. The capital, BRUSSELS had a population in 1921 of 775,039 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (204,224), Ghent (254,920) which has large cotton and flax spinning mills and is the second port of importance after Antwerp, while its flower shows are famous and Liège (166,117) the centre of the iron industry. Brussels is 222 miles from London, transit 8 hrs.

THE BELGIAN CONGO

Governor General, His Excellency Maurice Lippens, G.C.V.O.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated at 5,000,000 to 7,000,000. The total European population (Jan. 1920) was 6,672 of whom 3,588 were Belgians, 818 were British, 239 Americans, 268 Italians, 557 Portuguese, 87 Swedes, 53 Russians, 153 French, 123 Dutch, 75 Swiss, 308 Greeks, 22 Luxemburgers, 21 Danes, 14 Norwegians, and 11 Spaniards.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (92 miles), where the European steamers discharge and re-charge their cargo, but between that place and Leopoldville on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow gauge line runs from Lukula to Boma, the cocoa planting district of Mayumbe. Above Leopoldville the river and its numerous affluents are navigable by steamer for about 5,000 miles. The falls on the Upper River being avoided by a metrie gauge line from Stanleyville to Pontherville (125 kilometres), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (273 kilometres) was completed in 1926, connecting the West Coast of Africa with Belgian East Africa and the East Coast. The Katanga Railway reached Bukama in May, 1918, thus linking up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. Within eight years, 450 miles of railway have been constructed, 200 of which have been laid during the war. It is now possible to travel by train direct from Cape Town to the river Congo, a distance of 2,650 miles. Work has been started on the Stanleyville Lake Albert Railway, which will run between the Congo River and the Nile providing the last link to direct river and rail communication between the Cape and Cairo. Two new lines will run from the copper mining district of Katanga towards the West Coast, one of them reaching Lobito Bay (Portuguese Angola), the other linking the Katanga Railway with the Matadi Leopoldville Railway. A telegraph line connects Banana to Coquilhatville (895 miles), Boma with Tshela (85 miles), Stanleyville with Pontherville (79 miles), Kasongo with Uvira (265 miles), Kindu with Kongolo (210 miles), Kabolo with Albertville (169 miles), and Sakania with Bukama (448 miles), a total length of 2,160 miles. There is telegraphic communication with Europe. Fifteen wireless stations connect the West Coast with the principal Government stations throughout the Colony. A great inter-Continental wireless station is being erected at Kanga to communicate direct with Brussels. The West Coast District has a rather scanty rainfall (40 inches), but on the Malumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile.

and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts, oil palms are plentiful everywhere, and supply an ever increasing trade in palm-oil and palm kernels. Wild rubber and wild coffee are common. Coffee, cocoa, Pará and Ceara rubber and cotton are successfully planted. Mines are very extensive. The copper district of Katanga has enormous deposits of copper ore, and the melters at the Lubumbashi produced about 23,000 tons of copper in 1919. A rich tin belt extends from Bukama towards Lake Tanganyika. The gold bearing districts of North eastern Congo are being prospected by the Government, and contain both alluvial and reef gold. Diamond bearing gravels are worked in the south. The total imports during the year 1919 were valued at 85,682,000 francs the exports (204,146,254 francs in 1919) are mostly palm kernels and palm-oil, ivory, rubber, gum copal, cocoa, copper, gold and diamonds. Capital, Leopoldville (Leopoldville Kinshasa). Principal towns, Boma (pop. 500 whites, 1,000 natives), Elisabethville (Katanga) (pop. 1,000 whites, 6,000 natives), Stanleyville (200 whites, 8,000 natives), Coquilhatville.

Revenue (1921)	£2,700,425
Expenditure (1921)	3,304,422
Debt (1919)	14,000,000
Imports (1920)	9,507,390
Exports (1920)	12,609,820
Imports from U.K. (1920)	1,006,487
Exports to U.K. (1920)	724,755

By the Anglo-Belgian Agreement of July 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa (see "Tanganyika Territory"), which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. Ruanda and Urundi formed the N.W. corner of German East Africa from 5° S lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live stock and hides. The administrative capitals are Niassa (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

BOLIVIA

(República Boliviana)

President (1921-25), Bautista Saavedra.

MINISTRY

Foreign Affairs, Dr. Román Paz.

Interior and Justice, Dr. Francisco Iraizoz.

Finance, Dr. Carlos Zalles.

War and Colonization, Dr. Juan M. Sainz.

Development, Posts and Telegraphs, Dr. A. Flores.

Education and Agriculture, Dr. Gabino Villa Nueva.

Envoy Extraordinary, Minister Plenipotentiary in London, Señor Don Albert Gutiérrez, 24 Holland Park, W. 11.

Secretary of Legation, Señor Don Mamerto Uriolagolia.

Consul General, 20 Copthall Avenue, E.C. 2.

The Republic of Bolivia extends between lat. 20° and 23° S and long. 57° 30' and 73° W., and its area is about 597,460 square miles* with an estimated population of 2,825,439. The Republic was formerly comprised in the Spanish Vice Royalty of *Alto-Peru* and derives its present name from its liberator, Simon Bolívar, (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata) and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosí are now worked only for tin but gold, partly dug and partly washed is obtained on the Eastern Cordillera of the Andes, the tin output is after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, cocoa, indigo, India rubber, cacao potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth lead ores, wolfram wool, cocoa, hides, and antimony the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are about 1,175 miles of trunk lines of railways in operation, and 205 miles under construction and 4,000 miles of telegraph wire. There are wireless services between Riberalta, La Paz, Cobija, Capitandí (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also (with a gap of 125 miles) to Buenos Aires (5 days). Branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosí. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia), which, when completed will allow through railway communication with Buenos Aires, is, after many delays, now being pushed forward by an American corporation. The gap between Tupiza and La Quiaca is crossed by an automobile service, taking six hours. Communication with Peru is effected by rail to Guasqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (729 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosí to Sucre, the legal capital, is under construction, and trains run to Betanzos. Bolivia is without a sea coast, having been deprived of the ports of Tocopilla, Cobija,

* The country has not been completely surveyed and the area is officially estimated at 597,460 square miles; other estimates give an area of 700,000 square miles.

Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Army amounts to about 5,000 all ranks, the War Effective being about 105,000.

Actual revenue (1922)	Bs 22,530,000
Interior debt (Dec 1922)	12,676,145

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Álvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela, on the west by Peru, Bolivia, Paraguay, and Argentina, on the south by Uruguay, and on the east by the Atlantic

Ocean and extends between lat. 5° 10' N and 33° 45' S. and long. 34° 40' and 73° 15' W., being 2,600 miles from north to south, and 2,300 from west to east, with a coast line on the Atlantic of 3,700 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 30,635,605.

The northern States of Amazonas and Pará are mainly wide, low lying forest-clad plains. The central state of the Mato Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are Serra do Mar in São Paulo, the Serra do Mantiqueira (Itatiaia, 9,000), and the Serra do Espinhaço (Itacolumi, 6,000 feet), in the south east of Minas Geraes, the Serra do Paranapanema, between Goyaz and Minas Geraes, the Serra dos Aymores which divide Espírito Santo from Minas Geraes, and the Serra da Guariacaba, Branca and Araripe, which envelop Piauí.

Brazil is unequalled for the number and extent of its rivers. The Amazon, the largest river in the world, has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its northern tributaries are the Rio Branco, Rio Negro, and Japurá, its southern tributaries are the Jurua, Purus, Madeira and Tapajós, while the Içá meets it within 100 miles of its outflow into the Atlantic. The Tocantins and Araguaia flow northwards from the Plateau of Mato Grosso and the mountains of Goyaz to the Gulf of Pará. The Paranaíba flows from the encircling mountains of Piauí into the Atlantic. The São Francisco rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The Paraguy, rising in the south west of Mato Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the Parana, which rises in the mountains of that name and divides Brazil from Paraguay on the Iguaçu, which unites with the Uruguay at the Argentine boundary, are the majestic Falls of the Iguaçu and on the São Francisco are the no less famous falls of Paulo Afonso.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1522 became an independent empire under Dom Pedro, son of the refugee King João VI of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a Republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal Republic under the name of Estados Unidos do Brasil. The President and Vice President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write, they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 222 members, members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the

following order—French, Italian, English, German and Spanish.

PRODUCTION—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported and there are important deposits of monozite sand. Low grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle raising is an important industry, the number being 34,770,324 (Census of 1920). The chief products of the country are coffee, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *hera maté*, rubber and tobacco. The rubber comes from the more northern provinces especially the valley of the Amazon and is shipped from Pará and Manaus. Coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely especially in Bahia. Cotton is being largely cultivated. Sugar cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar producing zone. The exports include also meat, hides, maize beans, and *hera maté* (tea). The imports consist principally of every description of manufactured articles, but the annual production of home industries is estimated at £45,000,000, of which about half were textiles (1922). Foreign capital to the amount of £300,000,000 has been invested in Brazilian undertakings in the ten years 1908-1917. The protective duties were again increased in 1887, 1893, 1896, 1906, and 1916. In 1922 the exported merchandise was classified (1) animals and their products, £5,398,209, (2) minerals and their products, £1,000,076, (3) vegetables and their products, £62,119,205.

In 1922 the foreign trade of Brazil was shared as under

DEFENCE—The peace effective of the Army is about 50,000 all ranks. The Navy consists of 3 Dreadnoughts, 3 old battleships, 5 protected cruisers, 3 scouts, torpedo boats and some small vessels and aircraft.

EDUCATION—Primary education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy. There were over 1,000,000 pupils in 1920. Secondary and Technical education is carried out by Federal State and Municipal authorities, with 42,000 pupils in Federal schools and 40,000 in State and Municipal institutions in 1920. Higher education (12,000 students in 1920) is carried out by Federal and State governments at the State University of Rio de Janeiro, and at the University colleges at Manaus (Amazonas) and Curitiba (Paraná) and other private colleges.

COMMUNICATIONS—In December 1921, there were 28,226 kilometres of railway open, and 2,273 under construction. Length of telegraph wires, 79,771 kilometres. In 1921 steam and sailing vessels of 23,123,266 tons (of which 5,852,595 were under the British flag) entered Brazilian ports, the principal harbours being Manaus, Pará, Maranhão, Pernambuco, Macao, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece on the east by the Black Sea and on the south by Greece. The total area is stated at 40,000 square miles, with a population (1922) of 4,861,439. The prevailing religion of the Bulgarians is the Orthodox Greek Church with a Gregorian (Western) Calendar (since 1916).

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13 1878) and in 1885 Eastern Roumelia was added to the newly created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,000 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 18, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly* which ceded the S Dobrud to Rumania and E and W Thrace to Greece.

GOVERNMENT—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranie* of 246 representatives, elected for a maximum term of four years by adult manhood suffrage. Metropolitan members receive 15 leva, and others 10 leva, a day and travelling expenses.

PRODUCTION—Agriculture is the principal industry of the people and employs over half the population, the principal crops being wheat, rye, barley, oats, tobacco and fruit. The live stock includes sheep, goats, cattle, pigs, horses, asses and mules. Coal of good quality is mined at Pernik and Trevna, and stone, iron, gold, silver, lead, manganese and copper are worked, but the mineral development is in its infancy. The chief manufactures are woollens, cottons and cigarettes. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco, the principal imports being textiles, metal goods and machinery, colonial

wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal.

DEFENCE—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct. 1915-Sept. 1918) about 550,000 passed into the ranks of the Army, and of those over 250,000 became casual ties. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good, the number of illiterates in Bulgaria is very small. There are few technical schools. Sofia has a University.

COMMUNICATIONS—There were 1,245 miles of railway open in 1919 and about 250 miles under construction, 4,000 miles of telegraph line and 1,254 of telephone line. In 1914 there were 2,515 post offices and 438 telegraph offices. The principal Black Sea ports are Varna and Bourgas, and Rustchuk, Sistor and Vidin on the Danube. In 1913, 11 755 vessels (3 132,481 tons) entered and 11,710 vessels (3,108,505 tons) cleared at Bulgarian ports.

	1922-23.	leva	£

A State of South America of Spanish origin lying between the Andes and the shores of the South Pacific extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15' and 55° 59' S., and long. 66° 30' and 75° 48' W. Extreme length of coast line about 2,485 miles. Its extreme length is about 2,800 miles with an average breadth, north of 42°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea, but numerous summits attain a great height—the highest being in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain however, lowers considerably towards its southern extremity. There are no rivers of great size and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 13 provinces and 1 territory, the aggregate area of which is estimated at 280,798 square miles.

The population (June, 1923) was 3,843,951. Included in the population are four distinct racial divisions: (a) the Spanish settlers and their descendants, (b) the indigenous Araucanian Indians, Kuegians, and Changos, (c) mixed Spanish Indians and (d) European immigrants, who were represented in 1920 by 20,000 Spaniards, 15,000 Italians, 14,000 British and Irish, 11,000 Germans, and 10,000 French. In 1922, the births numbered 190,797 (39.4 per 1000), marriages, 25,392 (6.6 per 1000) and deaths, 126,205 (30.4 per 1000).

GOVERNMENT—Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a revolutionary war, culminating in the *Battle of Maipo* (April 5, 1818) achieved the independence of the nation. The present constitution bears the date of May 25, 1833. The President is chosen by indirect vote. The National Congress consists of a Senate of 37 members and a Chamber of Deputies of 128 members, elected by direct vote every three years. There is universal adult male suffrage for those who can read and write. From 1879–1884 Chile was at war with Peru and Bolivia, and Peru renewed her application for the return of the provinces of Tacna and Arica which were taken from her by Chile in the "Pacific War." Bolivia also demands an outlet to the Pacific. In 1922 Chile and Peru signed a treaty to submit the Tacna-Arica question to arbitration.

PRODUCTION &c—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper and potatoes are grown extensively. The vine and all European fruit trees flourish. The exportation of fruit to the United States is still in the experimental stage. The live stock includes (1919) 2,162,140 cattle, 400,190 sheep, 450,000 horses, 290,000 goats and 292,432 pigs. The mineral wealth is considerable, the country being extremely rich in copper ore and iron ore. The production of copper in 1922 was 128,596 metric tons or 17 per cent. of the world production. The ransless north yields more especially nitrate of soda, iodine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Achinal in Atacama and Caracoles in Antofagasta. The native copper and silver and the south iron and coal (1,046,378 metric tons of coal were mined in 1922 and 202,351 tons of foreign coal were imported). In 1922 the production of nitrate was 1,035,000 metric tons, sales for 1923 are expected to amount to over 2,000,000 metric tons. There are smelting works for copper and silver, tanneries, corn and saw mills, starch soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries and the domestic industry furnishes cloth, embroideries, baskets, and pottery. The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery.

INDUSTRIAL STATISTICS—Official statistics are—No. of industrial establishments 8,148, employing 81,991 persons, wage bill \$1,035,564, capital invested \$55,718,840, industrial production \$1,035,564,048, consumption of raw materials \$1,640,177,402 (including fuel) wealth created \$395,386,646 of which 40 per cent. went in salaries and wages, and 60 per cent. in expenses and profits.

COMMUNICATIONS—There were (1921) about 5,600 miles of railway, of which 1,383 miles are British controlled. In April, 1922 a convention was signed by Chile and the Argentine for the construction of two more lines Andine lines. In 1922 there were 30,174 kilometres of telegraph, 986 post offices, and 79,305 kilometres of telephone some worked by English companies, with 4 public wireless stations. The commercial marine numbers (1922) 102 steamers (66,790 tons) and 26 sailing vessels (9,252 tons). In 1922, 3,019 vessels (9,512,903 tons) entered Chilean ports from abroad, and 14,000 coasting vessels (6,609,365 tons), legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE—All able bodied male citizens from 20th to 45th year must serve in the militia. The peace effective of the active army is 24,962. The Air Force has a peace strength of 2 squadrons, with 60 pilots and 200 mechanics. The navy consists of 2 battleships, 1 ironclad, 6 cruisers, 22 destroyers, 5 torpedo-boats, and 6 submarines, with a complement of 6,646, all males.

EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 77 per cent of the children attended the 3,064 schools in 1923. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Spanish and the State religion is Roman Catholic.

	AREA AND POPULATION	Population
Territory	Square miles	
China Proper	1,501,000	402,000,000
Manchuria	360,000	11,000,000
Mongolia	1,076,000	3,000,000
Tibet	750,000	3,000,000
Eastern Turkestan	600,000	2,000,000

Total 4,287,000 421,000,000
China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles and its population, according to Chinese estimates for 1923 (exclusive of Mongolia, Tibet and special areas), exceeds 442,800,000.

China became a Republic on Feb 12, 1912, with a President and Vice President and an Executive Ministry and a Legislature of a Senate (Tsai Yi Yuan) of 264 members and a House of Representatives (Chung Yi Yuan) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (Tuchun) ranking first and holding practically all the powers of government under them each province is subdivided into circuits superintended by Taoyuns or Intendants and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Khabta, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. Mongolia has since developed into an

Independent self governing republic and is in alliance with the Soviet Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question and contributed towards the first Chinese War of 1840. A treaty was signed at Nanking as the result of these operations ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence, but the principle of extra territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese Government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the establishment of Korea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners, and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ch'ing and the late Li Hung Chang. This provides for an indemnity of \$25,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties—(1) between the U.K. and China (5 Sept. 1902), (2) U.S. and China (8 Oct. 1903), and (3) Japan and China (9 Oct. 1903). Under the two last Mukden, Tatungkow, Changsha, and Antung in Manchuria, were made Treaty ports.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria, and by the latter the following cities and towns in Manchuria were opened as places of international residence and trade—Feng-huang-ch'eng, Liao-yang, Hsia

mintuu, Tung-chiang tzu (on the Liao River), and Fa ku men in Fengtien Province, Chang ch'un, Kirin, Harbin, Ninguta, Hunchun and Jansing in the Kirin Province, and Tsitahar, Hailar, Aihun and Manchuli in the Heilungkiang Province.

In October, 1911, a revolution broke out in Hankow, which resulted finally in February, 1912, in the abdication of the Manchu Dynasty in favour of a Republican form of Government. In 1913 a second revolution, engineered by the Southern Party, was successfully put down by President Yuan Shih kai. Since that date the Central Government has been gradually consolidating its position, and bringing about a centralisation of power in Peking. In May, 1915, a new treaty with Japan was concluded by which additional privileges are granted to Japanese in Manchuria and Mongolia. Towards the end of 1915 President Yuan Shih kai engineered a campaign to revert to a Monarchical form of government, and, as the result of elections held all over the country, was invited to ascend the throne as Emperor. The Southern Provinces, however, immediately rose in revolt, and the attempt failed and finally ended with the death of Yuan Shih kai in May 1916. The Vice President, Li Yuan hung, succeeded to the Presidency, and all traces of the Yuan Shih kai régime were rapidly abolished. The first Republican Parliament reassembled, and the government reverted to the Republican form adopted after the overthrow of the Manchu Dynasty in 1912. Both Houses of Parliament are elected by a system of limited franchise and the government of the country is vested in them. The President, who is elected by Parliament, is assisted by a Premier and a Cabinet of Ministers, whose appointments have to be approved by Parliament, and to whom they are responsible for their actions. An abortive attempt to restore the Monarchy was suppressed in June 1917, after which Parliament was again dissolved and government carried on by the Cabinet and President Feng Kuo Chang. Li Yuan hung having resigned, the Anfu party was crushed by the Chihli party and Chang Tso lin combined in the war of 1920, and in that year a revolt in South China culminated in the declaration of an independent Republic of South China (with its capital at Chung King) including the former provinces of Yunnan, Kwei Chow, Sze Chuen and Honan, but this Republic has not yet been recognised, and internal and external discussions appear to threaten its existence. This has since (1921) dissolved into a sort of loose federation, Tsuehuan, Yunnan, Kwangsi, Kwangtung, Kweichow, and Hunan all not owing allegiance to the central Government. The old M.P.'s, after the second dissolution of Parliament in 1917 to the number of about 150, met at Canton and elected Sun Yat Sen as President of China. The election of Hsu Shih Chang in 1922 by the "Yuchun's" Parliament was held by them to be illegal. There were thus two "Presidents" in a divided China, one in Canton and one in Peking. The recent war of May, 1922, has helped to make prospects of reunification brighter by the defeat of Chang Tso lin by Wu Pei fu on the one hand, and the expulsion of Sun Yat Sen by the latter's ally, Ch'eu Chuang ming, on the other. Li Yuan hung has resumed the Presidential duty, and summoned the members of the old Parliament to meet in Peking to discuss and settle the long-deferred question of the Consti-

tution During 1923 the situation changed again, Li Yuan hung being expelled from Peking as the result of a *coup d'état* by the Northern Military Party, Sun Yat Sen also expelled Chen Chung ming and re established himself at Canton On Oct 10, Tsao Kun, one of the successful generals, was declared President of the Chinese Republic, and the situation appeared to be stabilised under a firm and energetic ruler

The estimated foreign population of China was as follows in 1921 British 9,298, Japanese, 144,434 Russian, 68,250, American, 8,230 Portuguese, 3,493 German 1,255 French, 1,453 the total being 240,769. Out of a total of 3,421 foreign firms in China, 534 were British, 1,237 Russian 955 Japanese, 273 German, 136 American and 113 French

DEFENCE—The army is undergoing reorganisation The total strength of all forces in August 1923, just after the Rebellion of that year was estimated at 500,000 but no authenticated statistics are obtainable An Air Force is being organised the assistance of a British officer (Group Capt. F V Holt, C M G, D S O) having been obtained until June 1922. The Navy consists of a protected cruisers built in 1921 (2,750 tons), 4 older protected cruisers (4,300-3,000 tons), 3 torpedo gunboats (850 tons) 11 gunboats (750-550 tons), 4 destroyers (400 tons), and 8 small torpedo boats (120 tons)

EDUCATION—Many changes in administration and development are under discussion, including a proposal to establish universal compulsory primary education In 1922-23 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking In 1922 there were upwards of 1,250 Chinese newspapers and magazines published at regular periods, in Peking Shanghai Pientsin, and the other large centres in addition to English and other Foreign daily newspapers

COMMERCE—The net trade of the open ports is stated as follows in *Hankuan taels* (in 1921 the *Hankuan tael*=3s 11½d)

Year	Imports	Exports	Total
1914	569,241,382	356,226,629	925,468,011
1918	554,893,082	485,883,031	1,040,776,113
1919	614,647,365	599,268,939	1,213,916,304
1920	762,250,230	541,631,300	1,303,881,530
1921	906,122,439	641,255,537	1,507,377,976

The import of Indian opium is now prohibited

*External Trade, 1921
Hankuan Taels*

Country	Imports from.	Exports to
Japan	210,359,237	172,110,728
Hong Kong	231,138,080	152,875,077
U S A	175,789,652	89,541,816
Great Britain (1920)	131,719,952	45,804,536
(1921)	150,000,000	31,000,000
France	9,639,138	23,945,151
Straits Settlements	8,031,246	19,461,388
Germany	13,348,856	6,773,917

COMMUNICATIONS—*Railways*—About 7,000 miles were open in Jan 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping—The China Merchants Steam Navigation Co have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the

coasting trade and on the Yangtze In 1922 the total tonnage of the 22,000 vessels entered and cleared at Chinese ports was 114,500,000. Of these ships 38,855 (42,200,000 tons) were British, 139,000 (31,800,000 tons) Chinese, and 25,200 (31,600,000 tons) Japanese, 5,500 (4,400,000 tons) U S A In June, 1922, a vessel of 14,750 tons, constructed at the Kiangnan Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high power wireless installations

CUSTOMS AND POSTS—The Chinese Maritime Customs is the controlling service this body consists of nearly 1,000 Europeans a large proportion of them British subjects, all under the control of the *Inspector General* By an Imperial Decree of May, 1906, the Maritime Customs Dept was transferred from the Foreign Board to the Board of Revenue and two Chinese Administrators General were appointed But the change has not materially affected the powers hitherto exercised by the *Inspector General* In addition to the collection of dues at the Treaty Ports this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations The Chinese Post Office formerly a branch of the Customs, was transferred in 1921 to the Ministry of Communications and a Foreign Co Director General, with a considerable foreign staff, was appointed letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes The number of Chinese post offices is 10,470 (1920) 401,000,000 postal packets and 4,200,000 parcels were handled in 1920

BUDGET (July 1921 June 1920)

Ordinary Revenue	Taels 400,838,001
Extraordinary Revenue	80,581,785
Total	480,419,786
Ordinary Expenditure	Taels 271,289,205
Extraordinary Expenditure	224,473,681
Total	495,762,888

Chinese Debt (Jan, 1920)

Wai Loans outstanding	£30,000,000
Boxer Indemnity do	48,000,000
Railway Loans do	40,000,000
General Loans do	50,000,000
Japanese Loans do	30,000,000
Short term Loans do	17,000,000
	£215,000,000

About 10s 2d per head of the population

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was *taels* 1,906,000,000, or less than 5 *taels* (11s) per head of the Chinese population

Included in the expenditure is the sum of 212,000,000 *taels* towards repayment of debt.

MANCHURIA lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (Pop. approx.) a station on the Manchurian railroad and connected with

the Russian system Indigo, opium cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

MONGOLIA has a total area of 1,076,000 square miles and a population estimated at about 3,000,000, the desert of Gobi being within its borders. Outer Mongolia, by the Treaty of Kiakhta of 1915, is an autonomous state under Chinese suzerainty with seat of government at Urga. Its ruler (Khan) has lost practically all political power and Mongolia has become a self governing Republic in alliance with the Soviet government at Moscow. A Bolshevik garrison is now maintained at Urga. The principal industry is cattle and sheep raising and the provision of transport animals.

TIBET (area 750,000 square miles pop 3,000,000) borders on British India, see p.

CHINESE TURKISTAN (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Jungaria and Chinese Tartary, and provides sheep, cattle and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi.

CAPITAL OF THE CHINESE REPUBLIC Peking. Population (1921) 1,300,000. The population of the principal ports in 1919 is estimated as follows—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,600; Foochow, 1,500,000; Hangchow, 720,950; Hankow, 300,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kiungchow, 500,000; Nanking, 900,000; Ningpo, 2,200,000; Shanghai, 1,600,000; Soochow, 1,100,000; Liensin, 828,000; Tientsin, 310,000; Wanhsien, 750,000; Wenchow, 1,750,000; Wuchow, 350,000.

FLAG. Five horizontal bands, red, yellow, blue, white, black.

The Republic of Colombia lies in the extreme

north west of South America, having a coast-

line on both the Atlantic and Pacific Oceans.

It is situated between 2° 40' S. to 12° 25' N. lat.

and 68° to 75° W. long., with an estimated area

of 461,606 square miles and a population esti-

mated at 5,475,000, of whom more than one half

are whites and half castes. The country is

intersected by three great ranges of the Andes,

known as the Western, Central, and Eastern

Cordilleras, the second contains the highest

peaks, but the latter is the more important, as it consists of a series of vast table lands cool and healthy. This temperate region is the most densely peopled portion of the Republic.

The principal rivers are the Patía, Cauca, Magdalena, Cauquetá and Putumayo. The Patía flows through the famous *Mimma Gorge* of the Western Cordilleras and one of its tributaries (the Carchi, or Upper Guataita) is spanned by the Bumihaca Arch, or *Inca's Bridge* of natural stone. On the Funza is the *Great Fall* of Tequendama 480 feet in height.

The Colombian coast was visited in 1502 by Christopher Columbus, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada which continued under Spanish rule until the revolt of the Spanish American colonies of 1811-1824. In 1829 Simon Bolivar (born 1783 died 1830) established the Republic of Colombia consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces and in 1831 the remaining territories were formed into the Republic of New Granada. In 1828 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive among the trees are mahogany, cedar, fustic and other dye woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead and coal; petroleum is available in large quantities but is unworked. The principal agricultural products are coffee, cotton, plantains and bananas and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, india rubber, and bananas. All religions are tolerated.

The standing army consists of about 6,000 men, the navy has been nearly abolished. Rail roads are in their infancy, about 750 miles being open in 1920 with 8,680 (1907) miles of telegraph. There is a bi-weekly passenger and mail aeroplane service (German) between Barranquilla and Girardot, the transit to the coast from Bogotá being thus reduced to two and a half days; a similar service, by same company, is in operation between Cartagena and Barranquilla. The rate of exchange is about \$5 gold = £1 (approximately).

Spanish is the language of the country.

	1920-21	1923
Revenue (estimate) gold	\$7,058,530	\$21,900,800

COSTA RICA

(República de Costa Rica)

President, Julio Acosta, assumed office May 8, 1920.

Minister of Foreign Affairs, Miguel Obregón (ad interim)

Treasurer, Tomas Soley Gnell

Interior (ad interim), Aquiles Acosta

Education, Miguel Obregón

Works, Narciso Blanco

Public Safety, Aquiles Acosta

Minister in London (vacant).

Consul General, Percy G. Harrison, 7 Crosby Square E.C. 3

The Republic of Costa Rica the most southern State of Central America extending across the isthmus between 8° 27' and 12° 10' N. lat. and from 82° 30' to 85° 45' W. long. contains an area of about 23,000 English square miles, and a population (1922) of 485,113.

For nearly three centuries (1530-1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824-1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1922) are coffee (£1,373,892), bananas (£1,000,419), sugar, gold and silver bullion, cacao, hardwoods, vegetables, skins, and hides. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1922 61 per cent from United States, 14 from United Kingdom, 4 per cent from Germany, 6 from Central America, and 7 from Hispano America).

The chief ports are Limón on the Atlantic coast through which passes the whole of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast. In 1922, 602 foreign vessels (848,775 tons) entered at Costa Rican ports. About 405 miles of railroad were open in 1922. In 1922 there were 209 post offices, dealing with 5,529,084 packets, and 147 telegraph offices (one wireless), with 2,120 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

The island of Cuba (the largest of the “West India Islands”) lies between 74° and 88° W. long., and 19° and 23° N. lat. with a total area of 44,178 sq. miles and a population of 2,889,004 (Nov. 1919).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1830-1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evoked by the Madrid authorities in 1897, the struggle was continued by the party

of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U. S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish American war led to the abandonment of the island, which was occupied by U. S. troops from Jan. 1, 1899 to May 20, 1902, Cuba was under U. S. military rule, and reforms of the widest and most far-reaching character were instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President and a legislature of two houses. The island was however again the prey of revolution from July to Sept., 1906, when the U. S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco nuts, pine apples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar (sugar crop in 1921-2 4,047,236 tons, 1922-3 3,602,056 tons), the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line, there are about 1,500 miles of roads.

Spanish is the language of the island.

Part of the Austro Hungarian Monarchy declared its independence on Oct 18, 1918 as the Czecho Slovak Republic, and ten days later the *Národní Výbor* (National Council) of Czecho Slovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S, the German and Polish Republics on the N, the German Republic on the W, and the Ukraine Republic on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia and Northern Hungary from the Danube (at Pressburg on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt Vereckza)—a total area of about 54,877 sq miles, with a population (Census of 1921) as under—

Bohemia	6,781,936
Moravia	2,633,027
Slovakia	2,966,824
Silesia	650,442
Ruthenia	596,601

Total 13,588,830
 Moravia and Silesia, and at 3,605,371 for Slovakia and Ruthenia, of whom 6,000,000 are Czechs, 3,700,000 Germans, 1,700,000 Slovaks, 1,000,000 Magyars, 300,000 Ruthenians and 250,000 Poles. The new State was recognised by Austria in 1918 and by Hungary on March 20, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. In 1920 the Democrats, Agrarians and Slovaks were in the ascendancy, Socialists 22, Clericals 22 and

Progressives 6 being in the minority of the 260 members. The Constitution guarantees religious and political freedom and the Church will be separated from the State. About 75 per cent. of the people are Roman Catholics.

As regards both natural resources and industrial development, Czecho-Slovakia is one of the richest territories in Europe. By the Peace Treaty it has acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead, are all mined successfully while the whole country is abnormally rich in mineral and thermal springs. Oil is found in Slovakia and Bohemia has rich deposits of clay kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self supporting. Thirty three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of ten millions, more than four million people are engaged in industry. The various industries are well organised and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Outside of Slovakia illiteracy is almost unknown, and both the German and Czech elements which compose the working class population are hard working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and after the first two and a half years of its existence it is no exaggeration to state that Czecho Slovakia is in a far more flourishing state than most of its neighbours.

Czecho Slovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, via the Danube, to the Black Sea.

DANUBE COMMISSIONS

The *International Danube Commission*, with its present headquarters at Bratislava (Pressburg), Czecho-Slovakia, was created by the Treaty of Versailles (1919), the States represented under the Treaty being Bavaria, Great Britain, Hungary, France, Italy, Yugoslavia, Czecho-Slovakia, Bulgaria, Austria, Rumania and Württemberg. The Commission controls the navigation of the Danube from Ulm (Württemberg) to Braila (Rumania), obtaining funds for improvements and administrative expenses from shipping dues from Braila to Sulina (the mouth of the Danube) the navigation is controlled by the *European Commission of the Danube*, created by the Treaty of Paris 1856 after the Crimean War the representation on this Commission is confined to France, Great Britain Italy and Rumania. The river is connected by canals with the Main a tributary of the Rhine (Ludwig Canal) this canal will be deepened to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean going vessels reach Braila, where transshipment into river barges is necessary. A pilotage service is maintained by the International Commission at the Iron Gates (headquarters Orsova).

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila Turmu Severin and Orsova (Iron Gates) in Rumania Russchuk, Vidin and Lom Palanka, in Bulgaria Belgrade, the capital of *Yugo Slavia* Buda Pest the capital of *Hungary* Bratislava (the present seat of the Commission), in *Czecho-Slovakia* Vienna, the capital, and Linz and Passau, in *Austria*, Ratisbon (Regensburg), in *Bavaria*, and Ulm, in *Württemberg*.

DANZIG

(*Freie Stadt Danzig*)

Under Articles 100 and 102 of the Treaty of Versailles, the City of Danzig with the surrounding territory (constituting a total area of about 580 sq miles, with a population estimated at 356,700) was declared to be a Free City, under the protection of the League of Nations. The Free City was constituted Nov 15, 1920, with an executive Senate and an elected Legislature of 120 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. The principal exports are timber, sugar and eggs, and the imports herrings, coal, textiles, machinery, fats and foodstuffs. The former shipbuilding industry shows signs of revival. The tonnage of ships entered in 1922 was 1,423,129 tons and of those cleared 1,428,820 tons. *Danzig*—*High Commissioner of League of Nations* Lt Col Mervyn Sorley Macdonnell, O B E (March 1923).

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zealand, Funen, Lolland, &c, the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N lat and 8° 5'—12° 40' E long, with an area of 25,024 square miles, and a population (July 1, 1921) of 2,282,000, an increase of 222,000 since 1900 (184,500 being due to the

inclusion of Slesvig). Nearly one half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woolens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1928, 1,070,000 hectares were under corn crops, 367,600 ha. sugar and other beets, and 767,500 ha. hay crop. In July, 1928, the live stock numbered 544,900 horses, 2,123,400 cattle, 470,000 sheep, and 620,800 swine. The crops in 1928 included 4,120,400 qrs of oats, 3,364,400 of barley, 1,507,500 rye, 2,003,000 mixed corn and 766,000 qrs of wheat. Its chief exports are agricultural produce including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn meal and oil cake, horses, and cattle. There is a sea-going mercantile marine of 399 steamers, with a tonnage of 341,825. There are (1927) 2,645 miles of railway and 5,437 miles of telegraph line.

DEFENCE—The Army consists of about 14,000 trained men, the vote for 1928-29 amounting to Kr 85,000,000 (including supplementary estimates of Kr 69,000,000). The Navy consists of 4 coast-defence ironclads and 1 launched, 2 small cruisers, 27 torpedo boats (built and building), 20 submarines (built or building). Vote, 1928-29, Kr 33,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, horticulture and agriculture predominating. The University is at Copenhagen.

Vice Consul, A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus who named it Hispaniola. The island was peopled by the Spaniards with imported African slaves, who soon exterminated the "Indian tribes. In 1821 an independent republic was proclaimed and the Spaniards abandoned the country. The present republic of San Domingo broke away from Haiti in 1844 and its independence is secured under a law of Nov. 6, 1844. The Dominican Republic comprises an area of 19,322 square miles, with a population of 897,405.

On 29 Nov., 1916, a military Government by U.S. officers was proclaimed, but on Oct. 22, 1922 a provisional Dominican government was installed, to be followed by a constitutionally elected government after Dec. 31, 1923, when the U.S. military forces of occupation will evacuate the island. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Re-

public and its foreign creditors. Since 1907 not less than 55 per cent of the Customs Collections has been deposited in a New York Bank to pay the interest and sinking fund charges of the Foreign Loan.

Sugar and cocoa are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, cotton wax honey, logwood, turtle shell, hides and divi-divi. There are about 150 miles of public railroad and telegraphic (3 wire less stations) and telephonic communication has been established throughout the Republic which is connected by cable with North and South America, New York, Curaçao, and Porto Rico. Since Jan 1, 1922, about 280 miles of first class roads have been constructed and opened. In May, 1922 a highway was opened across the island, from Santo Domingo to Monte Cristi and an extensive road making programme is now being actively pursued.

Of the import trade in 1922, 72 per cent. came from U S and 7 per cent from Great Britain. British trade is hampered by the insufficiency of direct maritime communication and by the absence of direct service with the largest ports which are on the south coast, the ships of the R.M.S.P. Co. calling at the northern ports only.

Consuls at Liverpool, Birmingham, Southampton, Glasgow, and Cardiff

An equatorial State of South America, extending from lat 1° 38' N to 6° 5' S, and between 60° 20' and 81° W long (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Viceroyalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000 mostly descendants of the Spaniards, aboriginal Indians and Mestizos. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,700 ft.), Illiniza (17,405 ft.), Carlinhuarazo (16,515 ft.), Cotacachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera and Cotopaxi (19,498 ft.) Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,600 ft.) and Sincholaigua (16,305 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon and by the rivers Guayaquil, Mira, Santiago, Chone, and Esmeraldas on the Pacific coast. There are extensive forests and the cinchona bark tree is common.

Its chief products are cocoa, vegetable ivory, cotton, coffee, india rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat &c. Its minerals consist of gold, quicksilver, lead, iron and copper, emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle. The chief imports are textiles and other manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The Galapagos (Tortoise) Islands (2,870 square miles) belong to Ecuador.

The language of the country is Spanish

Egypt lies between 22° and 32° N lat and 24° 30' E long. The northern boundary is the Mediterranean, and in the south Egypt is continuous with the Sudan. The western boundary runs from a point on the east N of Sollum (long 25° E), inland in a south westerly direction for some distance and then turns S along a meridian line approximately in long 24° E until it meets the parallel of 22° N lat, which forms the N boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15' E long) to the head of the Gulf of Aqaba, from which point the remainder of the E boundary is washed by the waters of the Gulf of Aqaba and the Red Sea. Within these boundaries is enclosed an area of about 363,781 sq miles, with a population (1917) of 12,718,255.

The Nile Valley—The river Nile runs through cliffs, which, with the exception of a stretch of granite in the neighborhood of Aswan, are chiefly of sandstone from Wadi Halfa to near Bana, while further north from Luxor to Cairo limestone predominates. The valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they spread out into the irregular fan-shaped forma-

tion of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouth. In the 600 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet.

The Libyan Desert—Westward from the Nile Valley into Tripoli stretches the vast limestone plateau of the Libyan Desert. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from E to N W are known as Kharga, Bahariya, Farafra, Bahariya and Siwa. On the eastern edge of the Libyan Desert, a few miles south west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx* 182 feet long.

The Eastern Desert of Egypt—In the Eastern Desert a great backbone of high and rugged mountains mostly of the igneous and metamorphic rocks, extends north westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. The principal peaks of the Egyptian portion of this mountain chain are (from N to S) *Gebels* (Mounts) Gharib 5,760 feet, Abu Dokhan 5,450 feet, Sheyib 7,150 feet, Hamata 6,490 feet, Farafra 4,480 feet, Gerf 4,650 feet, Shendi 6,271 feet, and Elba 4,680 feet. Flanking this mountain chain on the west, between the axis of the range and the Nile are plateaus of sandstones and lime stones, dissected by wadis (dry water courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wadis from well to well and here and there are to be found small encampments of wandering Arabs.

The Sinai Peninsula—The north (Mediterranean) coast of Sinai is flat and sandy like that of Egypt. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Ti. In some parts this scarp rises to over 5,000 feet above the sea level. South of El Ti the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. The highest peaks of these mountains, such as *Gebels* (Mounts) Katherine, 8,680 feet, Um Shomer, 8,530 feet, Eth Ithet, 8,030 feet, are higher than any of those in Egypt proper. Springs and wells occur in fair abundance, mostly in the wadis, and running water (mostly brackish) is found at a few points.

Native Population—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semitic race, known in the rural districts as *Fellahin* (*fellah*=ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 234,474 Coptic Christians are enumerated in the towns and villages. These Christians

townsmen and peasantry numbered 12,404,803 in the total of the Census of 1917. A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Berberin), of whom about one seventh are real nomads, and the remainder semi sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,981 other Europeans, and 1,466 Persians.

Religions—At the Census of 1917 there were 11,623,753 Muhammadans, 1,026,107 Christians, 59,581 Jews and 8,814 other religions.

Government—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes or bodyguard. From 1798-1801 French troops occupied the country, with the ostensible object of suppressing the Mamelukes and restoring the authority of the Sultan, and after their forced evacuation of the country Mohammed Ali, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841. Mohammed Ali was succeeded before his death by his son Ibrahim (1848), whose nephew Abbas II ruled from 1854-1859. During the reign of Said (1854-1869), a son of Mohammed Ali, the concession for the Suez Canal was obtained, and his successor, Ismail (1863-1879), a son of Ibrahim, was granted (by *firman* of May 14, 1869) the title of *Khedive*, the previous rulers having held the title of *Vah*, or Governor. In the early years of Ismail's reign the Egyptian dominions were very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 sq. miles, with a population of about 16,000,000. The wild extravagance of Ismail drove him to raise enormous loans in Europe, which plunged the country into such financial embarrassment that the Governments of France and Great Britain intervened and forced Ismail to abdicate, appointing his son Tawfik (1879-1902) to succeed him. By a Khedivial decree of November 10, 1879 two Comptrollers General were appointed for the reorganization of the administration and re-establishment of financial equilibrium, Major Evelyn Baring being the British and M. de Bignonière the French representatives. The Dual Control governed Egypt for two years, and a series of reforms was initiated, but further progress was interrupted by a military revolt, headed by an officer of the Egyptian Army (Ahmed Arabi Pasha). The revolt assumed alarming proportions, but the French Government declined to intervene, and a British expedition was despatched to re-establish the authority of the Khedive. The Dual Control was abolished by a decree of the Khedive (January 18, 1883), and a British financial adviser

was appointed in place of the Comptroller-General. In January, 1884 Sir Evelyn Baring (who had previously served as Comptroller-General) was appointed Consul General for the United Kingdom, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a *Mahdi* of Islam. In 1892 Tewfik was succeeded by his elder son Abbas II, who declared himself an adherent of the Central Powers and was deposed in 1914. Hussein Kamil Pasha being appointed in his stead. On November 18, 1914, a British Protectorate was declared over Egypt, which was therefore taken from the suzerainty of the Sultan of Turkey, and the Khedive assumed the title of Sultan. Sultan Hussein Kamil died October 9, 1917, and was succeeded by his brother, the present King. In March, 1922 Egypt was declared to be an independent kingdom.

Local Government—The chief towns constitute governorships (*muhafzas*), and the remainder of the occupied country is divided into provinces (*mudaryas*), which are subdivided into districts (*markaz*), each under a *mamur*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudur* (or governor) of the province. These councils were reorganized in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence—Service in the Egyptian Army is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot, but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £250, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which consisted of 984 officers and 20,997 men in 1922.

There is no Navy in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The Egyptian Police (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 206 officers (71 Europeans), 476 European constables, and 6,325 men, the latter 369 officers and 6,152 men. There are also 60,899 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupil at the Azhar University in Cairo, the principal University of the Moslem world. In 1921-2 there were 122 Elementary Schools (*Maktabe*) under Government supervision, with 21,270 pupils and 2,241 *Maktabe* under inspection for grants-in-aid with 68,664 pupils; there were also 22,886 pupils in other elementary schools. The government primary schools give a 4 years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,148 Egyptian institutions with 111,935 pupils and 509 foreign

institutions with 50,916 pupils. There are Colleges of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only that portion of them which can be irrigated from the waters of the Nile—this portion amounts at present to 5,400,000 acres (1919), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. By these works, and by the construction of a vast network of canals with controlling masonry works, a small part of the excess waters of the river have been stored and distributed at all seasons of the year, and perennial irrigation has been extended throughout Middle and Lower Egypt. The increase in the value of the land has been enormous, and some 2 million acres have been added to the cultivable land of Egypt. Although nearly the whole population is directly or indirectly connected with agriculture, the total given in the census return of 1917, under the headings of proprietors, tenants and labourers, &c., amounts to 4,022,000 persons employed, representing only 30.5 per cent. of the population. In 1921 the land was held as to 5,023,013 *faddans* by 1,887,202 native owners and as to 551,487 *faddans* by 7165 Europeans. The agricultural land is of two kinds. The first is that which is under the basin irrigation system, by which the land receives one watering only. This watering consists of a flooding at high Nile as the flood decreases the seeds of the various crops are sown, and the basin fields are left without further watering. Harvests of wheat, barley, beans, clover, vetches and lentils are gathered in due course. The second kind of land is that which is perennially irrigated by means of canals, and receives waterings according to rotations laid down by the Irrigation Department. In these lands which are for the most part in Lower Egypt cotton, maize, wheat, rice, beans, barley, sugar cane, clover, vegetables and fruit are the chief crops.

Cotton.—In 1922 there were 1,800,000 *faddans* under cotton, the crop being estimated at 4,353,000 kantars, against 1,291,889 *faddans* and 3,450,000 kantars in 1921. In 1922 the cotton exports were 6,479,372 kantars, valued at £239,714,845, of which Great Britain took 2,906,515 kantars (£27,874,228), U.S.A. 1,494,562 kantars (£29,059,488) and France 731,916 kantars (£24,504,893).

Live Stock.—In 1922 the cattle numbered 524,823, buffaloes 616,487, horses 34,952, mules 20,829, donkeys 612,726, and pigs 18,453.

Minerals.—The riparian districts of the lower Valley of the Nile are ill provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploitation and development, but of late years

considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation is chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufactures are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery, and cigarettes. The principal Egyptian industries are dyeing and tanning.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State system with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollüm, thus joining Iripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1922, was 1,590 miles. 27,342,000 passengers and 4,055,000 metric tons of merchandise were carried during 1921-2, the net receipts being £21,359,346. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 222 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oases of Kharga with the Nile Valley. In addition to the Government lines, there are 828 miles of light railways exploited by public companies.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fui and the south of the Sudan. There are many well known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft. The principal are those of Sollüm and Matruh on the Mediterranean, Ior, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safage, Qoseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depot at Suez, the majority of the Egyptian pilgrims to Mecca now travel by it. The principal port is Alexandria, where 1,468 vessels (2,776,123 tons) entered and 1,445 vessels (2,759,496 tons) cleared in 1921. The traffic through Port Said amounted in 1921 to 626 vessels entered and 633 cleared, the remainder being dealt with *via* Suez.

Posts and Telegraphs.—There were in 1922 2,909 post offices and stations, dealing with a total inland correspondence of 72,340,000 (including letters, post-cards, newspapers, &c.), and a total foreign correspondence of 22,022,000. There were on March 31, 1922, 88,895 miles of telegraph.

and telephone lines, with 109,111 miles of wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarrâf* (village tax collector).

	1922-23	1923-24
Revenue	£35,766,138	£34,905,000
Expenditure	28,247,171	34,355,000
Total Imports	£55,507,984	£43,333,938
Total Exports	42,483,956	48,716,418
Imports from U K	16,937,839	14,731,622
Exports to U K	17,045,830	23,035,915

Debt—The *Caisse de la Dette* a body representing the creditors of the Egyptian Treasury has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due while it also holds a considerable reserve fund, the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1921 and 1922—

Debt	1921	1922
Guaranteed Debt 3 per cent.	5,972,000	5,661,800
Privileged Debt, 3½ per cent.	31,127,780	31,127,780
Unfunded Debt, 4 per cent.	55,971,740	55,971,960
Total	92,971,740	92,761,540

The Cost of the Debt (in the Budget for 1922-23) is exclusive of £664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899 which were guaranteed on the Egyptian Tribute.

CAIRO, the capital (population about 800,000), stands on the E bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643 and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el Khalili the Hamzawi and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population about 450,000) founded B.C. 323 by Alexander the Great was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (see p. 90). It now contains two royal palaces Ras el Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1917 the towns of Tanta (74,195), Port Said (75,102) and Assiut (51,431) also exceeded 50,000 inhabitants.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea and on the E. by Lake Peipus and Somet Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dagö, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 17,953 sq. miles (within the boundary settled by agreement with Somet Russia), with a population (1920) of about 1,250,000. A large portion of the surface consists of forests, moors and small lakes. Agriculture is the chief industry, its oats, barley and flax being the chief crops, and dairy farming is carried on. There are important manufactures, including distilling, oil pressing, woollen, cotton, tobacco, cork, soap, and petroleum. There were (1923) 624 miles of broad gauge and 2,400 miles of narrow gauge railway in operation.

Legislature consists of a single chamber Assembly (*Riigikogu*) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being Regent of the Republic

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and annexed in 1808. Resulting from the revolution in Russia, Finland proclaimed its independence in 1918, and is now an independent Republic. The area is 125,588 square miles, with a population (1922) of 3,402,522 of whom about 3,000,000 are Finns, 300,000 Swedes, and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at *Helsingfors*, with 2,770 students, of whom 737 are women, in addition to the Polytechnic and the (reopened) Swedish University at *Åbo*. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export, dairy produce is also exported. There are (1922) 2,788 miles of railroad, and a merchant fleet of 4,621 vessels (mostly small), of which 636 are steamers. Railway connexion with Sweden was completed in 1922.

The country was formerly governed by the Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people, but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

The *Åland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia was wrested from Sweden by Russia in 1809, and was incorporated in the government district of Finland. The total area of the archipelago is about 220 square miles, with a population of about 17,000 of whom about two-thirds inhabit *Åland* (the largest island).

Fiume

(Free City of Fiume.)

Military Governor, Gen Gaetano Giardino

By the *Treaty of Rapallo*, the Free City of Fiume was recognized by Italy and by Yugoslavia, but until the Treaty is carried out in its entirety the city is occupied by Italian military forces and the Military Governor exercises legislative and executive power. The area is about 8 square miles with a population of 50,000 of whom about 10,000 inhabit the surrounding country, and 40,000 the city itself.
British Consul, Fiume—Alan Napier

1 *Finnish Mark*—The mark is the same nominal value as the *franco*; the average exchange Jan.-Sept. 1922 was about 100 = £1 sterling.

There are also Consuls at Southampton, Newcastle upon Tyne, Cardiff, Glasgow, Dublin, and in Jersey

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N lat., and from 7° 45' E to 4° 45' W long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais) which separate it from England. Its circumference is estimated at about 3,000 miles and its area (in 1914) at 207,076 square miles divided into 87 departments including the island of Corsica in the Mediterranean off the west coast of Italy. The territory ceded by the Treaty of Frankfurt (May 10, 1871) amounted to 5,602 square miles, that regained by the Treaty of Versailles (June 28, 1919) to 5,819 square miles making the present area of France (exclusive of Algeria) 112,895 square miles with a population (census of March 6, 1921) of 39,209,666 (inclusive of Alsace and Lorraine). In 1922 there were 759,846 births, 383,220 marriages, 27,684 divorces, and 669,257 deaths. In 1920 the excess of women over men was 2,500,000.

France has always been attractive to foreigners, of whom (1921) 1,550,449 were resident there, including 470,573 Italians, 415,546 Belgians, 303,121 Spaniards, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT—The monarchical system of government was overthrown by the French Revolution (1789-1792), and the First Republic endured until the Great Napoleon (born Aug 15, 1769, died May 21, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the Hundred Days of Napoleon (March 20-June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov 22, 1852. On Sept 4, 1870 the Emperor Napoleon III (nephew of the Great Napoleon) was deposed and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the Senate of 300 members (elected by indirect vote for 9 years one third being renewable every 3 years) and the Chamber of Deputies of 597 members (elected by direct vote for 4 years). Members of the legislature receive 15,000 francs a year and travelling facilities over the railways.

PRODUCTION—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound and are very productive the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production in 1913, 1921 and 1922 is shown in the following table—

Crop	Production	
	1913	1922
Wheat	Quintals 86,919,050	Quintals 88,034,290
Rye	12,714,750	11,276,110
Barley	10,437,600	8,348,850
Oats	51,826,010	35,428,950
Potatoes	125,899,652	83,096,550
		Quintals 83,000,000
